Women's Employment

The measurement of communication, particularly in business situations, cannot be over emphasized. It is the foundation on which all significant managerial functions are based. It facilitates interaction at personal, interpersonal, and team levels for the execution of organizational goals and objectives. This book explains the basics components and functions of communication in a simple yet interesting way. This is a comprehensive introduction to modern business communication which integrates communication theory and practice and challenges many orthodox views of the communication process. Business Communication analyses how effective communication can be achieved in organizations that are changing to meet new social, economic and technological demands.

Rudiments of Business Communication

In Secession and Security, Ahsan I. Butt argues that states rather than separatists determine whether a secessionist struggle will be peaceful, violent, or genocidal. He investigates the strategies, ranging from negotiated concessions to large-scale repression, adopted by states in response to separatist movements. Variations in the external security environment, Butt argues, influenced the leaders of the Ottoman Empire to use peaceful concessions against Armenians in 1908 but escalated to genocide against the same community in 1915; caused Israel to reject a Palestinian state in the 1990s; and shaped peaceful splits in Czechoslovakia in 1993 and the Norway-Sweden union in 1905. Butt focuses on two main cases—Pakistani reactions to Bengali and Baloch demands for independence in the 1970s and India's responses to secessionist movements in Kashmir, Punjab, and Assam in the 1980s and 1990s. Butt's deep historical approach to his subject will appeal to policymakers and observers interested in the last five decades of geopolitics in South Asia, the contemporary Israeli-Palestinian conflict, and ethno-national conflict, separatism, and nationalism more generally.

Secession and Security

The book, illustrated by a child with autism spectrum disorder, can be used to open the discussion about children with special needs.

A Special Friend

Acclaimed for its unique ecosystem and Royal Bengal tigers, the mangrove islands that comprise the Sundarbans area of the Bengal delta are the setting for this pioneering anthropological work. The key question that the author explores is: what do tigers mean for the islanders of the Sundarbans? The diverse origins and current occupations of the local population produce different answers to this question – but for all, ‘the tiger question’ is a significant social marker. Far more than through caste, tribe or religion, the Sundarbans islanders articulate their social locations and interactions by reference to the non-human world – the forest and its terrifying protagonist, the man-eating tiger. The book combines rich ethnography on a little-known region with contemporary theoretical insights to provide a new frame of reference to understand social relations in the Indian subcontinent. It will be of interest to scholars and students of anthropology, sociology, development studies, religion and cultural studies, as well as those working on environment, conservation, the state and issues relating to discrimination and marginality.

Forest of Tigers

The Amnesty International Report 2012 documents the state of human rights in 155 countries and territories in 2011. Throughout the year the demand for human rights resounded around the globe. The year began with protests in countries where freedom of expression and freedom of assembly were routinely repressed. But by the end of the year, discontent and outrage at the failure of governments to ensure justice, security and human dignity had ignited protests across the world. A common strand linking these protests, whether in Cairo or New York, was how quick governments were to prevent peaceful protest and silence dissent. Those who took to the streets displayed immense courage in the face of often brutal crackdowns and overwhelming use of lethal force. In a year of unrest, transition and conflict, too many people are still denied their most basic rights. As demands for better governance and respect for human rights grow, this report shows that world leaders have yet to rise to the challenge.

Amnesty International Report 2012

The most comprehensive book ever written on leatherback sea turtles. Weighing as much as 2,000 pounds and reaching lengths of over seven feet, leatherback turtles are the world's largest reptile. These unusual sea turtles have a thick, pliable shell that helps them to withstand great depths—they can swim more than one thousand meters below the surface in search of food. And what food source sustains these goliaths? Their diet consists almost exclusively of jellyfish, a meal they crisscross the oceans to find. Leatherbacks have been declining in recent decades, and some predict they will be gone by the end of this century. Why? Because of two primary factors: human redevelopment of nesting beaches and commercial fishing. There are only twenty-nine index beaches in the world where these turtles nest, and there is immense pressure to develop most of them into homes or resorts. At the same time, longline and gill net fisheries continue to overwhelm waters frequented by leatherbacks. In *The Leatherback Turtle*, James R. Spotila and Pilar Santidrián Tomillo bring together the world's leading experts to produce a volume that reveals the biology of the leatherback while putting a spotlight on the conservation problems and solutions related to the species. The book leaves us with options: embark on the conservation strategy laid out within its pages and save one of nature's most splendid creations, or watch yet another magnificent species disappear.

The Leatherback Turtle

This book focuses on the core problems of occupational health, safety and well-being of workers in the informal sector in developing countries, where it accounts for most of the rural labour force and a substantial percentage of the urban labour force. The sector is characterised by low incomes, unstable employment and lack of protection in the form of legislation/policies or trade unions. Though some health and problem-solving measures have been introduced, a focused academic effort to address the problems confronting workers in the unorganised sector, or informal economy, is lacking. The book evaluates workers' physical and mental health in the context of labour migration, social inclusion of minorities and the differently abled, provisions for women workers, monetisation, occupational safety for hazardous work, and in connection with various areas of informal work, e.g. agriculture, construction, transportation, sanitation, tanning, the tobacco industry, powerloom industry, surrogacy,

and self-employment. It provides a well-rounded description of an analytical reflection on the challenges these workers face and focuses on social policy changes to help alleviate them. Accordingly, it offers a valuable asset for researchers and students interested in development studies, the sociology of work, health and labour economics, public health, and social work.

Health, Safety and Well-Being of Workers in the Informal Sector in India

Welcome to the Django Girls Tutorial! We are happy to see you here:) In this tutorial, we will take you on a journey under the hood of web technologies, offering you a glimpse of all the bits and pieces that need to come together to make the web work as we know it. As with all unknown things, this is going to be an adventure - but no worries, since you already worked up the courage to be here, you'll be just fine:)

Django Girls Tutorial

This book highlights state-of-the-art research on big data and the Internet of Things (IoT), along with related areas to ensure efficient and Internet-compatible IoT systems. It not only discusses big data security and privacy challenges, but also energy-efficient approaches to improving virtual machine placement in cloud computing environments. Big data and the Internet of Things (IoT) are ultimately two sides of the same coin, yet extracting, analyzing and managing IoT data poses a serious challenge. Accordingly, proper analytics infrastructures/platforms should be used to analyze IoT data. Information technology (IT) allows people to upload, retrieve, store and collect information, which ultimately forms big data. The use of big data analytics has grown tremendously in just the past few years. At the same time, the IoT has entered the public consciousness, sparking people's imaginations as to what a fully connected world can offer. Further, the book discusses the analysis of real-time big data to derive actionable intelligence in enterprise applications in several domains, such as in industry and agriculture. It explores possible automated solutions in daily life, including structures for smart cities and automated home systems based on IoT technology, as well as health care systems that manage large amounts of data (big data) to improve clinical decisions. The book addresses the security and privacy of the IoT and big data technologies, while also revealing the impact of IoT technologies on several scenarios in smart cities design. Intended as a comprehensive introduction, it offers in-depth analysis and provides scientists, engineers and professionals the latest techniques, frameworks and strategies used in IoT and big data technologies.

Internet of Things and Big Data Analytics Toward Next-Generation Intelligence

'A superbly researched and groundbreaking account of Soviet espionage in the Thirties ... remarkable' 5* review, Telegraph On the trail of Soviet infiltrator Agent Blériot, in this bestseller, Svetlana Lokhova takes the reader on a thrilling journey through Stalin's most audacious intelligence operation.

The Spy Who Changed History: The Untold Story of How the Soviet Union Won the Race for America's Top Secrets

Imagining Afghanistan examines how Afghanistan has been imagined in literary and visual texts that were published after the 9/11 attacks and the subsequent U.S.-led invasion—the era that propelled Afghanistan into the center of global media visibility. Through an analysis of fiction, graphic novels, memoirs, drama, and film, the book demonstrates that writing and screening “Afghanistan” has become a conduit for understanding our shared post-9/11 condition. “Afghanistan” serves as a lens through which contemporary cultural producers contend with the moral ambiguities of twenty-first-century humanitarianism, interpret the legacy of the Cold War, debate the role of the U.S. in the rise of transnational terror, and grapple with the long-term impact of war on both human and nonhuman ecologies. Post-9/11 global Afghanistan literary production remains largely NATO-centric insofar as it is marked by an uncritical investment in humanitarianism as an approach to Third World suffering and in anti-communism as an unquestioned premise. The book’s first half exposes how persisting anti-socialist biases—including anti-statist bias—not only shaped recent literary and visual texts on Afghanistan, resulting in a distorted portrayal of its tragic history, but also informed these texts’ reception by critics. In the book’s second half, the author examines cultural texts that challenge this limited horizon and forge alternative ways of representing traumatic histories. Captured by the author through the concepts of deep time, nonhuman witness, and war as a multispecies ecology, these new aesthetics bring readers a sophisticated portrait of Afghanistan as a rich multispecies habitat affected in dramatic ways by decades of war but not annihilated.

Imagining Afghanistan

The thoroughly revised and updated 4th edition of 101 Speed Tests for SBI & IBPS Bank PO Exam is based on the concept of TRP – Test, Revise and Practice. It aims at improving your SPEED followed by STRIKE RATE which will eventually lead to improving your SCORE. How is this product different? • Each test is based on small topics which are most important for the Bank PO exams. Each test contains 30 MCQs on the latest pattern. • The whole syllabus has been divided into 5 sections which are further distributed into 91 topics. • In the end of each section a Sectional Test is provided. • In all, the book contains around 3500 Quality MCQ’s in the form of 101 tests. • Solutions to each of the 101 tests are provided at the end of the book. • It is our strong belief that if an aspirant works hard on the cues provided through each of the tests he/ she can improve his/ her learning and finally the SCORE by at least 20%.

101 Speed Tests for IBPS & SBI Bank PO Exam 4th Edition

A sudden announcement was made by the government on 24 March 2020 of a complete lockdown of the country, due to the spectre of Coronavirus. India’s Migrant Workers and the Pandemic was being written as the crisis was unfolding with no end in sight. Migrant workers from different parts of India had no choice but to trek back hundreds of kilometres carrying their scanty belongings and dragging their hungry and thirsty children in the scorching heat of the plains of India to reach home. How did caste, race, gender, and other fault lines operate in this governmental strategy to cope with a virus epidemic? The eight papers in this collection, highlight the ethical and political implications of the epidemic—particularly for India’s migrant workers. What were the forces of power at play in this war against the epidemic? What measures could have been taken and need to be taken now? Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

India's Migrant Workers and the Pandemic

Millions of children are on the move, both within and between countries, with or without their parents. The conditions under which movement takes place are often treacherous, putting migrant children, especially unaccompanied and separated children, at an increased risk of economic or sexual exploitation, abuse, neglect and violence. Policy responses to protect and support these migrant children are often fragmented and inconsistent and while children on the move have become a recognised part of today’s global and mixed migration flows they are still largely invisible in debates on both child protection and migration.

Children on the Move

Catch Me If You Can meets Patricia Highsmith in this “stylish” (New York Times Book Review) page-turner of greed and obsession, survival and self-invention that is a piercing character study of one unforgettable female con artist. At the end of the 1990s, with the art market finally recovered from its disastrous collapse, Miss Rebecca Farwell has made a killing at Christie’s in New York City, selling a portion of her extraordinary art collection for a rumored 900 percent profit. Dressed in couture YSL, drinking the finest champagne at trendy Balthazar, Reba, as she’s known, is the picture of a wealthy art collector. To some, the elusive Miss Farwell is a shark with outstanding business acumen. To others, she’s a heartless capitalist whose only interest in art is how much she can make. But a thousand miles from the Big Apple, in the small town of Pierson, Illinois, Miss Farwell is someone else entirely—a quiet single woman known as Becky who still lives in her family’s farmhouse, wears sensible shoes, and works tirelessly as the town’s treasurer and controller. No one understands the ins and outs of Pierson’s accounts better than Becky; she’s the last one in the office every night, crunching the numbers. Somehow, her neighbors marvel, she always finds a way to get the struggling town just a little more money. What Pierson doesn’t see—and can never discover—is that much of that money is shifted into a separate account that she controls, “borrowed” funds used to finance her art habit. Though she quietly repays Pierson when she can, the business of art is cutthroat and unpredictable. But as Reba Farwell’s deals get bigger and bigger, Becky Farwell’s debt to Pierson spirals out of control. How long can the talented Miss Farwell continue to pull off her double life?

The Talented Miss Farwell

The book presents a collection of peer-reviewed articles from the International Conference on Advances and Applications of Artificial Intelligence and Machine Learning - ICAAAIML 2020. The book covers research in artificial intelligence, machine learning, and deep learning applications in health-care, agriculture, business, and security. This volume contains research papers from academicians, researchers as well as students. There are also papers on core concepts of computer networks, intelligent system design and deployment, real-time systems, wireless sensor networks, sensors and sensor nodes, software engineering, and image processing. This book will be a valuable resource for students, academics, and practitioners in the industry working on AI applications.

Applications of Artificial Intelligence and Machine Learning

Are you looking to be in tune with yourself and understand why you are the way you are and respond the way that you do? Are you looking to release thoughts and patterns which don't serve you anymore? We are all a combination of divine and human qualities. We all struggle with our flaws and triggers. Becoming conscious of them allows us to reclaim our power and rewrite a new path forward for ourselves. This is the first step to Becoming Whole. Written in a simple yet profound manner, each chapter in this book focuses on one aspect of your inner being that needs to be brought into wholeness. As you read this book, you will: * Respond to your triggers with a lot more self-awareness and begin to ask yourself, "What is this situation asking me to change about myself?" * Release your disappointments and victim stories, bringing much-needed growth and peace in your life. * Develop a strong sense of self-worth, by letting go of the need to seek validation from others. Are you ready to become whole? ABOUT THE AUTHOR: Pooja Khanna is a Wellness Entrepreneur, Public Speaker, Author and a Spiritual Wellness & Life Coach. She founded a platform connecting people to hundreds of holistic wellness practitioners and healers in New York. Formerly a Corporate Executive with an illustrious career spanning 13 years in top Fortune 100 companies, Pooja is an avid believer in bringing change in your life through deep inner work.

The Art of Becoming Whole

An enlightening guide and refreshing approach to sugar. This book, scientifically backed and complete with infographics born of decades of research and experience, aspires to inform both professionals and lay people alike on the controversial topic of sugar in health and nutrition, debunking common fearmongering myths in the process. It: - answers that important question of what you need to know about sugar - poses and then answers the question - what is the connection between sugar and energy? - reveals the answer to that all-important question - what does a teaspoon of sugar weigh and how many calories/kilojoules does it contain? - discusses the important role of leftovers - explains how to read the food label of common drinks and foods containing sugar - identifies the connection between atmospheric carbon dioxide and sugars - suggests the important information on how to lose and

maintain weight. What is the sugar-free diet? - informs about the power of marketing of sugar-containing foods - answers the questions you have always wanted to ask but didn't know where to go

For Goodness' Sake, Let's Talk Sugar

In this book, experts discuss whether volatility, uncertainty, complexity and ambiguity (VUCA) represent a challenge or a business opportunity. More intense debates on global climate change, increased turbulence in financial quarters, increased job insecurity and high levels of stress at the workplace are attracting attention in the context of organization behavior and entrepreneurship. Fear and confusion have become part and parcel of business, often undermining trust, cooperation and inspiration. As a response, a new way of organizing self-management has emerged. The book combines practical wisdom from East and West, to develop integrative self-management theory and practice; provides direction to support an integrative mind-set, integrative organization and integrative leadership; and presents VUCA as an opportunity and necessity for development and growth, rather than a threat.

Managing VUCA Through Integrative Self-Management

This book presents state-of-the-art theories and technologies and discusses developments in the two major fields: engineering and sustainable computing. In this modern era of information and communication technologies [ICT], there is a growing need for new sustainable and energy-efficient communication and networking technologies. The book highlights significant current and potential international research relating to theoretical and practical methods toward developing sustainable communication and networking technologies. In particular, it focuses on emerging technologies such as wireless communications, mobile networks, Internet of things [IoT], sustainability, and edge network models. The contributions cover a number of key research issues in software-defined networks, blockchain technologies, big data, edge/fog computing, computer vision, sentiment analysis, cryptography, energy-efficient systems, and cognitive platforms.

Sustainable Communication Networks and Application

India has taken so sharp a turn in recent years that the very centre has shifted considerably. What led to this swing? Is it possible to trace the path to this point? Is there a way back to the just, secular, inclusive vision of our Constitution-makers? This country has long been an outlier in its South Asian neighbourhood, with its inclusive Constitution and functioning democracy. The growth of Hindutva, in some sense, brings India in line with the other polities here. In *Our Hindu Rashtra*, writer and activist Aakar Patel peels back layer after layer of cause and effect through independent India's history to understand how Hindutva came to gain such a hold on the country. He examines what it means for India that its laws and judiciary have been permeated by prejudice and bigotry, what the breach of fundamental rights portends in these circumstances, and what the all-round institutional collapse signifies for the future of Indians. Most importantly, Patel asks and answers that most important of questions: What possibilities exist for a return? Thought-provoking and pulling no punches, this book is an essential read for anyone who wishes to understand the nature of politics in India and, indeed, South Asia.

Elements Of Practical Geography

This concise book shows you how experiential learning can be used to overcome the challenges posed in applying and delivering information technology (IT) to your business needs through an innovative, game-based approach. Technology innovations and evolving business models are part of a rapid change that is forcing corporate and management professionals to learn, deploy, and adopt IT in new ways in order to maintain a competitive advantage. Many are doing this through experiential learning. You'll begin by reviewing the basics of experiential learning and its relevance to IT, followed by six chapters that apply the hands-on concept through various scenarios. *Make IT Through Experiential Learning* one of your valued resources today. What You'll Learn: Innovative and proven IT-related application scenarios Generic management and leadership skill development Guidance for applying the learning methods for generating extraordinary results over conventional methods Who This Book Is For: IT professionals, higher education students, and those engaged in training and organizational development.

Our Hindu Rashtra

Knowledge of Asian business is dominated by conventional wisdom, much of which has achieved the status of myth. Bestselling author Michael Backman has researched beneath the surface to reveal the things that you need to know about Asian business and society. Using a wealth of examples, case studies and anecdotes, he provides a revealing and unconventional picture based around key business themes. Business, business culture and culture are entwined to draw the reader from the outside into becoming an Asian insider. Written in the author's direct, sharp style, *The Asian Insider* is a fascinating read for anyone wishing to get to grips with Asian business and understand how Asia really works.

Let Me Say it Now

The definitive biography of India's most loved leader and scientist Aeronautical engineer, rocket scientist, missile man, visionary, teacher and the most inspiring head of state in living memory - Avul Pakir Jainulabdeen Abdul Kalam was all these and more. Unquestionably the most revered Indian leader since Mahatma Gandhi, he transcended all the boundaries and obstacles that came his way in the course of a remarkable life; and he did so with grace and humility. Arun Tiwari tells Dr Kalam's life story with a deep understanding of his formative experiences and character and reveals him as a man personifying all the glory and paradoxes of his nation: secular and religious; exalted and humble; schooled and unaffected; dynamic and calm; scientific and spiritual - an Indian above all.

IT Through Experiential Learning

"This timely book sets the bar for Object Transaction Monitors (OTMs). Then it provides in-depth comparisons of the leading OTM contenders-including the dirt and the gotchas. As a result, you get a \$3,000 analyst report on the current state of OTMs for the price of a book. How could you pass it up? This book is must reading for anyone involved in middleware." -Robert Orfali, Author *Client/Server Survival Guide*, Third Edition. Are Object Monitors (OMs) really the universal alternative to multiple middleware products? What do they offer and how do they compare to other products on the market? How seriously should I take vendors' claims when it comes to our unique requirements? How do I select and use the best OM products for our current and future needs? This essential guide supplies the answers to these and all your questions concerning OM technology. You get impartial assessments of all the leading OM products, including: * IBM ComponentBroker. * Microsoft MTS. * Inprise ITS. * BEA M3. * Iona OrbixOTM. * Hitachi TPBroker. For each product, the authors describe: its architecture and integration with other vendor products; its conformance with CORBA and COM; how each works in real-world business applications; and marketing strategy. All this information is based on in-depth testing and hands-on investigation. You also get a framework for choosing the best product for your overall business, pinpointing application variances, recognizing similar product sets, and identifying future trends. On the companion Web site you'll find: * Regular product updates. * The latest OM technology news. * Links to other sites of interest.

A.P.J. Abdul Kalam

An in-depth look at DTCC, including its role in the capital markets, its structure, and its offerings and services.

Essential Guide to Object Monitors

There's a fine line between love and hate. For five years, Sally and Clive have been lost in a passionate affair. Now he has dumped her to devote himself to his wife and family, and Sally is left in freefall. It starts with a casual stroll past his house, and popping into the brasserie where his son works. Then Sally starts following Clive's wife and daughter on Facebook. But that's alright, isn't it? These are perfectly normal things to do. Aren't they? Not since *Fatal Attraction* has the fallout from an illicit affair been exposed in such a sharp, darkly funny, and disturbing way: *The Mistress's Revenge* is a truly exciting fiction debut. After all, who doesn't know an otherwise sane woman who has gone a little crazy when her heart was broken? "A cracking debut. . . very *Fatal Attraction* with a clever twist at the end. Addictive stuff." —The Bookseller

Phosphorescence: On awe, wonder & things that sustain you when the world goes dark

Communication has evolved over the years. Face-to-face interactions of the past have given way to technology-driven channels of communication in present times. Communication audit, crisis communication, financial communication, communication beyond boundaries, and corporate communication are the new buzzwords in the language of business. The second edition of *Business Communication for Managers*, aimed at all MBA students, begins by briefly analysing the various theories of communication. It demonstrates methods of effective communication through examples, real-life scenarios, and role-plays. It adopts a multi-dimensional and integrative approach to solve communication dilemmas at the workplace and touches upon the thoughts related to attention, perception, empathy, and professionalism

Guide to Clearance & Settlement

India has a long-standing tradition of dispute resolution through arbitration, with arbitral-type regulations going back to the eighteenth century. Today, amendments to the 1996 Indian Arbitration Act, a steady evolution of case law and new arbitral institutions position India's vibrant system once more at the forefront of international commercial dispute resolution. In this handbook, over forty members of the international arbitration community in India and beyond offer authoritative perspectives and insights into topics on arbitration that matter in India. International arbitration practitioners, Indian practitioners, and scholars have combined efforts to produce a practical and informative guide on the subject. Among numerous notable features, the contributors provide detailed analysis and description of such aspects of arbitration as the following, with a focus on the Indian context: Indian application of the 1958 New York Convention; law governing the merits of the dispute and awards; investor-state dispute settlement; drafting arbitration clauses for India-centric agreements; managing costs and time; rise of virtual arbitration and technology; effect of public policy in light of extensive Indian jurisprudence; and arbitration of claims relating to environmental damage. Practical features include checklists for drafting arbitration clauses and a comparative chart of major commercial arbitration rules applicable to India. Also included is a comparative analysis of arbitral regimes in India, Singapore and England; chapters on the India Model Bilateral Investment Treaty and ISDS reforms; a special section on the enforcement of foreign awards; a section on the drafting of the award guided by leading arbitrators and stakeholders and a review of the new 2021 ICC Rules. For foreign counsel and arbitrators with arbitrations in India, this complete and up-to-date analysis provides guidelines for practitioners, corporate counsel, and judges on considerations to be borne in mind with respect to arbitration with an Indian nexus and whilst seeking enforcement and execution of an arbitral award in India. It will prove an effective tool for students and others in understanding and navigating the particularities and peculiarities of India's system of domestic and international commercial arbitration.

The Mistress's Revenge

To a nation fed on classical music, the advent of Rahul Dev Burman with his repertoire of Western beats was a godsend. RD revolutionized Hindi film music in the 1970s, and with his emphasis on rhythm and beats, this Pied Piper of Hindi film music had young India swinging to his tunes. At the same time, this genius proved his many detractors who criticized him for corrupting popular taste wrong by composing some of the most influential raga-based songs in Hindi cinema and showing an immense comfort with all kinds of music, including Indian folk. *RD: The Man, The Music* looks at the phenomenon called R.D. Burman and how he changed the way Indians perceived Hindi film music. Through anecdotes and trivia that went into the making of Pancham's music - the many innovations he introduced, like mixed rhythm patterns, piquant chords and sound mixing - and through interactions with the musicians who were part of RD's team, the authors create a fascinating portrait of a man who, through his music, continues to thrive, even fifteen years after his death.

The Wonder That Was India

This book engages with the concept, true value, and function of democracy in South Asia against the background of real social conditions for the promotion of peaceful development in the region. In the book, the issue of peaceful social development is defined as the conditions under which the maintenance of social order and social development is achieved – not by violent compulsion but through the negotiation of intentions or interests among members of society. The book assesses the issue of peaceful social development and demonstrates that the maintenance of such conditions for long periods is a necessary requirement for the political, economic, and cultural development of a society and state. Chapters argue that, through the post-colonial historical trajectory of South Asia, it

has become commonly understood that democracy is the better, if not the best, political system and value for that purpose. Additionally, the book claims that, while democratization and the deepening of democracy have been broadly discussed in the region, the peace that democracy is supposed to promote has been in serious danger, especially in the 21st century. A timely survey and re-evaluation of democracy and peaceful development in South Asia, this book will be of interest to academics in the field of South Asian Studies, Peace and Conflict Studies and Asian Politics and Security.

Business Communication for Managers, 2/e

The popular image of the British Raj-an era of efficient but officious governors, sycophantic local functionaries, doting amahs, blisteringly hot days and torrid nights-chronicled by Forster and Kipling is a glamorous, nostalgic, but entirely fictitious. In this dramatic revisionist history, Jon Wilson upends the carefully sanitized image of unity, order, and success to reveal an empire rooted far more in violence than in virtue, far more in chaos than in control. Through the lives of administrators, soldiers, and subjects-both British and Indian-The Chaos of Empire traces Britain's imperial rule from the East India Company's first transactions in the 1600s to Indian Independence in 1947. The Raj was the most public demonstration of a state's ability to project power far from home, and its perceived success was used to justify interventions around the world in the years that followed. But the Raj's institutions-from law courts to railway lines-were designed to protect British power without benefiting the people they ruled. This self-serving and careless governance resulted in an impoverished people and a stifled society, not a glorious Indian empire. Jon Wilson's new portrait of a much-mythologized era finally and convincingly proves that the story of benign British triumph was a carefully concocted fiction, here thoroughly and totally debunked.

Arbitration in India

This comprehensive book applies modern economic principles to study a firm's strategic position. It focuses on a company's boundaries economics, transactions costs, economies of scale and scope and diversification, as well as industrial organization economics. It also covers strategic positioning and dynamics associated with internal organization.

R. D. Burman -The Man, The Music

Summarizes some of the wisdom accumulated by chemical process industry risk analysis practitioners and safety professionals, providing information on the applicability of quantitative risk analysis (QRA) to the chemical processing industry. Discusses essentials of QRA, outlines considerations for deciding when to apply QRA, and describes practical situations in which QRA may be used successfully. Overviews the process of setting up an individual QRA, discusses the importance of defining the right problem for analysis, and overviews various classes of QRA techniques.
