Guide to Flow-Aware Networking

This book provides a practical guide to flow-aware networking (FAN), one of the most promising new quality-of-service architectures for the Future Internet. The latest concepts are examined in detail, including coverage of approximate flow-aware networking. The scope and evolution of the debate on network neutrality is also discussed. Topics and features: provides a broad survey of flow-oriented approaches and solutions based on the concept of flows; presents a range of mechanisms for improving transmission performance of streaming flows under congestion; illustrates how problems caused by congestion may be solved in a multilayer environment, proposing new methods for enhancing transmission in wired-wireless FAN; analyzes aspects of fair transmission in FAN, reviewing algorithms that improve transmission of streaming flows during network failures; describes the implementation aspects of the cross-protect router; concludes each chapter with review questions, with answers provided at the end of the book.

The Collaborative Organization: A Strategic Guide to Solving Your Internal Business Challenges Using Emerging Social and Collaborative Tools

Combining case studies and the authors own extensive research, The Collaborative Organization presents a strategic approach to building, implementing, and using social and collaborative technologies, such as those created by companies like Jive and Yammer, to create innovative products, solve business problems, and create new processes that will foster lasting success and growth. It shows how social tools can be used within the enterprise instead of just for brand-to-consumer interactions.

Neuroscience Databases

Neuroscience Databases: A Practical Guide is the first book providing a comprehensive overview of these increasingly important databases. This volume makes the results of the Human Genome Project and other recent large-scale initiatives in the neurosciences available to a wider community. It extends the scope of bioinformatics from the molecular to the cellular, microcircuitry and systems levels, dealing for the first time with complex neuroscientific issues and leading the way to a new culture of data sharing and data mining necessary to successfully tackle neuroscience questions. Aimed at the novice user who wants to access the data, it provides clear and concise instructions on how to download the available data sets and how to use the software with a minimum of technical detail with most chapters written by the database creators themselves.

"Census microdata are the confidential records of specific individuals and housing units from whom Decennial Census or American Community Survey responses have been obtained. The U.S. Census Bureau also draws a sample from the full set of microdata and makes these sampled records available in the Public Use Microdata Sample (PUMS) data products, so that users can develop their own tabulations. These data are being used by state departments of transportation (DOTs) and metropolitan planning organizations (MPOs) for studies, such as analyses of the commuting characteristics of population subgroups, and for supporting travel demand model and land use models."--Preface

"Parenting is hard. If you are reading this, you are likely a very concerned parent who is looking for guidance about how to help your child who is using substances (or engaging in other risky behaviors). You may have mild concerns about your child's focus at school, choice of friends, new "minimalist" communication style with you, or you may be facing sudden and terrifying changes. Whatever your particular mix of worries as a parent, your child's drug use (including alcohol) tends to make it that much more nerve-racking--sometimes explosive." From introduction, page 1.

E-effective Writing for E-Learning Environments integrates research and practice in user-centered design and learning design for instructors in post-secondary institutions and learning organizations who are developing e-learning resources. The book is intended as a development guide for experts in areas other than instructional or educational technology (in other words, experts in cognate areas such as Biology or English or Nursing) rather than as a learning design textbook. The organization of the book reflects the development process for a resource, course, or program from planning and development through formative evaluation, and identifies trends and issues that faculty or developers might encounter along the way. The account of the process of one faculty member's course development journey illustrates the suggested design guidelines. The accompanying practice guide provides additional information, examples, learning activities, and tools to supplement the text.

A Birder's Resource Guide

Health information technologies are revolutionizing and streamlining healthcare, and uptake continues to rise dramatically. If these technologies are to be effectively implemented, capacity must be built at a regional, national and global level, and the support and involvement of both government and industry will be vital. This book presents the proceedings of the 2017 Information Technology and Communications in Health conference (ITCH 2017), held in Victoria, BC, Canada, in February 2017. The conference considers, from a variety of perspectives, what is required to move the technology forward to real, sustained and widespread use, and the solutions examined range from improvements in usability and training to the need for new and improved design of information systems, user interfaces and interoperable solutions. Government policies, mandates, initiatives and the need for regulation are also explored, as is the requirement for improved interaction between industrial, governmental and academic partners. With its focus on building the next generation of health informatics and the capacity required to deliver better healthcare worldwide, this book will be of interest to all those involved in the provision of healthcare.

The Parent's 20 Minute Guide (Second Edition)

Fluorinated Coatings and Finishes Handbook: The Definitive User's Guide, Second Edition, addresses important, frequently posed questions by end-user design engineers, coaters, and coatings suppliers on fluorinated coatings and finishes, thus enabling them to achieve superior product qualities and shorter product and process development times. The book provides broad coverage of these fluorinated polymer coatings, including the best known PTFE, polytetrafluoroethylene, first trademarked as Teflon® and ePTFE (GoreTex®). Their inherent qualities of low surface tension, non-stick, low friction, high melting point, and chemical inertness make fluoropolymer coatings widely desirable across thousands of industrial and consumer applications, but these properties also make it difficult to convert fluoropolymers to coatings that have sufficient adhesion to the substrate to be protected. In this book, readers learn how fluoropolymer coatings are used and made, about their pigments and fillers, binders, dispersion processes, additives, and solvents. The book includes substrate preparation, coating properties, baking and curing processes, performance tests, applications, and health and safety. Provides a practical handbook that covers the theory and practice of fluorinated coatings, including the structure and properties of binders and how to get a non-stick coating to stick to the substrate. Covers liquid and powder fluorocoatings, their applications methods, curing and baking processes, and their commercial end uses. Presents detailed discussions of testing methods related to fluorocoatings, common coating defects, how they form, how to eliminate them, and the health and safety aspects of using and applying fluorocoatings. Includes substrate preparation, coating properties, baking and curing processes, performance tests, applications, and health and safety.

The "Personal Information Protection and Electronic Documents Act" was approved by the House of Commons in April 2000 and took initial effect on January 1, 2001. The Act applies to any organization that collects, uses or discloses personal information in the course of commercial activity. Within four years, it will apply to the entire private sector in Canada (except Quebec), unless the provinces and territories enact equivalent legislation. The Act is primarily designed to support and promote electronic commerce by protecting personal information that is collected, used, or disclosed in certain circumstances. It gives the force of law to the CSA Model Code for the Protection of Personal Information that representatives of business, government, and interest groups developed between 1992 and 1995. Parts 2-5 of the Act provide for the federal government to approve the use of electronic means for companies and individuals to communicate or record information or transactions electronically in the form of digital signatures and include amendments to the "Canada Evidence Act," the "Statutory Instruments Act," and the "Statute Revision Act." This book offers complete analysis of every provision in the Act. It also includes the CSA Model Code; detailed discussion of critical privacy issues; frequently asked questions; Privacy Impact Assessment guidelines; sample privacy policies; reproduction of the entire Act; and reproduction of European and OECD data protection initiatives.

The *Manual of Strategic Planning for Cultural Organizations* adopts a holistic approach to the creative world of cultural institutions. By encompassing museums, art galleries, gardens, zoos, science centers, historic sites, cultural centers, festivals, and performing arts, this book responds to the reality that boundaries are being blurred among institutional types—with many gardens incorporating exhibitions, many museums part of multidisciplinary cultural centers and festivals.. As cultural leaders transform the arts in the twenty-first century, this “whole career” manual will prepare readers for every stage. Three key areas covered are: Leadership change. This chapter explains the role of strategic planning when an institution is going through the process of hiring a new director. A question we are frequently asked is “Should the strategic plan precede the search process or should it wait until the new director takes up the position?” Institutional change. Increasingly, cultural organizations are going through major change: from public-sector agencies to nonprofit corporations; from private ownership to non-profit status; from nonprofit status to a foundation, and many other variations. This book addresses the role of strategic planning during these transitions. Staff empowerment. This manual addresses the opportunities for staff at all levels to grow by participating in strategic planning. This edition focuses on how to engage and empower staff. A Guide for Museums, Performing Arts, Science Centers, Public Gardens, Heritage Sites, Libraries, Archives, and Zoos is a game-changing book with broad reach into the cultural sector, while still serving the museum community.
