Literary Translation and the Making of Originals

Literary Translation and the Making of Originals engages such issues as the politics and ethics of translation; how aesthetic categories and market forces contribute to the establishment and promotion of particular "originals"; and the role translation plays in the formation, re-formation, and deformation of national and international literary canons. By challenging the assumption that stable originals even exist, Karen Emmerich also calls into question the tropes of ideal equivalence and unavoidable loss that contribute to the low status of translation, translations, and translators in the current literary and academic marketplaces.

It's Our Ship

Captain D. Michael Abrashoff, legendary commander of the USS Benfold, continues in the same vein of his bestselling book *It's Your Ship* with the knowledge he's gained from his speaking to and advising some of the top business minds in the world. The story of Captain Abrashoff and his command of USS Benfold has become legendary inside and outside the Navy. By governing his ship with his unique management techniques, Abrashoff turned the Benfold into a model of naval efficiency, with amazing cost savings, the highest gunnery score in the Pacific Fleet, and a highly motivated and top performing crew. In *It's Your Ship*, he first demonstrated how to bring his successful management techniques from the ship to the boardroom. Now, in his newest book *It's Our Ship*, in the same rugged, can-do voice, Abrashoff will focus on the leadership, motivational, and management insights and tips that he has learned from his last six years of addressing business and corporate audiences. Abrashoff's timely advice will be eminently prescriptive, and will feature anecdotes and insights from leaders of businesses large and small and from public and non-profit sectors.

Slave Stealers

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and

carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Tourism Management

This text provides concise introduction to all the core topics of tourism management. Covering both key theory and practice it introduces students to general management issues across the whole tourism sector in an accessible and manageable way. It integrates the themes of sustainability, internationalism, technology and globalization throughout to provide a thoroughly modern approach to the study of tourism.

Translation and Paratexts

As the 'thresholds' through which readers and viewers access texts, paratexts have already sparked important scholarship in literary theory, digital studies and media studies. Translation and Paratexts explores the relevance of paratexts for translation studies and provides a framework for further research. Writing in three parts, Kathryn Batchelor first offers a critical overview of recent scholarship, and in the second part introduces three original case studies to demonstrate the importance of paratextual theory. Batchelor interrogates English versions of Nietzsche, Chinese editions of Western translation theory, and examples of subtitled drama in the UK, before concluding with a final part outlining a theory of paratextuality for translation research, addressing questions of terminology and methodology. Translation and Paratexts is essential reading for students and researchers in translation studies, interpreting studies and literary translation.

Younger Skin in 28 Days

This volume presents detailed, recently-developed protocols ranging from isolation of nuclei to purification of chromatin regions containing single genes, with a particular focus on some less well-explored aspects of the nucleus. The methods described include new strategies for isolation of nuclei, for purification of cell type-specific nuclei from a mixture, and for rapid isolation and fractionation of nucleoli. For gene delivery into and expression in nuclei, a novel gentle approach using gold nanowires is presented. As the concentration and localization of water and ions are crucial for macromolecular interactions in the nucleus, a new approach to measure these parameters by correlative optical and cryo-electron microscopy is described. The *Nucleus*, Second Edition presents methods and software for high-throughput quantitative analysis of 3D fluorescence microscopy images, for quantification of the formation of amyloid fibrils in the nucleus, and for quantitative analysis of chromosome territory localization. Written in the successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, *The Nucleus*, Second Edition seeks to serve both professionals and novices with its well-honed methods for the study of the nucleus.

The *Healthy Skin Kitchen* is an essential resource for anyone who wants beautiful skin, particularly people who struggle with eczema, acne, and other skin disorders. It is laid out practically and beautifully, with gorgeous photography inspiring a healthy lifestyle. The recipes are allergy-friendly and include vegan and autoimmune paleo options to ensure there are options tailored to a wide range of people. Most skin health books use ingredients that are rich in salicylates and histamines, like coconut, avocado, fermented foods, etc. This book is the first to explode the myth that such foods benefit skin health. It focuses on low chemical foods that are truly healing for the skin. Find answers and methods to combat acne, allergies, dandruff, leaky gut, migraines, rosacea, and many more conditions. Even

those without skin problems will benefit from these accessible, nutritious recipes. Care for yourself and reclaim your life with The Healthy Skin Kitchen.
