Six Weeks to Words of Power

"Doesn't a romantic comedy set on a 1930s Nevada dude ranch teeming with about-to-be-divorced women owe a certain debt to the era's big-screen classics? Then again, it's hard to believe a cinematic version could be any more fun." — New York Times Book Review The dazzling second novel from the bestselling author of *Be Frank with Me*, a charming story of endings, new beginnings, and the complexities and complications of friendship and love, set in late 1930s Reno. It's 1938 and women seeking a quick, no-questions split from their husbands head to the "divorce capital of the world," Reno, Nevada. There's one catch: they have to wait six-weeks to become "residents." Many of these wealthy, soon-to-be divorcees flock to the Flying Leap, a dude ranch that caters to their every need. Twenty-four-year-old Ward spent one year at Yale before his family lost everything in the Great Depression; now he's earning an honest living as a ranch hand at the Flying Leap. Admired for his dashing good looks—"Cary Grant in cowboy boots"—Ward thinks he's got the Flying Leap's clients all figured out. But two new guests are about to upend everything he thinks he knows: Nina, a St Louis heiress and amateur pilot back for her third divorce, and Emily, whose bravest moment in life was leaving her cheating husband back in San Francisco and driving herself to Reno. A novel about divorce, marriage, and everything that comes in between (money, class, ambition, and opportunity), *Better Luck Next Time* is a hilarious yet poignant examination of the ways friendship can save us, love can destroy us, and the family we create can be stronger than the family we come from.

The text of this book does not fit any category. It's like listening to a storyteller around the campfire rather than reading the book. The author does not use any common literary devices as gradation, dramatization or emotionalism. In spite of that, his book made such a strong impact on me that I still remember clearly every story. -Egon Bondy

There is simply no value put on words, we can all speak them; they don't cost any money, as they are free to all they are simply not appreciated. Words, however, are the reason that one person lives a life of abundance while another person lives a life of lack. Words can open doorways that hands can not. They can break down invisible boundaries. A few words can destroy life or breathe new life into a withering one. Words can fill a person full of happiness or fill them full of despair. Words can build up a person's confidence, or take it crashing to the ground. As most people do not value their words, they misuse them, which allows the power of their words to work against them. They want to go in one direction, but their words push them in another. This conflict is what most people battle with each day. They ask God to grace their lives with favor, health and abundance, but their words keep them in a life full of disappointment, sickness, and lack. In this book, I want to share with you the correct way to harness the power of your words, so instead of holding you back, they propel you towards the life that you desire. The life that you were destined to live. I will draw from personal experience and Scripture to illustrate how positive thoughts and words can be used to overcome every challenge that stands in your way. I will share how important it is to stop the habit of talking idly about your problems and instead focus on speaking about solutions. "Knowing is not enough; we must apply. Willing is not enough; we must do." - Johann Wolfgang von Goethe Pick up your copy today by clicking the BUY NOW button at the top of this page.

'After forty years, Hammett has a worthy successor' The Times Dave Brandstetter stands alongside Philip Marlowe, Sam Spade and Lew Archer as one of the best fictional PIs in the business. Like them, he was tough, determined, and ruthless when the case demanded it. Unlike them, he was gay. Joseph Hansen's groundbreaking novels follow Brandstetter as he investigates cases in which motives are murky, passions run high, and nothing is ever as simple as it looks. Set in 1970s and 80s California, the series is a fascinating portrait of a time and a place, with mysteries to match Chandler and Macdonald. A rundown harbour is due to be re-developed - against the wishes of those who call it home. When Mr Le, the businessman behind the project, is shot on his way to meet the residents' spokesman, the culprit seems obvious. But then Dave is persuaded to take the case, and finds much more beneath the surface: forbidden love, deadly hatred, and most toxic of all, family honour.

"A landmark work of lesbian fiction" and the basis for the acclaimed film Desert Hearts (The New York Times). Against the backdrop of Reno, Nevada, in the late 1950s, award-winning author Jane Rule chronicles a love affair between two women. When Desert of the Heart opens, Evelyn Hall is on a plane that will take her from her old life in Oakland, California, to Reno, where she plans to divorce her husband of sixteen years. A voluntary exile in a brave new world, she meets a woman who will change her life. Fifteen years younger, Ann Childs works as a change apron in a casino. Evelyn is instantly drawn to the fiercely independent Ann, and their friendship soon evolves into a romantic relationship. An English professor who had always led a conventional life, Evelyn suddenly finds all her beliefs about love, morality, and identity called into question. Peopled by a cast of unforgettable characters, this is a novel that dares to ask whether love between two women can last.

Experts consider green construction and the social, institutional, and cultural changes associated with it, through a sociological and organizational lens. Buildings are the nation's greatest energy consumers. Forty percent of all our energy is used for heating, cooling, lighting, and powering machines and devices in buildings. And despite decades of investment in green construction technologies, residential and commercial buildings remain stubbornly energy inefficient. This book looks beyond the technological and material aspects of green construction to examine the cultural, social, and organizational shifts that sustainable building requires, examining the fundamental challenge to centuries-long traditions in design and construction that green building represents. The contributors consider the changes associated with green building through a sociological and organizational lens. They discuss shifts in professional expertise created by new social concerns about green building, including evolving boundaries of professional jurisdictions; changing industry strategies and structures, including the roles of ownership, supply firms, and market niches; new operational, organizational, and cultural arrangements, including the mainstreaming of environmental concerns; narratives and frames that influence the perception of green building; and future directions for the theory and practice of sustainable construction. The essays offer uniquely multidisciplinary insights into the transformative potential of green building and the obstacles that must be overcome to make it the norm. What if the one thing that could make you happy was a few simple choices away? A successful entrepreneur living in Southern California, Scott Rieckens felt like he had a dream life: A happy marriage, a two-year-old daughter, a membership to a boat club, and a BMW in the driveway. But underneath the surface, Scott was creatively stifled, depressed, and overworked trying to help pay for his family's beach-town lifestyle. Then one day Scott listened to a podcast interview that changed

everything. Three months later, he had quit his job, convinced his family to leave their home, and cut their expenses in half. Follow Scott as he devotes everything to F.I.R.E., a sub-culture obsessed with maximizing wealth and happiness. In a time when rates of both consumerism and depression are skyrocketing, Playing with FIRE is one family's journey to acquire the one thing that money can't buy: a simpler — and happier — life.
