Intro

Want to know what a silent heart attack is?

But what actually causes silent heart attacks?

Do you want to hear some shocking statistics?

But how do you know when you're having a silent heart attack? Here are a few signs that the American Heart Association asks to look out for.

Have you been feeling bloated for a while?

Are you sweating a lot these days?

There is also a reason why heartburn should never be ignored.

You might have heard that pain during a heart attack radiates only to the left arm.

Moving along, feeling tired should never be dismissed as unimportant.

Your doctor will run a few tests to find out what's going on.

Did you know that a silent heart attack increases your chances of getting another one by 35%?

Want to know how to reduce the risk of a silent heart attack?
