Institutions Militaires pour la Cavalerie, Et les Dragons (Classic Reprint)

This book examines the transformation of the French military profession during the momentous period that saw the death of royal absolutism, the rise and fall of successive revolutionary regimes, the consolidation of Napoleonic rule and the restoration of the Bourbon monarchy after the Empire's final collapse. Crossing traditional chronological boundaries, it brings together periods in French history that are usually treated separately and challenges established views of change and continuity during the Age of Revolution. Based on a wealth of archival sources, this book is as much a social history of ideas like equality, talent, and merit as a military history.

An important part of the Dutch national treasure of early printed books from before 1801 on military and related subjects is kept in military libraries and collections. This catalogue contains 10,000 books in twelve different languages dated 1500–1800 from nine different Defence institutions/collections, representing both Army and Navy. By far the largest collections are the property of the Royal Netherlands Army Museum in Delft and the Royal Netherlands Military Academy in Breda. A great if not substantial part of these books is especially of international significance because of the contents, the intrinsic value or as historical objects. It took eight years to trace and describe these books, all of which have been given extensive analytical bibliographic descriptions. The book is a project of the Royal Netherlands Army Museum, Delft
