Research Paper

The Journal series consists of reprints of research papers published by the members of the faculty in various periodicals.

The Little, Brown Guide to Writing Research Papers

This book first explains the purpose and value of the research writing assignment and then guides students through each step of the research writing process.

Information Literacy in Music

Information Literacy in Music: An Instructor's Companion is a practical guide to information literacy instruction for busy librarians and music faculty. This book contains examples of course-integrated assignments designed to help postsecondary music students develop foundational skills in information literacy. These assignments have been solicited from experienced librarians and faculty across the United States, and they represent a broad spectrum of approaches to music research, from historical to applied studies. Be inspired by new and creative solutions to students' information literacy challenges and by the many examples of successful collaborations between librarians and music faculty.

Research Methodology: Assignment, Seminar Paper & Projects

Academic Presenting and Presentations (APP) is a research-based training course designed to help students cultivate academic presentation skills and deal with the various presentation tasks they may be expected to fulfil as part of their university or college studies. The material is suitable for a global audience and can be used in a wide range of contexts in the field of Communication Skills, English Language Teaching and English for Academic Purposes. The instructional and practice material included not only helps students to develop their presentation skills but also deals with broader topics of interest in a study-oriented context, such as research and plagiarism. The unique content emphasises higher level task-achievement rather than discrete language points, since experience shows that this is the area most students find especially difficult. Each unit of *Academic Presenting and Presentations* focuses on a different presentation genre, building the students' awareness of how to present effectively whilst at the same time focusing attention on the specific requirements of addressing an audience in an academic environment. The accompanying videos form an integral component of this course and consist of two types of presentation: Learning Presentations, which give advice to students, and Sample Presentations, which illustrate different types of presentation. The downloadable videos are included in the online support materials.

Information literacy involves a combination of reading, writing, and critical thinking. Librarians in an academic library, while not directly responsible for teaching those skills, are involved in making such literacy part of the students' learning process. Broussard approaches the misconceptions about the relationship between libraries as a source of information literacy, and offers suggestions on providing students support when working on research papers.

Assigning Inquiry

To do solid academic research, college students need to look beyond the computer search engine. This short, practical book introduces students to the important components of the information-seeking process. The Elements of Library Research provides a foundation for success in any research assignment, from a freshman paper to a senior thesis. Unlike guides that describe the research process but do not explain its logic, this book focuses entirely on basic concepts, strategies, tools, and tactics for research--in both electronic and print formats. Drawing on decades of experience with undergraduates, reference librarian Mary George arms students with the critical thinking skills and procedures they need to approach any academic project with confidence. Ways to turn a topic into a research question Techniques for effective online searches How to evaluate primary and secondary sources When and how to confer with reference librarians and faculty How to avoid plagiarism Glossary of key terms, from Boolean search to peer review Checklists, timelines, and hints for successful research projects

Any teacher driven to despair by a stack of student research papers will find welcome inspiration in Beyond Note Cards. Since the research paper first became a fixture in the composition classroom, no other assignment has caused as much dread in students. By putting it in historical context, Ballenger offers new insight into the problems and promise of the research paper - and practical advice on how to revive it. Beyond Note Cards examines the best of the existing scholarship to offer a fresh, theoretically sound approach to teaching the research paper. Drawing on the recent movement to encourage inquiry-based learning, Ballenger argues that the spirit of inquiry should be at the heart of research paper instruction - not the usual preoccupation with teaching the paper's formal qualities. While Ballenger deals with theory, his book is never dry. Through case studies of his students and often

revealing autobiographical anecdotes, the author weaves a fascinating story about the evolution of the research paper historically and in his own classroom. The book also contains many practical features, including: classroom-tested exercises and assignments to help students become better researchers and research writers original survey information that instructors can use to discuss the assignment with their own students a special section on how to teach the double-entry journal as part of a research assignment a helpful appendix that explores Internet research and new approaches to note taking. Beyond Note Cards is an essential resource for instructors who are anxious to build connections between personal writing assignments and academic writing by highlighting the "habits of mind" that are present in both. In addition, teachers who already use Ballenger's popular student handbook, *The Curious Researcher* (Allyn & Bacon), will discover new ways to supplement it.
