Haunted Media

Examines the repeated association of new electronic media with spiritual phenomena from the telegraph in the late 19th century to television.

Slow Violence and the Environmentalism of the Poor

"Slow violence" from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war occurs gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

Understanding Media

When first published, Marshall McLuhan's Understanding Media made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

The Sounds of Early Cinema

The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. "Silent cinema" may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910). Contributors include Richard Abel, Rick Altman, Edouard Arnoldy, Mats Björkin, Stephen Bottomore, Marta Braun, Jean Châteauevert, Ian Christie, Richard Crangle, Helen Day-Mayer, John Fullerton, Jane Gaines, André Gaudreault, Tom Gunning, François Jost, Charlie Keil, Jeff Klenotic, Germain Lacasse, Neil Lerner, Patrick Loughney, David Mayer, Dominique Nasta, Bernard Perron, Jacques Polet, Lauren Rabinovitz, Isabelle Raynald, Herbert Reynolds, Gregory A. Waller, and Rashit M. Yangirov.

Imaginal Machines

Nonfiction. Political Science. Criticism and Theory. Art. "IMAGINAL MACHINES explores with humor and wit the condition of art and politics in contemporary capitalism. It reviews the potentials and limits

of liberatory art (from surrealism to Tom Waits) while charting the always-resurgent creations of the collective imagination. Shukaitis exhibits a remarkable theoretical breadth, bringing together the work of Castoriadis, the Situationists, and autonomous Marxism to define a new task for militant research: constructing imaginal machines that escape capitalism. IMAGINAL MACHINES is truly a book that makes a path by walking"--Silvia Federici, author of CALIBAN AND THE WITCH: WOMEN, THE BODY, AND PRIMITIVE ACCUMULATION.

The Environmentalism of the Poor

This is a wonderful book rich in empirical detail, full of theoretical insights, offering hope in a bleak world, altogether inspiring. . . a tremendous achievement of having helped to create the disciplines of ecological economics and political ecology, bringing them alive in this book, and making their insights available to the developing worldwide movement for environmental justice. Pat Devine, Environmental Values Any book by the ecological economist Joan Martinez-Alier is a Big Publishing Event. . . this is a book by a writer who loves his subject, knows it well, respects its history, and is driven by the desire to do justice. These are qualities enough to send you to the bookshop or the library in search of The Environmentalism of the Poor. Andrew Dobson, Environment Politics The book is a worthy and in-depth contribution to debates about political ecology and ecological economics. It should be read by all environmental and ecological economists who wish to make their analysis more relevant. Tim Forsyth, Progress in Development Studies A marvellous combination of insight, research and activism. . . A must-read for policymakers, practitioners and academics alike, and for anyone concerned with sustainable development, environmentalism or poverty alleviation. Human Ecology Journal . . . one of the most important environmental books to have been published recently. Martinez-Alier integrates two of the most significant areas of environmental theory political ecology and ecological economics. Eurig Scandrett, Friends of the Earth Scotland The book has three main strengths: its bibliography, which is extensive; the global perspective on the environmental movement and the relationship with poverty; and the general theme of this interdisciplinary work, which is not so much to provide new information, but to consider the existing information in a new light. Martinez-Alier is to be commended for taking such a step in the literature . . . the writing style is extremely approachable . . . Recommended. B.J. Peterson, Choice [Joan] Martinez-Alier combines the honest discipline of a scholar with the passionate energy of an activist. The result, The Environmentalism of the Poor, is highly recommended! Herman E. Daly, University of Maryland, College Park, US The Environmentalism of the Poor has the explicit intention of helping to establish two emerging fields of study political ecology and ecological economics whilst also investigating the relations between them. The book analyses several manifestations of the growing environmental justice movement , and also of popular environmentalism and the environmentalism of the poor , which will be seen in the coming decades as driving forces in the process to achieve an ecologically sustainable society. The author studies, in detail, many ecological distribution conflicts in history and at present, in urban and rural settings, showing how poor people often favour resource conservation. The environment is thus not so much a luxury of the rich as a necessity of the poor. It concludes with the fundamental questions: who has the right to impose a language of valuation and who has the power to simplify complexity? Joan Martinez-Alier combines the study of ecological conflicts and the study of environmental valuation in a totally original approach that will appeal to a wide cross-section of academics, ecologists and environmentalists.

The Washington War

A Team of Rivals for World War II—the inside story of how FDR and the towering personalities around him waged war in the corridors of Washington, D.C., to secure ultimate victory on the battlefields of Europe and the Pacific. The Washington War is the story of how the Second World War was fought and won in the capital's halls of power—and how the United States, which in December 1941 had a nominal army and a decimated naval fleet, was able in only thirty months to fling huge forces onto the European continent and shortly thereafter shatter Imperial Japan's Pacific strongholds. Three quarters of a century after the overwhelming defeat of the totalitarian Axis forces, the terrifying, razor-thin calculus on which so many critical decisions turned has been forgotten—but had any of

these debates gone the other way, the outcome of the war could have been far different: The army in August 1941, about to be disbanded, saved by a single vote. Production plans that would have delayed adequate war matériel for years after Pearl Harbor, circumvented by one uncompromising man's courage and drive. The delicate ballet that precluded a separate peace between Stalin and Hitler. The almost-adopted strategy to stage D-Day at a fatally different time and place. It was all a breathtakingly close-run thing, again and again. Renowned historian James Lacey takes readers behind the scenes in the cabinet rooms, the Pentagon, the Oval Office, and Hyde Park, and at the pivotal conferences—Campobello Island, Casablanca, Tehran—as these disputes raged. Here are colorful portraits of the great figures—and forgotten geniuses—of the day: New Dealers versus industrialists, political power brokers versus the generals, Churchill and the British high command versus the U.S. chiefs of staff, innovators versus entrenched bureaucrats . . . with the master manipulator, Franklin Delano Roosevelt, at the center, setting his brawling patriots one against the other and promoting and capitalizing on the furious turf wars. Based on years of research and extensive, previously untapped archival resources, *The Washington War* is the first integrated, comprehensive chronicle of how all these elements—and towering personalities—clashed and ultimately coalesced at each vital turning point, the definitive account of Washington at real war and the titanic political and bureaucratic infighting that miraculously led to final victory.

The Essential Cult TV Reader

The Essential Cult TV Reader is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. Once defined by limited viewership, cult TV has developed its own identity, with some shows gaining large, mainstream audiences. By exploring the defining characteristics of cult TV, The Essential Cult TV Reader traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as *Star Trek*, *The Avengers*, *Dark Shadows*, and *The Twilight Zone* to popular contemporary shows such as *Lost*, *Dexter*, and *24*, addressing the cultural context that allowed the development of the phenomenon. The contributors investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. The Essential Cult TV Reader answers many of the questions surrounding the form while revealing emerging debates on its future.

Twelve Angry Men

A landmark American drama that inspired a classic film and a Broadway revival—featuring an introduction by David Mamet A blistering character study and an examination of the American melting pot and the judicial system that keeps it in check, *Twelve Angry Men* holds at its core a deeply patriotic faith in the U.S. legal system. The play centers on Juror Eight, who is at first the sole holdout in an 11-1 guilty vote. Eight sets his sights not on proving the other jurors wrong but rather on getting them to look at the situation in a clear-eyed way not affected by their personal prejudices or biases. Reginald Rose deliberately and carefully peels away the layers of artifice from the men and allows a fuller picture to form of them—and of America, at its best and worst. After the critically acclaimed teleplay aired in 1954, this landmark American drama went on to become a cinematic masterpiece in 1957 starring Henry Fonda, for which Rose wrote the adaptation. More recently, *Twelve Angry Men* had a successful, and award-winning, run on Broadway. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across

genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Narrative and Media

Narrative and Media, first published in 2006, applies narrative theory to media texts, including film, television, radio, advertising, and print journalism. Drawing on research in structuralist and post-structuralist theory, as well as functional grammar and image analysis, the book explains the narrative techniques which shape media texts and offers interpretive tools for analysing meaning and ideology. Each section looks at particular media forms and shows how elements such as chronology, character, and focalization are realized in specific texts. As the boundaries between entertainment and information in the mass media continue to dissolve, understanding the ways in which modes of story-telling are seamlessly transferred from one medium to another, and the ideological implications of these strategies, is an essential aspect of media studies.

Virtual Art

An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 *The Battle of Sedan*, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

I Am a Strange Loop

One of our greatest philosophers and scientists of the mind asks, where does the self come from -- and how our selves can exist in the minds of others. Can thought arise out of matter? Can self, soul, consciousness, "I" arise out of mere matter? If it cannot, then how can you or I be here? *I Am a Strange Loop* argues that the key to understanding selves and consciousness is the "strange loop"-a special kind of abstract feedback loop inhabiting our brains. The most central and complex symbol in your brain is the one called "I." The "I" is the nexus in our brain, one of many symbols seeming to have free will and to have gained the paradoxical ability to push particles around, rather than the reverse. How can a mysterious abstraction be real-or is our "I" merely a convenient fiction? Does an "I" exert genuine power over the particles in our brain, or is it helplessly pushed around by the laws of physics? These are the mysteries tackled in *I Am a Strange Loop*, Douglas Hofstadter's first book-length journey into philosophy since Gödel, Escher, Bach. Compulsively readable and endlessly thought-provoking, this is a moving and profound inquiry into the nature of mind.

Media Spectacle

During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal

drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.

Everyday Aesthetics

Katya Mandoki advances in this book the thesis that it is not only possible but crucial to open up the field of aesthetics (traditionally confined to the study of art and beauty) toward the richness and complexity of everyday life. She argues that in every process of communication, whether face to face or through the media, fashion, and political propaganda, there is always an excess beyond the informative and functional value of a message. This excess is the aesthetic. Following Huizinga's view of play as an ingredient of any social environment, Mandoki explores how various cultural practices are in fact forms of playing since, for the author, aesthetics and play are Siamese twins. One of the unique contributions of this book is the elaboration and application of a semiotic model for the simultaneous analysis of social interactions in the four registers, namely visual, auditory, verbal and body language, to detect the aesthetic strategies deployed in specific situations. She argues that since the presentation of the self is targeted towards participants' sensibilities, aesthetics plays a key role in these modes of exchange. Consequently, the author updates important debates in this field to clear the way for a socio-aesthetic inquiry through contexts such as the family, school, medical, artistic or religious traditions from which social identities emerge.

"We need good screenwriters who understand character." Everywhere Andrew Horton traveled in researching this book—from Hollywood to Hungary—he heard the same refrain. Yet most of the standard how-to books on screenwriting follow the film industry's earlier lead in focusing almost exclusively on plot and formulaic structures. With this book, Horton, a film scholar and successful screenwriter, provides the definitive work on the character-based screenplay. Exceptionally wide-ranging—covering American, international, mainstream, and "off-Hollywood" films, as well as television—the book offers creative strategies and essential practical information. Horton begins by placing screenwriting in the context of the storytelling tradition, arguing through literary and cultural analysis that all great stories revolve around a strong central character. He then suggests specific techniques and concepts to help any writer—whether new or experienced—build more vivid characters and screenplays. Centering his discussion around four film examples—including *Thelma & Louise* and *The Silence of the Lambs*—and the television series, *Northern Exposure*, he takes the reader step-by-step through the screenwriting process, starting with the development of multi-dimensional characters and continuing through to rewrite. Finally, he includes a wealth of information about contests, fellowships, and film festivals. Espousing a new, character-based approach to screenwriting, this engaging, insightful work will prove an essential guide to all of those involved in the writing and development of film scripts.

Writing the Character-Centered Screenplay, Updated and Expanded edition

A collection of surprising, disarming and 'extremely funny' essays from the internationally bestselling author of *Me Talk Pretty One Day* (Sunday Times) Santaland Diaries collects six of David Sedaris's most profound Christmas stories into one slender volume perfect for use as a last-minute coaster or ice-scraper. This drinking man's companion can be enjoyed by the warmth of a raging fire, the glow of a brilliantly decorated tree, or even in the back seat of a police car. It should be read with your eyes, felt with your heart, and heard only when spoken to. It should, in short, behave much like a book. And oh, what a book it is! "As gritty and hard-driving a thriller as you'll find....The action never stops, the language sings and stings." —Washington Post The City Primeval in Elmore Leonard's relentlessly gripping classic noir is Detroit, the author's much-maligned hometown and the setting for many of the Grand Master's acclaimed crime novels. The "Alexander the Great of crime fiction" (Pittsburgh Post-Gazette) shines in these urban mean streets, setting up a downtown showdown between the psychopathic, thrill-killing "Oklahoma Wildman" and the dedicated city cop who's determined to take him down. The creator of U.S. Marshal Raylan Givens of TV's *Justified* fame, Elmore Leonard is the equal of any writer who has ever captivated readers with dark tales of heists, hijacks, double-crosses, and murder—John D.

MacDonald, Dashiell Hammett, James M. Cain, and Robert Parker included—and nobody then or now is better.

Santaland Diaries

The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.
