## Educational Psychology, Second Edition

The final marks are in: Educational Psychology, Second Canadian Edition stands at the head of the class. Taking their cue from the success of the first Canadian edition of Educational Psychology, the Santrock et al. author team has focused their revision efforts on the text's areas of strength: relevant and fully integrated Canadian content, focus on application, currency, and balanced coverage. Visually appealing and built on the proven Santrock pedagogical system, Educational Psychology effectively shepherds readers through all topics while maximizing knowledge retention and application. In addition, supporting this text is an unparalleled supplements package for both instructors and students. From print and video case studies to video lectures, advice from experts, first-person stories from in-service teachers, application exercises for theory and teaching approaches, tips on in-class strategies, and extensive practice-quiz materials, the OLC, iStudy space (proposed), and stand-alone resources offered for use with Educational Psychology, Second Canadian Edition earn this revision an A+ grade.

## Educational Psychology in the Canadian Classroom

Principles of Educational Psychology employs a unique approach to help students understand concepts, by encouraging them to examine their own learning and then showing them how to apply these concepts as teachers. The book concentrates on core concepts and principles and gives students an in-depth understanding of the central ideas of educational psychology.

## Educational Psychology in the Canadian Classroom, Second Edition. Study Guide and Workbook

For Child Development in Psychology, Education, Human Development, Child and Family Studies and Early Childhood Education particularly in applied College courses. Written by a highly regarded researcher in Cognitive Development and a noted Canadian clinical psychologist, this text presents the core research, theory and applications of Developmental Psychology in a chronological framework.

The chronological approach highlights the integrated aspects of child development and therefore it is more "applied". With an attractive, profusely illustrated modular format, and a new built-in study guide, the second edition of this popular text will help students understand and appreciate the importance of Developmental Psychology in their own lives and in their careers. To make sure that Children's relevant and interesting for students, the text includes many applications demonstrating how research translates into practice. It has been updated to highlight research of particular interest to students, and now includes design features such as bolded key terms, learning objectives, and bulleted summary points to help students focus on and retain what they've read. A student access code card to MyDevelopmentLab, is bound inside every copy of this text. It is an exciting online learning tool designed to increase student involvement and boost success rates. Video clips, audio clips, observation activities, and simulations add a multi-media learning experience via an electronic version of this text, and powerful assessment tools make a custom study plan that point the way to more efficient study.

#### Educational Psychology : a Learning-centered Approach to Classroom Practice, Second Canadian Edition, McCown, Driscoll ... . Study Guide

Educational Psychology is written to show how information and ideas drawn from research in educational psychology can be applied to solve the everyday problems of teaching. The Sixth Canadian Edition continues to emphasize the educational implications and applications of research on child development, cognitive science, learning, motivation, teaching, and assessment.

#### Educational Psychology, Second Canadian Edition. Instructor's Resource Manual

A leading introductory text, this authoritative volume comprehensively describes the school psychologist's role in promoting positive academic, behavioral, and emotional outcomes for all students. The book emphasizes a problem-solving-based, data-driven approach to practice in today's diverse schools. It grounds the reader in the concepts and tools needed to become a competent, ethical practitioner; implement and evaluate multi-tiered interventions; and facilitate systems-level change. Useful pedagogical features include illustrative vignettes and end-of-chapter discussion questions and activities. New to This Edition\*Incorporates up-to-date research findings and professional standards.\*Expanded coverage of response to intervention, cultural and linguistic diversity issues, and evidence-based practice in mental health.\*Chapter on legal issues includes expanded coverage of IDEA and other recent federal mandates.

#### Educational Psychology in the Canadian Classroom, Second Edition. Instructor's Manual

Educational Psychology, Second Edition offers a comprehensive overview of how key advances in social, developmental and cognitive psychology impact upon the role of educational psychologists working today. Written by leading researchers, the book also explores controversies and dilemmas in both research and practice, providing students with a balanced and cutting-edge introduction to both the field and the profession. Fully revised throughout, the new edition is written to encourage students to integrate their understanding of core psychological disciplines, as well as to consider what 'evidence-based practice' really means. Organized into two broad sections related to learning and behaviour, the book features a selection of vignettes from educational psychologists working in a range of contexts, as well as tasks and scenarios to support a problem-orientated approach to study. By integrating both research and everyday practice, the book is unique in engaging a critical appreciation of both the possibilities and limitations of educational psychology. It is the ideal book for any student wishing to engage with this important and evolving field of study.

#### Principles of Educational Psychology

For years the gold standard in its field, the new Canadian edition of Educational Psychology continues that tradition of excellence with updated Canadian content and statistics, an enhanced layout, improved pedagogy, and fully integrated MyEducationLab media content. This fifth Canadian edition emphasizes Canada's multicultural context and provides information about reaching diverse learners with added content through the text. As well, the new "Diversity and Convergences" sections highlight the similarities and differences among students in today's classroom. An entire new chapter, "The Learning Sciences and Constructivism" explores the latest findings of modern views about education. Along with its new content, Educational Psychology continues to integrate foundational theories and recent research and demonstrates how to apply this knowledge in real life situations. It shows how and why students learn and the roles of educational professions in motivating and guiding learning. Point/Counterpoint

boxes acknowledge controversies and prepare readers to make informed decisions. In maintaining its tradition of excellence, and enhancing its design and content, Educational Psychology, 5th Canadian Edition will remain the gold standard in the field.

#### Children, Second Canadian Edition

"Throughout three editions, professors and students note that Educational Psychology successfully includes many practical applications to the theoretical perspectives outlined, so that beginning teachers understand the connection between theory and practice. It's supplements and links to practical aspects motivate students, while it's teaching stories inspire teachers on how to structure their classrooms to bring out the best from each child."--Publisher's website.

#### Educational Psychology, Sixth Canadian Edition

Help students become scientifically literate. An Introduction to Psychological Science helps students view psychology as a practical, modern science--and gives them the tools to better understand our world. Throughout the second edition, authors Krause, Corts, Smith and Dolderman continue to emphasize scientific literacy: the ability not only to define scientific terminology, but also to understand how it functions, to evaluate it critically, and to apply it to personal and societal matters. In addition to helping students master key course objectives, learning how to think scientifically will enable students to categorize the overwhelming amount of information they encounter, as well as ignite their interest in psychological science.

#### Psychology, Second Canadian Edition. Study Guide

THINK currency. THINK relevancy. THINK Psychology. THINK Psychology, Second Canadian Edition is a concise presentation of the key theories and concepts of Psychology with current Canadian content and high-interest readings. Its attractive design featuring a unique, full-colour layout with exciting infographics is designed to inspire and engage today's students. Accessibly written with numerous contemporary examples, it relates the patterns and processes of human behaviour to students' everyday lives. Ten short readings on psychological topics selected from well-respected journals and popular press publications have been highlighted with annotations to present current psychological research in a relevant and accessible manner. Teaching & Learning Experience Engage Students—A highly visual design, exciting chapter opening vignettes, and the interactive ThinkSpot website provide an ideal educational experience for today's students. Explore Research—High interest Think readings from a range of journals and press publications introduce students to current and relevant developments in psychological research. Note: the Companion Website is not included with the purchase of this product.

#### Educ Psych Cdn Classroom

Offers comprehensive coverage of the issues, concepts, trends, and technologies of distance learning.

#### School Psychology for the 21st Century, Second Edition

The first Canadian edition of Visualizing Psychology has been designed to help students learn effectively. Created in collaboration with the National Geographic Society, Visualizing Psychology integrates rich visuals and media with text to direct students' attention to important information. The text helps students examine their own personal studying and learning styles with several pedagogical aids encouraging students to apply what they are learning to their everyday lives while offering ongoing study tips and psychological techniques for mastering the material. Karen Huffman is a professor of psychology at Palomar College in San Marcos, California, where she teaches full-time and serves as the Psychology Student Advisor and Co-Coordinator for Psychology Faculty. Karen received the National Teaching Award for Excellence in Community/Junior College Teaching given by Division Two of the American Psychological Association (APA). She also was recognized with the first Distinguished Faculty Award for Excellence in Teaching from Palomar College, and an Outstanding Teaching award from the University of Texas at Austin. Karen's special research and presentation focus is in active

learning and critical thinking, and she has presented numerous online web seminars and workshops throughout the United States, Canada, and Puerto Rico. Karen is the author of Wiley introductory psychology texts including, *Psychology in Action* and *Living Psychology*. Alastair Younger is Professor of Psychology at the University of Ottawa, Canada's largest bilingual university. He received his B.A. in Psychology from Carleton University in Ottawa in 1976, after which he studied clinical and developmental psychology at Concordia University in Montreal, completing his M.A. in 1979 and his Ph.D. in 1984. He is registered as a clinical psychologist with the College of Psychologists of Ontario and is a member of the Canadian Psychological Association and the Society for Research in Child Development. He is co-author of the first and second Canadian editions of *Child Psychology* (Wiley). In addition, he has authored more than 15 student study guides for courses in introductory psychology, child psychology, and abnormal psychology. He has been a professor at the University of Ottawa for more than 25 years, where he coordinates the introductory psychology courses in both English and French and has taught courses for many years in child psychology, theories of development, social development, and research methods and ethics. His research focuses on children's peer relations, especially shyness/withdrawal and aggression in children. Claire Vanston is a Psychology Instructor at Capilano University in North Vancouver, British Columbia. She earned her B. A. (Hons.) in Psychology in 1997, and then completed a Master of Science in biological psychology in 2000 and a Ph.D. in 2005. She has been the recipient of four national-level research scholarships and is a published research psychologist. Her doctoral studies investigated the effects of steroid hormones on cognition and behaviour and she continues working part-time in this area. She also holds a position as a Sexual Health Educator with Options for Sexual Health B.C. (previously Planned Parenthood) teaching elementary and high school sex education. She has authored a half a dozen student study guides and instructor manuals, and has taught a number of courses in community and seniors education programs. Dr. Vanston has taught courses for many years at CapU and elsewhere in the areas of introductory psychology, biological psychology, human neuropsychology, lifespan development, research methods and human sexuality. She is a mother of daughters, rides a Ducati Monster and is described by her students as not your average Psych Prof.

### Educational Psychology

Educational Psychology is written to show how information and ideas drawn from research in educational psychology can be applied to solve the everyday problems of teaching. The seventh Canadian edition maintains the lucid writing style for which the book is renowned. The text provides accurate, up-to-date coverage of the foundational areas within educational psychology: learning, development, motivation, teaching, and assessment, combined with intelligent examination of emerging trends in the field and society that affect student learning, such as student diversity, inclusion of students with special learning needs, education and neuroscience, and technology.

### Educational Psychology, Fifth Canadian Edition

For years the gold standard in its field, the new Canadian edition of *Educational Psychology* continues that tradition of excellence with updated Canadian content and statistics, an enhanced layout, improved pedagogy, and fully integrated MyEducationLab media content. This fifth Canadian edition emphasizes Canada's multicultural context and provides information about reaching diverse learners with added content through the text. As well, the new "Diversity and Convergences" sections highlight the similarities and differences among students in today's classroom. An entire new chapter, "The Learning Sciences and Constructivism" explores the latest findings of modern views about education. Along with its new content, *Educational Psychology* continues to integrate foundational theories and recent research and demonstrates how to apply this knowledge in real life situations. It shows how and why students learn and the roles of educational professions in motivating and guiding learning. Point/Counterpoint boxes acknowledge controversies and prepare readers to make informed decisions. In maintaining its tradition of excellence, and enhancing its design and content, *Educational Psychology*, 5th Canadian Edition will remain the gold standard in the field.

### Educational Psychology

The only Canadian educational psychology textbook of its kind, this innovative introduction connects theory to practice by documenting - through letters, journal entries, and the authors' accompanying commentary - a typical educator's experience teaching students of various ages, grades, nationalities, and abilities. This groundbreaking approach covers teaching and learning, development, individual

variability, and diversity, and brings together classroom management and assessment in a way that is practical, instructive, and accessible. An authoritative guide for teaching teachers how to teach, Educational Psychology is an ideal resource for beginning teachers, teacher-candidates, and undergraduate students in education programs.

#### An Introduction to Psychological Science, Second Canadian Edition, Loose Leaf Version

In lucid and jargon-free prose, the text explains and illustrates educational psychology's practical relevance for teachers and learners. The new edition continues to emphasize the applications of research on child development, on learning and cognition, on motivation, and on instruction and assessment. At the same time the text has long been counted on for its state of the art presentation of the field of educational psychology, and this edition continues that tradition with new and expanded coverage of import topics like the brain and neuroscience, the impact of technology on the lives and learning of students, and student diversity. From reviews of the book: "I polled my students . . . and the vast majority actually liked the textbook (which is rare). They find it easy to read, interesting and engaging. . . . This textbook's major strengths are its cognitive perspective, its readability, and the fact that it puts into practice some of the information-processing strategies that it teaches as effective ways to process information. . . ." –Elizabeth Pemberton, University of Delaware "[T]he text is written in a . . . conversational style that invites students to actively explore complex questions about teaching and learning. It is well-organized, supported with visual aids, and various learning tools, such as guidelines, reflection activities, and cases presenting opposing viewpoints. Most importantly, the text is informed and well supported by contemporary scholarship in the field of educational psychology." –Alina Reznitskaya, Montclair State University

#### THINK Psychology, Second Canadian Edition,

Note: If you are purchasing an electronic version, MyPsychLab does not come automatically packaged with it. To purchase MyPsychLab, please visit [www.mypsychlab.com](http://www.mypsychlab.com) or you can purchase a package of the physical text and MyPsychLab by searching for ISBN 10: 0205896111 / ISBN 13: 9780205896110. Psychology: From Inquiry to Understanding strives to empower readers to apply scientific thinking to the psychology of their everyday lives. It accomplishes this by providing the framework students need to go from inquiry to understanding. Its pedagogical features and assessment tools teach students how to test their assumptions and use scientific thinking skills to better understand the field of psychology and the world around them. The Second Canadian edition has been enhanced to provide even more opportunities for students to apply six key principles of scientific thinking to a variety of real-life scenarios.

#### Encyclopedia of Distance Learning, Second Edition

Canadian counsellors and counselling psychologists have made significant advances in mental health services and the broader field of applied psychology, but much of the counselling and counselling psychology scholarship has been published outside of Canada, rendering it difficult to identify as distinctly Canadian. This path-breaking book highlights the work of Canadian counsellors and counselling psychologists and focuses on issues pertinent to practising in Canada. Key topics such as scientific issues, health, wellness, prevention, career psychology, assessment, training and supervision, and social justice and multiculturalism are explored in detail. Using a strength-based framework, each chapter attends to societal factors, diversity of methodological frameworks, and an analysis of the challenges and future directions for the disciplines. Providing a common voice for a diverse group of students and professionals, Canadian Counselling and Counselling Psychology in the 21st Century will be of interest to counsellor educators, faculty in counsellor and counselling psychology training programs, and counsellors interested in advancing their understanding of the current state of the field. Contributors include Kevin G. Alderson (University of Calgary), Nancy Arthur (University of Calgary), Bill Borgen (University of British Columbia), Marla Buchanan (University of British Columbia), Erin Buhr (Trinity Western University), Lee Butterfield (Adler School of Professional Psychology), Sharon Cairns (University of Calgary), Sandra Collins (Athabasca University), Jose Domene (University of New Brunswick), Marilyn Fitzpatrick (McGill University), Nick Gazzola (University of Ottawa), Freda Ginsberg (SUNY Plattsburgh), Liette Goyer (Universite Laval), Bryan Hiebert (University of Victoria), George Hurley (Memorial University of Newfoundland), Anusha Kassan (University of British Columbia), Patricia Keats (Simon Fraser University), Audrey Kinzel (University of Saskatoon), Vivian Lalande (University of Calgary), Sasha Lerner (McGill University), Anne Marshall (University of Victoria), Marv McDonald
