Food Safety Regulatory Compliance

The global sourcing of ingredients has created complex supply chains, significant management challenges, and additional regulatory compliance requirements. This places tremendous pressure on food manufacturers, many of whom lack the knowledge, concepts, techniques, and procedures to comply with these increased requirements. Providing a roadmap for leveraging existing investments in food safety regulatory compliance into superior inventory management, Food Safety Regulatory Compliance: Catalyst for a Lean and Sustainable Food Supply Chain explains how to implement Lean operating principles to determine what needs to be improved, in what sequence improvements must be addressed, how one improvement feeds another, and the prerequisites for each improvement. Based on the author's experience working with hundreds of manufacturers, the book discusses cause-and-effect thinking, data accuracy, process simplification, process reliability, and workforce development. It includes how-to recommendations for implementing best practices to achieve these goals. These recommendations come together in the discussions on Batch-Process ERP (Enterprise Resource Planning) and also the Lean Management System and the useful techniques within it. The author also discusses the rapidly developing business requirement of sustainability, which is quickly moving from an optional, voluntary, and "nice to do" status to a "must do" status. The book can be read in whole or in part by everyone from the CEO to the factory floor supervisor; the language is nontechnical. But, to aid comprehension, each chapter concludes with an extensive quiz, and the appendix has definitions that will be new vocabulary for many. Normally large companies have the resources to fund the implementation of best practices, smaller companies less so. This book benefits both. In the case of the small- to medium-size manufacturer, it is a roadmap, and for the major corporation it is a tool to help assist their supplier community. It can help any organization achieve world-class excellence in operations and supply-chain management.

America's Providential History Teacher's Guide

Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators—and social studies teachers in particular—do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies—including teaching models, graphic organizers, and step-by-step instructions—for activities such as * Building vocabulary, * Developing textbook literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.

World Studies: Latin America

In this groundbreaking analysis, Marco Portales examines the way in which education and the media act as immobilizing social forces to shape the Latino world that exists despite the best efforts of many Mexican Americans and other Latinos. The delicate relationships between what Latinos are and what they seem to be, as perceived both by the larger society and by Latinos themselves, create and craft a culture that students of American culture have not sufficiently studied or understood. As bandidos or gigolos, drug users or unwed mothers, Latinos continue to figure in the public consciousness primarily as undesirables. Despite decades of effort by Spanish-speaking Americans to improve their image in the United States, Mexican Americans and other resident Latinos are still largely perceived by other Americans as poverty-stricken immigrants and second-class citizens. Accordingly, the great majority of Latino citizens receive substandard educations, equipping them for substandard jobs in substandard living environments. The lives of Mexican Americans and other Latinos, Portales contends, can best be illuminated by looking at the history of Chicanos and particularly Chicano literature, which dramatizes the impact of education and the media on Latinos. Like Irish literature, Chicano literature has sought to articulate and to establish itself as a postcolonial voice that has struggles for national attention. Through psychological and sociopolitical representations, Chicano writers have variously used anger, indifference, fear, accommodation, and other conflicting emotions and attitudes to express how it feels to be seen as an immigrant or a foreigner in one's own country. Portales looks at four Chicano literary works -- Americo Paredes' *George Washington Gomez*, Anthony Quinn's *The Original Sin*, Sandra Cisneros' *House on Mango Street*, and Ana Castillo's *Massacre of the Dreamers* -- to focus attention on social issues that impede the progress of Latinos. By doing so, he hopes to engage both Latino and non-Latino Americans in an overdue dialogue about the power of education and the media to form perceptions that can either empower or repress Latino citizens.

Rise of the American nation

Historians and teacher educators nationwide are now engaged in discussions about the importance of history teacher preparation. Interest within the history profession about the teaching of K-12 history has increased significantly during the past two decades, particularly since the controversy over the National Standards for History's publication. This attention is evident not only in the historical professions' various publications, but also in the federal government's multi-million dollar Teaching American History Program and the No Child Left Behind Act. Professional historians are increasingly committed to improving the teaching of history at the K-12 level through many forms of collaboration. History Education 101's thirteen essays are organized into three sections: context, practice, and new directions. The essays' contributors, tenured faculty who teach history teaching methods courses in colleges and universities throughout the United States, focus on how history education has, is, and will be taught to new K-12 teachers throughout the United States. Perhaps more than ever, it is critical for Americans to understand the role of higher education in the preparation of future middle and high school history teachers. This book provides important insights for academics in history and education departments as well as other individuals who are concerned with the status and improvement of history teaching in the schools, particularly current and future elementary and secondary teachers and administrators.

How worried are you about China? What do we fear? Is this fear new?

What did the West want from China? What did it get? What does the West fear?

Should the West fear the CPC or the Chinese most?

Are we asking the right questions to understand why we fear China?

When did this fear of China really start? Should we fear that China would get ahead of the West in

innovation?

How does Western media narratives fuel this fear? What remains untold?

Why does the West today have a negative perception of China? Why are we building 'WALLS OF FEAR'?

What is the European dilemma? What crossroad is Europe on today?

Is the BIPOLAR COLD WAR in the making? Is the 'NEW WORLD ORDER' a choice between AUTOCRACIES and DEMOCRACIES?

The false narrative of democracies versus autocracies. The real narrative of BIPOLAR WORLD versus MULTIPOLAR world

Is the Belt and Road Initiative about containment, but about avoiding getting contained. Is BRICS about creating a new world order or about a voice against the old world order?

Four new paradigm shifts that creates cracks in the Western walls.

Paradigm shift 1: South-to-South trade is opening up and increasing, while north-to-north trade will decrease due to more protectionism.

Paradigm shift 2: With NATO expansions, more security coalitions are being formed outside of NATO alliance, which will create more conflicts.

Paradigm shift 3: The not Western world is starting a very slow, but gradual dedollarisation shift in trade and reserve currency.

Paradigm shift 4: The China-US high-tech tech war is creating a race to the bottom and overcapacity in technology supply that are in high demand in the Global South and will make the Western factories uncompetitive.

The real fear for the West coming from China should come from the bottom up power, not Beijing.

The West is living in a twilight zone in denial of the four global paradigm shifts towards a new world.
