goSpanish

The Pimsleur® Method teaches speaking and understanding right from the start For almost 50 years, in over 50 languages, the Pimsleur® Method has been recognized by experts worldwide as one of the fastest and most effective ways to learn to speak another language. With Pimsleur you will learn Spanish in the same way you learned your first language as a child, acquiring the vocabulary of the new language, along with the melody, rhythm, and intonation of Spanish as used in everyday conversation. The Science of Memory Dr. Paul Pimsleur's research on memory was one of his most significant achievements: he discovered that if reminded of new words and information at gradually increasing intervals of time, the learners would remember the words or information for increasingly longer periods. Dr. Pimsleur documented that the acquisitions would actually move from short-term into long-term, or permanent, memory. The Reading Program Pimsleur Language Programs use the same revolutionary

learning Method to teach you to read, as well as to speak. You will start by sounding out Spanish, learning to associate the new sound system to the English alphabet you know. Gradually you will learn to look at the words and see them with "Spanish eyes." And you will learn to read Spanish without an English accent. Learn on the Go! goSpanish makes it easier than ever to use the Pimsleur programs by including the spoken lessons in two audio formats. Now you can listen anytime, anywhere: in your car or at home and on your MP3 player. This package contains:

- Eight 30-minute language lessons on four audio CDs
- A reading book with more than 50 Reading Lessons
- An iPod-ready MP3 CD that has:
 - MP3 audio files of the eight 30-minute spoken language lessons
 - An MP3 file containing three hours of reading lessons

In the first 10 lessons you'll begin using the past tense. Structures become more complex and informal speech is introduced. Soon you'll take part in conversations about ordering meals, shopping, and local attractions. As you progress, your fluency will increase as your vocabulary expands. The next 10 lessons will allow you to further combine and build upon known elements, and produce longer and more complex sentences. You'll be discussing business and social activities, expressing your interests, and talking about the weather. In the final 10 lessons you'll double your vocabulary and have several hundred structures to draw upon. You'll learn to express yourself with relative structures – faster, slower,

etc. You'll be able to ask for assistance in many situations and to ask for directions to various locations. You'll explore sports and leisure activities, manage changing money and banking, and discuss travel plans. By the end of the program, you'll be speaking at a mid-intermediate level with near-native pronunciation, and you'll be comfortable meeting most social demands and limited job requirements. Reading Lessons, which build upon the language skills acquired in Level 1, are included beginning in Lesson 9. These lessons, which total about one hour, are designed to give you practice reading English. A Reading Booklet to be used with the audio lessons is also included in PDF format. The Pimsleur Method We make no secret of what makes this powerful method work so well. Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. Here are a few of his "secrets": The Principle of Anticipation In the nanosecond between a cue and your response, your brain has to work to come up with the right word. Having to do this boosts retention, and cements the word in your mind. Core Vocabulary Words, phrases, and sentences are selected for their usefulness in everyday conversation. We don't overwhelm you with too much, but steadily increase your ability with every lesson. Graduated Interval Recall Reminders of new words and structures come up at the exact interval for maximum retention and storage into your long-term memory. Organic Learning You work on multiple aspects of the language simultaneously. We integrate grammar, vocabulary, rhythm, melody, and intonation into every lesson, which allows you to experience the language as a living, expressive form of human culture. Learning in Context Research has shown that learning new words in context dramatically accelerates your ability to remember. Every scene in every Pimsleur lesson is set inside a conversation between two people. There are no drills, and no memorization necessary for success. Active Participation The Pimsleur Method + active learner participation = success. This method works with every language and every learner who follows it. You gain the power to recall and use what you know, and to add new words easily, exactly as you do in Spanish. The English Language Approximately 375 million people speak English around the world and there are more than 50 countries where English is the primary language spoken, including in Australia, Canada, the Commonwealth Caribbean, Ireland, New Zealand, the United Kingdom, and the United States. This course teaches Standard American English as spoken in the US. Instruction is in Spanish. Tech Talk - CDs are formatted for playing in all CD players, including car players, and users can copy files for use in iTunes or Windows Media Player.

Language Hacking Spanish

It's true that some people spend years studying Spanish before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of Spanish, #LanguageHacking shows you how to learn and speak Italian through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in Spanish from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

The Everything Learning Spanish Book

Presents an introduction to the Spanish language that covers greetings, basic grammar, spelling, and vocabulary.

Remembering the Kanji 2

Following the first volume of Remembering the Kanji, the present work provides students with helpful tools for learning the pronunciation of the kanji. Behind the notorious inconsistencies in the way the Japanese language has come to pronounce the characters it received from China lie several coherent patterns. Identifying these patterns and arranging them in logical order can reduce dramatically the amount of time spent in the brute memorization of sounds unrelated to written forms. Many of the “primitive elements,” or building blocks, used in the drawing of the characters also serve to indicate the “Chinese reading” that particular kanji use, chiefly in compound terms. By learning one of the kanji that uses such a “signal primitive,” one can learn the entire group at the same time. In this way, Remembering the Kanji 2 lays out the varieties of phonetic pattern and offers helpful hints for learning readings, that might otherwise appear completely random, in an efficient and rational way. Individual frames cross-reference the kanji to alternate readings and to the frame in volume 1 in which the meaning and writing of the kanji was first introduced. A parallel system of pronouncing the kanji, their “Japanese readings,” uses native Japanese words assigned to particular Chinese characters. Although these are more easily learned because of the association of the meaning to a single word, the author creates a kind of phonetic alphabet of single syllable words, each connected to a simple Japanese word, and shows how they can be combined to help memorize particularly troublesome vocabulary. The 4th edition has been updated to include the 196 new kanji approved by the government in 2010 as “general-use” kanji.

The Way of the Linguist

The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book The Way of The Linguist, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad

and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Spanish for Reading

A unique approach to Spanish reading comprehension, Spanish for Reading can be used as a textbook supplement in classrooms or by anybody who is teaching himself Spanish. Each of the book's fifteen chapters concludes with a reading passage, the first of them quite easy to comprehend, and successive passages increasingly complex and sophisticated. Early passages are simple essays on Spain's and the Spanish-speaking world's language, geography, and culture. Later passages are excerpts from well-known works by world renowned Spanish writers, including Jorge Luis Borges, Pablo Neruda, and Gabriel Garcia-Marquez. Students who use this volume methodically will ultimately be reading and understanding these passages in their original, unedited Spanish, without need to seek outside help. Short of spending time in Spain or Latin America, here is as good an introduction to Spanish culture as a student will be able to find anywhere. Photos and line drawings.

Fluent Forever

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Zulu

Official organ of the book trade of the United Kingdom.

Papers R.P.

Covers the period from 1790 to 1905 in The Times of London.

The Bookseller

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

Palmer's Index to the Times Newspaper

"Why are you learning Zulu?" When Mark Sanders began studying the language, he was often asked this question. In *Learning Zulu*, Sanders places his own endeavors within a wider context to uncover how, in the past 150 years of South African history, Zulu became a battleground for issues of property, possession, and deprivation. Sanders combines elements of analysis and memoir to explore a complex cultural history. Perceiving that colonial learners of Zulu saw themselves as repairing harm done to Africans by Europeans, Sanders reveals deeper motives at work in the development of Zulu-language learning—from the emergence of the pidgin Fanagalo among missionaries and traders in the nineteenth century to widespread efforts, in the twentieth and twenty-first centuries, to teach a correct form of Zulu. Sanders looks at the white appropriation of Zulu language, music, and dance in South African culture, and at the association of Zulu with a martial masculinity. In exploring how Zulu has come to represent what is most properly and powerfully African, Sanders examines differences in English- and Zulu-language press coverage of an important trial, as well as the role of linguistic purism in xenophobic violence in South Africa. Through one person's efforts to learn the Zulu language, *Learning Zulu* explores how a language's history and politics influence all individuals in a multilingual society.

Allah Ta'ala has created the human being as 'ASHRAFUL MAKHLOOQAAT' (the best of His creation). Males and females have been created differently with their own unique physical and emotional characteristics and needs. All these are signs of His evident power and greatness. A female's first haidh (period / menstruation) is actually a transition or crossing over for her from childhood to adulthood. It is an important time in her life, because along with this change comes huge responsibilities. Apart from physical changes (which take place inside our bodies), we undergo emotional changes (the way we feel), as well as mental changes (the way we understand things). It is, therefore, very important for us to prepare ourselves for this transformation. This body is an amaanah (trust) from Allah Ta'ala. We use it to make the ibaadah (worship) of Allah Ta'ala. Therefore, it is important that we take care of it as best we can in order to fulfill the rights of Allah Ta'ala. However, it is not only our physical strength and mental well-being that we ought to worry about, but also our personal hygiene. This booklet has been compiled especially for our young sisters (9 -12 year olds) and may also be used as a guide for those mothers who find it difficult to speak to their daughters about these matters. The first part of the kitaab should be done in Grade 6 and the second part in Grade 7. With the help of Allah Ta'ala and by means of the following information, we will have a better idea of how our bodies work and how to cope with the physical and emotional changes that our bodies undergo. This kitaab is dedicated to all the young sisters of this ummah. We make dua that Allah Ta'ala makes this kitaab a means of Hidaayat (guidance) for you, Insha Allah!

Palmers' Index to the Times Newspaper

From a historical and cultural point of view, South Africa and Western Europe have much in common. The sociolinguistic commonalities are clearly evident in the status and use of English and Afrikaans, both of which have their roots in an intricate European migration history. This volume aims at capturing new facts about multilingualism in these two multicultural contexts by means of case studies on dominant and dominated languages in two regions in particular, i.e., KwaZulu-Natal in South Africa and the Netherlands in Western Europe. Through the exploration of local realities offered in this volume, the similarities and differences between the two geopolitical contexts become abundantly clear. This should lay the foundation for the comparative work that is eventually envisaged.

Resources in Education

This volume contains the conference proceedings of the 4th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, ISoLA 2010, which was held in Greece (Heraklion, Crete) October 18–21, 2010, and sponsored by EASST. Following the tradition of its forerunners in 2004, 2006, and 2008 in Cyprus and Chalcidiki, and the ISoLA Workshops in Greenbelt (USA) in 2005, in Poitiers (France) in 2007, and in Potsdam (Germany) in 2009, ISoLA 2010 provided a forum for developers, users, and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, testing, and maintenance of systems from the point of view of their different application domains. Thus, the ISoLA series of events serves the purpose of bridging the gap between designers and developers of rigorous tools, and users in engineering and in other disciplines, and to foster and exploit synergistic

relationships among scientists, engineers, software developers, decision makers, and other critical thinkers in companies and organizations. In particular, by providing a venue for the discussion of common problems, requirements, algorithms, methodologies, and practices, ISoLA aims at supporting researchers in their quest to improve the utility, reliability, flexibility, and efficiency of tools for building systems, and users in their search for adequate solutions to their problems.

It is now well over a hundred and fifty years since the first celebrated geographical explorations of Africa took place. However, it was many years before there began quests of a different kind – the investigation of behaviour, personality, attitude and ability among Africa's people. Originally published in 1975, this book is an account of that work: the first explorations in Africa of psychology. In an exhaustive and well-documented report the author, a psychologist who had himself done research in Nigeria, Uganda and who had lectured at Makerere University, drew together the main threads of the research carried out so far, putting the issues in an African perspective but anchoring them firmly within the framework of modern psychological thinking and technique of the time. Are there any common personality and intellectual characteristics among Africans? How does weaning affect African child development? How have Africans' feelings developed about city life and industrial work? The questions the author considers range from the broad-based to the specific. The challenges which lay ahead for African investigators then moving into the mainstream of the work are also discussed. But perhaps above all the book made a convincing case for psychology becoming a relevant and finely honed discipline in Black Africa, characterised by practical application to Black African society. Each chapter covers a defined area of modern psychology of the time and presents a comprehensive survey in a language no more technical than the subject warrants. At the time it was felt this book would be invaluable to students of Africa secondary education whose course included a psychology component and to African students beginning a degree course in psychology. It would also have provided an informative supplement to courses in medicine, development studies, political science, sociology and anthropology.

This book argues for the essential use of drawing as a tool for science teaching and learning. The authors are working in schools, universities, and continual science learning (CSL) settings around the world. They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking – sometimes direct observation and in other instances, their memories. The result is a collection of research and essays that offer theory, techniques, outcomes, and models for the reader. Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms. Secondary students describe their ideas of chemistry and physics. Teacher educators use drawings to consider the progress of their undergraduates' understanding of science teaching and even their moral/ethical responses to teaching about climate change. Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted. A physician explains how the history of drawing has been a critical tool to medical education and doctor-patient communications. Each chapter contains samples, insights, and where applicable, analysis techniques. The chapters in this book should be helpful to researchers and teachers alike, across the teaching and learning continuum. The sections are divided by the kinds of activities for which drawing has historically been used in science education: An instance of observation (Audubon, Linnaeus); A process (how plants grow over time, what happens when chemicals combine); Conceptions of what science is and who does it; Images of identity development in science teaching and learning.

This open access report explores the nature and extent of students' misconceptions and misunderstandings related to core concepts in physics and mathematics and physics across grades four, eight and 12. Twenty years of data from the IEA's Trends in International Mathematics and Science Study (TIMSS) and TIMSS Advanced assessments are analyzed, specifically for five countries (Italy, Norway, Russian Federation, Slovenia, and the United States) who participated in all or almost all TIMSS and TIMSS Advanced assessments between 1995 and 2015. The report focuses on stu-

dents' understandings related to gravitational force in physics and linear equations in mathematics. It identifies some specific misconceptions, errors, and misunderstandings demonstrated by the TIMSS Advanced grade 12 students for these core concepts, and shows how these can be traced back to poor foundational development of these concepts in earlier grades. Patterns in misconceptions and misunderstandings are reported by grade, country, and gender. In addition, specific misconceptions and misunderstandings are tracked over time, using trend items administered in multiple assessment cycles. The study and associated methodology may enable education systems to help identify specific needs in the curriculum, improve inform instruction across grades and also raise possibilities for future TIMSS assessment design and reporting that may provide more diagnostic outcomes.

Maringe ought to be commended for putting together an invaluable contribution to our understanding of research into a complex education system in South Africa. This volume provides a useful foundation to the current state of education quality in South Africa including the impact of interventions. It also brings to the fore challenges still facing education transformation. The evidence presented which, taken together, lays out a coherent view of how improvements could be made. Albert Chanee Head of Planning, Gauteng Department of Education For too long the weight of educational scholarship produced in South Africa has been limited to that simple and standard form called the literature review. Now, for the first time, education researchers are provided with an African-based text on the concepts and methods of conducting systematic reviews. In this exceptional work of editorship, Felix Maringe brings together some of the leading researchers on South African education to model and demonstrate how to review a significant body of research on a chosen topic which is adjudicated strictly on the basis of the quality and efficacy of the evidence in hand. I have no doubt that this remarkable book will become a standard reference for educational researchers in and beyond the African continent. It will also lift the quality of educational inquiry by equipping a new generation of scholars with the capacity for doing evidence-based research that compels the attention of policymakers, planners and practitioners alike.
