Our established, age-old notions of knowledge have ceased to be meaningful in postnormal times. What we define as true knowledge, and the ways in which we create it, have changed radically. The emergence of 'Big Data' and Artificial Intelligence, as well as 'fake news', 'alternative facts', 'deep fake', and 'post-truth' have changed the nature of knowledge production. Established disciplines, such as economics, sociology, anthropology, political science, have lost their significance. Revengeful capitalism, based on profit-driven algorithms, has not only led to environmental destruction, but has also ruined our understanding of what actually constitutes knowledge. In an era that defines societies by questions of knowledge, it becomes necessary and urgent to ask: how is knowledge produced, how is it distributed, and who decides what is true knowledge and what is not? Emerging Epistemologies explores the changing nature of knowledge production and investigates how emerging epistemologies are transforming our perceptions of the present and the future. The contributors to the volume examine digital landscapes, zombie disciplines, higher education, the role of metaphysics, and epistemological justice; and argue that epistemology does not exist in a vacuum but is determined and embedded in the worldview and culture of society. The chaos and contradiction that accompanies our increasingly complex world requires us to see through 'the smog of ignorance', and seek new ways of thinking and creating knowledge that promotes sustainability, diversity, social justice and appreciates different ways of knowing, being, and doing.

Emerging Epistemologies

This is a book of stories: tales of women who have 'made it'; ordinary women with extraordinary careers. You would not have known it from their histories for some even looked as though they were being groomed for failure. All of them are moving and inspiring! As I collected these tales, some of my old ideas about developing both men and women at work began to shift. In the past we have not been looking for relevantly outstanding qualities when choosing our leaders, and because of this we have not been spotting and developing potential talent in the best possible way. This book tells the story and looks at some of the most striking resemblances that these women seemed to share in common. It changed my life and my thinking around my own organisation and the work it does. It is a book for developers of people and recruitment professionals. It is a book for parents rearing the leaders of tomorrow. It is a book to make you think! This is a book for men and women with ambition for success and happiness. The two are not exclusive.

Assertion is one of our most important life skills, but very few people understand how to 'find their own voice' and then use it to get highly effective outcomes. Often people are so scared of conflict they will go to enormous lengths to avoid it, despite the fact that everyday many of us must both encounter and deal with conflict. Without assertion skills, people are placed at a severe social disadvantage, affecting their ability to progress beyond certain points in their career, relationships and own intellectual development. This Smart Therapy (ST) Assertion booklet, written by a highly experienced clinical psychologist, gives us a 'new take' on assertion and provides a clear, readable and easily applied method to help fill this crucial gap.

When a Loose Cannon Flogs a Dead Horse There's the Devil to Pay: Seafaring Words in Everyday Speech

A collection of meaningful messages to manage misgivings, surmount self-sabotage and submit to the super power of the soul. Written wildly to entertain and engage the wit of wild women, the twists of tales here electrify the light of life. Wild words send signals to chakra energy centres to break down blockages and balance the scales of sensibilities shook by silly and sorrowful situations. Wild ways often precede personal power by making sense of senselessly supressing self-love. It's a long learning

curve when your losses outweigh your wins. Words for Wild Women prompts reflection, developing a deeper understanding of why each misstep and misfortune on a wild road act as miles stones to self-mastery. The will of the wild is not motivated by madness, but rather a mission to overcome the heat from hell. Seek to ascend through the channels of change with love. Self-love.

Throughout his writing career, and especially in the last thirty years of his life, Aldous Huxley exhibited a deep interest in human potentialities, which he often described as our greatest unused natural resource. The present volume is the first book to focus on this Huxleyan core concern. It is based on presentations given at the Sixth International Aldous Huxley Symposium held in 2017 at the University of Almería (Spain). This volume collects essays by eleven scholars from eight countries that discuss Huxley's concept of human potentialities from an interdisciplinary perspective. This is another innovative feature of this book, since today Huxley is mainly remembered as a novelist, although only eleven of his fifty published works belong to that genre. The topics of this volume span Huxley's mature philosophy, including his theories relating to the expansion of consciousness, the development of nonverbal humanities, the need to improve bio-ethics, the role of nature, the role of beliefs and prejudice, and other subjects. These essays review Huxley's various positions, shedding light on their possible significance for today. Huxley marshalled his remarkable intellect to the project of improving the human condition, and here we find an up-to-date report card of his theories and their efficacy.

Aldous Huxley and Self-Realization

There are two entities that have dominated human thinking and faith from the dawn of civilization: God and the soul. Even though they have been obsessively discussed for thousands of years, by countless people, including many of humanity's greatest geniuses, the number of people today who can actually answer the simple questions, "What is God made of?" and "What is the soul made of?" is vanishingly small. Well, can YOU give the answer? If you can't, isn't it time you started studying Soul Science?

Stop Worrying; Start Writing

We are living in a defining moment, when the world in which teachers do their work is changing profoundly. In his latest book, Hargreaves proposes that we have a one-time chance to reshape the future of teaching and schooling and that we should seize this historic opportunity. Hargreaves sets out what it means to teach in the new knowledge society, to prepare young people for a world of creativity and flexibility and to protect them against the threats of mounting insecurity. He provides

inspiring examples of schools that operate as creative and caring learning communities and shows how years of "soulless standardization" have seriously undermined similar attempts made by many non-affluent schools. Hargreaves takes us beyond the dead-ends of standardization and divisiveness to a future in which all teaching can be a high-skill, creative, life-shaping mission because "the knowledge society requires nothing less." This major commentary on the state of today's teaching profession in a knowledge-driven world is theoretically original and strategically powerful? a practical, inspiring, and challenging guide to rethinking the work of teaching.

In this book, Yufang Ho compares the text style difference between the two versions of John Fowles' *The Magus*, exemplifying the methodological principles and analytic practices of the corpus stylistic approach. *The Magus* was first published in 1966 and was revised and republished by Fowles in 1977. Fowles' own comment on the second edition was that it was 'rather more than a stylistic revision.' The book explores how the revised version is linguistically different from the original, especially in terms of point of view (re) representation. The corpus stylistic approach adopted combines qualitative and quantitative comparison to confirm the overall text style difference. The analysis demonstrates that computer assisted methods can identify significant linguistic features which literary critics have not noticed and provide a more detailed descriptive basis for literary interpretation of (either edition) of the novel. This analysis of *The Magus* serves as a case study and exemplar of how corpus techniques may be used generally in the study of linguistics.

This inquiry may be thought of as a sequel to *The Concepts of Value* and as an extension of the brief core-vocabulary of aesthetic concepts found in one of the appendices to it. In terms of sheer numbers, most of the value concepts of our language are to be found in the area of human relations and of the aesthetic. There are also other value vocabularies, shorter but equally important, for example, the cognitive and logical. These and other objects of philosophical study (for example, the question of "other minds") deserve the kind of empirical survey that has been made of moral and aesthetic notions, if only to test a priori approaches to them. In the present study an even more determined empirical approach than that adopted for the first has been found necessary. Once the moral or human value vocabulary has been identified, sentential contexts for the use of the terms readily come to mind. In a study of the language of criticism, however, the vocabulary has first to be sought in the utterances of critics themselves and quoted in sufficient context to make their critical intentions clear. The outcome is that the present study is of great length, about half of it being quotations from critics. The rule adopted for arriving at this length go on collecting quotations as long as new types of appraisal came to light.

The Concepts of Criticism

The crisis facing the British monarchy is rushing headlong to catastrophe. To show the world that Britain is ready to embrace change, Prince James has embraced a royal referendum, to let the people decide who will be the next monarch. Will the British people accept James, a gay man, as their soon-to-be king? Or will they break with centuries of tradition and sidestep him to embrace his sister Alexandra, a woman who promises great reform? But the crisis extends much deeper than the tabloid headlines. James and his fiancée Andrew struggle to adjust to their newfound status in life and in the public while facing endless obstacles. With an indignant Church and affronted mothers trying to stand in their way and all of the drama in the palace regarding the new hot young servants, James is a tabloid headline away from losing it all. Meanwhile, Alexandra and Faisal's shaky marriage is on the verge of crumbling. She's willing to sacrifice her marriage—there's no cost too high—if it means she can win the royal referendum and become the Queen she knows she's destined to be and secure a royal future for her children. And in the background is Lizzie, the illegitimate daughter of Prince Richard and half-sister of James and Alexandra. She's all too happy to help if it means bringing her war against James to a bitter conclusion, and perhaps destroying the monarchy. One thing is clear: The battle for the line of succession is far from over.
