### Guided Self-Healing Meditations

At the moment a child takes birth, many stars emerge from around the earth's horizon. And each movement of the stars emits a specific vibration. Also, each star has its own individual movement.

All these vibrations together create a musical harmony. This Pythagoras called this Harmony of the Universe. This cosmic harmony regulates the state of health and illness throughout the life. This is an investigation on how healing can happen. It begins with a passage from Sri Aurobindos Savitri The fathomless zero occupied the cosmos and your world of finiteness. It is out of this fathomless zero first evolved ether or sky. Then came air, followed by fire, the remaining elements the water, the earth, and thus life evolved! The soul! The mind! And the physical body! Your physical body is mere showcase of all that happens at other planes or bodies. Then the question comes from where can healing really happen. Since physical body is mere showcase. Definitely it cannot be the beginning. Regular medicine begins here but not meditation. Can you start at bioplasmic level? Or you still have to go a step beyond. There are so many unresolved issues in each one of you that need to be addressed before the healing can really begin. Through these meditations, I am creating inner balance between body and the mind. Only then you can attain to meditateness. This process will continue until new man, one who is beyond body, mind, and intellect, is born out of you. This is just the beginning. MEDITATION THE ULTIMATE IN HEALING is the outcome of the insights and deeper understanding of someone who has explored deep within an unfathomable treasure or reservoir. He has also a tremendous capacity to transfer such inner experience to others as the process of healing. However, I was very impressed when I looked at the text and was even more so when I listened to the audio part of these meditations! I listened to them several times sometimes in deep meditation. My purpose was to analyze these audio and their role in healing. The various categories of body meditations, mind meditations, balancing the mind and meditationthe ultimate are all beautifully planned for the beginner as well as the experienced meditator. I can certainly assure you that you cannot remain untouched by this. Together, all these connect you to your beingthe ultimate light that heals all. Dr. C. H. Ramnarine

### Guided Meditations for Mindfulness and Self Healing

World-renowned restorative yoga teacher Jillian Pransky came to the practice of yoga to heal herself. For much of her life, she subscribed to a relentless work hard/play hard mentality, burying parts of herself beneath the pursuit of busy-ness and accomplishment. It wasn't until a devastating personal loss and health crisis thrust her into suffocating anxiety that she stopped racing around. As she began to pause and examine her actions and emotions, she found herself able to unlock deeply seated tension in her mind and body. Since then, Pransky has been devoted to studying and teaching mindfulness practices, deep relaxation, and compassionate listening. In Deep Listening, Pransky presents her signature Calm Body, Clear Mind, Open Heart program a 10-step journey of self-exploration that she's taught around the world. Derived from the techniques that healed her, the practice of Deep Listening invites you to pay close attention to your body, mind, and heart. You're taught how to tune inward and relax into a state of openness, ease, and clarity. This is the new frontier in integrative wellness—mindfulness designed for healing. Pransky doesn't ask you to "be your best self," or "do more!" She asks you to "be here" and "do less." She guides you gently through the stages of Deep Listening, from being present and noticing your tension to welcoming what you discover with softness and compassion. She integrates tools like guided meditations, journaling prompts, and restorative yoga poses to help you regard yourself with kindness and curiosity. Immersing yourself in the practice of Deep Listening will allow you to nurture your own well-being.

Theta Healing is a technique that was developed by Vitanna Stiballs. It is a self-help technique that uses energy to heal the body and the mind. The basic tenets of this technique have to do with the idea that we can all use our fundamental intuitive powers to create change in our lives on a number of different levels. These levels are inclusive of the emotional, the physical and the mental. The idea is that when we get to the place where we can slow our brainwaves to a state of theta that we can receive instant healing to our bodies. The brainwaves that are used in the Theta technique are the ones that are usually utilized in the seconds just between sleep and wakefulness. What happens is that when the brain is in a deeper state of relaxation, the frequency of the brainwaves slows down and then electrical energy waves of different frequencies are produced. When the brainwaves are at their lowest frequency, this is the time when delta waves are created; when an individual is in different states of deep sleep. The second lowest wave frequency is the theta wave and you get to this state when you are in deep meditation or hypnosis.

### 10 Guided Meditations For Anxiety, Depression & Deep Sleep

The contents of this book assumes that we are celestial, spiritual beings temporarily sojourning as terrestrial, physical beings. It assumes that during this incarnation we may bridge these two realities, these two aspects of ourselves, and thereby enliven our bodies and enlighten our immortal minds in such a manner as to become healthier, happier people who are a blessing to others and make this world a better place for us having sojourned here. It assumes that dreaming sleep and regular meditation are required practices for us to achieve this breakthrough. Just as we know that good hygiene, proper nourishment, and physical exercise are important for our bodies, so are mental and spiritual exercises and nourishment important to our souls. Within us is the life force and deeper levels of consciousness which need attention and expression. "So may an individual effect a healing through meditation, through attuning not just a side of the mind or a portion of the body but the WHOLE, to that at-oneness with

the spiritual forces within, the gift of the life-force within EACH body. Each individual body must bring its own creative force in balance." -Edgar Cayce

Regular meditators are healthier, calmer, and better able to handle the stress that modern life entails. Meditation helps relieve depression and anxiety. Many types of meditation exist, some involving rituals and membership in spiritual groups. Meditators meet in quiet rooms and follow a prescribed schedule of meditation, often similar to prayer. For the beginner, NONE of those approaches is necessary. In the pages ahead, you'll learn simple methods you can try by yourself or with others. There is no way to fail with meditation. It does work, and it will work for you. Not only that, but meditating is simple and requires no spiritual beliefs to be successful. All you need is a little free time and a desire to try it out for yourself! Inside of all of us are energy centers known as chakras. The practice of healing your chakras dates back centuries. Most won't realize that they have these places inside of them that are responsible for the variant levels of energy balances they might experience. If you are experiencing any sort of pain or hardship at the moment, it will affect your chakra. Chakras are on a different spiritual plane and it is time that we tap into them. In this meditation, we are going to take you through your different chakras in order to help you identify them and start the process of healing. This is something that you will want to do consistently in order to ensure that your chakras are not going to be out of balance. Even when everything in your life is going seemingly right, there could still be a blockage that is causing a disturbance in your overall life. Most chakra meditations will require that you sit up straight in order to ensure that you can allow a good flow of energy through your body. For this one we won't require that, but it is an option.
