Introduction

Conspectus of "Master and his Emissary" (Iain's Weltanschauung)

What is meaning?

On writing a 1,000 page book, and developing your own worldview

Why is God sometimes associated with "becoming" and not "being"?

How does the mind "bring the world about" rather than observe it?

Existence needs resistance

Nietzschean story of the Emissary, and the left-brain being contemptuous of the right

Not wanting a master, speaking to oneself, and evil

On "boredom" and the realness of time ("even God cannot exist without time")

Why the "arrow of time" in physics? (some thoughts on Bergson)

On Henri Bergson and flow vs slices of time

Language is like money (the "meaning" of language)

Music / painting / the arts be made explicit in language

Metaphor is a cure by language for the ills entailed by language

Reason is related to embodiment

Is "logic" universal? Would aliens develop them in the same manner?

Fantasy vs Imagination: "Original" isn't newness, but going back to the "origin"

The more we're authentic, the more we're the same

How can something both "be" and "not be" simultaneously

Wissen vs Kennen (knowledge)

On schizophrenia

Non-rhythmic music (right brained) vs rhythmic music (left brain)

Longing vs wanting (unification vs division)

Should you engage with the world or disengage?

The meaning of having "no self"

Identifying psychological structures neurologically (ego = left hemisphere?)

Utilitarianism, objective morals, and the left-hemisphere

On Daniel Dennett's "Consciousness Explained"

Writing a book about the right-brain, using your left-brain

Mindfulness is similarly "objective" like the schizophrenic mind?

Mixing the left and the right brain (coherent but incompatible)

Does consciousness reside in the left or right hemisphere

The world is not made out of "things"

Solving the "never step in the same river twice" paradox, with "being"

Reason / rationality in their extremes demonstrate their own limitations

Measuring intelligence via inhibitory neurons, rather than encephalization

Jung and McGilchrist [Sam Ford]

"Substitution effect" and its impact to the imbalance between right / left brain in the West [Joanne Dong]

The left / right distinction is a left phenomenon? [Ciaran Dudley]

Left / right hemispheres mapping onto the left / right political spectrum?

Reason vs rationality

The right brain should be paramount, according to Jesus?

How can something be more important than reason? Isn't that self defeating?

How can we "transcend utility"? On the hierarchy of goals / needs

On Chomsky and Objective Truth [Diego J. Pinto]

On Douglas Hofstadter's analogy book "Surfaces and Essences"

Thinking of time as a resource is a destructive idea (eg. "time is wasted")

Introduction

Hoffman's thought on the state of the country during COVID and what it entails about his theories
Why he meditates for 3 hours daily, and what type of practice it is

Hoffman's diet and health habits

On computational psychology (Hoffman's initial background)

Outlining (technically) the conscious agent model, and the motive force behind the lettering

Consciousness as primary to Being, as the impediment for rationalists

Why neural correlates aren't *just* correlates, but instead can play causal role (playing devil's advocate) and the limits of the "virtual reality" metaphor

Nima Armani Hamed's amplituhedron, and consciousness

Local hidden variables / realism may be saved, via loopholes in Bell's theorem

The assumption of uniform probability of fitness functions on cyclic groups, etc. is a problem for a theory that says our perceptions are non-veridical (ie. that they don't match "reality")

Evolution entails that we don't see the truth / reality as it is

On the over simplification of evolutionary models (outputting down to the Real Line of dimension 1 without further structure)

The intensity of meditation, and fear of letting go / fear of the unknown

Illusions are failures to guide adaptive behavior.

The various philosophical theories on truth (correspondence, pragmatic, deflationary, etc.)

Spacetime as a data compression tool for conscious agents

On the nature of causality

How is reality objective, when in Hoffman's model it's predicated exclusively on subjective agents

What is "you"? What is "identity"? What is the "self"? (Eastern religions vs Western religions)

How does Free Will fit into a stochastic model?

Douglas Hofstadter's "strange loop" model of consciousness & Tononi's Integrated information theory vs. Donald Hoffman's

Where God fits into all of this, as well as Hoffman's definition of God

What happens when you die?

Gödel's incompleteness theorem's implications for Hoffman's model

John Vervaeke's other forms of knowledge which aren't "propositional"

Landauer's limit (fastidious critiques)

On the moon not existing when you don't look at it

Do you see the same color red that I see? (and other experiences / qualia)

The paradox of pursuing truth, though truth is inimical (relative to fitness)

Where does Deepak Chopra take Hoffman's message too far + what Jesus meant by "I am the truth / the way / the life"
