Exploring the visions of the end of the Cold War that have been put forth since its inception until its actual ending, this volume brings to the fore the reflections, programmes, and strategies that were intended to call into question the bipolar system and replace it with alternative approaches or concepts. These visions were associated not only with prominent individuals, organized groups and civil societies, but were also connected to specific historical processes or events. They ranged from actual, thoroughly conceived programmes, to more blurred, utopian aspirations - or simply the belief that the Cold War had already, in effect, come to an end. Such visions reveal much about the contexts in which they were developed and shed light on crucial moments and phases of the Cold War.

Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators—and social studies teachers in particular—do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies—including teaching models, graphic organizers, and step-by-step instructions—for activities such as * Building vocabulary, * Developing textbook literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.

Visions of the End of the Cold War in Europe, 1945-1990

The Cold War between the United States and the Soviet Union lasted from the end of World War II until the end of the 1980s. Over the course of five decades, they never came to blows directly. Rather,

these two world superpowers competed in other arenas that would touch almost every corner of the globe. Inside you will read about... What Was the Cold War? The Origins of the Cold War World War II and the Beginning of the Cold War The Cold War in the 1950s The Cold War in the 1960s The Cold War in the 1970s The Cold War in the 1980s and the End of the Cold War Both interfered in the affairs of other countries to win allies for their opposing ideologies. In the process, governments were destabilized, ideas silenced, revolutions broke out, and culture was controlled. This overview of the Cold War provides the story of how these two countries came to oppose one another, and the impact it had on them and others around the world.

The Systems Approach and Its Enemies (C. West Churchman, 1979) is one of Churchman's most significant works. In this particular writing he displayed two main tendencies, that he was a Skeptic and that he showed Socratic Wisdom. In this book the editors seek to follow up on these two themes and reveal how modern authors interpret Churchman's ideas, apply them to their own line of thinking and develop their own brand of Systemics.

Prof. Gordon provides a broad analysis of the entire jurisprudential output related to speech and gross human rights violations for courts, government officials, and scholars. The book is organized into three parts. The first part covers the foundation: a brief history of atrocity speech and the modern treatment of hate speech in international human rights treaties and judgments under international criminal tribunals. The second part focuses on fragmentation: detailing the inconsistent application of the charges and previous prosecutions, including certain categories of inflammatory speech and a growing doctrinal rift between the ICTR and ICTY. The last part covers fruition: recommendations on how the law should be developed going forward, with proposals to fix the problems with individual speech offenses to coalesce into three categories of offense: incitement, speech-abetting, and instigation.

Resources in Education

This study provides a broad examination of the international power structure during the Cold War. Combining research from history, sociology, and political science, the author analyzes how the international system was based on a hierarchical and dynamic web of interdependent partnerships.

Wisdom, Knowledge, and Management:

A new way of looking at international relations from a leading expert in the field What makes for war or for a stable international system? Are there general principles that should govern foreign policy? In *The Cold War and After*, Marc Trachtenberg, a leading historian of international relations, explores how historical work can throw light on these questions. The essays in this book deal with specific problems—with such matters as nuclear strategy and U.S.-European relations. But Trachtenberg's main goal is to show how in practice a certain type of scholarly work can be done. He demonstrates how, in studying international politics, the conceptual and empirical sides of the analysis can be made to connect with each other, and how historical, theoretical, and even policy issues can be tied together in an intellectually respectable way. These essays address a wide variety of topics, from theoretical and policy issues, such as the question of preventive war and the problem of international order, to more historical subjects—for example, American policy on Eastern Europe in 1945 and Franco-American relations during the Nixon-Pompidou period. But in each case the aim is to show how a theoretical perspective can be brought to bear on the analysis of historical issues, and how historical analysis can shed light on basic conceptual problems.

Remembering the Cold War examines how, more than two decades since the collapse of the Soviet Union, Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe. Given the Cold War's blurred definition – it has neither a widely accepted commencement date nor unanimous conclusion - what is to be remembered? This book illustrates that there is, in fact, a huge body of 'remembrance,' and that it is more pertinent to ask: what should be included and what can be overlooked? Over five sections, this richly illustrated volume considers case studies of Cold War remembering from different parts of the world, and engages with growing theorisation in the field of memory studies, specifically in relation to war. David Lowe and Tony Joel afford careful consideration to agencies that identify with being 'victims' of the Cold War. In addition, the concept of arenas of articulation, which envelops the myriad spaces in which the remembering, commemorating, memorialising, and even revising of Cold War history takes place, is given prominence.

The Logic of the Cold War

Ayşe Kaya analyses the relationship between states' economic power and their political power in key multilateral economic institutions.

The Cold War and After

This book is open access under a CC BY 4.0 license. This book explores how the socially disputed period of the Cold War is remembered in today's history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is 'just history'. The contributions to this book unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past with a reflexive and disciplined approach.

World War II

A powerful case that the economic shocks of the 1970s hastened both the end of the Cold War and the rise of neoliberalism by forcing governments to impose austerity on their own people. Why did the Cold War come to a peaceful end? And why did neoliberal economics sweep across the world in the late twentieth century? In this pathbreaking study, Fritz Bartel argues that the answer to these questions is one and the same. The Cold War began as a competition between capitalist and communist governments to expand their social contracts as they raced to deliver their people a better life. But the economic shocks of the 1970s made promises of better living untenable on both sides of the Iron Curtain. Energy and financial markets placed immense pressure on governments to discipline their social contracts. Rather than make promises, political leaders were forced to break them. In a sweeping narrative, *The Triumph of Broken Promises* tells the story of how the pressure to break promises spurred the end of the Cold War. In the West, neoliberalism provided Western leaders like Ronald Reagan and Margaret Thatcher with the political and ideological tools to shut down industries, impose austerity, and favor the interests of capital over labor. But in Eastern Europe, revolutionaries like Lech Wałęsa in Poland resisted any attempt at imposing market discipline. Mikhail Gorbachev tried in vain to reform the Soviet system, but the necessary changes ultimately presented too great a challenge. Faced with imposing economic discipline antithetical to communist ideals, Soviet-style governments found their legitimacy irreparably damaged. But in the West, politicians could promote austerity as an antidote to the excesses of ideological opponents, setting the stage for the rise of the neoliberal global economy.

Remembering the Cold War

"Authenticity," the dominant cultural value of the baby boom generation, became central to presidential campaigns in the late 20th century. Beginning in 1976, Americans elected six presidents whose campaigns represented evolving standards of authenticity. Interacting with the media and their publics, these successful presidential candidates structured their campaigns around projecting "authentic" images and connecting with voters as "one of us." In the process, they rewrote the political playbook, redefined "presidentiality," and changed the terms of the national political discourse. This book is predicated on the assumption that it is worth knowing why.

Power and Global Economic Institutions

Shows how Franklin D. Roosevelt alienated his inner circle of advisors as he built an alliance between him, Winston Churchill and Joseph Stalin, an alliance that eroded when Harry Truman took the presidency after Roosevelt's death, eventually leading to the Cold War.

The Cold War in the Classroom

Harold "Hotsy" Hargan worked for the Atomic Energy Commission at the Paducah Gaseous Diffusion Plant where he encountered many problems that could possibly be a hazard to the public. Hotsy battled with supervisors over the neglect. The supervising contractor just moved Hotsy from site to site exposing him time and time again to radiation. Hotsy contracted cancer and finally decided to blow the whistle working with the Justice Department and the FBI which he soon found was just a whitewash for the government.

McDougal Littell the Americans

The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

Political leadership styles in East Asian states are shaped and influenced by a number of domestic factors. These factors include the type of political system that an East Asian state adopted from their days of independence and decolonization. There is a diverse array of political systems in the region, ranging from Western-style liberal democracies like Japan and South Korea to autocratic one-party states like North Korea. Most other East Asian countries adopt systems somewhere in between these two polar ends. This volume begins with a macro-political perspective of leadership. It then looks at case studies of political leadership and the factors that influence the shape and outcome of leadership styles in the region. The book also examines the concept of community leadership and its impact on community well-being. Several specific case studies are examined in depth. While examining political leadership from a macro theoretical and empirical perspective, the book also adopts historical-anthropological perspectives to analyse case studies. The case studies also examine policy formulation and implementation to look at the role of government in handling community-level issues. Finally, the book focuses on economic leadership in international political economy and global business.

Roosevelt's Lost Alliances

The premise of this work of fiction is that major Mexican drug traffickers can operate with impunity in Mexico enjoying the protection of the Mexican Government as they flood the United States with heroin, cocaine, methamphetamine and marijuana. The heroes of this work of fiction have likened the Mexican Government protection of drug traffickers to the protection the North Vietnamese Army and Viet Cong received from the governments of Cambodia and Laos during the Vietnamese War. As veterans of that war my heroes witnessed how these governments provided safe zones for the North Vietnamese Army and Viet Cong from the American Military and as Veteran DEA Special Agents can see how the same thing is happening in Mexico with major drug traffickers who have the financial means to buy off any government official. Using a Special Operations Team, originally assigned to Bolivia, to sneak

into Mexico and do unilateral enforcement operations in Mexico my heroes not only hope to wreck havoc with the major traffickers but also hope to send a signal to those in the Mexican government who choose to protect these traffickers that they can not offer the traffickers a Safe Zone.

Callous Disregard

This is a detailed history of one of the most important and dramatic episodes in modern science, recounted from the novel vantage point of the dawn of the information age and its impact on representations of nature, heredity, and society. Drawing on archives, published sources, and interviews, the author situates work on the genetic code (1953-70) within the history of life science, the rise of communication technosciences (cybernetics, information theory, and computers), the intersection of molecular biology with cryptanalysis and linguistics, and the social history of postwar Europe and the United States. Kay draws out the historical specificity in the process by which the central biological problem of DNA-based protein synthesis came to be metaphorically represented as an information code and a writing technology—and consequently as a “book of life.” This molecular writing and reading is part of the cultural production of the Nuclear Age, its power amplified by the centuries-old theistic resonance of the “book of life” metaphor. Yet, as the author points out, these are just metaphors: analogies, not ontologies. Necessary and productive as they have been, they have their epistemological limitations. Deploying analyses of language, cryptology, and information theory, the author persuasively argues that, technically speaking, the genetic code is not a code, DNA is not a language, and the genome is not an information system (objections voiced by experts as early as the 1950s). Thus her historical reconstruction and analyses also serve as a critique of the new genomic biopower. Genomic textuality has become a fact of life, a metaphor literalized, she claims, as human genome projects promise new levels of control over life through the meta-level of information: control of the word (the DNA sequences) and its editing and rewriting. But the author shows how the humbling limits of these scriptural metaphors also pose a challenge to the textual and material mastery of the genomic “book of life.”

American Journey

This authoritative and enlightening book focuses on fundamental questions such as what is innovation, who is it relevant for, what are the effects, and what is the role of (innovation) policy in supporting innovation-diffusion? The first two sections present a comprehensive overview of our current knowledge on the phenomenon and analyse how this knowledge (and the scholarly community underpinning it) has evolved towards its present state. The third part explores the role of innovation for growth and development, while section four is concerned with the national innovation system and the role of (innovation) policy in influencing its dynamics and responding to the important challenges facing contemporary societies.
