A towering figure in twentieth-century theatre in India, Habib Tanvir was an actor, director and playwright, working in Hindi and Urdu. He founded Naya Theatre in 1959, through which he created remarkable works, drawing on the history and traditions of the tribal folk of Chhattisgarh. This book brings together four of his most significant plays. *Agra Bazar* (1954), set amid the bustle of a colourful street market, is woven together by the wonderfully human voice of the poet Nazir, and examines important cultural and socioeconomic issues of the period. *Charandas Chor* (1975), Tanvir's most famous work, is about a folk hero who robs the rich and evades the law until he comes up against one wall he cannot scale--his own commitment to the truth. In *Bahadur the Wine-Seller* (1978), Tanvir reinvents a nearly forgotten Chhattisgarh folk tale about a mother-son relationship in which he finds a echoes of Oedipus, while in *The Living Tale of Hirma* (1985), he dramatizes a historical event in which a headstrong ruler of an Indian tribe clashes with a population who want to replace the tribal way of life with newfound ideals of democracy. Enriched by introductory texts and an intensive interview with

Tanvir that covers the milestones of his illustrious career, the book will be the perfect introduction to Tanvir's work for English-language theatre fans and scholars--back cover.

If you're at this point, you must be getting ready for your English language exams, so we have a few words of advice for you: Exams aren't bad. They're your opportunity to show off just how much you know about English--and you have been studying it since you were five, so you definitely know a thing or two! Don't worry about your exams--worry never changes anything--instead, try and see them as an opportunity to show off what you know. Practising exam papers is a good way to revise and, because this exam is still relatively new, there aren't that many past papers out there. The papers in this book have been created to try and replicate the exam experience for you. Some people might suggest using your literature texts for practice, but the whole point of this exam is that it is unseen: it's best to work on extracts you've never read before. There is more than one way to tackle an exam paper. You could sit it in one go and complete it in exam conditions from start to finish. You could go at the papers gently, with modelled examples in front of you to help (check out the videos at youtube.com/mrbruff). Another method is to try three question thirds all in a row, slide tackling your way through the paper. You might want to complete all of the Section B questions before beginning Section A. However you do it, take your time, and use the indicative content at the end to check your work. The indicative content isn't everything. You might make a point that we haven't included. Marking your own work is quite difficult so, although these are good to practise on, you should share with someone who understands the marking system to mark your work and give you feedback. This book is not a guide to the exam: it is a set of practice papers. For a detailed question-by-question guide to AQA English language, you should pick up a copy of 'Mr Bruff's Guide to GCSE English Language' in paperback on Amazon, or eBook at mrbruff.com. Please note: we are not endorsed by or affiliated to the AQA exam board. We are simply two experienced teachers creating resources.

A Voyage Towards the South Pole and Round the World

"A Voyage Towards the South Pole and Round the World" in 2 volumes is an inspiring personal account of the second voyage of James Cook, from 1772 to 1775, commissioned by the British government with advice from the Royal Society, which was designed to circumnavigate the globe as far south as possible to finally determine whether there was any great southern landmass, or Terra Australis. On his first voyage, Cook had demonstrated by circumnavigating New Zealand that it was not attached to a larger landmass to the south, and he charted almost the entire eastern coastline of Australia, yet Terra Australis was believed to lie further south. Alexander Dalrymple and others of the Royal Society still believed that this massive southern continent should exist. In the course of the voyage he visited Easter Island, the Marquesas, Tahiti, the Society Islands, Niue, the Tonga Islands, the New Hebrides, New Caledonia, Norfolk Island, Palmerston Island, South Sandwich Islands, and South Georgia, many of which he named in the process. Cook proved the Terra Australis Incognita to be a myth and predicted that an Antarctic land would be found beyond the ice barrier.

It is gradually being recognised by both Indigenous and non-Indigenous Australians that getting contemporary Indigenous governance right is fundamental to improving Indigenous well-being and generating sustained socioeconomic development. This collection of papers examines the dilemmas and challenges involved in the Indigenous struggle for the development and recognition of systems of governance that they recognise as both legitimate and effective. The authors highlight the nature of the contestation and negotiation between Australian governments, their agents, and Indigenous groups over the appropriateness of different governance processes, values and practices, and over the application of related policy, institutional and funding frameworks within Indigenous affairs. The

long-term, comparative study reported in this monograph has been national in coverage, and community and regional in focus. It has pulled together a multidisciplinary team to work with partner communities and organisations to investigate Indigenous governance arrangements-the processes, structures, scales, institutions, leadership, powers, capacities, and cultural foundations-across rural, remote and urban settings. This ethnographic case study research demonstrates that Indigenous and non-Indigenous governance systems are intercultural in respect to issues of power, authority, institutions and relationships. It documents the intended and unintended consequences-beneficial and negative-arising for both Indigenous and non-Indigenous Australians from the realities of contested governance. The findings suggest that the facilitation of effective, legitimate governance should be a policy, funding and institutional imperative for all Australian governments. This research was conducted under an Australian Research Council Linkage Project, with Reconciliation Australia as Industry Partner.

The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia- Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.

The Social Web (including services such as MySpace, Flickr, last.fm, and WordPress) has captured the attention of millions of users as well as billions of dollars in investment and acquisition. Social websites, evolving around the connections between people and their objects of interest, are encountering boundaries in the areas of information integration, dissemination, reuse, portability, searchability, automation and demanding tasks like querying. The Semantic Web is an ideal platform for interlinking and performing operations on diverse person- and object-related data available from the Social Web, and has produced a variety of approaches to overcome the boundaries being experienced in Social Web application areas. After a short overview of both the Social Web and the Semantic Web, Breslin et al. describe some popular social media and social networking applications, list their strengths and limitations, and describe some applications of Semantic Web technology to address their current shortcomings by enhancing them with semantics. Across these social websites, they demonstrate a twofold approach for interconnecting the islands that are social websites with semantic technologies, and for powering semantic applications with rich community-created content. They conclude with observations on how the application of Semantic Web technologies to the Social Web is leading towards the "Social Semantic Web" (sometimes also called "Web 3.0"), forming a network of interlinked and semantically-rich content and knowledge. The book is intended for computer science professionals, researchers, and graduates interested in understanding the technologies and research issues involved in applying Semantic Web technologies to social software. Practitioners and developers interested in applications such as blogs, social networks or wikis will also learn about methods for increasing the levels of automation in these forms of Web communication.

The whole world runs away from death, because death snatches everything, but the one who accepts it and willingly faces it, receives something from death itself. Ironically, knowledge of death gives you the gift of life. Katopanishad tells the story of young Nachiketa who goes to face the lord of death and the extraordinary dialogue that ensues between them. Upanishad means sitting close to the Master.

Gurudev takes us through this beautiful story integrating its profoundness with real-life situations, turning abstract philosophy into existential reality.

Exploring the Nexus Between Technologies and Human Rights

In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview

of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives.

'Art Arktis' explores the fragility and variety of a majestic, untouched world through a collection of fine-art photography. Dietmar Baum and Tini Papamichalis embarked on a three-week expedition, capturing landscapes otherwise guarded from the sights of mankind by ice with the help of Hasselblad's latest camera technology. Using their trained eyes and artistic points of view, the two have created seemingly surreal images--as if a scene from another planet was painted. The goal of this Antarctic excursion in February 2014 was to give insight into this fragile and pristine land, transporting the viewer to these solitary vistas. The stunning array of images of Antarctica evokes a lasting impression--to undoubtedly preserve this region because of its indisputable role in our planet's life. SELLING POINTS: * Following successful exhibitions the images can now be seen in a large-format coffee table book * Explore the wonders of Antarctica * A must for any enthusiast of polar landscapes 120 colour photographs

An analytical schism has developed over differing assessments of China's military modernization. Underlying this debate are at least two key questions. First, will the ongoing China's People's Liberation Army (PLA) modernization provide China with significant offensive power projection and/or preemptive capability? If so, by when? Second, does the pace and success of China's military modernization constitute a threat to the United States and/or its friends and allies in the Asia-Pacific region? At the source of these differing views on the pace and likely success of the PLA modernization is a lack of hard evidence, aggravated by a Chinese tendency to conceal both strengths and weaknesses. There are also analysts who are locked into positions on the PLA that the evidence seems unable to alter. Lack of information is often muddled by anecdotal knowledge, sometimes provided by Chinese interlocutors, that may be impossible to confirm or refute. In addition, a large body of conventional wisdom about the PLA has built up over time, which may inhibit fresh reassessment. Finally, peer comparisons of the PLA to the U.S. military, which is without equal in the post-Cold War period, may shape analysis of the PLA's capabilities and shortfalls. As a result, conclusions about China's military modernization often leave considerable room for interpretation on any side of an argument. The policy decisions made today based in part on the absence of hard analysis will likely haunt U.S. and allied policy and interests well into the 21st century, as China's comprehensive strength and historic aspirations mature. In order to minimize miscalculations about the PLA modernization, debate is essential, for it can help reduce the twin analytical evils of overestimation and underestimation. Debate can reduce wishful thinking or demonization about China's strategic capability and intentions. It may also preclude counterproductive self-imposed constraints on U.S. policy options based on fear of self-fulfilling prophecies of a China threat. Active debate, finally, can lead to a reevaluation of old, well-worn assumptions, and spur greater exploitation of publicly available information about the PLA and China's national security. All of this would potentially help to develop a clearer picture of China's People's Liberation Army After Next into the 21st century.

This new volume traces the normative, legal, institutional, and political responses to the challenges of assisting and protecting internally displaced persons (IDPs). The crisis of IDPs was first confronted in the 1980s, and the problems of those suffering from this type of forced migration have grown continually since then. Drawing on official and confidential documents as well as interviews with leading personalities, Internal Displacement provides an unparalleled analysis of this important issue and includes: an exploration of the phenomenon of internal displacement and of policy research about it; a review of efforts to increase awareness about the plight of IDPs and the development of a legal framework to protect them; a 'behind-the-scenes' look at the creation and evolution of the mandate of the Representative of the Secretary-General on IDPs; a variety of case studies illustrating the difficulties in overcoming the operational shortcomings within the UN system; a foreword by former UN high commissioner for refugees, Sadako Ogata. Internal Displacement will appeal to students and scholars with interests in war and peace, forced migration, human rights and global governance.

This book gives students a thorough overview of the environmental issues that impact the supply chain and details strategic methods of addressing the political, social, technological, market, and economic concerns that have caused organizations to reconsider their impact. Readers will learn how to integrate the fields of operations management, procurement and purchasing, logistics, and marketing into a successful green supply chain, looking outward to form sustainable partnerships rather than focusing their efforts within the company. Each chapter describes a function or dimension of green supply chains, supplemented with short vignettes to ground the theory in practice. The authors examine various industries, including electronics, food products, and manufacturing, and draw on case studies from the Americas, Europe, Asia, and Oceania, allowing students to compare and contrast domestic and international practices. Blending industry insights with the latest academic thinking, they also

consider hot button topics like global–local relationships, the role of third parties, green multitier supplier management, and blockchain technology management. Conclusive chapter summaries and plenty of visual aids help readers retain the information they need to improve environmental performance within, and beyond their organizations. Green Supply Chain Management is an excellent introduction to the topic for students and practitioners of supply chain management and environmental sustainability.

The Bauhaus was one of the 20th century's most influential cultural movements, yet at the same time it is regarded as the epitome of the Modernist design cliché: geometric, industrial, minimalistic. The publication »The Bauhaus #itsalldesign« disproves this cliché and takes a new, up-to-date look at the design of the Bauhaus. The book offers the very first comprehensive overview of the extended concept of design which was initiated at the Bauhaus showing the great interest of Bauhaus designers in social interconnections, experiments and processes. Alongside rare exhibits from design, architecture, art, film, and photography, the book documents the development processes as well as the socio-political concepts behind the Bauhaus. To underline their relevance for today's creative practise, these ideas are contrasted to current themes in design such as the digital revolution, and the works of numerous present-day artists and designers. Among others, Olaf Nicolai, Adrian Sauer, Wilfried Kühn and Joseph Grima created artistic works on the topic especially for the exhibition and the publication. The lavishly illustrated publication features essays by renowned authors, a glossary of key terms related to all aspects of the Bauhaus, as well as a detailed catalogue section.

Quintessentially fascinating, love intrigues and perplexes us, and drives much of what we do in life. As wary as we may be of its illusions and disappointments, many of us fall blindly into its traps and become ensnared time and again. Deliriously mad excitement turns to disenchantment, if not deadening repetition, and we wonder how we shall ever break out of this vicious cycle. Can psychoanalysis – with ample assistance from philosophers, poets, novelists, and songwriters – give us a new perspective on the wellsprings and course of love? Can it help us fathom how and why we are often looking for love in all the wrong places, and are fundamentally confused about “what love really is”? In this lively and wide-ranging exploration of love throughout the ages, Fink argues that it can. Taking within his compass a vast array of traditions – from Antiquity to the courtly love poets, Christian love, and Romanticism – and providing an in-depth examination of Freud and Lacan on love and libido, Fink unpacks Lacan’s paradoxical claim that “love is giving what you don’t have.” He shows how the emptiness or lack we feel within ourselves gets covered over or entwined in love, and how it is possible and indeed vital to give something to another that we feel we ourselves don’t have. This first-ever commentary on Lacan’s Seminar VIII, *Transference*, provides readers with a clear and systematic introduction to Lacan’s views on love. It will be of great value to students and scholars of psychology and of the humanities generally, and to analysts of all persuasions.

The Ashtavakra Gita, or the Ashtavakra Samhita as it is sometimes called, is a very ancient Sanskrit text. Nothing seems to be known about the author, though tradition ascribes it to the sage Ashtavakra; hence the name. There is little doubt though that it is very old, probably dating back to the days of the classic Vedanta period. The Sanskrit style and the doctrine expressed would seem to warrant this assessment. The work was known, appreciated and quoted by Ramakrishna and his disciple Vivekananda, as well as by Ramana Maharshi, while Radha-krishnan always refers to it with great respect. Apart from that the work speaks for itself. It presents the traditional teachings of Advaita Vedanta with a clarity and power very rarely matched. The Reverend John Henry Richards, MA, BD, was an Anglican priest born in 1934 who was ordained a deacon in Llandaff in 1977 and a priest there in 1978. He served in Maesteg, Cardiff, Penmark, and Stackpile Elidor until his retirement in 1999, and died in 2017. He is known for his English translations of the Ashtavakra Gita, the Dhammapada, and the Vivekachudamani, which he put in the public domain and distributed on the Internet in 1994. The text used here is the one revised in 1996

Take a poetic tour through the duff and get the dirt on the tiny, fascinating critters that live there. For all the kids who can't resist turning over a rock, science poetry maven Leslie Bulion presents nineteen lively ecological poems in a variety of verse forms about the "brown food web" and the creatures that live there—from bacteria and rove beetles to mushrooms and millipedes, and all of the other busy recyclers in between. Illustrator Robert Meganck adds to the fun with humorous and vivid, yet scientifically detailed, artwork. Science notes run throughout for added context, and thorough back matter includes a glossary, poetry notes, hands-on investigations, and other resources for cross-curricular learning.
