Intro

THIS IS WHAT I WILL COVER

Welcome to this NURSING PERSONAL STATEMENT training tutorial!

What to include in a nurse personal statement.!

Why you want to be a nurse.

What attracted you to nursing.

The qualities you possess that are relevant to the role.

Your understanding of the role of a nurse and what will be expected of you (make reference to the 6 Cs of Nursing).

Address the challenges of the nursing course you are applying to study.

End with a powerful statement that demonstrates why they should accept your application.

Maternal Child Nursing Care

Written by the foremost experts in maternity and pediatric nursing, Maternal Child Nursing Care, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care.

NEW! Content updates throughout the text give you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

Maternal & Child Health Nursing

New Fourth Edition combined maternity and pediatrics text for undergraduate nursing students maintains a strong family focus, where both wellness and illness are emphasized as family-centered events. Utilizes a nursing process framework to present information in a clear, readable user-friendly style. Features include abundant critical thinking exercises; care plans with rationale, and clinical vignettes. New features include photo journals, NIC and NOC boxes, a glossary of terms, enhanced information on communication and evidence-based practice, and increased coverage of alternative therapies. For more information, visit <http://connection.LWW.com/go/pillitteri>.

Maternal-Child Nursing

Ideal for accelerated maternity and pediatrics courses, Maternal-Child Nursing, 4th Edition is filled with user-friendly features to help you quickly master essential concepts and skills. It offers completely updated content that's easy to read and understand. Plus, active learning tools give you the chance to practice applying your knowledge and make learning fun! Critical Thinking Exercises allow you to apply your knowledge to realistic clinical situations. Nursing care plans assist you with applying the nursing process to plan individualized care for the most common maternity and pediatric conditions. Critical to Remember boxes summarize and highlight essential, need-to-know information. Communication Cues provide practical tips for effective verbal and nonverbal communication with patients and families. Clinical Reference sections in pediatric chapters present information relevant to each body system, including anatomy and physiology, differences in the pediatric patient, and related laboratory and diagnostic tests. Integrated electronic features match icons in the text, so you can use print and electronic resources more effectively together. Using Research to Improve Practice boxes help you determine proper care to reinforce best practice. Spanish translations are included for phrases commonly encountered with maternity and pediatric patients. Improved design makes the text easier to read, and up-to-date photos ensure accuracy.

Corresponding chapter-by-chapter to Maternal-Child Nursing, 4th Edition, Elsevier Adaptive Learning combines the power of brain science with sophisticated, patented Cerego algorithms to help you learn faster and remember longer. It's fun; it's engaging; and it's constantly tracking your performance and adapting to deliver content precisely when it's needed to ensure core information is transformed into lasting knowledge.

Maternal-Child Nursing - Text and Elsevier Adaptive Learning Package

Updated in an all new 3rd edition, Pediatric Care Plans for the Hospitalized Child is an essential guide to preparing individualized care plans tailored to meet the special needs of the non-critical, hospitalized child. This book provides a quick reference for correlating pediatric medical diagnoses with nursing diagnoses, and will serve as a valuable tool in the clinical setting. A unique thirteen-part format provides care plans that are organized by medical diagnoses with six corresponding nursing diagnoses for each medical diagnosis. In this new edition all of the nursing care plans are situated in tables instead of text, making it much easier for the reader to understand and access.

Pediatric Nursing Care Plans for the Hospitalized Child

Adele Pillitteri aims to ensure that today's students have a technical understanding, without losing the importance of compassion in their role as a nurse. The text presents pediatrics and maternity as a continuum of knowledge, taking a holistic approach and viewing maternity and pediatric content as a family event. The text links theory closely with application that helps students gain a deeper understanding of content and be better prepared to practice in their careers."--Provided by publisher.

Maternal and Child Health Nursing

NEW! Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW! Updated Drug Guides summarize the latest information on medications.

Maternal-Child Nursing - E-Book

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes Murray's Foundations of Maternal-Newborn Nursing, 4th edition text and Mosby's Maternal-Newborn & Women's Health Nursing Video Skills.

Foundations of Maternal-newborn Nursing

Thoroughly revised to correspond with the 4th edition of the book. Provides learning activities, case studies, and review questions to test students' content knowledge and critical thinking skills. Learning Activities including matching and labeling exercises help students acquire the factual knowledge presented in each chapter. Clinical Case Studies helps student apply knowledge to real-life situations, make interpretations based on facts presented and test their critical thinking skills. Developing Insight activities focus on acquiring knowledge in ways that require active involvement such as visiting community agencies or practicing skills that a nurse will use. Check Yourself activities are multiple choice questions that enable students to test their knowledge of client care issues. Incorporates Cultural Diversity considerations into exercises and activities to ensure the student receives the most complete, well-rounded coverage. Answers to the Learning Activities, Case Studies, and Check Yourself activities are provided in the back of the Study Guide. Expanded Clinical Case Studies include more community and home care and high risk conditions. Increased number of Learning Activities and Check Yourself further test student's content knowledge and critical thinking skills.

Foundations of Maternal-Newborn Nursing

The themes that shape this book - nursing care in the community, client education, critical thinking, & evidence-based practice in nursing - will prepare students for the responsibility of managing care for families with diverse healthcare needs, & to work collaboratively with families & other health professionals to enhance care. For courses in maternal and child nursing care in any nursing program Help students think like nurses with maternal-newborn and pediatric clients As nursing courses are shortened and clinical experiences become more limited, time is increasingly precious to both students and faculty. Designed to support faster, more efficient learning in condensed courses, Maternal & Child Nursing Care presents key content about maternal-newborn nursing, women's health, and pediatric nursing topics in an accurate, readable way. Throughout this family-focused text, special attention is paid to health promotion, home/community care, patient and family education, clinical reasoning, evidence-based practice, and cultural competence. Engaging features help readers learn and retain essential concepts in a short period of time. The straightforward approach allows students to focus on what is most important-developing the essential skills and abilities to practice nursing in fast-changing healthcare environments. Also available with MyNursingLab(MyNursingLab is an an online homework, tutorial, and assessment program designed to engage students in the Maternal/Newborn Nursing course and improve results. Its guided learning path is proven to help students think like a nurse as they move beyond memorization to true understanding through application. NOTE: You are purchasing a standalone product; MyNursingLab does not come packaged with the content.

Maternal & Child Nursing Care

MATERNAL-CHILD NURSING CARE, 2ND EDITION covers the essential content for the maternity and pediatric nursing courses combined in one affordable text. The inclusion of expert authors, contributors, and reviewers ensures delivery of accurate and up-to-date content in both maternity and pediatric areas. The authors are also noted for their clear writing style that makes content easy to read and understand. The following are the key features retained for the second edition: Nursing Care Plans, Nurse Alerts, Guidelines, Emergency Treatment, Home Care, Cultural Awareness, Family Focus, Patient Teaching and Critical Thinking Exercises. The second edition will also include a new full-color design, greater emphasis on community care and research throughout. - Expert authors ensure delivery of accurate and up-to-date maternity and pediatric content - Authors' clear writing style makes content easy to read and understand - Focus on the family throughout emphasizes the influence of family in health and illness - Nursing Care Plans, including rationales for interventions, provide students with an overview and specific guidelines for delivering effective nursing care - Nurse Alerts point out critical information that students should not overlook when treating patients - Guidelines boxes outline nursing procedures in an easy-to-follow fashion - Emergency boxes highlight emergency procedures in a step-by-step format to help students understand how to perform them - Home Care boxes detail important information to help prepare students to deliver care to patients and families in the home setting - Atraumatic Care boxes (in the pediatric section) teach students to provide competent care without creating undue physical or psychological stress to the patient - Critical Thinking boxes provide students with case scenarios that depict real life situations to help them choose the best intervention and make good clinical judgements - Patient Teaching boxes (in the maternity section) highlight content students can share with patients and families to help them meet or exceed expected outcomes - Cultural Considerations boxes provide students with information to help them deliver culturally competent care - Family Focus boxes highlight the needs or concerns of families that students

should consider when family-centered care is provided - NEW Chapter 3, Community and Home Care, provides a basis for understanding community aspects of maternity care - Unit 2, Reproductive Years, provides students with a thorough understanding of health promotion and prevention, common health concerns, contraception, infertility, and abortion related to the care of women throughout the childbearing years - Two NEW chapters, Pre-Existing Conditions (13) and Gestational Conditions (14) focus on the care and treatment of pregnant women with conditions she had prior to becoming pregnant and those she acquired during pregnancy - NEW Chapter 21, Assessment and Care During the Fourth Trimester focuses on nursing care management of the physical and psychosocial needs of the mother and on discharge teaching during the fourth trimester (postpartum) - NEW Chapter 22, Transition to Parenthood, focuses on assisting parents in adapting to parenthood, and includes practical suggestions for the first weeks at home after the birth - NEW Chapter 29, Community-Based Care of the Child and Family, provides students with an understanding of how to provide care for patients outside of the acute care setting - An inviting full-color design with over 1,000 colorful photographs and line drawings has been added to enhance the overall visual appeal of the text - Community Focus boxes have been added throughout to highlight information on how to provide care in community settings (Includes a FREE MERLIN website at: www.harcourthealth.com/MERLIN/Wong/maternal/)

Maternal Child Nursing Care

Co-written by a maternity and pediatrics nursing author team thoroughly integrates maternal-newborn nursing and pediatric nursing in one since book. Equal focus is placed on community-based and hospital-based care to address the increasing balance between both nursing care settings. This edition has increased coverage of pain assessment and management, nutrition and health promotion, patient education and communication, research based practice, and assessment as the core of the nursing process. A CD-ROM includes NCLEX-RN practice questions and Critical Thinking in Action videos.

Maternal and Child Nursing Care

Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! Maternal Child Nursing Care, 7th Edition covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps prepare students to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes teach students how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that students should consider to provide family-centered care.

Maternal Child Nursing Care - E-Book

LEARN-APPLY-ASSESS Davis Advantage for Maternal-Child Nursing Care combines an innovative text with an immersive online program that make this challenging but must-know content easier to master by making learning personal. Together, they create a seamless experience that tracks each student's progress and assesses their knowledge until they have mastered the concepts and are ready to apply them in class, clinical, and practice. An access code inside new, printed textbooks unlocks an ebook, as well as access to Davis Advantage. Or choose the all-digital Instant Access option, which includes the ebook and immediate access to Davis Advantage.

Maternal Child Nursing Care

Written specifically for the LPN/LVN student, this Third Edition of Introductory Maternity and Pediatric Nursing provides clear, well-illustrated, and clinically relevant coverage of pregnancy, birth, and pediatrics to help student's master key clinical and critical thinking skills and prepare for the NCLEX® exam and successful practice. This Third Edition is enhanced by new care plans in the clinical chapters, new case studies, a new art program, a new pronunciation guide, and more. Online video clips of live births, Cesarean delivery, breastfeeding, pediatric milestones, the well child, and the hospitalized child bring concepts to life in dynamic full color. To ensure student mastery of key topics, an integrated workbook at the end of each chapter includes NCLEX-style questions (many NEW to this edition), study activities, and critical thinking: "What Would You Do?" exercises.

Davis Advantage for Maternal-Child Nursing Care

Prepare today's LPN/LVN students for success on the NCLEX-PN® and in clinical practice with this proven introduction to the essentials of maternity and pediatric nursing. Designed specifically for the LPN curriculum, Introductory Maternity and Pediatric Nursing, 5th Edition, focuses on need-to-know coverage of pregnancy, birth, and pediatrics, combining a clear, straightforward approach with built-in workbook features that reinforce understanding without the need for an additional study guide. Accompanied by engaging online resources, this up-to-date learning package provides the ideal foundation for your students' success in LPN/LVN practice.

Introductory Maternity and Pediatric Nursing

It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families and children, not only in traditional hospital settings, but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes, holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

Introductory Maternity & Pediatric Nursing

Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

Maternal-Child Nursing Care

Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. --From publisher description.

Maternal-Child Nursing Care Optimizing Outcomes for Mothers, Children, & Families

Rev. ed. of: Maternal-newborn nursing care. 4th ed. 1998./Includes index.

Maternal and Child Nursing Care

Preceded by Maternal & child health nursing / Adele Pillitteri. 7th edition. 2014.

Maternal Newborn Nursing Care Plans

Nursing care for pregnant women and children is a family-centered process, and Maternal and Child Nursing Care, 3e, is a text that addresses the needs of families across the continuum, from conception through adolescence. The themes that shape this book- nursing care in the community, client education, critical thinking, and evidence-based practice in nursing-will prepare students for the responsibility of

managing care for families with diverse healthcare needs, and to work collaboratively with families and other health professionals to enhance care

Preparation & Administration of Meropenem (captioned) - Preparation & Administration of Meropenem (captioned) by EM3FOAMed 1,360,887 views 8 years ago 5 minutes, 6 seconds - Captions provided for in situ use by healthcare professionals working in the Emergency Department.

#EM3 East Midlands Emergency Medicine Educational Media

Obtain a clean blue tray and disinfectant wipes

Disinfect tray and allow to air dry

Gather the following equipment

Write 'Meropenem' on antibiotic label

Arrange equipment around your tray

Show your prescription to a second checker

Second checker to sign prescription

Close the needle guard against the bottom of the tray

DO NOT use your fingers

Disinfect vial top with 2% Chlorhexidine Gluconate in 70% Alcohol wipe

Draw up your water for injection

Push the needle into the vial

Add the water to the vial in several steps

Allow pressure to equalise after each step

Shake Meropenem vial

Shake for another 60 secs

Leave to stand for another 15 secs

Ensure solution is clear and free of particles

Attach a new needle to the water syringe

Allow the antibiotic to flow back into syringe

Grab another Chlorhexadine Alcohol wipe...

and take tray and prescription to patient

Check patient's wrist band against their notes

Scrub the bung for 30 secs

Remove excess air from the syringe

Administer Meropenem over 5 mins

Flush IV line with 0.9% NaCl

Dispose of all sharps and consumables, leaving your work area tidy
