Plato and a Platypus Walk Into a Bar

Here's an accusation – Sherlock Holmes never deduced anything. When it comes to language, it all depends on what your definition of 'is' is. And one for the existentialists – you haven't lived until you think about death all the time. Daniel Klein and Thomas Cathcart take philosophy to task with flair and gusto in this wise and hilarious treasure of a book. Lively, original, and powerfully informative, Plato and a Platypus Walk Into a Bar... is an irreverent crash course through the great thinkers and traditions. It's philosophy for everyone, from the curious layperson to the professor who's seen it all. Klein and Cathcart have the knack of getting to the core of an issue in a crystal clear line, meaning there's more room for jokes – good jokes, clever jokes, jokes that'll have you laughing so hard the people nearby will shoot you strange looks. It's the philosophy class you wish you'd had and finally, it all makes sense!

Plato and a Platypus Walk Into a Bar--

Q. Why are there almost as many jokes about death as there are about sex? A. Because they both scare the pants off us. Thomas Cathcart and Daniel Klein first made a name for themselves with the outrageously funny New York Times bestseller Plato and a Platypus Walk into a Bar.... Now they turn their attention to the Big "D" and share the timeless wisdom of the great philosophers, theologians, psychotherapists, and wiseguys. From angels to zombies and everything in between, Cathcart and Klein offer a fearless and irreverent history of how we approach death, why we embrace life, and whether there really is a hereafter. As hilarious as it is enlightening, Heidegger and a Hippo Walk Through Those Pearly Gates is a must-read for anyone and everyone who ever expects to die. And now, you can read Daniel Klein's further musings on life and philosophy in Travels with Epicurus and Every Time I Find the Meaning of Life, They Change it.

Heidegger and a Hippo Walk Through Those Pearly Gates

"Every time I find the meaning of life, they change it." The words of Reinhold Niebuhr provide the title and set the tone for what is a wryly humorous look at some of the great philosophical pronouncements on the most important question we can face. Daniel Klein's philosophical journey began fifty years ago with just this conundrum; he began an undergraduate degree in philosophy at Harvard University to glean some clue as to what the answer could be. Now in his seventies, Klein looks back at the wise words of the great philosophers and considers how his own life has measured up. Told with the same brilliantly dry sense of humour that made *Travels with Epicurus* a Sunday Times bestseller, *Every Time I Find the Meaning of Life, They Change It* is a pithy, dry, and eminently readable commentary on one of the most profound subjects there is.

Every Time I Find the Meaning of Life, They Change It

Describes how the author journeyed to Greece with a suitcase full of philosophy books in order to learn how to achieve a fulfilling old age, explaining how he came to regard old age as a life stage filled with simple and heady pleasures.

"Milwaukee - not New York, Chicago or Los Angeles was the scene of a number of television firsts: The Journal Company filed the very first application for a commercial TV license with the FCC in 1938. The first female program director and news director in a major market were both at Milwaukee stations. The city was a major battleground in the VHF vs. UHF war that began in the 1950s. The battle to put an educational TV station on the air was fought at the national, state and local levels by the Milwaukee Vocational School. WMVS-TV was the first educational TV station to run a regular schedule of colorcasts, and WMVT was the site of the first long-distance rest of a digital over-the-air signal." "This detailed story of the rich history of the city's television stations since 1930 is told through facts, anecdotes, and quotations from the on-air talent, engineers, and managers who conceived, constructed, and put the stations on the air. Included are discussions of the many locally-produced shows - often done live - that once made up a large part of a station's broadcast day. Through these stories - some told here for the first time - and the book's extensive photographic images, the history of Milwaukee television comes alive again for the reader." "From the first early tests using mechanical scanning methods in the 1930s, through the first successful digital television tests, the politics, conflicts, triumphs, and failures of Milwaukee's television stations are described in fascinating detail." --Book Jacket.

Aristotle and an Aardvark Go to Washington

Is the Western world really post-Christian, or does Christianity simply need a reinterpretation? What did Dietrich Bonhoeffer mean by "religionless Christianity"? Is it passé? Or was it perhaps ahead of its time? In an era of dramatically increased religious pluralism and the emergence of large numbers of people identifying as "spiritual but not religious," so-called "religionless Christianity" can speak to those who find both biblicism and "belief-based" religion irrelevant. In this personal, witty, and timely book, New York Times bestselling author Thomas Cathcart takes readers on a journey into belief and unbelief and leads them through to the other side. Drawing from deep philosophical and theological wells, *There Is No God and Mary Is His Mother* demonstrates the meaningfulness of being a Christian in a secular age. Cathcart shows that, even absent traditional theological formulas and doctrines, Christianity can be a credible, meaningful, and practical means of negotiating worldly existence and experience. For Christians, *There Is No God and Mary Is His Mother* offers encouragement. For ex-Christians, it presents a different way of being a Christian than the one they've rejected. For atheists, it shows how

Christianity can be an ally in affirming the here and now. Religionless Christianity is possible and desirable wherever and whenever it awakens personal and social transformation.

There Is No God and Mary Is His Mother

Over the course of human history, the sciences, and biology in particular, have often been manipulated to cause immense human suffering. For example, biology has been used to justify eugenic programs, forced sterilization, human experimentation, and death camps—all in an attempt to support notions of racial superiority. By investigating the past, the contributors to *Biology and Ideology* from Descartes to Dawkins hope to better prepare us to discern ideological abuse of science when it occurs in the future. Denis R. Alexander and Ronald L. Numbers bring together fourteen experts to examine the varied ways science has been used and abused for nonscientific purposes from the fifteenth century to the present day. Featuring an essay on eugenics from Edward J. Larson and an examination of the progress of evolution by Michael J. Ruse, *Biology and Ideology* examines uses both benign and sinister, ultimately reminding us that ideological extrapolation continues today. An accessible survey, this collection will enlighten historians of science, their students, practicing scientists, and anyone interested in the relationship between science and culture.

The Trouble With Perfect

This is the first English translation of Proclus' commentary on Plato's Parmenides. Glenn Morrow's death occurred while he was less than halfway through the translation, which was completed by John Dillon. A major work of the great Neoplatonist philosopher, the commentary is an intellectual tour de force that greatly influenced later medieval and Renaissance thought. As the notes and introductory summaries explain, it comprises a full account of Proclus' own metaphysical system, disguised, as is so much Neoplatonic philosophy, in the form of a commentary.

Plato

In this book, Craig Blomberg addresses the tough questions about the place and purpose of wealth and material possessions in a Christian's life. He points to the goodness of wealth, as God originally designed it, but also surveys the Bible's many warnings against making an idol out of money. So are material possessions a blessing for which we should long? And what are the dangers that the use or abuse of material possessions can produce? Blomberg expounds upon how the sharing of goods and possessions is the key safeguard against both greed and covetousness. He expands on the concept of giving generously, even sacrificially, to those who are needier, demonstrating how Christians can participate in God's original good design for abundance and demonstrate the world-altering gospel of Christ. Is there any one key to keeping possessions in their proper, God-intended perspective? Are there limits on how rich we should become or on how poor we should allow others to get? What does a truly Christian economic system look like? How does the Bible's teaching on wealth fit into the gospel?

Little Big Minds

In the 1950s and 60s, Martin Heidegger turned to sculpture to rethink the relationship between bodies and space and the role of art in our lives. In his texts on the subject—a catalog contribution for an Ernst

Barlach exhibition, a speech at a gallery opening for Bernhard Heiliger, a lecture on bas-relief depictions of Athena, and a collaboration with Eduardo Chillida—he formulates his later aesthetic theory, a thinking of relationality. Against a traditional view of space as an empty container for discrete bodies, these writings understand the body as already beyond itself in a world of relations and conceive of space as a material medium of relational contact. Sculpture shows us how we belong to the world, a world in the midst of a technological process of uprooting and homelessness. Heidegger suggests how we can still find room to dwell therein. Filled with illustrations of works that Heidegger encountered or considered, *Heidegger Among the Sculptors* makes a singular contribution to the philosophy of sculpture.

Cindy Johaneck offers a new perspective on the ideological conflict between qualitative and quantitative research approaches, and the theories of knowledge that inform them. With a paradigm that is sensitive to the context of one's research questions, she argues, scholars can develop less dichotomous forms that invoke the strengths of both research traditions. Context-oriented approaches can lift the narrative from beneath the numbers in an experimental study, for example, or bring the useful clarity of numbers to an ethnographic study. A pragmatic scholar, Johaneck moves easily across the boundaries that divide the field, and argues for contextualist theory as a lens through which to view composition research. This approach brings with it a new focus, she writes. "This new focus will call us to attend to the contexts in which rhetorical issues and research issues converge, producing varied forms, many voices, and new knowledge, indeed reconstructing a discipline that will be simultaneously focused on its tasks, its knowledge-makers, and its students." *Composing Research* is a work full of personal voice and professional commitment and will be a welcome addition to the research methods classroom and to the composition researcher's own bookshelf. 2000 Outstanding Scholarship Award from the International Writing Centers Association.

Man is the Measure

SUNDAY TIMES BESTSELLER 'There to fill the Sapiens-size hole in your life' Observer In this groundbreaking global overview of philosophy, Julian Baggini travels the world to provide a wide-ranging map of human thought. One of the great unexplained wonders of human history is that written philosophy flowered entirely separately in China, India and Ancient Greece at more or less the same time. These early philosophies have had a profound impact on the development of distinctive cultures in different parts of the world. What we call 'philosophy' in the West is not even half the story. Julian Baggini sets out to expand our horizons in *How the World Thinks*, exploring the philosophies of Japan, India, China and the Muslim world, as well as the lesser-known oral traditions of Africa and Australia's first peoples. Interviewing thinkers from around the globe, Baggini asks questions such as: why is the West more individualistic than the East? What makes secularism a less powerful force in the Islamic world than in Europe? And how has China resisted pressures for greater political freedom? Offering deep insights into how different regions operate, and paying as much attention to commonalities as to differences, Baggini shows that by gaining greater knowledge of how others think we take the first step to a greater understanding of ourselves.
