Six Thinking Hats

The internationally bestselling guide to better thinking used by tens of thousands of people - fully revised and updated.

Six Thinking Hats

A leading authority on lateral thinking streamlines the decision-making process by identifying the central aspects of problem-solving and, by using real-life scenarios, describes how to focus thinking on each aspect individually, then link them into a productive progression.

Leadership Coaching

Leadership Coaching examines the models and techniques used to develop leadership in others through a coaching relationship. Looking at specific models, each contributor reviews the research which supports the model and then explores how the model can be of help in a coaching relationship. The book includes chapters on well known models such as Porter's Strategy model and Goleman's model of leadership styles. It also draws on work from both the western view of leadership, as well as other traditions such as using ancient writers of Sun Tzu and African myths.

Six thinking hats for schools : resource book for adult educators

This book summarises the ideas of educational theorists and psychologists of the last 60 years, from Elinor Goldschmied to Tina Bruce. It also looks at the important contemporary issues in early years education, from whether boys and girls learn differently to the role of the community in the early years setting.

How Children Learn - Book 3

Stimulating and developing the creative potential of all members of an organization (not just those in the more traditionally creative functions such as design or research and development) is widely seen as contributing to performance and results. This textbook introduces ideas, skills and models to help students understanding how creative thinking can aid problem-solving. The latest edition of this well-regarded book brings the story up to date whilst retaining popular features such as case studies and case histories together with extensive diagrams, examples and thought-provoking questions. New to this edition are sections on thinking styles and types, creativity and its role in innovation, implementation, and software aids to creativity. This rounded textbook will continue to be an ideal resource for a range of courses and modules across the business school curriculum including problem-solving, strategic management, creativity and innovation management.

Creative Problem Solving for Managers

"Negotiation: Science and Practice" is a university-level textbook and lecture series designed to teach effective skills and techniques in negotiation. It provides scientifically tested tools that allow anyone to construct and implement the best possible negotiation strategies, in any negotiation scenario. From this pack, students, like yourself, learn the art, science and practice of influence, as well as how to construct optimal agreements, whether you are negotiating a settlement in a legal dispute, a contract to sell a business, a ceasefire in a conflict zone, the sale of your own home, a price rise of the goods or services your company provides, a wage dispute with a powerful union or even an amendment to legislation. The lectures in this textbook are as follows: Lecture 1: Negotiation dynamics (available in full, for free, in the "sample") Lecture 2: Preparation for negotiation Lecture 3: Evaluation techniques Lecture 4: Influence Lecture 5: Cognitive biases, heuristics, errors and effects Lecture 6: Group dynamics Lecture 7: Logic and creativity Lecture 8: Parachutes, problems and tricks Lecture 9: Culture, human nature and individual difference Lecture 10: Enforcement mechanisms Lecture 11: Ethics, lying, the law and why good people do bad things Lecture 12: Alternative dispute resolution Lecture 13: Conflict This book contains: - A comprehensive lecture series (outlined above) - Week-by-week multiple choice questions (100+ pages) - Detailed answers and explanations to all week-by-week questions (50+ pages) - A mid-semester exam - A comprehensive reference glossary (200 pages) - Full academic abstracts to complement critical references (aiding a more detailed understanding and facilitating further exploration of the science behind each technique) - The most comprehensive examination of the psychology of negotiation available, with clear examples of how it can be used to achieve desired outcomes - The most comprehensive description of common "dirty tricks" in negotiation and how to respond to them - Detailed explanations of the law and how it affects you as a negotiator; including important case summaries - Step-by-step explanations of how to calculate the 'need-to-know' numbers in all negotiations

Creativity and Intuition in Management

This book presents a range of teaching strategies developed by teachers of literature who have heard the call from students, employers, and academic administrators for more relevant learning experiences in an ever-changing world. Integrating critical theory and classroom experience, the contributors to this book demonstrate how they foster learning, collaboration and cooperation, and creative thinking. The book abounds with descriptions of successful non-traditional teaching strategies. We see teachers collaborating across disciplines and across colleges, in some cases across countries and grade levels, and demystifying literary studies for students brought up on visual media. Many of the contributors lead their campuses in the use of computer-mediated communication and multimedia to support instruction. The chapters exemplify the shift from understanding teaching as "making students see what the teacher sees," to inviting them to engage texts together, as a community, and to learn how, with their teacher, knowledge and authority are culturally and socially constructed. In Learning Literature in an Era of Change practicing teachers offer their peers in literature and composition, and faculty developers, an exciting range of new models where professors are partners in learning, and where education is not delivered but discovered and disseminated.

Negotiation: Science and Practice

The Creative City is a clarion call for imaginative action in developing and running urban life. It shows how to think, plan and act creatively in addressing urban issues, with remarkable examples of innovation and regeneration from around the world. This revised edition of Charles Landry's highly influential text has been updated with a new, extensive overview.

Six Thinking Hats

Rekindles the spirit that some have lost and explores the problem retaining respect for human values in an increasingly systemized world.

Technology, Innovation and Entrepreneurship Part III: My Startup

Edward De Bono's Read more concept of 'Thinking Hats' has proven itself to be a way to ensure that students consider problems and issues from different perspectives; 'actively thinking'. This series includes books that teach the use of Edward de Bono's six thinking hats.

Learning Literature in an Era of Change

Creativity and Innovation for Managers will appeal to any manager responsible for getting more out of a business. Creative thinking, creative problem solving and creative idea generation have become essential business drivers. This book provides an excellent executive briefing for senior management to understand what business creativity is, how it can benefit the company, and how to get the most out of it. It looks at the pitfalls on the road to innovation and the ways to avoid them, pulling together the experiences of key practitioners in the field both in the UK and the US. By concentrating on the essentials, Creativity and Innovation In Brief is a waffle-free approach to creativity, providing a quick action focused and accessible insight into a complex topic. It provides; - a practical approach to business creativity without the hype; - an agenda for making innovation happen in your business - a real world view.

The Creative City

A collection of essays that examines recent advances in experiential learning, education and research practices. The text aims to help educators become aware of good practices and theoretical perspectives in the field.

The Paradox of Progress

This book provides a broad overview of the theory and practice of creativity and innovation. It is an interdisciplinary study that synthesizes the popular, complex and contemporary discourses on the topic. The approach of the book is centred on praxis, that is, it is grounded strongly in research-based theories, but aims to offer ideas on how to apply creativity and innovation in the everyday context. The authors present an expansive and well-informed perspective on creativity and innovation that transcends any single discipline or specialist area, making the book accessible, readable and memorable. Above all, the reader will be able read the book with a high degree of ease, grasp and retain key and critical concepts of creativity (and the creative process) and innovation (and the innovative process) as well as consider ways of applying them in their everyday lives across all vocations and professional contexts.

Thinking Hats

Whether you use budget, schedule, quality, or other criteria, the statistics by think tanks, institutes, associations, and other trade organizations all point to one inescapable conclusion: your project has a greater chance of getting into trouble than staying out of it. Based on the lessons learned by the author during a quarter of a century of lea

The Irish Journal of Psychology

Welcome to the proceedings of the inaugural Symposium on Collective Intelligence (COLLIN 2010). This was the first of a new series of events that will evolve over the coming years, and we were happy to hold the event in Hagen where the idea for this symposium was born. The participants visited Hagen in April, with excellent opportunities to get rain, wind and sun. Collective intelligence denotes a phenomenon according to which the purposeful interaction between individuals creates intelligent solutions and behaviors that might not have come to existence without this concerted effort of a community. The members of such communities form a social network, typically over the Internet. They are engage with each other over a sustained period of time to develop an area of innovation through collaboration and exchange of ideas, experiences and information. Leading-edge information and communication technologies (ICT) offer ample opportunities for enabling collective intelligence. COLLIN aims to become the flagship conference in the areas collective intelligence and ICT-enabled

social networking, which is attracting more and more researchers and practitioners from both academia and industry.

Six Thinking Hats

This book describes and defines the elements of the fourth industrial revolution and how the opportunities offered by sensorization, the Internet of Things, cloud computing, robotics, and the use of big data can benefit small to medium-sized enterprises. It first defines the terms of the latest technological advances and then suggests the ways in which these can be applied. Business is about meeting customer needs by delivering products and services to expectations at the appropriate quality and price and on time. When the appropriate digital tools are applied within a lean thinking framework using statistical control of all processes, the benefits to the customer and the enterprise are significant. Advances in industries such as fuel cells, battery technology, robots and clean energy solutions are briefly described. It is hoped that the readers and my clients will benefit from my experience as they further innovate and create their successful business ventures.

Conservation Policies for Sustainable Hillslope Farming

The importance and understanding of inclusiveness in education has become an integral part of the education system. With emphasis on the well-being of families and children alike, the concept of an inclusive learning environment continues to focus on the interests of the child as a whole, not their condition, and this approach is at the forefront of supporting their emotional and educational well-being. Now fully updated, this new edition of Supporting Inclusive Practice encourages the ongoing practice of inclusion with discussions, guidance and advice on how to build an inclusive environment. This book encourages debate, reflection and discussion when relating to the teaching of: children with English as an additional language gifted and talented children children with autism and physical and sensory disabilities children who have suffered loss, grief and bereavement children in Care or being 'looked after'. Helping you to promote children's independence and emotional resilience, and with advice on working with families and professional agencies, this book is integral to all those at university training to work in the education sector, as well as teachers and teaching assistants who are truly looking to achieve inclusive practice in their classroom.

Empowerment Through Experiential Learning

It is widely assumed that as we grow older there is a gradual decline in the way we use our brains. This book draws on acclaimed and proven scientific evidence to put forward a sensational brand-new theory which explodes the myth and shows that, with the right sort of mental and physical exercise, you can actually significantly improve your brain power as you get older. Drawing upon a wealth of fascinating facts and records, with studies of great geniuses such as Einstein and Goethe who improved with age, THE AGE HEARSY is packed with practical advice and guidance on how you can actively learn to enhance your memory, powers of creativity and concentration.

Creativity and Innovation

THE classic work about improving creativity from world-renowned writer and philosopher Edward de Bono. In schools we are taught to meet problems head-on: what Edward de Bono calls 'vertical thinking'. This works well in simple situations - but we are at a loss when this approach fails. What then? Lateral thinking is all about freeing up your imagination. Through a series of special techniques, in groups or working alone, Edward de Bono shows how to stimulate the mind in new and exciting ways. Soon you will be looking at problems from a variety of angles and offering up solutions that are as ingenious as they are effective. You will become much more productive and a formidable thinker in your own right. 'If more bankers and traders had read Lateral Thinking and applied the ideas of Edward de Bono to their own narrow definitions of risk, reward and human expectations, I suspect we would be in much better shape than we are' Sir Richard Branson Edward de Bono invented the concept of lateral thinking. A world-renowned writer and philosopher, he is the leading authority in the field of creative thinking and the direct teaching of thinking as a skill. Dr de Bono has written more than 60 books, in 40 languages, with people now teaching his methods worldwide. He has chaired a special summit of Nobel Prize

laureates, and been hailed as one of the 250 people who have contributed most to mankind. Dr de Bono's titles include classic bestsellers such as Six Thinking Hats, Lateral Thinking, I Am Right You Are Wrong, Teach Yourself How To Think, Teach Your Child How To Think, and Simplicity - all now re-issued by Penguin. www.edwdebono.com

Managing Projects in Trouble

En un mercado laboral incierto, sometido a un ritmo cada vez más vertiginoso, la flexibilidad y la adaptabilidad se convierten en factores clave para la dirección por proyectos. Esta realidad supone adaptarse a unas nuevas condiciones en las que se exigen resultados prácticamente inmediatos en el corto espacio de tiempo que dura el proyecto. En esa localización, los profesionales que coinciden —durante un período limitado— deben potenciar un conjunto de aptitudes, actitudes y comportamientos. El director del proyecto de trabajo tampoco escapa a esta realidad, en la que debe gestionar un equipo de colaboradores y ejercer su liderazgo para conducirlo y cumplir con el objetivo propuesto. Este libro muestra cómo liderar el equipo en el contexto de un proyecto a través de cuatro competencias que se pueden adquirir, estimular y desarrollar—la planificación, la comunicación, la motivación y la creatividad—, en las que el empoderamiento de los colaboradores se convierte en la pieza clave del proceso. A través de este libro, de un modo secuencial y mediante el autodiagnóstico personal, el lector adquiere los conocimientos y el método para el diseño, la puesta en marcha y el desarrollo de un proyecto de trabajo en el que el liderazgo se convierte en su mejor arma para gestionar los recursos y llegar a los objetivos trazados.

Six Thinking Hats for Schools

Focusing on effective time management, creativity, stress reduction, and spiritual advice, Fellers promises a lasting impact on your life.

Six Thinking Hats for Schools: Grades 3-5

The classic work about meetings and decision-making. Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles have been adopted by businesses and governments around the world, ending conflict and confusion in favour of harmony and productivity. The Six Hats strategy will fundamentally change the way you work and interact. 'An inspiring man with brilliant ideas. De Bono never ceases to amaze with his clarity of thought.' Sir Richard Branson
