Part of DK's best-selling Eyewitness series, which is now getting an exciting makeover, this popular title has been reinvigorated for the next generation of information-seekers, with a fresh new look, new photographs, updated information, and a new "eyewitness" feature - fascinating first-hand accounts from experts in the field.

Volcano

Help your child learn with this fact-packed guide to Volcanos! From fiery mountains under the sea to spectacular explosions, explore the danger and wonder of volcanoes. Peer into a bubbling crater, see red-hot rivers of lava and meet the monkeys who love a hot volcanic bath. Packed with fantastic facts and dramatic, atmospheric photography, Great for projects or just for fun, make sure your child learns everything they need to know about Volcanoes.

Rescue

Describes how rescue teams use vehicles, equipment, and animals to bring people to safety after natural disasters and accidents in space and at sea, and how relief organizations help supply needed clothing, food, and medical care.

Natural Disasters

When natural disasters happen they grab headlines around the world. People, creatures, and the environment are all impacted when nature gets out of control. Natural disasters can be upsetting to live through, but scientists today better understand their causes and how we can protect ourselves and others. Natural Disasters: Investigate Earth's Most Destructive Forces with 25 Projects teaches readers about some of the natural disasters throughout history, what caused them, their impact on civilizations, and how people today cope with natural disasters. Readers of this book will make their own shake tables, create a cake batter lava flow, invent a wind tunnel, and experiment with avalanches. These hands-on activities engage readers and add depth to the text while ensuring that the learning is made lasting and fun.

Disasters

Natural and man-made disasters have the power to destroy thousands of lives very quickly. Both as they unfold and in the aftermath, these forces of nature astonish the rest of the world with their incredible devastation and magnitude. In this collection of ten well-known catastrophes such as the great Chicago fire, the sinking of the Titanic, and hurricane Katrina, Brenda Guiberson explores the causes and effects, as well as the local and global reverberations of these calamitous events. Highlighted with photographs and drawings, each compelling account tells the story of destruction and devastation, and most especially, the power of mankind to persevere in the face of adversity.

Natural Disasters Coloring and Facts Book

Natural Disasters are violent events that are outside the control of humans. They are caused by the forces of nature and may result in loss of life, injury, and damage to property. There are 9 types of natural disasters, can you name them? Natural disasters education is a very important part in the prevention of natural disasters. If it is applied from an early age, it would be successful and will yield positive results, namely to reduce the risks and consequences. Why do we need to learn about natural disasters? Because they have always happened and will always happen in the future. Remember, disasters and emergencies have been increasing all over the world. Æ In the city of Kraljevo, Serbia, a survey was conducted on schoolchildren regarding their knowledge of natural disasters. The unaware

children were then subjected to a virtual earthquake simulation. Researchers analyzed the behavior and test results claiming that only 16% of the students behaved correctly and they were the ones who scored the most points on the natural disaster knowledge test. It has been proven that the earlier children are exposed to the subject, the more prepared they will be psychologically in case of a disaster. Why should you buy this book? Æ This book is meant to encourage young people to take an interest in the subject, to make them realize that the problem exists and that only knowledge will help protect against the danger. Therefore, the book contains interesting information about disasters and coloring pages. Learning through play is the best form of development for children. Click the cover to reveal what's inside! About this book: 40 full pages drawings of Volcanic Eruption, Earthquake, Tornado and Facts, Printed on high quality solid white paper, Easily color with crayons, colored pencils or colored pens, Beautiful designs appropriate for all ages, High quality cover makes the book an ideal gift Put a SMILE on your face! Scroll up and BUY NOW!

Natural Disasters

The ultimate guide to the ultimate storms, Hurricane Watch is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

Hurricane Watch

Get the facts about how our planet's climate is changing and what the consequences will be. This essential guide explores Earth's climate, past and present, giving you the facts and figures behind one of today's most urgent issues, and investigates what we can all do to make a difference. DK Eyewitness Climate Change explains why human activities are making the planet heat up - and how we know for sure that this is the case. The book explores the effects of the changing climate, from more frequent hurricanes and wildfires to melting ice caps and rising sea levels. It shows how scientists predict how the climate will change in the future, and what actions we can all take to combat climate change. Stunning photographs offer a unique "eyewitness" view of the dramatic changes that are affecting the weather, the environment, and the way we lead our lives. With a groundbreaking visual approach, and clear, child-friendly text, DK Eyewitness books have been trusted favourites of parents, teachers, and school-age children since 1985. Now the series is having an exciting makeover, with a fresh new look, new photographs, updated information, and a new "eyewitness" feature - fascinating first-hand accounts from experts in the field. Perfectly conceived for younger readers, and packed with pictures, stories, at-a-glance infographics, and so much more, let Eyewitness be your expert guide to a world that is always changing.

Climate Change

DK Eyewitness Volcano is an exciting and informative guide to the fascinating natural world of volcanoes and earthquakes. Stunning real-life photographs offer a unique 'eyewitness' view of these amazing natural disasters. Help your child to learn all about the terrifying volcanoes and devastating earthquakes and that occur continuously across the world and why they happen where they do. They'll also discover all about the Mount St Helens eruption and the enormous damage it caused, to how people can survive an earthquake. Then use the giant pull-out wall chart to decorate their room.

Volcano

Look inside natural disasters and discover how they work! Natural disasters devastate communities. They reshape the landscape and can alter people's ways of life in an area for years after the event. Learn all about Earthquakes and Tsunamis. Find out how they form, where they are most to happen and how scientists study them through diagrams and case studies. Explore how natural disasters work by cracking them open and looking at them from the inside. How do they happen? How are they destructive? What happens on the inside of each phenomena? And where in the world are the danger zones? This series explore each of these questions in detail. This series uses detailed artwork, cutaways and images from real-life to give a rounded view of each event. Perfect for readers aged 9 and over.

Natural Disaster Zone: Earthquakes and Tsunamis

Eyewitness

Earthquakes. Hurricanes. Meteorites. Tsunamis. The natural world is full of powerful forces that can kill you in an instant. Hiding in your closet won't save you. Clinging to your roof is a good idea, until your roof is swept out to sea. When faced with a natural disaster, sometimes the only thing to do is close your eyes and hang on. See how these people survived in just that way.

21st Century Basic Skills Library Natural Disasters

Readers are taken on a rescue operation and introduced to many methods and equipment used by rescuers in this "Eyewitness Book". Full-color illustrations.

Hurricane & Tornado

Describes various disasters that have taken place throughout history.

Nature's Fury

Even though natural disasters often seem inexplicable, this text takes these destructive events caused by forces of nature and describes the fundamental science behind their occurrences. Captivating diagrams and photographs show what natural disasters such as volcanoes, hurricanes, and avalanches look like, while text boxes encourage readers to compare and contrast the causes and outcomes of these devastating incidents. Information about historic natural disasters, as well as preparedness and rescue methods, benefits any reader who seeks to understand these global happenings.

Surviving Natural Disasters
