Argumentative Essay

This Argumentative Essay study guide is created by Pamphlet Master for students everywhere. This tool has a comprehensive variety of college and graduate school topics/subjects which can give you what it takes to achieve success not only in school but beyond. Included in the pamphlet are:

- What is Argumentative Essay? - Formal vs. Informal Arguments - Sample Argumentative Essay
- Deductive arguments - Standard argument types - Inductive arguments - Defeasible arguments
- Argument by analogy -Transitional arguments - Argument in informal logic - A complete argument
- The five-paragraph essay - Longer argumentative essays

Writing Argumentative Essays

This brief rhetoric helps students develop strategies for critical reading, critical thinking, research, and writing that will help them argue clearly and convincingly. It teaches them to identify and develop arguments, to read and form reactions and opinions of their own, to analyze an audience, to seek common ground, and to use a wide, realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues. It includes clear explanations and examples of argument theory and reading and writing processes, research and documentation skills, and offers engaging, class-tested writing assignments and activities. 49 Essays for Analysis cover several broad issue and sub-issue areas, all of contemporary concern. Unique chapters discuss student argument styles, Rogerian argument, and argument and literature.

A Guide to Writing Argumentative Essays

Written as an essential guide for first-year university students, A guide to writing argumentative essays provides explanation and strategies for the successful completion of this popular form of assessment. This book takes the unique approach of catering for reading learners through definition and clarification of key aspects in essay writing (telling them how to write an essay), before focusing on visual learners with a sample essay that is deconstructed with the use of 25 figures (showing them how to write the essay). This easy-to-follow method not only increases student understanding of the different aspects of essay writing, but demonstrates the purpose and function of these aspects in a working sample. From the earliest stages of generating ideas, through brainstorming, to the final development of argument

and paragraphs, this resource will promote essay writing skills and assist in consistently achieving higher marks.

Mastering the 5-paragraph Essay

Meaningful, student-centered lessons and activities that include models and rubrics for teaching informational, narrative, persuasive essays!

Beyond the Five-paragraph Essay

Love it or hate it, the five-paragraph essay is perhaps the most frequently taught form of writing in classrooms of yesterday and today. But have you ever actually seen five-paragraph essays outside of school walls? Have you ever found it in business writing, journalism, nonfiction, or any other genres that exist in the real world? Kimberly Hill Campbell and Kristi Latimer reviewed the research on the effectiveness of the form as a teaching tool and discovered that the research does not support the five-paragraph formula. In fact, research shows that the formula restricts creativity, emphasizes structure rather than content, does not improve standardized test scores, inadequately prepares students for college writing, and results in vapid writing. In *Beyond the Five-Paragraph Essay*, Kimberly and Kristi show you how to reclaim the literary essay and create a program that encourages thoughtful writing in response to literature. They provide numerous strategies that stimulate student thinking, value unique insight, and encourage lively, personal writing, including the following: Close reading (which is the basis for writing about literature) Low-stakes writing options that support students' thinking as they read Collaboration in support of discussion, debate, and organizational structures that support writing as exploration A focus on students' writing process as foundational to content development and structure The use of model texts to write in the form of the literature students are reading and analyzing The goal of reading and writing about literature is to push and challenge our students' thinking. We want students to know that their writing can convey something important: a unique view to share, defend, prove, delight, discover, and inspire. If we want our students to be more engaged, skilled writers, we need to move beyond the five-paragraph essay.

Why They Can't Write

Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers.

The Tipping Point

'A wonderful page-turner about a fascinating idea that should affect the way every thinking person thinks about the world around him' Michael Lewis In this brilliant and original book, Malcolm Gladwell explains and analyses the 'tipping point', that magic moment when ideas, trends and social behaviour cross a threshold, tip and spread like wildfire. Taking a look behind the surface of many familiar occurrences in our everyday world, Gladwell explains the fascinating social dynamics that cause rapid change. 'Hip and hopeful, THE TIPPING POINT is like the idea it describes: concise, elegant but packed with social power. A book for anyone who cares about how society works and how we can make it better' George Stephanopoulos

Essays and Arguments: A Handbook for Writing Student Essays

How does one help undergraduate students learn quickly how to produce effectively organized, persuasive, well-reasoned essays? This book offers a straightforward, systematic introduction to some of the key elements of the construction of arguments in essay form. The focus here is on practical advice that will prove immediately useful to students—recommended procedures are emphasized, and detailed examples of academic and student writing are provided throughout. The book introduces the basics of argumentation before moving on to the structure and organization of essays. Planning and outlining the essay, writing strong thesis statements, organizing coherent paragraphs, and writing effective introductions and conclusions are among the subjects discussed. A separate section concisely explores issues specific to essays about literary works.

Academic Writing, Real World Topics

Academic Writing, Real World Topics fills a void in the writing-across-the-curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division; and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, Academic Writing, Real World Topics introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader, or from one of many resources included in each chapter's Suggested Additional Resources. Part II, Real World Topics, also refers extensively to the Guide. Thus, the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content.

Authoring a PhD

This engaging and highly regarded book takes readers through the key stages of their PhD research journey, from the initial ideas through to successful completion and publication. It gives helpful guidance on forming research questions, organising ideas, pulling together a final draft, handling the viva and getting published. Each chapter contains a wealth of practical suggestions and tips for readers to try out and adapt to their own research needs and disciplinary style. This text will be essential reading for PhD students and their supervisors in humanities, arts, social sciences, business, law, health and related disciplines.

Pondering on Problems of Argumentation

Pondering on Problems of Argumentation is a collection of twenty essays brought together for anyone who is interested in theoretical issues in the study of argumentation. This collection of papers gives the reader an insightful and balanced view of the kind of theoretical issues argumentation theorists are currently concerned with. Because most of the perspectives on argumentation that are en vogue are represented, this volume provides a multidisciplinary and even interdisciplinary outlook on the current state of affairs in argumentation theory. Some of the contributions in Pondering on Problems of Argumentation deal with problems of argumentation that have been recognized as theoretical issues for a considerable time, like the problems of fallaciousness and identifying argumentation structures. Other contributions discuss issues that have become a focus of attention only recently or regained their prominence, such as the relationship between dialectic and rhetoric, and the strategic use of the argumentative technique of dissociation. In five separate sections papers are included dealing with argumentative strategies, problems of norms of reasonableness and fallaciousness, types of argument and argument schemes the structure of argumentation and rules for advocacy and discussion.

Invisible Forces

Educators consistently identify student motivation as a top concern, particularly during the transition to college, but often feel helpless to influence it. Some assume that students are simply motivated

or not. Others are daunted by trying to shape an unobservable psychological phenomenon. Invisible Forces provides a framework for thinking of student motivation as a set of internal "mindsets" that are promoted or thwarted through a complex ecology of personal, classroom, institutional, and systemic factors. Using the method of portraiture, Pei Pei Liu brings this ecology to life. The book presents a series of four rich case studies of educators' efforts to support student motivation and the challenges they encounter in secondary and postsecondary writing classrooms. Attuned to the unique status of writing-based courses as a near universal academic experience throughout the transition from high school to college, these portraits shed light on different strategies, make a case for institutional support of instructors, and pave the way for greater alignment between secondary and postsecondary settings.

Critical Thinking, fifth edition

William Hughes's Critical Thinking, revised and updated by Jonathan Lavery, is a comprehensive and accessible introduction to the essential skills required to make strong arguments. Hughes and Lavery give a thorough treatment of such traditional topics as deductive and inductive reasoning, logical fallacies, the importance of inference, how to recognize and avoid ambiguity, and how to assess what is or is not relevant to an argument. The authors also cover less traditional topics such as special concerns to keep in mind when reasoning about ethical matters, and how the nature of a language can affect the structure of an argument. In addition to covering basic concepts for analyzing and assessing arguments, the text also has two chapters that are designed to help students write argumentative essays. Last but not least, Critical Thinking includes a selection of logical paradoxes and puzzles that are as entertaining as they are enlightening. For the fifth edition particular attention has been paid to the needs of Canadian students and instructors.

Suggestions to Medical Authors and A.M.A. Style Book

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the *Orwell's Essays* series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' – 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' – and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can – and must – be rediscovered with every age.' — *Irish Times*

Why I Write

This book explores how value and quality are established in markets and society by means of a series of empirical studies across a diverse set of topics. It contributes to the sociology of markets, as well as connecting to the larger issue of the constitution of social order through classification.

Constructing Quality

'Shoot all the bluejays you want, if you can hit 'em, but remember it's a sin to kill a mockingbird' Meet Scout, the narrator of this book. Her story is one of Deep South summers, fights at school and playing in the street. The spooky house of her mysterious neighbour, Boo Radley, sags dark and forbidding nearby. Her brother, Jem, and her friend, Dill, want to make Boo come outside. Her story is about justice. When Scout's father, a lawyer, agrees to defend a black man against an accusation by a white girl, he must battle the prejudice of the whole town. It's about imagination - not just the kind you need for childhood games. Because you never really know a man until you stand in his shoes and walk around in them. *Vintage Children's Classics* is a twenty-first century classics list aimed at 8-12 year olds and

the adults in their lives. Discover timeless favourites from *The Jungle Book* and *Alice's Adventures in Wonderland* to modern classics such as *The Boy in the Striped Pyjamas* and *The Curious Incident of the Dog in the Night-Time*.

Paragraph Development helps students edit their own writing for clarity and accuracy and offers a three-phase strategy for building writing skills through planning, writing, and revising. The approach in each chapter is direct and functional: a model is provided and graphically explained, then students use the model to write their own paragraphs.-- Offers controlled information-transfer exercises, a choice of writing topics, and peer consultation and writing-evaluation methods.

A Rulebook for Arguments

The Genre of Argument is a rhetoric that defines the distinguishing characteristics of the argument paper, which students can understand easily once they are aware of its context and purpose. By looking at argument as a genre, students gain insight into how purpose influences many features of successful argumentative writin. Students are led to find the problem within a topic and develop a position or thesis in response to that situation. The overt consideration of genre will help students to apply generic conventions in a multiplicity of contexts.

Uptaught

The ability to write an argumentative essay is an essential skill for every student to learn. Learning how to write the argumentative essay begins in secondary education, but it doesn't stop there. The argumentative essay is a specific style of essay that chooses and defends a side in a debate or topic with multiple perspectives both for and against it. Developing an argumentative essay requires research, analysis and understanding of rhetoric, logical fallacies, and creating a defense supported by evidence. Learning how to write a proper argumentative essay is crucial for being able to enhance, practice, and apply critical thinking skills as well as being able to use rhetoric to defend any topic regardless of personal opinion. This book will teach students and learners of any age how to write an argumentative essay. It will take an introductory approach and assume that the reader has never written an argumentative essay before. This book will teach students: ?What an argumentative essay is?What rhetoric is?What logical fallacies are?The basic structure to an argumentative essay?How to organize an argumentative essay?How to write an argumentative essayWhile a person or student may excel at critical thinking skills, it can be difficult to organize those thoughts into a coherent essay that clearly communicates a position and defense of an argumentative topic. Learn the basics and transform your writing into proficient communication and convincing rhetoric.

Oregon Writes

This volume is the second in the series covering the many issues and concepts of how inquiry-based learning (IBL) can be applied to arts, humanities and social sciences programs.

Bathudi and Sounti Tribes

A pioneering exercise in the bio-anthropological study on the two lesser known scheduled tribes of Orissa, rich with empirical data generated from 59 different villages and compared with the similar earlier studies of various tribal populations of neighbouring states.

Anthropos

Next to Africa, India has the largest tribal population (67.7 million) in the world. Indian tribes, spread over the length and breadth of the country, are concentrated in hilly and forest regions. The tribes of India differ considerably from one another in race, language culture and beliefs, and present a spectacle of striking diversity. It is this diversity marked by varied social characteristics and diverse cultural traditions and linguistic traits that lends lustre to the cultural mosaic of India. Encyclopaedia Profile of Indian Tribes, first of its kind, seeks to present a concise but comprehensive account of the socio-cultural profile of all the tribal communities who have been declared as Scheduled Tribes by the Government of India. The tribes are arranged alphabetically in order to facilitate easy reference. Each profile deals with the geographical distribution of the tribal population, the social structure, the means of subsistence and economic organisation, religious beliefs and practice, the political institutions, and modern social changes sweeping the community. At the end of each profile, there is a short bibliography for the more inquisitive reader. Each entry in this four volume set has been contributed by a scholar who has deep personal knowledge and contact with the community. This classic multi-volume set will be extremely useful to scholars studying tribals in India and abroad and to all those interested in a standard reference work on the Indian tribes.

Accessions List, South Asia

Orissa is the home of 62 scheduled tribes. But comparatively very little research has been done on the socio-economic life of the tribals. This is a pioneering work to combine the studies and analyses by historians, anthropologists, psychologists, economists and literary critics on the changing society of the tribals. As a combined effort of many academicians the book gives a wide coverage on the study of Orissan tribals, to make it a worthwhile addition to the available material on the subject.

A plethora of literature is available and various studies have been undertaken on different aspects of tribal development. But very few on the analysis of tribal problems vis-à-vis programmes/policies for their development has remained more or less unexplored. The present study has attempted to plug this critical gap. In this book the author has delved deeper into the genesis of tribal problems, critically examined the programmes for their development in the past and present and offered some valuable insights for lifting them out of the morass of poverty and stagnation. It has traced successive shifts in tribal development policies and strategies at different points of time. A thumbnail picture has been presented on impact of the programmes on the stakeholders through case studies conducted in a remote district of a poverty ridden state. The results of the field study tend to conceptualise that despite input in terms of money and material and the so called coveted efforts and endeavours of public servants, there is an abysmal mismatch between the objectives and achievement. We are still far away from the point of their conscientisation. The study will be of immense academic and practical worth. The comprehensive analysis and critical review presented in this book on an important aspect of tribal development and finally the policy prescriptions suggested make it imperative reading for economists,

anthropologists, planners, policy makers, administrators and members of the academic and research organizations.

Anthropology of Small Populations

In this compelling social history, William R. Pinch tackles one of the most important but most neglected fields of the colonial history of India: the relation between monasticism and caste. The highly original inquiry yields rich insights into the central structure and dynamics of Hindu society—insights that are not only of scholarly but also of great political significance. Perhaps no two images are more associated with rural India than the peasant who labors in an oppressive, inflexible social structure and the ascetic monk who denounces worldly concerns. Pinch argues that, contrary to these stereotypes, North India's monks and peasants have not been passive observers of history; they have often been engaged with questions of identity, status, and hierarchy—particularly during the British period. Pinch's work is especially concerned with the ways each group manipulated the rhetoric of religious devotion and caste to further its own agenda for social reform. Although their aims may have been quite different—Ramanandi monastics worked for social equity, while peasants agitated for higher social status—the strategies employed by these two communities shaped the popular political culture of Gangetic north India during and after the struggle for independence from the British.

It is widely believed that, because of its exceptional social development, the caste system in colonial Bengal differed considerably from the rest of India. Through a study of the complex interplay between caste, culture and power, this book convincingly demonstrates that Bengali Hindu society preserved the essentials of caste discrimination in colonial times, even while giving the outward appearance of having changed. Using empirical data combined with an impressive array of secondary sources, Dr Bandyopadhyay delineates the manner in which Hindu caste society maintained its cultural hegemony and structural cohesion. Starting with an examination of the relationship between caste and power, the book examines early cultural encounters between `high` Brahmanical tradition and the more egalitarian `popular` religious cults of the lower castes. It moves on to take a close look at the relationship between caste and gender showing the reasons why the reform movement for widow remarriage failed. It ends with an examination of the Hindu `partition` campaign, which appropriated dalit autonomous politics and made Hinduism the foundation of an emergent Indian national identity. Sekhar Bandyopadhyay breaks with many of the assumptions of two important schools of thought—the Dumontian and the subaltern—and takes instead a more nuanced approach to show how high caste hegemony has been able to perpetuate itself. He thus takes up issues which go to the heart of contemporary problems in India's social and political fabric.

India and the Rights of Indigenous Peoples

This book examines the politics and culture of eastern India's landed chiefs.

Tribals of Orissa

This richly informative book is perhaps the first book written for American students of international education, comparative education, and government by an Indian scholar familiar with both cultures. Dr. Shrimali received his Ph.D. from Teachers College, Columbia University, and has taught in this country. What he has to say about education in the land of Dharma is as valuable as it is interesting. By democracy, Dr. Shrimali means education, which he equates with freedom and equal opportunity. Dr. Shrimali highlights the major problems of his country's population, culture, and politics in discussing, in some detail, India's modern history since separation, and he pays special attention to Indian characteristics and institutions which, he feels, have hindered India's development as a nation. Highly

critical of the English heritage in India, Dr. Shrimali offers scant hope for democracy in India unless there is radical change in some of her institutions."

The Tribes and Castes of Bengal

This book analyses efforts to advance the rights of Indigenous People within peace-building frameworks: Section I critically explores key issues concerning Indigenous Peoples' Rights (struggles for land, human, cultural, civil, legal and constitutional rights) in connection with key approaches in peace-building (such as nonviolence, non-violent strategic action, peace education, sustainability, gender equality, cultures of peace, and environmental protection). Section II examines indigenous leaders and movements using peace and non-violent strategies, while Section III presents case studies on the successes and failures of peace perspectives regarding contributions to/ developments in/ advancement of/ barriers to the rights of Indigenous Peoples. Lastly, Section IV investigates what advances have been achieved in Universal Indigenous Peoples' Rights in the 21st century within the context of sustainable peace.

The study of social networks is a new but fast widening multidisciplinary area involving social, mathematical, statistical and computer sciences for application in diverse social environments; in the latter sciences, and specially for the field of Economics. It has its own parameters and methodological tools. In 'Models for Social Networks with Statistical Applications', the authors show how graph-theoretic and statistical techniques can be used to study some important parameters of global social networks and illustrate their use in social science studies with some examples in real life survey data.

Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development. Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the compilation of lists. Recently, these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and, as a consequence, have used a much more ecological approach. This manual of ethnobotanical methodology will become an essential tool for all ethnobiologists and ethnoecologists. It fills a significant gap in the literature and I only wish it had been available some years previously so that I could have given it to many of my students. I shall certainly recommend it to any future students who are interested in ethnoecology. I particularly like the sympathetic approach to local peoples which pervades this book. It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained researchers. A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied. This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders.

4e de couv.: This volume presents the results of a pioneering anthropological documentation of hitherto unknown traditions of sacred music performed by marginalised musicians and priest-musicians of the Bora Sambar region of western Odisha. The work is based on ethnographic research in rural regions of western Odisha conducted between the years 2002 - 2010. The study presents the first documentation of a unique sound culture of India, Odisha. Local music is analysed as an indigenous theory, thus as a crucial medium of religion, culture and politics.

This delicious new series from New York Times bestselling author Lisa Papademetriou is a real treat! Hayley has a knack for baking cupcakes with all sorts of ingredients, from cocoa to peanuts to even Thai curry! She and her little sister, Chloe, have just moved into their grandmother's house with their

mom, who divorced their dad a year ago and has just been laid off from her job. Hayley often helps out at her grandmother's tea shop, where she gets to practice her cupcake-baking skills. She makes a batch for her new class only to learn that the PTA president's daughter is allergic to gluten. Before she even gets a chance to share her gluten-free cupcake recipe, Hayley finds out that the PTA may institute a school-wide cupcake ban. Now it's up to Hayley and her new friends to "Save the Cupcake!"

The traditional understanding of Shiva told through stories and teachings from the Shiva Mahapurana • Explains Shiva's contradictory forms, such as destroyer or benefactor, and how his form depends on the needs of the devotee • Reveals how Shiva's teachings allow one to see through the illusions at the root of all grief and alienation in human life • Explores Shiva's relationships with Durga, Shakti, Sati, and Parvati and with his sons Ganesha and Kartikeya Shiva, the most ancient and complex deity of the Hindu pantheon, has been portrayed in many contrasting lights: destroyer and benefactor, ascetic and householder, wild demon slayer and calm yogi atop Mount Kailash. Drawing from the Hindu sacred text the Shiva Mahapurana--said to be written by Shiva himself--Vanamali selects the essential stories of Shiva, both those from his dark wild side and those from his benevolent peaceful side. Vanamali discusses Shiva's many avatars such as Shambunatha and Bhola, as well as Dakshinamurti who taught the shastras and tantras to the rishis. She explores Shiva's relationships with Durga, Shakti, Sati, and Parvati and with his sons Ganesha and Kartikeya. Examining Shiva's acceptance of outsiders, Vanamali explains why ghosts and ghouls are his attendants and why his greatest devotees are demon kings, like Ravana. She includes famous Shiva stories such as the Descent of the River Ganga and Churning the Milky Ocean as well as those that reveal the origin of the festival of lights, Diwali; his creation of the cosmic couple, or hierogamos; and how Shiva and Parvati taught the world the secrets of Kundalini Shakti. The author also draws upon Shaivite teachings to illustrate the differences between Western science and Vedic science and their explanations for the origins of consciousness. Integrating Shiva's two sides, the fierce and the peaceful, Vanamali reveals that Shiva's form depends on the needs of the devotee. Understanding his teachings allows one to see through the illusions at the root of all grief and alienation in human life, for Shiva is the wielder of maya who does not fall under its spell. While Ganesha is known as the remover of obstacles, Shiva is the remover of tears.

The Prospects for Democracy in India

Before the 1st edition of the Textbook of Pediatric Emergency Medicine published, there was no official pediatric emergency medicine subspecialty in either pediatrics or emergency medicine. This book defined many of the treatments, testing modalities procedural techniques and approaches to care for the ill and injured child. As such, it was written with both the pediatrician and the emergency physician in mind. The Textbook of Pediatric Emergency Medicine, has an entirely new editorial board and templated chapters focusing on evidence-based diagnosis and management of pediatric patients in the ED. The book's content has been rewritten to eliminate and eliminate redundancy, creating succinct sections that pertain to patient care in the ED. Templated chapters include: Clinical Outcomes/Goals of Therapy Current Evidence Clinical Considerations Clinical Recognition: Triage Initial Assessment Management/Diagnostic Testing Clinical indications for discharge or admission, including parental instructions References In the ED, nurses and physicians work closely as a paired team, thus this edition reflects that partnership and offers content tailored to it. Online ancillaries, found in the bundled eBook, include Learning Links for nursing considerations and clinical pathways that outline the key steps to take when managing critically ill patients.

Peacebuilding and the Rights of Indigenous Peoples

David Garrison, PhD University of Chicago, defines Church Planting Movements as rapidly multiplying indigenous churches planting churches that sweep across a people group or population segment. Garrison's Church Planting Movements: How God Is Redeeming a Lost World signaled a breakthrough in missionary church planting. After the publication of Garrison's book in 2004 it became impossible to talk about missions without referencing Church Planting Movements. Church Planting Movements examines more than two-dozen movements of multiplying churches on five continents. After presenting these case studies, Garrison identifies ten universal elements present in each movement. He then broadens the circle of examination to identify a further ten common characteristics, factors identified in most, but not all, of the movements. He concludes his examination with a list of "Seven Deadly Sins," i.e. harmful practices that stifle or impede Church Planting Movements. Important for evangelical readers, the author returns to his findings to see how they stand up to the light of Scripture. What he discovers is that Church Planting Movements are much more consistent with the New Testament lay-led house-church movements that swept rapidly through the Mediterranean world in the face of hostile opposition than today's more sedentary professional institutionalized Christianity. Learn more about Church Planting Movements from the book's website: www.ChurchPlantingMovements.com.

Models for Social Networks With Statistical Applications

Anthropological enquiry is best done by attending equally to both social and cultural material. This is the view propounded here by Marvin Davis, who uses such an holistic approach to develop an original perspective on hierarchy and politics in rural Bengal. In the first part of the book, Professor Davis describes the indigenous theory of rank held by Hindus in rural West Bengal and shows that the premise of inequality is a central organising principle of their entire society and cosmos. In the second part, he shows that the Bengali preoccupation with rank generates frequent political rivalries at each level of rural social organisation. His book will interest all anthropologists and other social scientists concerned with the social and political organization of rural India. In addition, his explication of the links between ideology and social structure, often viewed in isolation from each other, makes the book an important contribution to anthropological theory and method.
