The State Enrolled Nurse

This book offers nurse educators a single text that covers the curriculum development process alongside some examples of innovation in approaches to nurse education.

The Enrolled Nurse

In an era of globalization, population growth, and displacements, migration is now a fact of life in a constantly shifting economic and political world order. This book contributes to the discourse on the beneficiaries, benefactors, and the casualties of African displacement. While the few existing studies have emphasized economic motivation as the primary factor triggering African migration, this volume treats a range of issues: economic, socio-political, pedagogical, developmental, and cultural. Organized with a multidisciplinary thrust in mind, this book argues that any discussion of African migration, whether internal or external, must be conceived as only one aspect of a more complex, organic, and global patterning of "flux and reflux" necessitated by constantly shifting dynamics of world socio-economic, cultural, and political order.

Focus on Nurse Recruitment

UK. Report on the role of the nurse and the midwives in the hospital and in the community and on the education and training required for that role - covers the public image of nursing and the actual working conditions, training courses and admission requirements, human resources planning, promotion opportunities and career structures, etc., and includes a list of recommendations. References and statistical tables.

Report of the Committee on Senior Nursing Staff Structure

In the past few years nursing - its structure, training procedure and qualifications - has undergone significant changes as a profession.

Working as a Nurse

Counseling the Nursing Mother: A Lactation Consultant's Guide, Seventh Edition presents topics within a counseling framework with practical suggestions and evidence-based information interwoven throughout. Additionally, the Seventh Edition is an ideal study guide for International Board Certified Lactation Consultant (IBCLC) certification and practice.

Nursing Times, Nursing Mirror

Tells the stories of real people working in the nursing profession in Australia now.

Curriculum Development in Nursing

This book explores the impacts of HIV/AIDS and neoliberal globalization on the occupational health of public sector hospital nurses in KwaZulu-Natal, South Africa. The story of South African public sector nurses provides multiple perspectives on the HIV/AIDS epidemic-for a workforce that played a role in the struggle against apartheid, women who deal with the burden of HIV/AIDS care at work and in the community, and a constituency of the new South African democracy that is working on the frontlines of the HIV/AIDS epidemic. Through case studies of three provincial hospitals in KwaZulu-Natal, set against a historical backdrop, this book tells the story of the HIV/AIDS epidemic in the post-apartheid period.

The Human Cost of African Migrations

During the Second World War, more than 4,000 civilian nurses enlisted as Nursing Sisters, a specially created all-female officers' rank of the Canadian Armed Forces. They served in all three armed force branches and all the major theatres of war, yet nursing as a form of war work has long been under-explored. An Officer and a Lady fills that gap. Cynthia Toman analyzes how gender, war, and medical technology intersected to create a legitimate role for women in the masculine environment of the military and explores the incongruous expectations placed on military nurses as "officers and ladies."
