

Toward A New Strategy For Development

[#development strategy](#) [#economic growth](#) [#sustainable development](#) [#strategic planning](#) [#future development](#)

Explore innovative frameworks for a new development strategy, focusing on sustainable growth and robust economic development. This content delves into strategic planning and future-oriented approaches essential for achieving global progress.

We collaborate with academic communities to expand our research paper archive.

Welcome, and thank you for your visit.

We provide the document Strategy For Sustainable Development you have been searching for.

It is available to download easily and free of charge.

Across countless online repositories, this document is in high demand.

You are fortunate to find it with us today.

We offer the entire version Strategy For Sustainable Development at no cost.

Toward a New Strategy for Development

Toward a New Strategy for Development: A Rothko Chapel Colloquium is a collection of papers commissioned by the Rothko Chapel and presented at a colloquium held in Houston, Texas on February 3-5, 1977. The colloquium provided a forum for discussing the need for a new strategy for development, with emphasis on needs and programs from the perspectives of the developed countries at the center of the world's economic system and of the developing countries at its periphery, and from the standpoint of different disciplines. Comprised of 10 chapters, this book begins with an introduction to Marxism and its congruence with other neoclassical doctrines such as the Chicago School, followed by a discussion on development economics as well as the conditions that gave rise to the rapidly growing interest in development. The next chapter traces the origins and history of one major body of Latin American ideas on development since the early 1950s: the United Nation's Economic Commission for Latin America. Subsequent chapters explore internal issues of development within countries, with emphasis on urban and rural bias as well as factors that influence regional development policy; the postwar economic experience of the Third World; and the reactions of developed countries to calls for a new international economic order. This monograph will be of interest to economists and sociologists.

Towards a New Strategy for Development

The Partnership for Growth (PfG) is one of the first experiments to operationalize the Obama administration's strategy to bring greater programmatic coherence to U.S. trade and development initiatives in four countries—The Philippines, El Salvador, Ghana, and Tanzania. A key goal was to reinforce a country-led approach, but to also bring to the development table the considerably deeper pockets of non-aid actors, as well as what they are best at bringing—the jobs, training, new businesses, domestic supply chain, and market linkages that are the fundamental ingredients of any sustainable development strategy.

Toward a New Strategy for Development

The case against "one thing at a time"; Development dichotomies and economic strategy; The success of growth policies in Brazil; Linkages and the strategy of development; Economic growth and disequilibrium in Colombia; The role of technology in economic development; Equity and growth in Mexico; What role for the state in Latin America; Economic and political instability in Chile; Trade policies and industrialization; Growth and stagnation in Argentina; What development strategy for Latin America.

Toward a New Paradigm of Sustainable Development

This volume is based on two international seminars organised by the OECD and the National Land Agency, Japan which examines the emerging consensus concerning a new strategic mode for spatial policy.

Towards a New Development Strategy for Latin America

This book provides an innovative framework to analyze the process of industrial upgrading and diversification, a key feature of economic development. Based on this framework, it provides concrete advice to development practitioners and policy makers on how to unleash a country's growth potential.

Towards a New Role for Spatial Planning

The Middle East and North Africa (MENA) region has been facing considerable economic challenges. Left behind by the industrial revolution, overly dependent on oil resources, and on the fringes of the globalization process, a number of MENA countries have embarked on structural reforms to overcome economic stagnation, mounting unemployment, and increasing poverty. At the same time, there is growing awareness worldwide that the knowledge revolution offers new opportunities for growth resulting from the availability of information and communication technologies and from the advent of a new form of global economic development rooted in the concept of the knowledge economy, which is based on the creation, acquisition, distribution, and use of knowledge. This book, developed from papers prepared for a World Bank sponsored conference, assesses the challenges confronting the region's countries and analyzes their readiness for the knowledge economy based on a set of indicators. It provides quantitative analysis to help benchmark the countries against worldwide knowledge economy trends, identifies key implementation issues, and presents relevant policy experiences. The basic policy elements that underpin a strategy to prepare for a knowledge-based economy are discussed, including: the renovation of education systems, the creation of a climate conducive to innovation, and the development of an efficient telecommunications infrastructure as the foundation of a new era. The formulation of national visions and strategies is also discussed. Examples from the region and other parts of the world illustrate the chapters. A set of data that makes it possible to benchmark and position countries' readiness for the knowledge economy is presented in an appendix.

New Structural Economics

The global financial and economic crisis starting in 2007 has provoked the exploration of alternatives to neo-liberalism. Although neo-liberalism has been critiqued from various perspectives, these critiques have not coalesced into a concrete alternative in development economics literature. The main objective of this book is to name and formulate this alternative, identify what is new about this viewpoint, and project it on to the academic landscape. This book includes contributions from many prominent development economists who are unified by a form of "developmental pragmatism". Their concern is with the problems of development that preoccupied the pioneers of economic development in the mid-twentieth century, known as the developmentalists. Like the developmentalists, the contributors to *Towards New Developmentalism* are policy-oriented and supportive of institutional development and engagement with economic globalization. This collection has an over-arching concern with promoting social justice, and holds the general view of the market as the means to affecting an alternative program of development rather than as a master whose dictates are to be obeyed without question. This important collection sets the agenda for new developmentalism, drawing on issues such as industrial policy, technology, competition, growth and poverty. In broad terms, the economic development debate is cast in terms of whether the market is the master, an ideological neo-liberal perspective, or the means to affect change as suggested by the pragmatic perspective that is being termed neo-developmentalism. This book will be valuable reading to postgraduates and researchers specialising in the area of development studies including within economics, international relations, political science and sociology.

Towards a New United Nations Development Strategy

Cites case studies from US metropolitan areas to argue that the traditional theories of monopoly capitalism and world systems are inadequate to analyze the emerging international capitalist economy. Also examines the new relationships between economics, politics, and governments. Paper edition (unseen), \$16.95. Annotation copyrighted by Book News, Inc., Portland, OR

Knowledge Economies in the Middle East and North Africa

This illuminating new book presents a series of in-depth case studies from around the world based on numerous personal interviews with organizational leaders and focusing on their journey towards sustainability. The aim is to provide visions of a more sustainable future, and shed light on the path, milestones and solutions – in particular the management processes these organizations employed – to provide a reliable compass that others can follow. Although each organization must take steps to fit its particular circumstance, business conditions and culture, Mapping the Journey proves that valuable lessons can be learned by setting aside critique as to where these organizations may yet make progress and instead focusing on the guidelines, targets, measures of success, tools and techniques and valuable wisdom about how pioneer organisations are travelling toward a prosperous, sustainable future. Each organization included has crafted its own unique strategic responses to an identified need for increased sustainability. While none can be said to have reached the end-point of a sustainable development strategy, all have found that, by addressing the challenge of sustainable industrial practices, they have found innovative solutions, new opportunities for revenue generation, better relationships with customers, new business and product opportunities and a boost to morale from the executive ranks to front-line employees. Mapping the Journey examines both public and private organizations worldwide: SJ Rail of Sweden; Sony Corporation; SC Johnson; TransAlta Corporation; Patagonia; Henkel; Volvo; ASG; Interface Flooring Systems; Suncor; DaimlerChrysler; AssiDoman; Germany's Centre for Technology Assessment and the Dutch National Environmental Policy Plan. These case studies provide an inspiring framework of effective processes for defining a sustainable development strategy and transforming it successfully into actions and results.

Towards New Developmentalism

Monograph presenting some of the social reforms and strategies of 'new left' socialism in the USA - maintains that the political system of the future should emphasize such goals as decentralization, community development, broad political participation, greater control of economic resources, etc. References.

Global Capitalism

The latest population census in Egypt shows that there are more people now living along the narrow strip of land by the Nile than ever before, 95 million (CAPMAS 2017). The country's rapidly growing population, its limited water resources, and its dependence on food imports all reinforce the importance of an integral agricultural policy. With the recent series of economic reforms that saw the flotation of the Egyptian pound, the imposition of a value-added tax, and decreases in energy subsidies, Egypt has a unique opportunity to focus on sector-level policies, including those within agriculture. This paper reviews agricultural and other related policies and their impact on the overall economic performance of the agricultural sector in Egypt. This stocktaking of policies is to serve as the basis for developing a more comprehensive agricultural strategy and policy framework that aligns sectoral policy objectives with policy measures in an effective and consistent manner. The paper is intended to serve as a reference for policymakers, researchers, and institutions. It highlights agriculture's place in the Egyptian economy and examines water and irrigation policy and the provision and distribution of agricultural inputs, research, and extension, and reviews the price and procurement policies for key crops. Other public policies and their impact on agriculture are also evaluated via a look at the food subsidy system, land rent and tenure, land reclamation, and trade policies. The concluding section of the paper presents a summary of key messages and proposed questions for further research.

Mapping the Journey

The early twenty-first century witnessed remarkable attempts by Africa's political leadership to promote regional integration as a means of fast-tracking economic progress, facilitating peace and security, consolidating democratic gains, and promoting the general welfare of the African people. The transition

of the Organization of Unity (OAU) to the African Union (AU), as well as the foisting of a new economic blueprint for the continent-the New Partnership for Africa's Development (NEPAD), combined with the growing role of the regional economic communities (RECs) in harmonizing and creating subregional norms and standards in the political and economic arena suggests a new trend towards regionalism in Africa. Indeed, in the new regional integration architecture, the RECs are considered to be the building blocks of the integration process led by the African Union. This new impetus of a regional development strategy was largely prompted by the slow pace of economic progress on the continent, the increasing marginalization of Africa in the global economy, and the need to create regional resources and standards that would benefit the continent in all spheres of social life. A painful realization became obvious that small micro-states in Africa sticking to their political independence and sovereignty would hardly make much progress in an increasingly globalised world. A macro-states' approach of regional integration has assumed Africa's new strategy to intervene in and integrate with a globalizing world. The current regional trend in Africa has received very little scholarly attention especially in a systematic and comprehensive way. This is due partly to the fact that the processes are currently unfolding and there is still uncertainty in the outcomes. Poor documentation and the dearth of primary materials (especially from the regional institutions) also contribute to the lack of scholarly work in this area. This study assembles the voices of some of the most seasoned African and Africanist scholars who have constantly, in one way or another, interacted with the integration process in Africa and kept abreast of the developments therein, and seeks to capture those developments in a nuanced manner in the economic, political and social spheres. The essence of this book is to analyze those processes--teasing out the issues, problems, challenges and major policy recommendations, with tentative conclusions on Africa's regional development trajectory. The book therefore fills major knowledge and policy gaps in Africa's regional development agenda. This book is a landmark contribution in a systematic attempt to comprehend Africa's regional development strategy led by the African Union. It examines the background, nuances, and dimensions of the process, which include the basis and historiography of pan-Africanism, the transition of the OAU to the AU, the issue of popular participation in development, the NEPAD and APRM initiatives, the evolving regional peace and security architecture, and the efforts of regional institutions to facilitate democracy, human rights, rule of law and good governance on the continent. The book underscores the fact that formidable obstacles and challenges abound in the trajectory, politics, and processes of this regional development paradigm, especially as Africa navigates an uncertain future in a deeply divided and unequal yet globalised World. The book constitutes a major reference material and compendium for a wide range of readers--students and scholars of African affairs and African development, policy makers both in Africa and the western countries, regional and international institutions and organizations, and all those interested in the past, present and future of Africa's development process.

Strategy and Program: Two Essays Toward a New American Socialism

The book is a comprehensive study of the strategic position of Yangtze River Economic Belt in the political and economic development of China. It is a holistic and precise qualitative and quantitative delineation of Jiangsu's position in this belt and its development strategy, and the strategic position of Yangtze River Economic Belt in national development. It also illustrates the great significance of the initiation of Yangtze River Economic Belt for the economy, politics, environment, and integration of natural resources. There is a research of the position of Jiangsu in the construction of the nation, and the difficulties it has encountered. Coordinated and balanced development of Yangtze River Economic Belt will effectively facilitate reasonable allocation and exploitation of various resources, the implementation of other national strategies, and communication and cooperation between China and Western countries, enhancing their mutual understanding. Therefore, common readers can get some general information from different perspectives, and professionals can have a detailed understanding of different arrangements and guiding principles. It is thus suitable for different readers. Yangtze River Economic Belt runs through the three regions of China, making a vital latitudinal axis, whose coordinated and balanced development is of great strategic importance for promoting coordinated and shared development of the three regions and for the spatial balance of population, economy and the environment. The current imbalance between them, the absolute disparity in regional development, the obstruction in the flow of resource factors, the inequality in development opportunities, the incoordination between regional economic growth and the bearing capacity of resources and environment, the fragmentation of regional economic policies, all contribute to the insufficient utilization of the Golden Waterway, problems numerous. How coordinated and balanced development can be realized within this economic belt is a prominent and pressing, even a severe problem.

An agricultural policy review of Egypt: First steps towards a new strategy

This Strategy sets out the priorities and themes of the United Nations Research Institute for Social Development over the period 2021–2025. It integrates research, communications, policy engagement, results and impact—and is calibrated against the fast-moving social, economic and political context as it impacts on development. It is the product of work with a wide range of stakeholders, and takes on board policy concerns and academic debates. We aim to fill identified knowledge gaps and also to anticipate fast-evolving social issues that are not yet in the mainstream. We are proud to have been doing this important work since 1963, and look forward to celebrating the 60th Anniversary of UNRISD in 2023, the mid-point of this Strategy period.

The African Union and New Strategies for Development in Africa

This volume is based on two international seminars organised by the OECD and the National Land Agency, Japan which examines the emerging consensus concerning a new strategic mode for spatial policy.

Agropolitan Development

For more than a century, energy and its procurement have been central to the U.S. position as a world power. How can U.S. relations with established producer nations ensure the stability of energy supplies? How can non-OPEC resources best be brought to the international marketplace? And what are the risks to international security of growing global reliance on imported oil? In *Energy and Security: Toward a New Foreign Policy Strategy*, Jan H. Kalicki and David L. Goldwyn bring together the topmost foreign policy and energy experts and leaders to examine these issues, as well as how the U.S. can mitigate the risks and dangers of continued energy dependence through a new strategic approach to foreign policy that integrates both U.S. energy and national security interests. Contributors include Abdullah bin Hamad Al-Attiyah, Kevin A. Baumert, Michelle Billig, Loyola de Palacio, Jonathan Elkind, Michelle Michot Foss, Leon Fuerth, Lee H. Hamilton, Evan M. Harrie, John P. Holdren, Paul F. Hueper, Amy Myers Jaffe, J. Bennett Johnston, Donald A. Juckett, Viktor I. Kalyuzhny, Melanie A. Kenderdine, William F. Martin, Charles McPherson, Kenneth B. Medlock III, Ernest J. Moniz, Edward L. Morse, Julia Nanay, Shirley Neff, Willy H. Olsen, Bill Richardson, John Ryan, James R. Schlesinger, Gordon Shearer, Adam E. Sieminski, Alvaro Silva-Calderón, Luis Téllez Kuenzler, J. Robinson (Robin) West, Daniel Yergin, and Keiichi Yokobori.

Towards a New Paradigm for Development

This book describes the sustainable development journey of 15 business families committed to using their enterprises as a force of societal good. In turn, each family reaps benefits of high economic returns, while contributing to society and environment. The youngest family firm is in its 20s, while there are others over 100 years of age. Size, industry, locations vary. But all these business families share a deep shared commitment towards sustainable development, control over strategic decision-making in their firms and trans-generational continuity intentions. Family values embed their enterprises with a strong sense of purpose to achieve their chosen sustainable development goals. Professionalized systems and processes foster the development of capabilities, and partnerships with a variety of stakeholders ensure the simultaneous achievement of social, environmental and profitability goals.

Toward a Coordinated and Balanced Development

The Comprehensive Development Framework (CDF), a World Bank aid policy approach, has become an important influence on the global development agenda since its launch in 1999. It is based on four principles: a long-term holistic development framework; results orientation; country ownership; and country led-partnership. This report contains findings from five case study evaluations of CDF pilot implementation in Bolivia, Ghana, Romania, Uganda and Vietnam, and from a non-CDF pilot study in Burkina Faso chosen as a control. A World Bank synthesis evaluation report on the CDF is also available (ISBN 0821356437).

Overcoming Inequalities: Towards a New Eco-social Contract

The North-South Economic Corridor (NSEC), one of the priority economic corridors under the Greater Mekong Subregion (GMS) Economic Cooperation Program, was designated as a GMS flagship initiative in 2002. Efforts have been taken since then to develop NSEC but these were pursued mainly on a project-by-project basis. Consultations in NSEC countries were started in the last quarter of 2007

to initiate a holistic approach to the development of NSEC. The strategy and action plan for NSEC is the product of these and subsequent consultations with government officials, representatives of the private sector, and other stakeholders in these countries. Besides providing a vision and framework for developing NSEC, this strategy and action plan is aimed at improving coordination, ensuring effective implementation, and helping the mobilization of resources and the broadening of support for NSEC development. The strategy and action plan for NSEC was endorsed at the 15th GMS Ministerial Conference held in Cha-am, Petchburi Province, Thailand on 17-19 June 2009.

Helping Self-help

This study of Berlin, after German unification, examines and makes proposals for distressed areas where there is a need for targeted regeneration measures.

Towards a New Role for Spatial Planning

New Directions in Development: A Study of U.S. AID Donald R. Mickelwait, Charles F. Sweet, and Elliott R. Morss In 1973 Congress legislated a fundamental change in U.S. foreign aid policy: rather than provide general assistance to developing nations, the U.S. Agency for International Development (AID) would focus on helping the rural poor in those nations. AID commissioned Development Alternatives, Inc. (DAI), to prepare a strategy for making the change toward "New Directions" in development and then to assist in the design and implementation of a number of projects using the new strategy. The authors describe the bureaucratic and administrative problems that confronted Development Alternatives in this job, giving particular attention to the administrative and bureaucratic barriers within AID itself. They conclude with a set of recommendations for reform that are essential if the agency is to attain its "New Directions" objectives.

Energy and Security

This book presents a radically different approach to innovation aimed at creating new growth cycles for the Russian economy. To better grasp the opportunities hidden behind worldwide megatrends, such as the growing economic prosperity of Asian countries and the importance of the internet-based economy, the authors argue for a reinvention of Russia's innovation strategy. Instead of a purely technology-driven approach, the authors illustrate how the principles of strategic innovation help develop institutional and non-technical innovation, as well as new forms of leadership and entrepreneurship within the Russian business culture. The authors also discuss the impact of strategic innovation on corporate strategies, innovation and economic policy, as well as academic research and development agendas. The book also sheds new light on how cooperation between Russia and the EU, the US and China in the area of innovation can be of mutual benefit.

Pioneering Family Firms' Sustainable Development Strategies

Ten skills for agile leadership Complex challenges are all around us—they impact our companies, our communities, and our planet. This complexity and the emergence of networks is changing the practice of strategic management. Today's leaders need to understand how to design and guide complex collaborations to accelerate innovation and change—collaborations that cross boundaries both inside and outside organizations. Strategic Doing introduces you to the new disciplines of agile strategy and collaborative leadership. You'll learn how to design and guide complex collaborations by following a discipline of simple rules that you won't find anywhere else.

- Unleash the power of true collaboration
- Learn and master the 10 skills of agile leadership
- Apply individual skills to targeted situations

Introduces a new discipline of leadership strategy Filled with compelling case studies, Strategic Doing outlines a new discipline of leadership strategy specifically designed for open, loosely-connected networks.

Toward Country-led Development

This new strategy for transport development in the Greater Mekong Subregion (GMS) consists of a strategic framework covering 2018–2030 and a set of performance indicators initially covering 2018–2022. It is mainly a strategic document providing a common framework for GMS cooperation in the transport sector. Cooperation in the transport sector has been at the core of the GMS Economic Cooperation Program since its inception in 1992. The main thrust of the program was eliminating the

barriers to cooperation, and the significant lack of connectivity was a critical constraint on economic relations among the GMS countries.

Toward Sustainable and Balanced Development

This book aims to contribute to the debate on global public goods, a debate which has been taking place for some time in the UN and the World Bank, among the regional development banks and bilaterally among states and donors. There is a need for new visions and strategies and to examine global infrastructure on the basis of the idea that global public goods, including human rights, contribute to cohesion at local, regional and international levels. The book investigates the possibilities and disadvantages of applying the idea of public goods in a global context. It explains the history of the concept and its significance for human rights. The authors include, in addition to academics, representatives from public institutions, civil society organizations, independent consultants, the media and the private sector.

Towards a New Development Strategy

Drawing on the movements of corporate social responsibility, socially responsible investing and sustainable development, this title examines the making of financial reality towards social responsibility and sustainability, and offers an understanding of finance as a collective construct and endeavour embedded in societal context.

Urban Renaissance Berlin: Towards an Integrated Strategy for Social Cohesion and Economic Development

In European urban development practices throughout Europe, there is a recurring need for new perspectives that provide insight into the complexity involved in the realization of projects. This need exists particularly around prestigious projects, where the tension between planning ambitions on the one hand, and the reality of conflicting interests and tight budgets on the other reaches its highest point. In the Netherlands, it is also likely that this tension will not decrease in the coming years. Reason enough for an investigation into strategies for urban development projects. This thesis combines several existing scientific insights around the phenomenon 'strategy'. Here, strategy is recognized as force. The term force emphasizes that a strategy, as opposed to a plan, provides those involved with the capacity to respond to the continuously changing reality of an urban development project. Thus, an effective strategy not only consists of making plans, but also includes three other strategic activities: venturing, learning, and visioning. These insights are then specified on the basis of the remarkable case of Rotterdam CityPorts - a project between city and port in which political and economic forces are especially amplified. This leads the thesis to develop a comprehensible theoretical model that reflects the complexity occurring in the realization of contemporary urban development projects. This strategy-as-force model is useful for both scientists and practitioners

New Directions in Development

Proposes a new strategy for the beyond-GDP community which aims to replace the economic paradigm centred on Gross Domestic Product (GDP) by 2030.

The Rich and the Poor

'The big, era-defining questions and, at last, the subtle, tenable answers, teased out without cliché or compromise. A vital volume at a critical moment.' Dr Augustus Casely-Hayford, Director, Africa '05
'This book dispels the myth of a uniformly hopeless, hungry continent. It shows just how extraordinarily diverse Africa is and how much it has changed in the last 20 years.' Full of fresh thinking on problems that face Africa and new African approaches to development.' Richard Dowden, Director, Royal African Society
This ground-breaking book, with a foreword by former President of Ireland (1990-1997) and UN Human Rights Commissioner (1997-2002) Mary Robinson, uniquely distils the complex issues surrounding Africa at the beginning of the 21st century. African and Western scholars provide a fascinating 'map' for the reader to navigate between issues such as urban and rural livelihoods, the potential of fresh water fishing, health, the HIV/AIDS crisis, conflict and efforts at peacemaking. Also included are critical assessments of Africa's role in the global economy, the growth of regional economic cooperation within Africa, the influence of ethnicity on the continent's politics, the evolution of its political institutions, and the impact of Africa's legal systems on its development. A substantial

introductory essay by the editors measures the distance Africa has travelled and the lessons it has learned since Africa in Crisis, the classic Earthscan book, was published in 1985. Ben Wisner is visiting research fellow at DESTIN, London School of Economics and at Benfield Hazard Research Centre, University College London, and visiting professor of environmental studies, Oberlin College, USA. Camilla Toulmin is Director of the International Institute for Environment and Development. Rutendo Chitiga is a freelance writer and editor, and has a postgraduate degree in environment and development.

Strategic Innovation in Russia

What approach does your company use to develop and execute its strategy? We are confronted with a plethora of different approaches and frameworks which purport to answer this question from the classic Michael Porter approach to Kim and Mauborgne's blue ocean strategy to Steve Jobs' build it and they will come" philosophy. The answer? There is no one approach that works for everyone but there is a best approach for your specific context. And it has never been more important to choose the right one: not only has the number of different approaches proliferated ten-fold over the past 40 years, but the environments in which executives must formulate and execute strategy have become increasingly diverse and complex. The difference between winning and losing has never been greater. And using the right approach pays off: firms that successfully match their approach to their environment realize significantly better returns than those who don't. And, they avoid the common frustrations stemming from lack of perceived relevance and engagement around on the strategy process. How you choose and execute the right approach is the focus of this book. From Global BCG strategy experts Martin Reeves, Knut Haanæs, Janmejaya Sinha (and based on the bestselling article in Harvard Business Review), Your Strategy Needs a Strategy offers a practical guide to help you to match your approach to strategy to your environment and execute it effectively, to combine different approaches for companies which operate in multiple environments, and to lead your organization in making better strategic choices. Organizing approaches into five strategic archetypes Be Big, Be Fast, Be First, Be the Orchestrator, Be Viable the authors explain the conditions under which each is appropriate, when and how to execute each one, and how to avoid common strategy traps. They richly illustrate the idea with interviews with CEOs from different industries from around the globe. For anyone leading a business or charged with developing a winning strategy this book is for you. The world of strategy is thick with opposing ideas and frameworks; Your Strategy Needs a Strategy will help you cut through the noise and find clarity on which approach is your best bet.

Strategic Doing

GMS Transport Sector Strategy 2030
