Nation Branding in Modern History

A recent coinage within international relations, “nation branding” designates the process of highlighting a country’s positive characteristics for promotional purposes, using techniques similar to those employed in marketing and public relations. Nation Branding in Modern History takes an innovative approach to illuminating this contested concept, drawing on fascinating case studies in the United States, China, Poland, Suriname, and many other countries, from the nineteenth century to the present. It supplements these empirical contributions with a series of historiographical essays and analyses of key primary documents, making for a rich and multivalent investigation into the nexus of cultural marketing, self-representation, and political power.

Nation branding

Nation Branding: Concepts, Issues, Practice is a comprehensive and exciting text that demonstrates why nations are embracing the principles of brand management. It clearly explains how the concepts and techniques of branding can be adapted to the context of nations- as opposed to the more usual context of products, services, or companies. Concepts grounded in the brand management literature such as brand identity, brand image, brand positioning, and brand equity, are transposed to the domain of nation branding and supported by country case insights that provide vivid illustrations of nation branding in practice. Nation branding is a means by which more and more nations are attempting to compete on the global stage. Current practice in nation branding is examined and future horizons traced. The book provides: * The first overview of its kind on nation branding * A blend of academic theory and real world practice in an accessible, readable fashion * A clear and detailed adaptation of existing brand theory to the emerging domain of nation branding * An original conceptual framework and models for nation branding * A rich range of international examples and over 20 contributions by

leading experts from around the world Country case insights on nation branding strategies currently being utilized by nations such as Japan, Egypt, Brazil, Switzerland, Iceland, and Russia Clearly and coherently structured, the book is an essential introduction to nation branding for both students and policymakers and will be an essential text for those interested in this fast growing area.

Culture and International History

Combining the perspectives of 18 international scholars from Europe and the United States with a critical discussion of the role of culture in international relations, this volume introduces recent trends in the study of Culture and International History. It systematically explores the cultural dimension of international history, mapping existing approaches and conceptual lenses for the study of cultural factors and thus hopes to sharpen the awareness for the cultural approach to international history among both American and non-American scholars. The first part provides a methodological introduction, explores the cultural underpinnings of foreign policy, and the role of culture in international affairs by reviewing the historiography and examining the meaning of the word culture in the context of foreign relations. In the second part, contributors analyze culture as a tool of foreign policy. They demonstrate how culture was instrumentalized for diplomatic goals and purposes in different historical periods and world regions. The essays in the third part expand the state-centered view and retrace informal cultural relations among nations and peoples. This exploration of non-state cultural interaction focuses on the role of science, art, religion, and tourism. The fourth part collects the findings and arguments of part one, two, and three to define a roadmap for further scholarly inquiry. A group of "commentators" survey the preceding essays, place them into a larger research context, and address the question "Where do we go from here?" The last and fifth part presents a selection of primary sources along with individual comments highlighting a new genre of resources scholars interested in culture and international relations can consult.

Nation Branding in Europe

This book provides an explanation of nation branding theory and practice within the European context, exploring how countries build and manage their reputations globally. Each chapter focuses on a specific European country, selected from a cross-section of large, medium-sized and small countries to provide a breadth of cases from across the continent. The chapters are written from a wide range of academic and practitioner perspectives. Nation Branding in Europe is valuable supplementary reading for advanced undergraduate, postgraduate and doctoral students interested in nation branding and will appeal to students from marketing, communications, and international relations disciplines. Outside of academia, the book will be of interest to those working in the areas of public diplomacy and strategic communications, as well as public relations and branding practitioners involved in designing nation branding campaigns.

Nation Branding

Nation Branding: Concepts, Issues, Practice was the ground-breaking first textbook to provide an overview of this recently established but fast-growing practice, in which the principles of brand management are applied to countries rather than companies. Many governments have invested in nation branding in order to strengthen their country's influence, improve its reputation, or boost tourism, trade and investment. This new edition has been comprehensively revised and its influential original framework modified to reflect the very latest changes to this still-developing field. It remains an accessible blend of theory and practice rich with international examples and contributions. Updates to this edition: New international cases of countries as diverse as China, United Arab Emirates, Ghana, Cuba, India, Great Britain and many more; New contributions from distinguished scholars, diplomats and businesspeople providing a range of case studies, practitioner insights and academic perspectives; New Companion Website to support the book featuring instructor aids such as PowerPoint presentations for each chapter and an instructor manual; This much-anticipated update to an influential book is an essential introduction to nation branding for students and policy makers.

The Brand and Its History

This book delves into the origins and evolution of trademark and branding practices in a wide range of geographical areas and periods, providing key knowledge for academics, professionals, and general audiences on the complex world of brands. The volume compiles the work of twenty-five prominent worldwide scholars studying the origins and evolution of trademarks and branding practices from medieval times to present days and from distinct European countries to the USA, New Zealand,

Canada, Latin America, and the Soviet Union. The first part of the book provides new insights on pre-modern craft marks, on the emergence of trademark legal regimes during the nineteenth century, and on the evolution of trademark and business strategies in distinct regions, sectors, and contexts. As industrialisation and globalisation spread during the twentieth century, trademarking led to modern branding and international marketing, a process driven by new economic, but also cultural factors. The second part of the book explores the cultural side of the brand and offers challenging studies on how luxury, fashion, culture associations, and the consolidation of national identities played a key role in nowadays branding. This edited volume will not only be of great value to scholars, students and policymakers interested in trademark/branding research, but to marketing and legal practitioners as well, aiming to delve into the origins of modern brand strategies. The chapters in this book were originally published as two special issues of the journal, *Business History*.

Nation Branding

Nation Branding: Concepts, Issues, Practice provides a theoretical framework, alongside insightful examples from the practice of nation branding, in which the principles of brand strategy and management are applied to countries globally. This new edition has been comprehensively updated and its influential original framework modified to reflect the very latest changes in the field. It remains an accessible blend of theory and practice rich with international examples and contributions. Updates to this edition: New Academic Perspectives and Practitioner Insights in each chapter Updated and new cases from a broad range of nations and cultures Fresh coverage of online branding and social media New material covering the critical and ethical issues of nation branding, including the limitations Updated references and sources Updated online resources, including PowerPoint slides and Instructor Manual with end-of-chapter discussion points and suggested answers This is an essential introduction to nation branding for students of Marketing, Brand Management, Communications, and Public and International Relations, as well as policy makers looking for a rigorous yet applied approach.

Branding the Nation

What happens to the nation when it is reconceived as a brand? How does nation branding change the terms of politics and culture in a globalized world? *Branding the Nation* offers a unique critical perspective on the power of brands to affect how we think about space, value and identity.

Handbook of Research on Future Policies and Strategies for Nation Branding

By taking corporate marketing concepts and applying it to countries, "nation branding" is a way for these regions to enhance their reputations and project a desired image for international recognition. New modes of publicity and marketing geared towards geographic location fall into this category, leading nation branding to have vast benefits for the economics and societies of countries. New marketing strategies have emerged and are being adopted to consequently brand countries with this purpose of economic growth. By studying these emerging strategies and methods, nations can best develop a desired brand and reputation to foster growth and prosperity. The *Handbook of Research on Future Policies and Strategies for Nation Branding* discusses how exactly nation branding works to benefit the function and mission of these nations along with showing how nation branding can be used as a strategic asset for the redesign of economic, political, and social characteristics of a country. The chapters outline the given situation of nations and the nature and implications of the brand that is required, measure branding inference, and propose future steps for nation branding. This book is a critical reference source for brand managers, tourism professionals, marketers, advertisers, government officials, travel agencies, academicians, researchers, and students working in the fields of international relations, economics, social sciences, business studies, marketing, and entrepreneurship.

Histories of Public Diplomacy and Nation Branding in the Nordic and Baltic Countries

Histories of Public Diplomacy and Nation Branding in the Nordic and Baltic Countries provides an historical perspective on public diplomacy and nation branding in the Nordic-Baltic region during the twentieth and twenty-first centuries. It covers a range of attempts by these self-described peripheral states to represent the nation abroad.

The Modern Fairy Tale

This book provides a unique and intriguing insight into current debates concerning the relationship between nation and state as well as the political management of international image in today's Europe through an examination of debates on nation branding and the Eurovision Song Contest. Europe is a contested construct and its boundaries are subject to redefinition. This work aims to advance critical thinking about contemporary nation branding and its relationship to, and influence on, nation building. In particular it focusses on key identity debates that the Eurovision Song Contest engendered in Estonia in the run-up to EU accession. The Eurovision Song Contest is an event which is often dismissed as musically and culturally inferior. However, this work demonstrates that it has the capacity to shed light on key identity debates and illuminate wider socio-political issues. Using a series of in-depth interviews with political elites, media professionals and opinion leaders, this book is a valuable contribution to the growing field of research on nation branding and the Eurovision Song Contest.

Brand Singapore

Without nation branding, there would be no Singapore. Reputation is precious. Top talent and hot money gravitate only to the most attractive, respected nations. For a country as small and as young as Singapore, its brand is its most valuable asset. Singapore's stunning ascent from Third World to First World in a matter of 30 years was spearheaded by a concerted, closely-coordinated programme of nation branding. Brand Singapore helped to attract the investments, business, trade, tourism and talented human resources that are the lifeblood of a successful nation. Today, the city-state is known internationally as a dynamic, safe, corruption-free place to do business, a Garden City, and increasingly, a vibrant city of culture and the arts. In global surveys of quality of life, Singapore regularly tops the charts. How did Singapore create this country brand, cultivate and guard it, sell it to its "shareholders", and make it known to the world? Drawing on two decades in the nation branding game, Koh Buck Song offers an illuminating inside look at – and candid critique of – a country brand that is as rich in resource as it is potent with promise.

Nation Brand, the Journal of Nation Branding

The guiding mission of Nation Brand is to illuminate the everyday interactions that shape how nations are perceived. Nation Brand is an interactive journal that incorporates feedback and content from readers. Nation Brand was inspired by Wharton Professor David Reibstein's philosophy that nations, like products, have images or brands. The brand of a nation is a source of influence, even as it is itself subjected to many influences. Although this web of influence is necessarily complex, in one sense it is simple: Nations are branded by people and through people. Through editorial content and submissions from readers around the world, Nation Brand unpacks the myriad ways in which people brand nations through their communications. In a practical sense, Nation Brand is a communications guide. Useful information and tips are included to help readers become more effective in their interpersonal communications, intentional and unintentional. Nation Brand also seeks to help readers become more conscious of how various nations are currently being branded and how they have been branded in the past. Nation Brand will review strategies for nation branding, both historical and current. Although the subject of nation branding is serious and vital to the well-being of the people associated with a nation, this publication is written as a practical user's guide. Articles and reviews are brief, to-the-point, and focused on immediate application. The importance of listening well and listening often will be a recurring theme in Nation Brand. In every section of every issue, editors Tracy Steen, Ph.D., and Tom Lincoln will invite input. Please email or text ideas and submissions to ideas@nationbrandjournal.com or (215) 205-5481. As communications in various forms shape our perceptions of the world, the brand of a nation is inexorably formed or altered. The process is active, multi-faceted, vibrant, and ultimately galvanizing. Nation Brand will cover it all.

Cool Nations

Nation branding is the most recent feature of imagined nation-making in the history of nations. Facing global competition, national decision-makers aim to distinguish their countries from others by means of branding. Quite a few nations have considered the term 'cool' suitable for describing some essence of their country's brand. Cool Nations. Media and the Social Imaginary of the Branded Country traces the mediated ways in which the transnational idea of "cool" has circulated from popular culture, fashion, and marketing into describing nations. The book explores the commodification of the nation, the shift to a promotional political culture, and the role of media in contributing to the circulation of the idea of the Cool Nation. The social imaginary of nation branding takes its theory and practices from marketing,

unlike earlier imaginations based on ideas of democracy or citizenship. Cool Nations argues that "cool" is one of the vehicles through which the commodification of nations takes place.

Nation Branding, Public Relations and Soft Power

Nation Branding, Public Relations and Soft Power: Corporatizing Poland provides an empirically grounded analysis of changes in the way in which various actors seek to manage Poland's national image in world opinion. It explores how and why changes in political economy have shaped these actors and their use of soft power in a way that is influenced by public relations, corporate communication, and marketing practices. By examining the discourse and practices of professional nation branders who have re-shaped the relationship between collective identities and national image management, it plots changes in the way in which Poland's national image is communicated, and culturally reshaped, creating tensions between national identity and democracy. The book demonstrates that nation branding is a consequence of the corporatization of political governance, soft power and national identity, while revealing how the Poland "brand" is shaping public and foreign affairs. Challenging and original, this book will be of interest to scholars in public relations, corporate communications, political marketing and international relations.

Brand New Nation

The early twenty-first century was an optimistic moment of global futures-making. The old 'third-world' nations were rapidly embracing the script of unbridled capitalism in the hope of arriving on the world stage. Brand New Nation reveals the on-the-ground experience of the relentless transformation of the nation-state into an attractive investment destination for global capital. The infusion of capital not only rejuvenates the nation, it also produces investment-fuelled nationalism, a populist energy that can be turned into a powerful instrument of coercion. Grounded in the history of modern India, the book reveals how the forces of identity economy, identity politics, publicity, populism, violence and economic growth are rapidly rearranging the liberal political order the world over.

Commercial Nationalism

This book intervenes in discussions of the fate of nationalism and national identity by exploring the relationship between state appropriation of marketing and branding strategies on the one hand, and, on the other, the commercial mobilization of nationalist discourses.

Branding the Nation

National governments around the world are turning to branding consultants, public relations advisers and strategic communications experts to help them "brand" their jurisdiction. Using the tools, techniques and expertise of commercial branding is believed to help nations articulate more coherent and cohesive identities, attract foreign capital, and maintain citizen loyalty. In short, the goal of nation branding is to make the nation matter in a world where borders and boundaries appear increasingly obsolete. But what actually happens to the nation when it is reconceived as a brand? How does nation branding change the terms of politics and culture in a globalized world? Through case studies in twelve countries and in-depth interviews with nation branding experts and their national clients, Melissa Aronczyk argues that the social, political and cultural discourses constitutive of the nation have been harnessed in new and problematic ways, with far-reaching consequences for both our concept of the nation and our ideals of national citizenship. Branding the Nation challenges the received wisdom about the power of brands to change the world, and offers a critical perspective on these new ways of conceiving value and identity in the globalized twenty-first century. This book is about how nation branding became a worldwide phenomenon and a professional transnational practice. It is also about how nation branding has become a solution to perceived contemporary problems affecting the space of the nation state: problems of economic development, democratic communication, and especially national visibility and legitimacy amidst the multiple global flows of late modernity. In this book, Melissa Aronczyk charts the political, cultural and economic rationales by which the nation has been made to matter in a twenty-first-century context of global integration.

Brand New Justice

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand

New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms. * Controversial and thought-provoking analysis of issues that are central to 21st century economic thought; radical new thinking on wealth-creation in the developing world. * Unites world-class branding and marketing knowledge with an emerging-market development agenda. * Concrete answers to the problems of anti-capitalism, medium level poverty and the brand backlash; a way for the marketing and advertising industries to regain respect and a more positive reputation

Branding the Nation, the Place, the Product

Branding is a profoundly geographical type of commodification process. Many things become commodities that are compared and valued on markets around the globe. Places such as cities or regions, countries and nations attempt to acquire visibility through branding. Geographical imaginations are evoked to brand goods and places as commodities in order to show or create connections and add value. Yet, not all that is branded was originally intended and created for markets. This volume aims to broaden current understanding of branding through a series of contributions from geography, history, political studies, cultural, and media studies, offering insight into how ordinary places, objects and practices become commodities through branding. In so doing, the contributions also show how nation, place and product as targets of branding can be seen as intertwined. To discuss these forms of branding, book chapters refer to states, cities, holiday destinations, food malls, movies, dances, post stamps and other items that serve as brands and/or are branded. The book will be of interest to students and scholars in geography, sociology, history, cultural studies and business studies who would like to gain an understanding of the intricate and surprising ways in which things, places, and cultural practices become brands.

Latin America's Potential in Nation Branding: A closer look at Brazil's, Chile's and Colombia's practices

In the globalized world of today, a well-elaborated, long-term oriented nation branding strategy can help nations to improve and to better control of their nation image. Nation branding activities increase the countries' competitiveness in the global marketplace, and help to foster the tourism arrivals, inward foreign direct investment flows and exports, and further, they help to attract talented workforce and students. Despite its growing importance, most Latin American countries still have not engaged enough in the area of nation branding, and mostly only focus their activities on the tourism promotion. The region's countries have a good image regarding soft factors such as their people and tourism attractions but have a weak image regarding their products and investment opportunities. Brazil has a relatively good nation image in many dimensions but still has not developed an extensive nation branding strategy. Chile and Colombia are among the Latin American countries which have started to conduct more complete nation branding activities. Although, such advances can be observed, there is still a lot of improvement potential in the nation branding practices of Latin American countries.

Research Companion to Language and Country Branding

Research Companion to Language and Country Branding brings together entirely new interdisciplinary research conducted by scholars working on various sociolinguistic, semiotic, anthropological and discursive analytical aspects of country branding all over the world. Branding is a process of identity construction, whereby countries gain visibility and put themselves on the world map as distinctive

entities by drawing on their history, culture, economy, society, geography, and their people. Through branding, countries aim not only at establishing their uniqueness but also, and perhaps most importantly, at attracting tourism, investments, high quality human capital, as well as at forging financial, military, political and social alliances. Against this backdrop, this volume explores how countries and regions imagine and portray others and themselves in terms of gender, ethnicity, and diversity today as well as the past. In this respect, the book examines how branding differs from other, related policies and practices, such as nation building, banal nationalism, and populism. This volume is an essential reference for students, researchers, and practitioners with an interest in country, nation, and place branding processes.

How to Brand Nations, Cities and Destinations

Usually, a country brand is not focused, resulting in unsuccessful place branding. It is possible to successfully raise your national identity to the level of an attractive brand. Building a country brand is an investment, with strong positive returns. This book will guide you along the path to building a successful brand.

The 'Made in Germany' Champion Brands

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In *The 'Made in Germany' Champion Brands*, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Future Policies and Strategies for Nation Branding

"This book presents contributed chapters that discuss the growing body of research on nation branding, beginning with an extensive overview of scholarly writing on nation branding and offering best practices as they pertain to economic dimension of the issue, cultural and social dimensions, and business dimensions"--

Competitive Identity

Ever since Simon Anholt coined the phrase 'Nation Branding', there has been more and more interest in the idea that countries, cities and regions can build their brand images. This authoritative book considers how commercial brand management can really be applied to places and shows how places can build and sustain their competitive identity.

Transmission Impossible

"In this study, Jessica C. E. Gienow-Hecht challenges long-standing analyses of the United States' "cultural imperialism" that emphasize the policy makers' determination to export U.S. culture in order to spread capitalism and gain access to overseas markets and raw materials. She also contests the claims by scholars of reception theory that foreign audiences deliberately condition the reception of U.S. culture abroad. Studying the example of the U.S. Army newspaper the *Neue Zeitung* - published for the German population from 1945 to 1955 - she convincingly demonstrates that U.S. officials actually exerted very little direct influence on their cultural and information programs in postwar

Germany, leaving the initiative to binational midlevel agents. Transmission Impossible reveals that the selection of agents who transmit political and cultural values to the foreign world is as crucial to the success of the enterprise as the package of values itself."--BOOK JACKET. "Containing a wealth of fresh information on the use of propaganda in the Cold War, the administrative structure of the U.S. occupation, Soviet-American conflicts, and Jewish biography, this book will be of interest to scholars of U.S. foreign relations, German history, occupation history, ethnicity, sociology, and culture."--BOOK JACKET.

Tribal Modern

"Tribal Modern analyzes what is most distinctive about Arab Gulf culture over the past 15 years and how this culture shapes distinctive national identities. It highlights the tribal as the decisive element in modern Arab Gulf culture and identity. The question incredulous outsiders ask is: how could fishermen, pearl divers and pastoral nomads catch up with the rest of the modernized world? Observers remain skeptical about the apparent clash between the modern and the backward tribal. But in these newly rich desert societies different meanings attach to the tribal generally coded non-modern. Tribes here are not primitive; they are the instruments and symbols of identity for hypermodern Gulf societies. Nationals make claims based on a newly imagined tribal identity that entitles them alone to the rights and privileges of modern citizenship. Tribal Modern explores the interweaving of the tribal and the modern into a national brand. Structural, performative and cognitive, the brand is being built into heritage and fantasy architecture; it is performed in neo-tribal sports, dress codes and language, especially neo-Bedouin poetry contests. The tribal signals a new aristocratic identity in the anonymity of 21st century globalization. The tribal in the Arab Gulf states is a fundamental and constitutive part of the modern. The tribal modern shapes a national brand to project political power abroad and prestige at home. Most studies of these new, mega-rich countries come from the social sciences. Tribal Modern looks at cultural indices of local self-assertion. It provides a cultural analysis of Gulf Arab social formation that examines the intersection of race, class and gender"--Provided by publisher.

The New Era of Diplomacy

Public diplomacy and nation branding have recently been important topics in the diplomatic communities around the world and the importance for governments of reaching out to foreign publics has been recognized like never before. This book explores why these concepts have risen to prominence amongst several ministries of foreign affairs, particularly in Europe and North America, lately and have become an integrated part of their diplomatic strategy. Whether public diplomacy and nation branding will contribute to an increased efficiency in reaching foreign policy goals is still unclear and is investigated in detail. From a foundation of a history of diplomatic practice the author explores if this new trend signifies a new era of diplomacy and international relations, or if it is merely an added function in a modern ministry of foreign affairs with little impact on the way diplomacy and communication between states have been conducted. This book will help provide a better understanding of the latest trends in diplomacy for the practitioner, student of international relations or any person with a general interest in diplomacy and political communication.

Branded Nation

Branding, says James Twitchell, is nothing more than commercial storytelling; brands are the stories that are associated with products. (For example, the special taste of Evian, says Twitchell, is in the brand, not the water.) Branding has become so successful, so ubiquitous that even institutions that we thought were above branding, antithetical to branding, have succumbed. Such cultural institutions as religion, higher education, and the art world have learned to love Madison Avenue or lose market share. Of course, most ministers, university presidents, and museum directors will insist that branding has nothing to do with them, but as Twitchell brilliantly demonstrates in this witty, insightful examination of three of our most important cultural institutions, wherever supply exceeds demand branding follows. The rise of the megachurch epitomizes branding in religion. From its inception the megachurch was designed not to compete with other churches but to bring in the "unchurched," especially men, worshippers who might otherwise be home watching television or strolling through the mall on a Sunday morning. The megachurches have been phenomenally popular, none more so than Willow Creek Community Church, just south of Chicago, one of the oldest megachurches, which Twitchell analyzes in Branded Nation. Colleges and universities have embraced branding as they have grown more alike. Especially among the top schools in the country, the student bodies, the faculties, often

even the campuses themselves are practically interchangeable. What distinguishes each school is the story it tells about itself. Now every institution of higher learning has its image organizers, its brand managers, usually in the admissions or development offices, whose job it is to make their institution seem different from all the rest. Even museums, with their multimillion-dollar Monets, have seen the advantages of branding. The blockbuster exhibitions often put familiar paintings in a new context, that is, they provide a new narrative, branding the art. Museums keep expanding their stores, placing them not just near the entrance on the ground floor but throughout the museum, in the galleries themselves. Some museums, such as the Guggenheim, even franchise themselves, turning the institution itself into a brand. In short, high culture is beginning to look more and more like the rest of our culture. In perhaps his most subversive observation, Twitchell doesn't condemn the branding of cultural institutions. On the contrary, he believes that branding may be invigorating our high culture, bringing it to new audiences, making it a more integral part of our lives. Not since *Bobos in Paradise* has there been such a trenchant, provocative analysis of our world.

Helsinki 1975 and the Transformation of Europe

"It was in Europe that the Cold War reached a decisive turning point in the 1960s, leading to the era of detente. The Conference on Security and Cooperation in Europe (CSCE), with its Final Act in Helsinki in August 1975, led to a rapprochement between East and West in the fields of security, economy and culture. This volume offers a pilot study in what the authors perceive as the key issues within this process: an understanding over the 'German problem' (balancing the recognition of the post-war territorial status quo against a formula for the eventuality of a peaceful change of frontiers) and the Western strategy of transformation through a multiplication of contacts between the two blocs. Both of these arguments emerged from the findings of an international research project on 'Detente and CSCE in Europe, 1966-1975', funded by the VolkswagenStiftung and headed by the two editors."--BOOK JACKET.

Russia's Public Diplomacy

Russian public diplomacy attracts growing attention in the current global climate of tension and competition. However, it is often not understood or is misunderstood. Although some articles and book chapters exist, there are almost no books on Russian public diplomacy neither in Russian, nor in English. This edited collection is an in-depth and broad analysis of Russian public diplomacy in its conceptual understanding and its pragmatic aims and practice. Various aspects of Russian public diplomacy – from cultural to business practices – will interest professors, students and practitioners from various countries. Written by a diverse collection of the most prominent and capable scholars, from academia to international organizations, with a wealth of knowledge and objective experience, this book covers the vital topics and thoroughly analyzes the best practices and mistakes within the broad understanding of public diplomacy conducted by the Russian Federation.

Branding Post-Communist Nations

Nation branding--a set of ideas rooted in Western marketing--gained popularity in the post-communist world by promising a quick fix for the identity malaise of "transitional" societies. Since 1989, almost every country in Central and Eastern Europe has engaged in nation branding initiatives of varying scope and sophistication. For the first time, this volume collects in one place studies that examine

the practices and discourses of the nation branding undertaken in these countries. In addition to documenting various rebranding initiatives, these studies raise important questions about their political and cultural implications.

Brand Jamaica

Brand Jamaica is an empirical look at the postindependence national image and branding project of Jamaica within the context of nation-branding practices at large. Although a tiny Caribbean island inhabited by only 2.8 million people, Jamaica commands a remarkably large presence on the world stage. Formerly a colony of Britain and shaped by centuries of slavery, violence, and plunder, today Jamaica owes its popular global standing to a massively successful troika of brands: music, sports, and destination tourism. At the same time, extensive media attention focused on its internal political civil war, mushrooming violent crime, inflation, unemployment, poverty, and abuse of human rights have led to perceptions of the country as unsafe. Brand Jamaica explores the current practices of branding Jamaica, particularly within the context of postcoloniality, reconciles the lived realities of Jamaicans with the contemporary image of Jamaica projected to the world, and deconstructs the current tourism model of sun, sand, and sea. Hume Johnson and Kamille Gentles-Peart bring together multidisciplinary perspectives that interrogate various aspects of Jamaican national identity and the dominant paradigm by which it has been shaped.

Branding Books Across the Ages

As marketing specialists know all too well, our experience of products is prefigured by brands: trademarks that identify a product and differentiate it from its competitors. This process of branding has hitherto gained little academic discussion in the field of literary studies. Literary authors and the texts they produce, though, are constantly 'branded': from the early modern period onwards, they have been both the object and the initiator of a complex marketing process. This book analyzes this branding process throughout the centuries, focusing on the case of the Netherlands. To what extent is our experience of Dutch literature prefigured by brands, and what role does branding play when introducing European authors in the Dutch literary field (or vice versa)? By answering these questions, the volume seeks to show how literary scholars can account for the phenomenon of branding.

Brand New Justice

Applying his observations on economic history and the development and impact of global marketing, Anholt presents in this book a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

Shaping International Public Opinion

Bridging nation branding and public diplomacy, this book presents a cohesive framework. At its core is the introduction of the Model of Country Concept, which illustrates the array of factors, including hard- and soft-power initiatives, that shape how global citizens form their opinions about other countries. Each chapter applies the Model of Country Concept across a wide geographic, methodological, and disciplinary range of qualitative and quantitative research studies. The book offers a framework for future positioning of both practice around and research about nation branding and public diplomacy. Written for a broad audience the book offers a comprehensive yet approachable solution for framing a conversation about the heterodox nature of nation branding and public diplomacy, and advances the field through original research.

Popular Geopolitics and Nation Branding in the Post-Soviet Realm

This seminal book explores the complex relationship between popular geopolitics and nation branding among the Newly Independent States of Eurasia, and their combined role in shaping contemporary

national image and statecraft within and beyond the region. It provides critical perspectives on international relations, nationalism, and national identity through the use of innovative approaches focusing on popular culture, new media, public diplomacy, and alternative "narrators" of the nation. By positing popular geopolitics and nation branding as contentious forces and complementary flows, the study explores the tensions and elisions between national self-image and external perceptions of the nation, and how this complex interplay has become integral to contemporary global affairs.

At The Feet of Mahatma Gandhi

I have sometimes felt that Mahatma Gandhi is a modern replica in human form of the sacred Ganga. Descending from heavenly heights like our seers and prophets; rishis and munis; of yore; he has delivered his life-giving message; not only helping us in our material well-being by showing us the way to political independence; social justice and economic prosperity; but also to catch a glimpse of the moral and spiritual heights and to climb at least a few steps in the long and arduous course leading to those heights. Even so will Mahatma Gandhi's message of Love and Truth; Ahimsa and Satya bear fruit only for those who will follow his straight and narrow path and regulate their lives according to his strict and strenuous regimen; and give ultimate material prosperity only to those who order and fashion their affairs in conformity with his policy and programme. —From this book Beautiful tribute to the Father of the Nation Mahatma Gandhi by one of the greatest sons of motherland Bharat which brings to light all the characteristics which made Mohandas Karamchand Gandhi— the Mahatma.

Rethinking modernity in colonial and postcolonial Indian history

The Indian Struggle, 1920-1942

In a hierarchy, every employee rises to the level of their own incompetence. This simple maxim, defined by this classic book over 40 years ago, has become a beacon of truth in the world of work. From the civil service to multinational companies to hospital management, it explains why things constantly go wrong: promotion up a hierarchy inevitably leads to over-promotion and incompetence. Through barbed anecdotes and wry humour the authors define the problem and show how anyone, whether at the top or bottom of the career ladder, can avoid its pitfalls. Or, indeed, avoid promotion entirely!

This detailed book is a "how-to" guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be

used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation, and powerful enhancements for online searching.

The Peter Principle

Across the globe, Google, Amazon, Facebook, Apple and Microsoft have accumulated power in ways that existing regulatory and intellectual frameworks struggle to comprehend. A consensus is emerging that the power of these new digital monopolies is unprecedented, and that it has important implications for journalism, politics, and society. It is increasingly clear that democratic societies require new legal and conceptual tools if they are to adequately understand, and if necessary check the economic might of these companies. Equally, that we need to better comprehend the ability of such firms to control personal data and to shape the flow of news, information, and public opinion. In this volume, Martin Moore and Damian Tambini draw together the world's leading researchers to examine the digital dominance of technologies platforms and look at the evidence behind the rising tide of criticism of the tech giants. In fifteen chapters, the authors examine the economic, political, and social impacts of Google, Amazon, Facebook, Apple, and Microsoft, in order to understand the different facets of their power and how it is manifested. Digital Dominance is the first interdisciplinary volume on this topic, contributing to a conversation which is critical to maintaining the health of democracies across the world.

Introduction to Controlled Vocabularies

One of the most popular Indian novels of all ages, 'Ananda Math' was translated innumerable times into Indian and English languages. Five editions were published in Bengali and Hindi during the author's lifetime, the first in 1882. The novel has the backdrop of the 18th century famine in Bengal, infamous as "Chhiyattorer Manvantar" (famine of 76th Bengali year, 1276), to narrate the saga of armed uprising of the ascetics and their disciples against the pillaging East India Company rulers. The uprising is historically known as 'Santan Vidroha', the ascetics being the children of Goddess Jagadambe. The saga of 'Ananda Math' is thrilling and best epitomised in the patriotic mass-puller song "Bande Mataram" ('Hail thee, O My Motherland'). The song is still a mantra that stirs imagination of millions of Hindus. The ascetics robbed the tormentors of people — the British rulers and the greedy zamindars — distributed the looted wealth to poverty-stricken people but kept nothing for themselves. Their targets were mostly the Company armoury and supplies. They had a highly organised setup, spread throughout Bengal. It was also India's first battle for freedom, and not the Sipahi Vidroha of 1857.

Humanism offers students a clear and lucid introductory guide to the complexities of Humanism, one of the most contentious and divisive of artistic or literary concepts. Showing how the concept has evolved since the Renaissance period, Davies discusses humanism in the context of the rise of Fascism, the onset of World War II, the Holocaust, and their aftermath. Humanism provides basic definitions and concepts, a critique of the religion of humanity, and necessary background on religious, sexual and political themes of modern life and thought, while enlightening the debate between humanism, modernism and antihumanism through the writings and works of such key figures as Pico Erasmus, Milton, Nietzsche, and Foucault.

The Newcastle Poetry Prize, one of the country's most prestigious and important awards, is always a challenge for the judges. There were 590 entries in this year's prize. Of these, sixty poems or roughly ten percent we considered as contenders. After further discussion, we settled on a list of thirty-six poems for the anthology. These were poems that had something to say about our times, impressed us with their technique, surprised us with their language, moved us, made us laugh, and astounded us with their intellectual depth. In creating poetry, you need to surrender to the poem, that is, to let it open a spaciousness inside you. When you surrender to the poem it means that the poem can take a turn anywhere, it can border on the unexpected and the unknown. The poems we have selected for the anthology we believe have achieved this level of success. Mike Ladd & Judith Beveridge Judges 2020 Newcastle Poetry Prize

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application. Learn more. Why I am an Atheist

This book presents the legislation that formed the basis of Roman law - The Laws of the Twelve Tables. These laws, formally promulgated in 449 BC, consolidated earlier traditions and established enduring rights and duties of Roman citizens. The Tables were created in response to agitation by the plebeian class, who had previously been excluded from the higher benefits of the Republic. Despite previously being unwritten and exclusively interpreted by upper-class priests, the Tables became highly regarded and formed the basis of Roman law for a thousand years. This comprehensive sequence of definitions of private rights and procedures, although highly specific and diverse, provided a foundation for the enduring legal system of the Roman Empire.
