

Manual Lens Meaning

[#manual lens](#) [#manual focus lens](#) [#what is a manual lens](#) [#definition of manual lens](#) [#how manual lenses work](#)

A manual lens refers to a type of camera lens where the photographer manually adjusts both the focus and aperture settings, rather than relying on the camera's autofocus or auto-exposure systems. These lenses offer precise tactile control, often appealing to photographers who desire a more hands-on approach and specific creative effects.
