## Selling British Columbia

*Selling British Columbia* is an entertaining examination of the development of the tourist industry in British Columbia between 1890 and 1970. Michael Dawson argues that in order to understand the roots of the fully-fledged consumer culture that emerged in Canada after the Second World War, it is necessary to understand the connections between the 1930s, 1940s, and the postwar era. Cultural producers such as tourism promoters and the state infrastructure played important roles in fostering consumer demand, particularly during the Depression, the Second World War, and throughout the postwar era. Dawson draws upon promotional pamphlets, newspapers, advertisements, and films, as well as archival sources regarding government, civic, and international tourism organizations. Central to his book is an examination of the representation of popular imagery and of how aboriginal and British cultures were commodified and marketed to potential tourists. He also looks at the gendered aspect of these promotional campaigns, particularly during the 1940s, and challenges earlier interpretations regarding the relationship between tourism and nature in Canada. Historians have tended to focus on either the first wave of consumerism from the 1880s to the 1920s, or else on the era of economic expansion that followed World War Two. As Dawson shows, the 1930-45 period in particular was an important and dynamic one in the creation of Canadian and British Columbian consumer culture. Michael Dawson's highly readable and engaging account of the development of the British Columbia tourist industry will be welcomed by British Columbian and Canadian historians, as well as other scholars of tourism and consumerism.

## Outside the Walls of the Asylum

This historical account of the care of insanity outside formal instruction explores key issues relating to the social history of madness from 1750 to the present day. These include women and the social construction of madness, the boarding out of lunatics by poor law authorities, familial care and treatment of the insane and the practice of mental healing by general practitioners.

## State and Local Government Special Studies

*Seduced, Abandoned, and Reborn* exposes the fears expressed by elders about young people in the early American republic. Those authors, educators, and moral reformers who aspired to guide youth into respectable stations perceived new dangers in the decades following independence. Battling a range of seducers in the burgeoning marketplace of early America, from corrupt peers to licentious prostitutes, from pornographic authors to firebrand preachers, these self-proclaimed moral guardians crafted advice and institutions for youth, hoping to guide them safely away from harm and toward success. By penning didactic novels and advice books while building reform institutions and colleges, they sought to lead youth into dutiful behavior. But, thrust into the market themselves, these moral guides were forced to compromise their messages to find a popular audience. Nonetheless, their calls for order did have lasting impact. In urban centers in the Northeast, middle-class Americans became increasingly committed to their notions of chastity, piety, and hard work. Focusing on popular publications and large urban centers, Hessinger draws a portrait of deeply troubled reformers, men and women, who worried incessantly about the vulnerability of youth to the perils of prostitution, promiscuity, misbehavior, and revolt. Benefiting from new insights in cultural history, *Seduced, Abandoned, and Reborn* looks at the way the categories of gender, age, and class took rhetorical shape in the early republic. In trying to steer young adults away from danger, these advisors created values that came to define the emerging middle class of urban America.

## State and Local Government Special Studies

"Do not think of the Pennsylvania Railroad as a business enterprise," *Forbes* magazine informed its readers in May 1936. "Think of it as a nation." At the end of the nineteenth century, the Pennsylvania Railroad was the largest privately owned business corporation in the world. In 1914, the PRR employed more than two hundred thousand people—more than double the number of soldiers in the United States Army. As the self-proclaimed "Standard Railroad of the World," this colossal corporate body underwrote American industrial expansion and shaped the economic, political, and social environment of the United States. In turn, the PRR was fundamentally shaped by the American landscape, adapting to geography as well as shifts in competitive economics and public policy. Albert J. Churella's masterful account, certain to become the authoritative history of the Pennsylvania Railroad, illuminates broad themes in American history, from the development of managerial practices and labor relations to the relationship between business and government to advances in technology and transportation. Churella

situates exhaustive archival research on the Pennsylvania Railroad within the social, economic, and technological changes of nineteenth- and twentieth-century America, chronicling the epic history of the PRR intertwined with that of a developing nation. This first volume opens with the development of the Main Line of Public Works, devised by Pennsylvanians in the 1820s to compete with the Erie Canal. Though a public rather than a private enterprise, the Main Line foreshadowed the establishment of the Pennsylvania Railroad in 1846. Over the next decades, as the nation weathered the Civil War, industrial expansion, and labor unrest, the PRR expanded despite competition with rival railroads and disputes with such figures as Andrew Carnegie and John D. Rockefeller. The dawn of the twentieth century brought a measure of stability to the railroad industry, enabling the creation of such architectural monuments as Pennsylvania Station in New York City. The volume closes at the threshold of American involvement in World War I, as the strategies that PRR executives had perfected in previous decades proved less effective at guiding the company through increasingly tumultuous economic and political waters.

#### Checklist of Basic Municipal Documents

This book looks at how the British Labour Party came to terms with the 1960's 'cultural revolution', specifically changes to: the class structure, place of women, black immigration, the generation gap and calls for direct political participation.

#### Property Taxation 1941

Vol. 30 includes "The first half century of the Essex Institute," and "List of present members."

#### Analytical and Classified Catalogue of the Library of the Parliament of Queensland

The history of British Columbia's economy in the twentieth century is inextricably bound to the development of the forest industry. In this comprehensive study, Gordon Hak approaches the forest industry from the perspectives of workers and employers, examining the two institutions that structured the relationship during the Fordist era: the companies and the unions. He relates daily routines of production and profit-making to broader forces of unionism, business ideology, ecological protest, technological change, and corporate concentration. The struggle of the small-business sector to survive in the face of corporate growth, the history of the industry on the Coast and in the Interior, the transformations in capital-labour relations during the period, government forest policy, and the forest industry's encounter with the emerging environmental movement are all considered in this eloquent analysis.

#### Seduced, Abandoned, and Reborn

This book presents the first comprehensive study of the development of the central institution of Australian government over the first century of its life.

#### The Pennsylvania Railroad, Volume 1

How American bicyclists shaped the landscape and left traces of their journeys for us in writing, illustrations, and photographs. In the later part of the nineteenth century, American bicyclists were explorers, cycling through both charted and uncharted territory. These wheelmen and wheelwomen became keen observers of suburban and rural landscapes, and left copious records of their journeys—in travel narratives, journalism, maps, photographs, illustrations. They were also instrumental in the construction of roads and paths ("wheelways")—building them, funding them, and lobbying legislators for them. Their explorations shaped the landscape and the way we look at it, yet with few exceptions their writings have been largely overlooked by landscape scholars, and many of the paths cyclists cleared have disappeared. In *Old Wheelways*, Robert McCullough restores the pioneering cyclists of the nineteenth century to the history of American landscapes. McCullough recounts marathon cycling trips around the Northeast undertaken by hardy cyclists, who then describe their journeys in such magazines as *The Wheelman Illustrated* and *Bicycling World*; the work of illustrators (including Childe Hassam, before his fame as a painter); efforts by cyclists to build better rural roads and bicycle paths; and conflicts with park planners, including the famous Olmsted Firm, who often opposed separate paths for bicycles. Today's ubiquitous bicycle lanes owe their origins to nineteenth century versions, including New York City's "asphalt ribbons." Long before there were "rails to trails," there was a movement to adapt existing passageways—including aqueduct corridors, trolley rights-of-way, and canal towpaths—for bicycling.

The campaigns for wheelways, McCullough points out, offer a prologue to nearly every obstacle faced by those advocating bicycle paths and lanes today. McCullough's text is enriched by more than one hundred historic images of cyclists (often attired in skirts and bonnets, suits and ties), country lanes, and city streets.

#### The System of Mineralogy of James Dwight Dana, 1837-1868

At the turn of the twentieth century, Winnipeg was the fastest-growing city in North America. But its days as a diverse and culturally rich metropolis did not end when the boom collapsed. *Prairie Metropolis* brings together some of the best new graduate research on the history of Winnipeg and makes a groundbreaking contribution to the history of the city between 1900 and the 1980s. The essays in this collection explore the development of social institutions such as the city's police force, juvenile court, health care institutions, volunteer organizations, and cultural centres. They offer critical analyses on ethnic, gender, and class inequality and conflict, while placing Winnipeg's experiences in national and international contexts.

#### Preliminary Inventory

This fascinating portrait of an amateur astronomy movement tells the story of how Charles Olivier recruited a hard-working cadre of citizen scientists to rehabilitate the study of meteors. By 1936, Olivier and members of his American Meteor Society had succeeded in disproving an erroneous idea about meteor showers. Using careful observations, they restored the public's trust in predictions about periodic showers and renewed respect for meteor astronomy among professional astronomers in the United States. Charles Olivier and his society of observers who were passionate about watching for meteors in the night sky left a major impact on the field. In addition to describing Olivier's career and describing his struggles with competitive colleagues in a hostile scientific climate, the author provides biographies of some of the scores of women and men of all ages who aided Olivier in making shower observations, from the Leonids and Perseids and others. Half of these amateur volunteers were from 13 to 25 years of age. Their work allowed Olivier and the AMS to contradict the fallacious belief in stationary and long-enduring meteor showers, bringing the theory of their origin into alignment with celestial mechanics. Thanks to Olivier and his collaborators, the study of meteors took a great leap forward in the twentieth century to earn a place as a worthy topic of study among professional astronomers.

#### Preliminary Inventory of the Records of the United States Military Academy

Stephen Bell and Andrew Hindmoor compare banking systems in the U.S. and UK to those of Canada and Australia and explain why the system imploded in the former but not the latter. Canadian and Australian banks were able to make profits through traditional lending practices, unlike their competition-driven, risk-taking U.S. and UK counterparts.

#### Public Documents of Massachusetts

Pleuropneumonia has had a long history in Australia. *Clearing a Continent: The Eradication of Bovine Pleuropneumonia from Australia* is an authoritative monograph on the history, spread, and final eradication of the disease. Based on an enormous amount of research and archive material, the text details the background of the first outbreak, the spread through the affected states, the battle for control, as well as the persistence of the disease in northern areas long after it had been brought under control in the south. There is also vital information on vaccination. This work is an important resource not only for those with a need for historical information on disease in Australia, but also as a reference for countries throughout the world to provide a better understanding of the behaviour of the disease.

#### Edinburgh University Publications

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain

imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

### Bulletin of the Essex Institute

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

### Proceedings. [Continued as] Bulletin

Financed by British spoils from eastern Maine in the War of 1812, modelled on the University of Edinburgh, and shaped by Scottish democratic education tradition, Dalhousie was unique among Nova Scotia colleges in being the only liberal, nonsectarian institution of higher learning. Except for a brief flicker of life (1838-43), for the first forty-five years no students or professors entered Dalhousie's halls a reflection in part of the intense religious loyalties embedded in Nova Scotian politics. The college building itself was at different times a cholera hospital and a Halifax community centre. Finally launched in 1863 and by 1890 embracing the disciplines of law and medicine, Dalhousie owed its driving force to the Presbyterians, retaining a double loyalty to their ethos of hard work and devotion to learning and to a board, staff, and student body of mixed denominations. P.B. Waite enlivens his descriptions of the life of the university with evocative portrayals of governors, professors, and students, as well as sketches of the social and economic development of Halifax. A welcome addition to the histories of Canadian universities, this volume and its forthcoming companion, dealing with the years 1925 to 1980, contribute significantly to our knowledge of the sometimes bitter internecine struggles that accompanied the development of higher education in Canada. "Everywhere is evident the deft turn of phrase, the captivating descriptions, the beautifully drawn word pictures that do much to enliven and illuminate the story ... It possesses many strengths, including clarity and liveliness, and tells us much about Dalhousie as an institution of buildings, presidents, and professors." B. Moody, Department of History, Acadia University.

### Reports

Post-World War II historical developments, including Japanese American resettlement, the U.S. occupation of Japan, the Cold War, and decolonization in an emerging "Third World," created both a climate of uncertainty and possibility for the future of Japanese American Buddhism in the United States. As both a racial minority and as adherents of a non-Christian religious tradition with roots in Asia, Nikkei Buddhists faced distinct challenges in asserting their religion as part of their ethnic heritage. Adaptations associated with Nisei Buddhism sought to prioritize cultural assimilation as prescribed by U.S. government officials and other proponents of racial liberalism, while also seeking to maintain Shin Buddhist tradition, claiming it as integral to Nikkei heritage and part of a tradition of American religious freedom. Nisei also presented Buddhism as a world religion, which served as more than a rhetorical strategy, since many Nisei extended their vision of the sangha (community of Buddhists) to include connections with Buddhists in Japan and South and Southeast Asia. But Nisei Buddhism's emerging influence among American Shin Buddhist communities would be challenged by converts and a younger generation of more progressive Nikkei during the 1960s. *Reorienting the Pure Land: Nisei Buddhism in the Transwar Years, 1943-1965*, is the first historical study of Nisei Shin Buddhists in the United States during the tumultuous period between World War II and the early decades of the Cold War. This book examines Nisei-led adaptations to American Shin Buddhist institutions and organizations in an effort to reconstitute Nikkei Buddhist communities following the end of World War II and release from U.S. government sponsored concentration camps. Taking a transnational perspective, this text establishes the importance of Buddhism in shaping networks in the United States and across the globe, and is the first to highlight the centrality of ethnic Buddhism in building the terms of racial inclusion and the

construction of Asian Americans as a model minority. In addressing themes of religious adaptation, cultural nationalism, and global connection, *Reorienting the Pure Land* makes new contributions to the fields of Japanese American history, the history of Buddhism in America, and the study of Cold War racial liberalism.

#### Capital and Labour in the British Columbia Forest Industry, 1934-74

It is generally forgotten that cricket rather than rugby union was the 'national game' in New Zealand until the early years of the twentieth century. This book shows why and how cricket developed in New Zealand and how its character changed across time. Greg Ryan examines the emergence and growth of cricket in relation to diverse patterns of European settlement in New Zealand - such as the systematic colonization schemes of Edward Gibbon Wakefield and the gold discoveries of the 1860s. He then considers issues such as cricket and social class in the emerging cities; cricket and the elite school system; the function of the game in shaping relations between the New Zealand provinces; cricket encounters with the Australian colonies in the context of an 'Australasian' world. A central theme is cricketing relations with England at a time when New Zealand society was becoming acutely conscious of both its own identity and its place within the British Empire. This imperial relationship reveals structures, ideals and objectives unique to New Zealand. Articulate, engaging and entertaining, Ryan demonstrates convincingly how the cricketing experience of New Zealand was quite different from that of other colonies.
