Appleton & Lange's Review for the USMLE Step 1

A Springer Series on Medical Education book This is a book about the origins, design, implementation, and effects of the [Primary Care Curriculum at the University of New Mexico School of Medicine]. It is also so much more. It is a first-person account of a moving human experience, in which some deeply caring people search for ways to provide a humane, effective learning experience for students who are seen as preparing to be practitioners of a humane, changing profession....In the 1920s, Gertrude Stein observed that the United States was now the oldest country in the world, for it was the first to join the twentieth century. Perhaps, we must now view the University of New Mexico's PCC as among the oldest programs in medical education, for it may prove to have been one of the first to join the twenty-first century."--Hilliard Jason, MD, EdD, Director, National Center for Faculty Development in the Health Professions, University of Miami School of Medicine

Guidebook for Clerkship Directors - 5th edition

Graduate medical education (GME) is critical to the career development of individual physicians, to the functioning of many teaching institutions, and to the production of our physician workforce. However, recent reports have called for substantial reform of GME. The current lack of established GME outcome measures limits our ability to assess the impact of individual graduates, the performance of residency programs and teaching institutions, and the collective contribution of GME graduates to the physician workforce. To examine the opportunities and challenges in measuring and assessing GME outcomes, the National Academies of Sciences, Engineering, and Medicine held a workshop on October 10–11, 2017, in Washington, DC. Workshop participants discussed: meaningful and measurable outcomes of GME; possible metrics that could be used to track these GME outcomes; possible mechanisms for collecting, collating, analyzing, and reporting these data; and further work to accomplish this ambitious goal. This publication summarizes the presentations and discussions from the workshop.
