ASEAN-China Cooperation for Poverty Reduction

The Association of Southeast Asian Nations (ASEAN) has been one of the world's most dynamic and fastest-growing regions over the years. Its average combined GDP growth rate is more than 6% and the total combined GDP was valued at US\$3.0 trillion in 2018. ASEAN countries have managed to significantly reduce their national poverty over the last few decades. Although a correlation exists between economic growth and poverty reduction, millions of people in ASEAN countries still do not

have sufficient incomes to fulfill their basic needs including food, shelter, clothes and sanitation. This book is a collection of working group papers contributed by members of Network of ASEAN-China Think-tanks (NACT) and covers best practices on poverty alleviation in ASEAN member states as well as in China, and ASEAN-China cooperation. It discusses experiences of ASEAN member states and China such as with regard to national policies, principles, definitions, approaches, progress, and challenges in poverty reduction. It reviews and evaluates the way forward including existing joint projects, opportunities, and challenges in the future cooperation and offers policy recommendations from both national and regional perspectives to help policymakers better cope with the daunting poverty challenges.

Cambodia

Cambodians have displayed tremendous resilience. The National Strategic Development Plan (NSDP) has been formulated using the comprehensive Rectangular Strategy of the Royal Government of Cambodia and synthesizes the Cambodia Millennium Development Goals (CMDG), the National Poverty Reduction Strategy (NPRS), etc. It provides the framework for growth, employment, equity, and efficiency to reach CMDGs. It lays out the vision, goals, strategies, and priority actions. Its implementation will be regularly monitored to make annual adjustments. NSDP could be successfully implemented to attain intended goals and reduce poverty.

Social Protection System Review of Cambodia

In 2017, the Royal Government of Cambodia published a new Social Protection Policy Framework (SPPF), providing an ambitious vision for a social protection system in which a comprehensive set of policies and institutions operate in sync with each other to sustainably reduce poverty and vulnerability. The Social Protection System Review of Cambodia prompts and answers a series of questions that are crucial for the implementation of the framework: How will emerging trends affect the needs for social protection, now and into the future? To what extent are Cambodia's social protection instruments able – or likely – to address current and future livelihood challenges? How does fiscal policy affect social protection objectives? This review provides a contribution to the ongoing policy dialogue on social protection, sustainable growth and poverty reduction. It includes four chapters. Chapter 1 is a forward-looking assessment of Cambodia's social protection needs. Chapter 2 maps the social protection sector and examines its adequacy. An investigation of the distributive impact of social protection and tax policy is undertaken in Chapter 3. The last chapter concludes with recommendations for policy strategies that could support the establishment of an inclusive social protection system in Cambodia, as envisaged by the SPPF.

International Journal of Economic and Political Integration: Vol. 2, No. 1

This Country Framework Report for Cambodia is a country review looking at improving the environment for private sector involvement in infrastructure. Its three main objectives are to describe and assess the current status and performance of key infrastructure sectors, secondly, look at the policy, regulatory and institutional environment for involving the private sector in those sectors and to help policymakers frame future reform and development strategies and help potential investors assess investment opportunities.

Private Solutions for Infrastructure in Cambodia

"This monumental study, by arguably the most respected economic policymaker in the Cambodian government over the past decade, is a very welcome addition to the sparse literature on the Cambodian economy. It is destined to become the standard reference on economic development in post-conflict Cambodia. The volume's 25 chapters are grouped into nine sections: geography and population, the macroeconomic framework, the challenge of modernising agriculture, the challenge of industrialisation, services and infrastructure, human resource development, international economic relations and a conclusion. The content is encyclopaedic, with an immense amount of detail on practically every conceivable aspect of the country's development. Dr Naron is to be congratulated for fitting this admirable project into his extremely demanding 'daytime' job as the secretary of state in the Ministry of Economy and Finance, along with many other responsibilities. Among the many reasons to welcome its publication is its authentic Cambodian voice and perspective in a literature dominated by foreign researchers. A generation of scholars on the Cambodian economy and all those with an interest in the country are in his debt" (Asian-Pacific Economic Literature).

Cambodian Economy

In the 20 years since the Paris accords of 1991 brought peace to Cambodia, the country has undergone what can only be described as astounding change. From apolity where the entire fabric of society had been rent asunder through years of war and genocide, contemporary Cambodia is fast becoming a vibrant state and assuming a new position in the Asia-Pacific region. The contributions to this volume - many by prominent figures who were intimately connected with the process - describe the diverse strands of mediation and peace-building which went into the creation of the 1991 accords. The subsequent role of UNTAC and the 1993 general elections in the process of Cambodian revival and social rebuilding are also described. While not denying that obstacles and difficulties remain, the contributions outline the evolving economic, political, religious and human resource situations within Cambodia, while also examining the country's contemporary international relations. This book constitutes a particularly fitting testament to the 20 years of Cambodian reconstruction which have followed the 1991 peace accords.

Cambodia

Neoliberal economics have emerged in the post-Cold War era as the predominant ideological tenet applied to the development of countries in the global south. For much of the global south, however, the promise that markets will bring increased standards of living and emancipation from tyranny has been an empty one. Instead, neoliberalisation has increased the gap between rich and poor and unleashed a firestorm of social ills. This book deals with the post-conflict geographies of violence and neoliberalisation in Cambodia. Applying a geographical analysis to contemporary Cambodian politics, the author employs notions of neoliberalism, public space, and radical democracy as the most substantive components of its theoretical edifice. He argues that the promotion of unfettered marketisation is the foremost causal factor in the country's inability to consolidate democracy following a United Nations sponsored transition. The book demonstrates Cambodian perspectives on the role of public space in Cambodia's process of democratic development and explains the implications of violence and its relationship with neoliberalism. Taking into account the transition from war to peace, authoritarianism to democracy, and command economy to a free market, this book offers a critical appraisal of the political economy in Cambodia.

Cambodia's Neoliberal Order

Cambodia's economic performance over the past decade has been impressive, and poverty reduction has made significant progress. In the 2000s, the contribution of agriculture and agro-industry to overall economic growth has come largely through the accumulation of factors of production---land and labor---as part of an extensive growth of activity, with productivity modestly improving from very low levels. Despite these generally positive signs, there is justifiable concern about Cambodia's ability to seize the opportunities presented. The concern is that the existing set of structural and institutional constraints, unless addressed by appropriate interventions and policies, will slow down economic growth and poverty reduction. These constraints include (i) an insecurity in land tenure, which inhibits investment in productive activities; (ii) low productivity in land and human capital; (iii) a business-enabling environment that is not conducive to formalized investment; (iv) underdeveloped rural roads and irrigation infrastructure; (v) a finance sector that is unable to mobilize significant funds for agricultural and rural development; and (vi) the critical need to strengthen public expenditure management to optimize scarce resources for effective delivery of rural services.

Rural Development for Cambodia

This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment: information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.

Empowerment and Poverty Reduction

The Role of Trade in Ending Poverty looks at the complex relationships between economic growth, poverty reduction and trade, and examines the challenges that poor people face in benefiting from trade opportunities. Written jointly by the World Bank Group and the WTO, the publication examines how trade could make a greater contribution to ending poverty by increasing efforts to lower trade costs, improve the enabling environment, implement trade policy in conjunction with other areas of policy, better manage risks faced by the poor, and improve data used for policy-making.

The Role of Trade in Ending Poverty

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

The Global Findex Database 2017

Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Poverty in the Philippines

Authors Paul Polak and Mal Warwick describe their Zero-Based Design of starting from scratch to create innovative products and services tailored for the very poor to show how their design principles and vision can enable unapologetic capitalists to supply the very poor with clean drinking water, electricity, irrigation, housing, education, health care, and other necessities at a fraction of the usual cost and at profit margins attractive to investors.

The Business Solution to Poverty

This book looks at the major policy challenges facing developing Asia and how the region sustains rapid economic growth to reduce multidimensional poverty through socially inclusive and environmentally sustainable measures. Asia is facing many challenges arising from population growth, rapid urbanization, provision of services, climate change and the need to redress declining growth after the global financial crisis. This book examines poverty and related issues and aims to advance the development of new tools and measurement of multidimensional poverty and poverty reduction policy analysis. The book covers a wide range of issues, including determinants and causes of poverty and its

changes; consequences and impacts of poverty on human capital formation, growth and consumption; assessment of poverty strategies and policies; the role of government, NGOs and other institutions in poverty reduction; rural-urban migration and poverty; vulnerability to poverty; breakdown of poverty into chronic and transitory components; and a comparative study on poverty issues in Asia and other regions. The book will appeal to all those interested in economic development, resources, policies and economic welfare and growth.

Poverty Reduction Policies and Practices in Developing Asia

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Impact Evaluation in Practice, Second Edition

The Global Monitoring Report 2014/2015: Ending Poverty and Sharing Prosperity was written jointly by the World Bank Group (WBG) and the International Monetary Fund, with substantive inputs from the Organisation for Economic Co-operation and Development. This year's report details, for the first time, progress toward the WBG's twin goals of ending extreme poverty by 2030 and promoting shared prosperity and assesses the state of policies and institutions that are important for achieving them. The report continues to monitor progress on the Millennium Development Goals (MDGs). Also for the first time, the report includes information about high-income countries. It finds that while gaps in living standards have been closing in many countries, the well-being of households in the bottom 40 percent, as measured by the non-income MDGs such as access to education and health services, remains below that of households in the top 60 percent. The focus of this year's report is on three elements needed to make growth more inclusive and sustainable: investment in human capital that favors the poor, the best use of safety nets, and steps to ensure the environmental sustainability of economic growth. These three elements are imperative to all countries' development strategies, and are also fundamental to global efforts to achieve the twin goals, the MDGs, and the Sustainable Development Goals that will succeed the MDGs. Global Monitoring Report 2014/2015 was prepared in collaboration with regional development banks and other multilateral partners.

Global Monitoring Report 2014/2015

Fighting Poverty with Facts: Community-based monitoring systems

Fighting Poverty with Facts

An important study of contemporary Cambodia and the tension between the needs of reconstruction and those of democratization.

Beyond Democracy in Cambodia

Offering a comprehensive overview of the current situation in the country, The Handbook of Contemporary Cambodia provides a broad coverage of social, cultural, political and economic development within both rural and urban contexts during the last decade. A detailed introduction places Cambodia within its global and regional frame, and the handbook is then divided into five thematic sections: Political and Economic Tensions Rural Developments Urban Conflicts Social Processes Cultural Currents The first

section looks at the major political implications and tensions that have occurred in Cambodia, as well as the changing parameters of its economic profile. The handbook then highlights the major developments that are unfolding within the rural sphere, before moving on to consider how cities in Cambodia, and particularly Phnom Penh, have become primary sites of change. The fourth section covers the major processes that have shaped social understandings of the country, and how Cambodians have come to understand themselves in relation to each other and the outside world. Section five analyses the cultural dimensions of Cambodia's current experience, and how identity comes into contact with and responds to other cultural themes. Bringing together a team of leading scholars on Cambodia, the handbook presents an understanding of how sociocultural and political economic processes in the country have evolved. It is a cutting edge and interdisciplinary resource for scholars and students of Southeast Asian Studies, as well as policymakers, sociologists and political scientists with an interest in contemporary Cambodia.

The Handbook of Contemporary Cambodia

Over the course of the last half century, the growth economies of Southeast Asia – Indonesia, Malaysia, the Philippines, Singapore, Thailand and Vietnam – have transformed themselves into middle income countries. This book looks at how the very success of these economies has bred new challenges, novel problems, and fresh tensions, including the fact that particular individuals, sectors and regions have been marginalised by these processes. Contributing to discussions of policy implications, the book melds endogenous and exogenous approaches to thinking about development paths, re-frames Asia's model(s) of growth and draws out the social, environmental, political and economic side-effects that have arisen from growth. An interesting analysis of the problems that come alongside development's achievements, this book is an important contribution to Southeast Asian Studies, Development Studies and Environmental Studies.

Challenging Southeast Asian Development

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Compendium of Knowledge Solutions

Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a "win-win" situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

World Development Report 1978

China is in the throes of two transitions: from a command economy to a market-based one and from a rural, agricultural society to an urban, industrial one. So far, both transitions have been spectacularly successful. China is the fastest-growing economy in the world, with per capita incomes more than quadrupling since 1978, achieving in two generations what took other countries centuries. Although swift growth and structural change have resolved many problems, they also have created new challenges: employment insecurity, growing inequality, stubborn poverty, mounting environmental pressures, rising costs of food self-sufficiency, and periods of macroeconomic instability stemming from incomplete reforms. Unmet, these challenges could undermine the sustainability of growth, and China's promise could fade. China 2020, a seven-volume set, examines China's recent history, where it is today, and the path it should follow during the first two decades of the 21st century. The volume

in the set entitled, *Financing Health Care: Issues and Options for China* assesses the state of health care in China and addresses the problems facing the sector in terms of financial access to health care, efficiency, and total cost. Although the health sector is in relatively good condition today, this study asserts the need to promptly make policy changes to ensure universal health care coverage by either the public or the private sector over the next two decades. Chapters focus on the effects of reduced public health spending on rural populations, the likely increase in health costs as the population ages, the harmful effects of tobacco use, and fee-for-service provider systems.

The Macroeconomics of Poverty Reduction in Cambodia

This summary organizes the theme papers, findings, and recommendations that were presented at the Regional Workshop on Indigenous Peoples and Poverty Reduction, including the proposed regional plan of action that can guide future national approaches to this issue throughout the Southeast Asian region. Included are the opening statements by government representatives, the presentation of the project's main findings, the panel's discussion on the role of international assistance, and a list of participants and observers.

Shock Waves

This book presents the latest tools, techniques, and solutions that decision makers use to overcome the challenges faced by their sustainable supply chains. Given the ever increasing significance of socio-economic and environmental factors, the management of sustainable supply chains has become a complex and dynamic task. Multiple and conflicting objectives of stakeholders including suppliers, manufacturers, service providers, and retailers add to the complexity of decisions that modern day managers of supply chains face. With the unprecedented technological developments and innovations at hand, sustainability can be maximized for all the activities of a supply chain including: service concept and product design, material sourcing and procurement, manufacturing processes, delivery of the final product, and end-of-life management of the product. Consequently, the sustainable supply chains' problems require a systematic and integrated approach. Modeling and simulation, in general, as well as system dynamics and agent-based modeling, in particular, have the capabilities to deal with the complexity of sustainable supply chain related problems. This book will appeal to professionals and researchers in the field.

A Poverty Profile of Cambodia

Development Challenges, South-South Solutions is the monthly e-newsletter for the United Nations Development Programme's South-South Cooperation Unit (www.southerninnovator.org). It has been published every month since 2006.

Indigenous Peoples/ethnic Minorities and Poverty Reduction: Proceedings of a Regional Workshop, Asian Development Bank, Manila, Philippines, 25-26 October 2001

This book is basically the World-Poverty.org website in September 2015 and considers the real fundamentals of world poverty and its various causes and possible solutions. This is of course an important issue area which does have unfortunately some very substantial complexities and problems. If there are any updates on this after that date, you can visit the website with its Sitemap which notes updates.

Innovative Solutions for Sustainable Supply Chains

Cambodia's new national poverty lines show higher historical poverty rates and a dramatic decline in poverty during the 2007–2009 global financial crisis. With 18.9% of the population being poor in 2012, Cambodia now counts among the countries with the most rapid poverty reduction in the world. However, many people moved only slightly above the poverty line---remaining highly vulnerable---and poverty is increasing both in urban areas and according to the international poverty line of \$2 per day. This report includes an in-depth look at household debt and vulnerability, the multidimensional nature of poverty, and tools for targeting support to the poor.

Development Challenges, South-South Solutions: March 2011 Issue

For anyone wanting to learn, in practical terms, how to measure, describe, monitor, evaluate, and analyze poverty, this Handbook is the place to start. It is designed to be accessible to people with a

university-level background in science or the social sciences. It is an invaluable tool for policy analysts, researchers, college students, and government officials working on policy issues related to poverty and inequality.

World Poverty in the 21st Century

This book provides examples of possible triple-win solutions for simultaneously reducing poverty, raising the quality of the environment, and adapting to climate change. The book provides empirical evidence and observations from sixteen case studies in Southeast and East Asia, and from the Pacific. It argues that a spatial approach focussing on the environments in which the poor and vulnerable live, would trigger changes for development policies and implementation that better balance environmental and social concerns. In line with the post-2015 Millennium Development Goals (MDG) and Sustainable Development Goals (SDG) agenda, emphasizing integrated development approaches for the slum poor, the upland poor, the dryland poor, the coastal poor, and the flood-affected wetland poor, would also bring the environment and poverty agenda closer. The book emerged from a cooperation of the Asian Development Bank (ADB) with the Institute of Southeast Asian Studies (ISEAS) in partnership with experts from research institutes and think-tanks in the Asian region.

Cambodia

Interrelations between Public Policies, Migration and Development is the result of a project carried out by the European Union and the OECD Development Centre in ten partner countries.

Rice production responses in Cambodia

The positive impacts of social protection on reducing poverty and inequality and contributing to development are well evidenced. Establishing an integrated system facilitates the provision of a social protection floor, whereby individuals are appropriately protected throughout the life cycle. This is achieved not only by making sure there is a sufficient range of programmes to cover a population's risk profile but also by sharing information on different individuals to ensure they are linked to an appropriate programme. The Social Protection System Review is one of a small number of tools that serve to analyse how effective a country is in establishing a social protection system that responds to the needs of its people both today and in the future. The toolkit presents methodologies which can be implemented in any country, at any income level and by any institution. It is intended to generate policy recommendations that are actionable through national systems.

Handbook on Poverty + Inequality

As we approach the 25th anniversary of the first recognition of HIV/AIDS in 1981, this book reflects on the international impact of the disease. It has persistently remained a global issue, with more than 50 million people worldwide estimated to have been infected since that date. This ambitious book, written by 165 authors from 30 countries, offers a multi-country comparative study that examines how the response to the common, global threat of HIV is shaped by the history, culture, institutions and health systems of the individual countries affected. Increasingly the shift of health systems has been from prevention only as the main containment strategy, to a strategy that includes scaling up HIV treatment, and care and prevention services, including antiretroviral therapy. Thus, all parts of the health system must be involved; policy makers, healthcare professionals and users of the services have been forced to think differently about how services are financed, how resources are allocated, how systems are structured and organized, how services are delivered to patients, and how the resulting activity is monitored and evaluated in order to improve the effectiveness, efficiency, equity and acceptability of the response. This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system. Most chapters combine a health policy expert with an HIV specialist, allowing both a 'top down' health system approach and a 'bottom up' HIV-specific perspective. There are thematic and analytical sections, which provide an overview and some suggestions for solutions to the most serious outstanding issues, and chapters which analyse specific country and organisational responses. There is no perfect health system, but the evidence provided here allows the sharing of knowledge, and a opportunity to assess the impact and reactions, to an epidemic that must be considered a long term issue.

The Environments of the Poor in Southeast Asia, East Asia and the Pacific

Development Challenges, South-South Solutions is the monthly e-newsletter of the United Nations Office for South-South Cooperation in UNDP (www.southerninnovator.org). It has been published every month since 2006. Its sister publication, Southern Innovator magazine, has been published since 2011.

Interrelations between Public Policies, Migration and Development

National human development report, Cambodia.

Social Protection System Review

This open access book explores the historical, cultural and philosophical contexts that have made anti-poverty the core of Chinese society since Liberation in 1949, and why poverty alleviation measures evolved from the simplistic aid of the 1950s to Xi Jinping's precision poverty alleviation and its goal of eliminating absolute poverty by 2020. The book also addresses the implications of China's experience for other developing nations tackling not only poverty but such issues as pandemics, rampant urbanization and desertification exacerbated by global warming. The first of three parts draws upon interviews of rural and urban Chinese from diverse backgrounds and local and national leaders. These interviews, conducted in even the remotest areas of the country, offer candid insights into the challenges that have forced China to continually evolve its programs to resolve even the most intractable cases of poverty. The second part explores the historic, cultural and philosophical roots of old China's meritocratic government and how its ancient Chinese ethics have led to modern Chinese socialism's stance that "poverty amidst plenty is immoral". Dr. Huang Chengwei, one of China's foremost anti-poverty experts, explains the challenges faced at each stage as China's anti-poverty measures evolved over 70 years to emphasize "enablement" over "aid" and to foster bottom-up initiative and entrepreneurialism, culminating in Xi Jinping's precision poverty alleviation. The book also addresses why national economic development alone cannot reduce poverty; poverty alleviation programs must be people-centered, with measurable and accountable practices that reach even to household level, which China has done with its "First Secretary" program. The third part explores the potential for adopting China's practices in other nations, including the potential for replicating China's successes in developing countries through such measures as the Belt and Road Initiative. This book also addresses prevalent misperceptions about China's growing global presence and why other developing nations must address historic, systemic causes of poverty and inequity before they can undertake sustainable poverty alleviation measures of their own.

Joella's Success Story: full recovery from motion-induced MdDS (Mal de Debarquement Syndrome) - Joella's Success Story: full recovery from motion-induced MdDS (Mal de Debarquement Syndrome) by The Steady Coach 5,083 views 6 months ago 1 hour, 20 minutes - I'm so excited to bring you this interview with the wonderful Joella, who is recovered from MdDS that was brought on by **motion**, ...

Intro and about Joella

Symptoms start 2-3 days after a cruise

Joella mentions early experiences that contributed to unconscious health anxiety

The fears that came in once she realized she had MdDS; contributions of Facebook community

Symptoms worsen, physical sway, anxiety, visit to ER

Why she decided to wean off clonazepam 2 months in

Symptoms: rocking, bobbing, vibrating vision, visual delay, neck pain, headaches. insomnia, brain zaps, what the anxiety was like

Trying to hide it from her kids and loved ones

What the ups and downs of recovery were like for her

She found my work and was very skeptical about it

How the optokinetic stripe exercise helped her at the beginning

The symptoms are not "psychological" but they are coming from your brain's processing

It can be really hard to know if you're "there" with recovery

Practicing being steady

Collecting evidence that this was a neural circuit problem, and getting moving again

Curable was very helpful for anxiety; VRT was not helpful but plauy was

Belief in neural circuit problems, community support, practicing healing

Importance of NOT bypassing difficult emotions, tips for finding a therapist

Her experience with parts work (Internal Family Systems)

How therapy contributed to her recovery; ups and downs can be devastating

Joella's steps to self-compassion

Self-compassion plays an ACTIVE ROLE in inducing recovery

Stress had just accumulated through the years and the way she lived her life was contributing

All the things that people with MdDS aren't "supposed" to do that Joella has done!

Some advice: take some baselines so you can see your progress, the journey is NOT linear, just because you're struggling now doesn't mean you can't get better **DISCLAIMER**: Please note that Yonit Arthur, The Steady Coach and any of our other guests are not acting as an audiologist nor offering audiology or medical services services or advice on any public videos or on any other content.
