The Pamphleteer

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

The Pamphleteer

Les Relations entre l'Europe occidentale et les États-Unis d' Amérique

Il n'y a plus d'Amérique

The geological and osteological papers, published in 1812, of the influential early palaeontologist Georges Cuvier (1769-1832), discoverer of extinction.

Huit Mois En Amerique

The five elements - governmental authorities, public discourse, corporate and market interests, citizens' associations and international agencies - may help in figuring out the complex and challenging purpose of the research work presented in this volume which is nothing less than the history of the governance of cultural and natural heritage in eleven countries, from its outset to the present. Speaking about governance is challenging. The term has been vastly used and misused. But today, when the feverish popularity of the concept is probably in decline, we rest with one solid conviction at least: that social, economic, cultural and institutional processes are governed not only through government (be it national or local) with its legislative, administrative and jurisdictional mechanisms, but through a larger array of different actors and factors. These include schools and universities, citizens' associations, public opinion, economic corporations, non-governmental organizations, learned societies, unions, media, international agencies, clubs, consultants etc. In fact, the reader is going to meet quite a few of these actors in this publication; they are the unavoidable characters involved in the story the authors have set out to tell.

Les Relations entre l'Europe occidentale et les États-Unis d' Amérique

For nearly every important decision, we often receive the same advice: think for yourself. Such a statement assumes that rational thought is a type of "do-it-yourself project," that what a person thinks is derived from one's independent human existence. But there are some critical thinkers who challenge this assumption, showing the ways in which rational thought is molded and determined in forceful ways by various elements that lie outside the free choices of an individual. According to both Alexis de Tocqueville and Romano Guardini, structural elements within various cultures exhibit a distinct power over rational thought and dispose human persons to specific patterns of logic, and according to their evidence, what a person thinks is inextricably bound to their relationships. In this book, the social

dimensions of rational thought can be more clearly seen, even by those conditioned to think that they can think for themselves.

United States Vs. Mexico in the Matter of the Case of the Pious Fund of the Californias

These interviews engage issues central to a real dialogue between French and American cultures. Each interview is annotated and followed by additional texts (literary, philosophical, sociological) aimed at broadening students' cultural background. A culture index and numerous graphs with sociological data also complete the interviews.

Papers Relating to the Foreign Relations of the United States

The texts collected in this volume unveil the practice and the methods of the translators and scholars who contributed to the reemergence of Yiddish in contemporary Canada. Each of the personalities discussed enlarged the historical position and interpreted various aspects of the Yiddish language in Montreal that until recently remained obscure or inaccessible. -- Les textes rassemblés dans ce volume tentent de lever le voile sur la démarche et les méthodes des traducteurs et chercheurs qui ont contribué à la réémergence du yiddish dans le Canada contemporain. Ces traducteurs et chercheurs ont élargi l'assise historique et interprété de nombreux aspects de la langue yiddish à Montréal, aspects qui jusque-là demeuraient obscurs et inaccessibles.

L'HISTOIRE DE L'AMERIQUE

Chaque jour, ce sont près de sept enfants ou adolescents qui meurent par balle aux États-Unis. Cette statistique glaçante ne peut rendre compte à elle seule des vies détruites par les armes à feu, Gary Younge a donc décidé de raconter le destin des jeunes gens tués au cours d'une journée choisie au hasard. Ils sont dix à être abattus le 23 novembre 2013, dix enfants et adolescents âgés de 9 à 19 ans : sept noirs, deux hispaniques, un blanc. Gary Younge consacre un chapitre à chacune de ces victimes tuées par balle, parfois par accident, parfois lors d'un règlement de comptes : Jaiden, Kenneth, Stanley, Pedro, Tyler, Edwin, Samuel, Tyshon, Gary et Gustin. En recoupant les entretiens qu'il a menés avec leurs proches, les rapports de la police, du « 911 » et des journalistes locaux, il reconstitue la vie et les dernières minutes de ces jeunes, victimes de leur condition sociale, de la négligence des adultes, des lobbys. Vibrante immersion dans ces dix courtes vies, Une journée dans la mort de l'Amérique est un ouvrage aussi précis qu'intense. Gary Younge déploie tout son savoir-faire narratif pour nous immerger dans les États-Unis d'aujourd'hui et nous inviter à réfléchir, sans tabou, à cette tragédie américaine.
