Post-War to Post Modern

This book fulfils a keenly-felt need for a modern, comprehensive dictionary of Scottish Gaelic into English. The numerous examples of usage and idiom in this work have been modelled on examples culled from modern literature, and encompass many registers ranging from modern colloquial speech, to more elaborate literary constructions. The main contemporary terms and idiomatic phraseology, often not available in other dictionaries, provide excellent models for easier language learning. In addition to the main dictionary, the volume contains introductory material, providing guidance on using the dictionary, spelling and pronunciation. There are also twelve useful appendices which cover not only the various parts of speech, lenition and proper nouns, but also address the more difficult issues of expressing time, direction and numerals. The clarity of the design and layout of the volume will greatly ease the process of attaining mastery of the Gaelic language.

A New and Complete Dictionary of Terms of Art

The multi-volume Etymological Dictionary of Egyptian by Gábor Takács "promises to open a new chapter in Egyptian and Afro-Asiatic comparative linguistics" (A. Dolgopolsky, in *Israel Oriental Studies*). The amount of material offered, the extensive treatment of scholarly discussions on each item, and the insights into the connections of Egyptian and the related Afro-Asiatic (Semitic-Hamitic) languages, including many new lexical parallels, will make it an indispensable tool for comparative purposes and an unchallenged starting point for every linguist in the field. This second volume is in fact the first volume of the very etymological dictionary. It comprises the Egyptian words with initial b-, p-, and f-. The reader will find the etymological entries even more detailed than those of the introductory volume, due to the full retrospective presentation of all etymologies proposed since A. Erman's time, and thanks to an extremely detailed discussion of all possible relevant data even on the less known Afro-Asiatic cognates to the Egyptian roots.
