International Bestseller "Emotional . . . sinks its hooks into you from the very first sentence." —Marie Claire "Perfect for fans of Room, this heartbreaking but important novel . . . reminds readers that hope can be found in even the darkest moments." —Real Simple First grader Zach Taylor is in his classroom when a gunman enters the school auditorium and the unthinkable happens, irrevocably changing the

very fabric of this close-knit community. While Zach's mother pursues a quest for justice, and Zach's father retreats into his work, Zach finds solace in the healing world of books and art. Armed with his new insights, and the optimism and stubbornness only a child could have, Zach becomes determined to help the adults in his life rediscover the universal truths of love and compassion they need to pull them through their darkest hour. A dazzling, tenderhearted debut about healing, family, and the exquisite wisdom of children, narrated by a six-year-old boy who reminds us that sometimes the littlest bodies hold the biggest hearts, and the quietest voices speak the loudest.

An “entertaining” look at the psychology and neuroscience behind the act of influencing others (Kirkus Reviews). People try to persuade us every day. From the news to the Internet to coworkers and family, everyone and everything wants to influence our thoughts in some way. And in turn, we hope to persuade others. Understanding the dynamics of persuasion can help us to achieve our own goals—and resist being manipulated by those who don’t necessarily have our best interests at heart. Psychologist Kevin Dutton has identified a powerful strain of immediate, instinctual persuasion, a method of influence that allows people to disarm skepticism, win arguments, and close deals. With a combination of astute methods and in-depth research in the fields of psychology and neuroscience, Dutton’s fascinating and provocative book: Introduces the natural super-persuaders in our midst: Buddhist monks, magicians, advertisers, con men, hostage negotiators, and even psychopaths. Reveals which hidden pathways in the brain lead us to believe something even when we know it’s not true. Explains how group dynamics can make us more tolerant or deepen our extremism. Illuminates the five elements of SPICE (simplicity, perceived self-interest, incongruity, confidence, and empathy) for instantly effective persuasion. “[Split-Second Persuasion] offers some powerful insights into the art and science of getting people to do what you want.” —New Scientist
