Vanished Khans and Empty Steppes

The book opens with an outline of the history of Almaty, from its nineteenth-century origins as a remote outpost of the Russian empire, up to its present status as the thriving second city of modern-day Kazakhstan. The story then goes back to the Neolithic and early Bronze Ages, and the sensational discovery of the famous Golden Man of the Scythian empire. A succession of armies and empires, tribes and khanates, appeared and disappeared, before the siege and destruction in 1219 of the ancient Silk Road city of Otrar under the Mongol leader Genghis Khan. The emergence of the first identifiable Kazakh state in the sixteenth century was followed by early contacts with Russia, the country which came to be the dominant influence in Kazakhstan and Central Asia for three hundred years. The book shows how Kazakhstan has been inextricably caught up in the vast historical processes - of revolution, civil war, and the rise and fall of communism - which have extended out from Russia over the last century. In the process the country has changed dramatically, from a simple nomadic society of khans and clans, to a modern and outward-looking nation. The transition has been difficult and tumultuous for millions of people, but Vanished Khans and Empty Steppes illustrates how Kazakhstan has emerged as one of the world's most successful post-communist countries.

Vanished Khans and Empty Steppes a History of Kazakhstan from Pre-History to Post-Independence

Kazakhstan is the ninth-largest country in the world, a landlocked nation that borders both China and Russia. Kazakhstan has long struggled to find its own identity. Since declaring independence in 1991 after the breakup of the Soviet Union, Kazakhs have struggled to regain their unique culture. This volume takes readers through its past and current events, across mountains and valleys, and into the everyday lives of its citizens, using vivid photographs, engaging sidebars, and accessible maps. Readers explore Kazakhstan's culture, geography, government, and people. They'll be encouraged to develop an interest in global exploration, history, and current events.

Nono Stato al mondo per estensione, stretto tra Russia e Cina, il Kazakistan si trova al centro degli equilibri della “nuova guerra fredda” provocata dal conflitto in Ucraina agli inizi del 2022. In questa dettagliata ricostruzione, Fabrizio Vielmini segue la parabola politica di Nursultan Nazarbaev, autocrate visionario la cui eclissi ha innescato una lotta feroce fra i dignitari della sua corte, fatta di apparati deviati e tattiche di manipolazione di massa. Vittima ne è stata la società kazakistana, un variegato tessuto di etnie, religioni e tribù, espropriate dalle ricchezze del proprio Paese. L'adesione del regime al neo-liberismo, unita all'etnicizzazione della vita pubblica assortita da influenze islamiche, ha scosso le basi della convivenza civile. Al centro degli equilibri strategici della “nuova guerra fredda” in Ucraina, il nuovo Presidente Tokaev cerca di mantenere il Kazakistan in equilibrio fra le tempeste interne e i sommovimenti geopolitici circostanti, che rischiano di travolgere le fragili basi dell'esistenza di questo sorprendente Paese a cavallo tra Oriente e Occidente.

Kazakistan: fine di un'epoca

.While the early history of the steppe nomad is shrouded in obscurity, *The Empire of the Steppes* brings both the general reader and the specialist the majestic sweep, grandeur and the overriding intellectual grasp of Grousset's original. Hailed as a masterpiece when first published in French in 1939, and in English in 1970, this great work of synthesis brings before us the people of the steppes, dominated by three mighty figures--Atilla, Genghiz Khan, and Tamberlain--as they marched through ten centuries of history, from the borders of China to the frontiers of the West. The book includes nineteen maps, a comprehensive index, notes, and bibliography. The late Rene Grousset was director of the Cernuschi Museum and curator of the Muse Guimet in Paris, a member of the French Academy and author of many works on Asia Minor and the Near East.

The Empire of the Steppes

"... a rewarding book." —Times Literary Supplement Set in the vast windswept Central Asian steppes and the infinite reaches of galactic space, this powerful novel offers a vivid view of the culture and values of the Soviet Union's Central Asian peoples.

The Day Lasts More than a Hundred Years

The only thing most people know about Kazakhstan is that it is homeland to Borat - and he isn't even real. Actually this vast place - the last unknown inhabited country in the world - is far more surprising and entertaining. For one thing, it is as varied as Europe, combining stupendous wealth, grinding poverty, exotic traditions and a mad dash for modernity. Crisscrossing a vanished land, Christopher Robbins finds Eminem by a shrinking Aral Sea, goes eagle-hunting, visits the scene of Dostoyevsky's doomed first love, takes up residence beside one-time neighbour Leon Trotsky and visits some of the most beautiful, unspoilt places on earth.

In Search of Kazakhstan

The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.

History of Civilizations of Central Asia: Development in contrast : from the sixteenth to the mid-nineteenth century

The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. *Lost Enlightenment* recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

Lost Enlightenment

The first complete history of Central Eurasia from ancient times to the present day, *Empires of the Silk Road* represents a fundamental rethinking of the origins, history, and significance of this major world region. Christopher Beckwith describes the rise and fall of the great Central Eurasian empires, including those of the Scythians, Attila the Hun, the Turks and Tibetans, and Genghis Khan and the Mongols. In addition, he explains why the heartland of Central Eurasia led the world economically, scientifically, and artistically for many centuries despite invasions by Persians, Greeks, Arabs, Chinese, and others. In retelling the story of the Old World from the perspective of Central Eurasia, Beckwith provides a new understanding of the internal and external dynamics of the Central Eurasian states and shows how their people repeatedly revolutionized Eurasian civilization. Beckwith recounts the Indo-Europeans' migration out of Central Eurasia, their mixture with local peoples, and the resulting development of the Graeco-Roman, Persian, Indian, and Chinese civilizations; he details the basis for the thriving economy of premodern Central Eurasia, the economy's disintegration following the region's partition by the Chinese and Russians in the eighteenth and nineteenth centuries, and the damaging of Central Eurasian culture by Modernism; and he discusses the significance for world history of the partial reemergence of Central Eurasian nations after the collapse of the Soviet Union. *Empires of the Silk Road* places Central Eurasia within a world historical framework and demonstrates why the region is central to understanding the history of civilization.

This book considers the applicability and use of civil society, both as a concept and in practice, in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan. The volume examines whether civil society organisations (CSOs) are a progressive force for change, or a safety net. Various forms of CSOs are investigated: NGOs and community based organisations, trade unions, political parties and religious groups, as well as more long-standing soviet and traditional institutions and practices. The book contains lessons and perspectives about civil society growth across time, and considers future directions.

The Development of Civil Society in Central Asia

The five central Asian States of Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan stand at the crossroads of world civilization. Influenced by South Asia, Iran, China and Russia, this region which has recently burst onto the world stage once again, guards a distinct identity. This collection by established experts on the area covers the dramatic Soviet interventions of the early twentieth century, and details the role of ethnicity and the contribution made by Islamic impulses in the process of building the modern nation states.

We must find new and innovative ways of conceptualizing transboundary energy issues, of embedding concerns of ethics or justice into energy policy, and of operationalizing response to them. This book stems from the emergent gap; the need for comparative approaches to energy justice, and for those that consider ethical traditions that go beyond the classical Western approach. This edited volume unites the fields of energy justice and comparative philosophy to provide an overarching global perspective and approach to applying energy ethics. We contribute to this purpose in four sections: setting the scene, practice, applying theory to practice, and theoretical approaches. Through the chapters featured in the volume, we position the book as one that contributes to energy justice scholarship across borders of nations, borders of ways of thinking and borders of disciplines. The outcome will be of interest to undergraduate and graduate students studying energy justice, ethics and environment, as well as energy scholars, policy makers, and energy analysts.

Energy Justice Across Borders

[Includes 12 maps and 4 tables] In recent years, the U.S. Army has paid increasing attention to the conduct of unconventional warfare. However, the base of historical experience available for study has been largely American and overwhelmingly Western. In *Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan*, Dr. Robert F. Baumann makes a significant contribution to the expansion of that base with a well-researched analysis of four important episodes from the Russian-Soviet experience with unconventional wars. Primarily employing Russian sources, including important archival documents only recently declassified and made available to Western scholars, Dr. Baumann provides an insightful look at the Russian conquest of the Caucasian mountaineers (1801-59), the subjugation of Central Asia (1839-81), the reconquest of Central Asia by the Red Army (1918-33), and the Soviet war in Afghanistan (1979-89). The history of these wars—especially as it relates to the battle tactics, force structure, and strategy employed in them—offers important new perspectives on elements of continuity and change in combat over two centuries. This is the first study to provide an in-depth examination of the evolution of the Russian and Soviet unconventional experience on the predominantly Muslim southern periphery of the former empire. There, the Russians encountered fierce resistance by peoples whose cultures and views of war differed sharply from their own. Consequently, this Leavenworth Paper addresses not only issues germane to combat but to a wide spectrum of civic and propaganda operations as well.

Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan [Illustrated Edition]

This book traces the establishment of a master narrative of the Middle Ages in Bulgaria and its evolution to the present day, including the attempt at a Marxist counter-narrative, thereby offering a critical analysis of Bulgarian historiographical views.

TRAVELLERS IN THE GREAT STEPPE

Dark Shadows is a compelling portrait of Kazakhstan, a country that is little known in the West. Strategically located in the heart of Central Asia, sandwiched between Vladimir Putin's Russia, its former colonial ruler, and Xi Jinping's China, this vast oil-rich state is carving out its place in the world as it contends with its own complex past and present. Journalist Joanna Lillis paints a vibrant picture of this emerging nation through vivid reportage based on 17 years of on-the-ground coverage, and travels across the length and breadth of this enigmatic country that lies along the ancient Silk Road and at the geopolitical and cultural crossroads where East meets West. Featuring tales of murder and abduction, intrigue and betrayal, extortion and corruption, this book explores how a president, Nursultan Nazarbayev, transformed himself into a potentate and the economically-struggling state he inherited at the fall of the USSR into a swaggering 21st-century monocracy. A colourful cast of characters brings the politics to life: from strutting oligarchs to sleeping villagers, from principled politicians to striking oilmen, from crusading journalists to courageous campaigners. This new edition features two additional chapters covering the aftermath of Nazarbayev's fall from power in 2019; the Chinese government's repressions against the Kazakhs of Xinjiang as part of its crackdown on Muslim minorities; and an Afterword reflecting on the tumultuous events of January 2022 in Almaty. Traversing dust-blown deserts and majestic mountains, taking in glitzy cities and dystopian landscapes, *Dark Shadows* conjures up Kazakhstan as a living, breathing place, full of extraordinary people living extraordinary lives.

Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America, Africa and Polynesia. The second part discusses the ways in which these international systems were brought into contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization – and their consequences on contemporary society. History of International Relations provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.

Mapping the Chinese and Islamic Worlds

This book seeks to deepen readers' understanding of world history by investigating urbanization and the evolution of urban systems, as well as the urban world, from the perspective of historical analysis. The theoretical framework of the approach stems directly from space-economy, and, more generally, from location theory and the theory of urban systems. The author explores a certain logic to be found in world history, and argues that this logic is spatial (in terms of spatial inertia, spatial trends, attractive and repulsive forces, vector fields, etc.) rather than geographical (in terms of climate, precipitation, hydrography). Accordingly, the book puts forward a truly original vision of urban world history, one that will benefit economists, historians, regional scientists, and anyone with a healthy curiosity.

Chinggis Khan was perhaps the most influential man of the last millennium, and yet he was not a Muslim. So, why is he included in a series profiling Makers of the Muslim World? In this novel perspective on a much-maligned figure, Michal Biran explains the monumental impact Chinggis Khan had upon the Islamic World, both positive and negative. Often criticized as a mass-slaughterer, pillager, and arch-enemy of the faith, Biran shows that his constructive influence upon Islam was also considerable - his legacy apparent in Central Asia even today.

Prince, Pen, and Sword: Eurasian Perspectives

Empires and Exchanges in Eurasian Late Antiquity offers an integrated picture of Rome, China, Iran, and the Steppes during a formative period of world history. In the half millennium between 250 and 750 CE, settled empires underwent deep structural changes, while various nomadic peoples of the steppes (Huns, Avars, Turks, and others) experienced significant interactions and movements that changed their societies, cultures, and economies. This was a transformational era, a time when Roman, Persian, and Chinese monarchs were mutually aware of court practices, and when Christians and Buddhists criss-crossed the Eurasian lands together with merchants and armies. It was a time of greater circulation of ideas as well as material goods. This volume provides a conceptual frame for locating these developments in the same space and time. Without arguing for uniformity, it illuminates the inter-connections and networks that tied countless local cultural expressions to far-reaching inter-regional ones.

The fall of the Soviet Union was one of the most dramatic events of this century. It was also one of the most surprising. Perhaps because many Sovietologists neglected its status as an empire, most Americans were taken completely by surprise when the USSR began its precipitous collapse under Mikhail Gorbachev. This book subjects the Soviet Union as an empire to systematic scrutiny, using tools and methods at the disposal of modern political science. Foreign policy specialists, defense experts, and Russian area analysts will find this book essential. The book is also recommended for undergraduate and graduate courses in Russian and Soviet history and the study of empires.
