

# postelection conflict management in nigeria the challenges of national unity monograph series school for conflict analysis and resolution

[#post-election conflict Nigeria](#) [#conflict management Nigeria](#) [#national unity challenges Africa](#) [#Nigeria political stability](#) [#peacebuilding Nigeria](#)

This monograph comprehensively examines the intricate dynamics of post-election conflict management in Nigeria. It delves into the profound challenges impacting national unity, providing critical insights and analysis from the School for Conflict Analysis and Resolution, essential for understanding peacebuilding efforts in the region.

We value the intellectual effort behind every thesis and present it with respect.

Thank you for choosing our website as your source of information.

The document Nigeria National Unity Challenges is now available for you to access. We provide it completely free with no restrictions.

We are committed to offering authentic materials only. Every item has been carefully selected to ensure reliability. This way, you can use it confidently for your purposes.

We hope this document will be of great benefit to you. We look forward to your next visit to our website. Wishing you continued success.

Many users on the internet are looking for this very document. Your visit has brought you to the right source. We provide the full version of this document Nigeria National Unity Challenges absolutely free.

## Postelection Conflict Management in Nigeria

This volume is an invitation to deploy high-level scholarship in a strategic policy-making process that will strengthen the unity of Nigeria. Many in the international community and within Nigeria itself assert that the country is destined for unmanageable collapse, but John Paden proposes how Nigeria can respond to its current crises and tensions in ways that will serve the interests of the state, with its diverse citizenry, as well as the world at large. Distributed for George Mason University Press

## Contemporary Nigerian Politics

Looks at how Nigeria's political parties compete for power in a context of transition, terrorism, and religious and ethnic tension.

## Conflict Management in International Missions

This book serves primarily as a field guide and curriculum for organisations training personnel for conflict management missions abroad. Currently, a gap exists between practitioners and academia in the field of conflict management and peacebuilding. Few practitioners have studied conflict management, and few academics have experience as field workers. Conflict literature contains a range of important insights and analyses, but is useful only to a limited degree to practitioners. This book provides practitioners with a much needed guidebook which is easy to understand, academically solid and which identifies with their mission and helps them relate to real-time challenges in the field. The book focuses on a number of case studies, including peacebuilding efforts in East Timor, and offers a range of practical advice for persons about to embark on a mission, from the receipt of an appointment

to establishment in the field and encountering the realities and practical challenges that handling conflicts may imply. This book will be of much interest to students of conflict management, peacebuilding and conflict resolution, as well as practitioners in the field.

#### Managing Conflicts in Africa's Democratic Transitions

The democratization process which bolstered a culture of periodic elections has also fostered election-related violent conflicts. As democratic transitions gained currency in the new millennium, orderly transitions through the ballot boxes began replacing military coups but deaths and destructions came in the wake of elections in many countries. Inspired by decades-long pro-democracy movements across Africa that culminated in the Arab Spring of 2010-2011, and motivated by the desire to find long-term solutions to election-related violent conflicts in the continent, this book explores the terrain of democratization, elections, and conflict management. It raises and answers many questions, such as: What are the root causes of election-related conflicts? How free, fair, and credible are elections in many African countries? What institutional mechanisms are available for ballot and voter security and for mandate protection? What has been the role of civil society organizations in conflict prevention and management? What are the responsibilities of the international community, especially regional organizations like the Economic Community of West African States (ECOWAS) and the African Union (AU), in conflict resolution? What indigenous mechanisms for conflict management have been identified that may be proactively engaged?

#### Conflict Management in Nigeria

In *Conflict Management in Nigeria: Issues and Challenges*, Dr. Oshita O. Oshita, one of the leading peace researchers in Nigeria, interrogates a number of cross-cutting issues and challenges that may be encountered in the process of engaging with conflict mitigation in Nigeria. He explores the complex issues involved just as he analyses the challenges arising from the political economy of conflict management in Nigeria from historical and contemporary perspectives.

#### Conflict Resolution and Peace Education in Africa

Africa today suffers from too much political unrest and violent conflict. The contributors to this edited collection recognize a missing link in efforts to foster democracy, and with it political stability and peace, in Africa's developing countries: Democracy can be sustained only where effective means for resolving citizens' disputes exist both within and outside the formal legal system. The writers whose articles appear here--scholars, practitioners, and peace advocates--present their varied knowledge of conflict and war in Africa and strategies for introducing and implementing mediation, from Sierra Leone to South Africa. This volume is a model exchange of insights and ideas in the important field of conflict resolution as applied to Africa.

#### Conflict Resolution in Africa: The Case of the Organisation of African Unity (OAU)

The objective of this research is to investigate the causes of conflict in Africa. Further, it discusses the role played by the Organization of African Unity (OAU) in ensuring political order during its period of existence. The study employs content analysis of historical documents, academic works, internet sources and also current conflict situations in Africa as a baseline for its argument. Mainly, the study shows which major sources of tension need to be resolved to enjoy a sound, stable, peaceful, political and economic environment in the new millennium.

#### Minding the Gap

The prevailing narrative on Africa is that it is awash with violent conflict. Indeed, it does suffer from a multitude of conflicts — from border skirmishes to civil wars to terrorist attacks. Conflicts in Africa are diverse and complex, but there have been a number of cases of successful conflict management and resolution. What accounts for the successes and failures, and what can we learn from Africa's experience? *Minding the Gap: African Conflict Management in a Time of Change* takes on these questions, bringing together more than 20 experts to examine the source of conflicts in Africa and assess African management capacity in the face of these conflicts.

#### Humanitarian Intervention and Conflict Resolution in West Africa

The end of the Cold War has been characterized by a wave of violent civil wars that have produced unprecedented humanitarian catastrophe and suffering. Although mostly intra-state, these conflicts have spread across borders and threatened international peace and security. One of the worst affected regions is West Africa which has been home to some of Africa's most brutal and intractable conflicts for more than a decade. This volume locates the peacekeeping operations of the Economic Community of West African States (ECOWAS) within an expanded post-Cold War conceptualization of humanitarian intervention. It examines the organization's capacity to protect civilians at risk in civil conflicts and to facilitate the processes of peacemaking and post-war peace-building. Taking the empirical case of ECOWAS, the book looks at the challenges posed by complex political emergencies (CPEs) to humanitarian intervention and traces the evolution of ECOWAS from an economic integration project to a security organization, examining the challenges inherent in such a transition.

### Dynamics of Conflict Management I

Alternative Dispute Resolution Human interactions -even in primordial societies- normally results in certain amount of grievances. Conflicts have become a major part of nation building as the basis of modern democracies has been in differing opinion on all issues by several parties. Conflict and peace are never direct opposite and conflict should not be mistaken for war. Conflict is normal in any healthy relationship as it helps determine the strength and direction of relationships. People disagree, have different opinion on issues and expresses diverging interests in several situations. As conflicts are products of relationship a lot of emotions are involved. Conflicts elicit strong feelings and emotions in parties, making parties interests in supposedly trivial issues strong. The need to express feeling unencumbered, to feel understood, supported and cherished become the primary emotional priority of all parties to conflicts.

### Models of Conflict Resolution

This volume considers the options available to donors in the effort to prevent conflict and enhance prospects for peaceful social, economic and political development.

### Development Centre Seminars Conflict Management in Africa A Permanent Challenge

Studienarbeit aus dem Jahr 2021 im Fachbereich Afrikawissenschaften - Sonstiges, Chukwuemeka Odumegwu Ojukwu University (EDUCATION), Sprache: Deutsch, Abstract: This paper examined the principals' strategies in managing conflict in secondary schools in Nigeria. Conflict as a concept has become so pervading, that it is part of life and existence itself. The paper looked at meaning, levels, types, causes and effects and concept of conflict management strategies. It was recommended among others that the guidance and counselling committees in the schools should be strengthened so that they can educate the students on better ways of handling conflict. School authorities should complement reward students' good behaviors and to encourage them to behave well in school. Peer mediation teams should be established with selected students who are well behaved and equipped with conflict resolution skills to help the schools handle interpersonal conflict. This group could be trained periodically by the district education office, civil society, or any community-based or non-governmental organization which is interested in conflict management so that basic schools in the district would have relatively reduced conflict environment. It is also necessary for students to be educated on all the conflict resolution mechanisms in the schools and sanctions for certain offences.

### Principal s Strategies in Managing Conflict in Secondary Schools in Nigeria

Master's Thesis from the year 2015 in the subject Sociology - War and Peace, Military, University of Innsbruck, course: Peace, Security and Conflict Studies, language: English, abstract: As stated in the UNESCO preamble, "Since wars begin in the minds of men, it is in the minds of men that the defenses of peace must be constructed". This quote is the foundation for this work. My thesis demystifies the cycle of armed conflicts in Nigeria. I strongly believe that there is a need to positively transform the mindsets and ideologies that drive and fuel violent hostilities. At every point in time in Nigeria, there is unrest ranging from election violence, quest for self-determinism, or tensions arising from ideological dissonances. This thesis investigates what triggers these hostilities, and further explores nonviolent, grassroots and people oriented conflict transformation approaches. The historical, cultural and ethno-political complexity of Nigeria made this research a big challenge. For this study to be concrete, I explored some root-cause dynamics connected to armed conflicts in Nigeria. Obviously, armed conflicts are confrontations with the presence and the use of mobile and stationary weapons.

This is why some scholars and experts argue that without weapons, armed conflict will not exist. Thus, eliminating weapons is the ultimate solution for ending armed conflicts. This argument is the brain behind arms embargo treaties such as the ECOWAS Moratorium on Small and Light Weapons, and the Bamako Declaration. Nigeria ratified both treaties, and has further demonstrated commitment in several multilateral disarmament and non-proliferation initiatives. This nexus between weapons availability and armed conflict is also the driving force behind demobilization and disarmament programs in Nigeria. The fundamental question here is, despite these acclaimed political and diplomatic endeavors on national, regional and international levels, why do armed conflicts still exist? My thesis unravels this missing puzzle. Following this, the threefold research questions for this study are as follows: 1. What internal and external factors facilitate incessant armed conflicts in Nigeria? 2. Why has previous conflict resolution or conflict management mechanisms proved to be ineffective? 3. Taking the aforementioned questions into consideration, what approaches could be deployed to transform the situation?

#### Demystifying the cycle of armed conflicts in Nigeria. A holistic healing approach

This edited text builds on a core set of concepts to offer insights into conflict management and African politics. Key concepts such as ripe moments, hurting stalemates, and collapsed states, are built upon in order to show how conflict resolution theory may be applied to contemporary challenges, particularly in Africa.

#### Conflict Management and African Politics

This book is aimed at both professionals and students who desire to deepen their understanding of the processes involved in conflict intervention and resolution effectively.

#### Conflict Intervention and Transformation

Conflict Management and Resolution provides students with an overview of the main theories of conflict management and conflict resolution, and will equip them to respond to the complex phenomena of international conflict. The book covers these four key concepts in detail: negotiation, mediation, facilitation, reconciliation. It examines how to prevent, manage and eventually resolve various types of conflict that originate from inter-state and inter-group competition, and expands the existing scope of conflict.

#### Conflict Management and Resolution

This volume offers a comprehensive assessment of the problem of conflict and its methods of management in Nigeria's contemporary democracy. It represents a compendium of resourceful studies provided by experts on conflict studies from various disciplines across the Social Sciences and Humanities. Such studies are very useful at this crucial point in Nigeria's history as there are currently various national and international efforts to address the scourge of violent conflicts that have caused huge numbers of deaths and displacement of persons. The book will be of particular interest and use to conflict researchers, students, practitioners and government officials.

#### Nigeria, a Country under Siege

This work raises questions on whether and how to effectively resolve conflict. Taking stock of the ideas, assumptions and practices of this emerging field, the book provides an examination of conflict theory and practice, focusing on politics and international relations, as well as biology, culture, management, psychology and social psychology. Central to its thesis is the interaction between the skills of resolving conflict and societal pressures for conflict's continuation. Conflict resolution is a growth area of study; its methods are applicable in domestic violence as well as in attempts to secure world peace. This text is written in a deliberately provocative way which does not include every side to an argument.>

#### NGOs and Conflict Management

One global leadership challenge is managing the complexity of the political and economic climate of a society. As the global environment changes, it is essential for global leaders to adapt and develop flexible strategies for resolving conflicts and achieving peace. Global Leadership Initiatives for Conflict Resolution and Peacebuilding provides emerging research on a leader's role in the international, national, and nongovernmental organization within post-conflict resolution and peaceful leadership. While highlighting topics, such as civil society organizations, leadership education, and social reconstruction, this book explores leadership theories and practice models to conceptualize

the intersection of leadership within conflict management and resolution. This book is an important resource for leaders, scholar-practitioners, educators, and researchers seeking current research on the strategic and diplomatic methods of a peaceful global organization.

### Conflict Resolved?

Conflict Resolution is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Conflict Resolution deals with conflict which is an integral component in the utilization and management of all life support systems. These volumes give a comprehensive review on Conflict Domains: Warfare, Internal Conflicts, and the Search for Negotiated or Mediated Resolutions; Analysis methods of conflict and its resolution; Approaches to Conflict ;Resolution; Formal Models for Conflict Resolution and Case Studies. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

### Global Leadership Initiatives for Conflict Resolution and Peacebuilding

This book introduces the subject of third party intervention, one of the core subject matters of the fields of conflict resolution and peace studies. It provides a comprehensive introduction to the dimensions, issues, and methods of third party intervention, and approaches the subject from an interdisciplinary perspective. It delves into third party definitions, typologies, actors, rationale, motives, decision dimensions, and roles. This book provides in-depth analysis of such third party methods as mediation, arbitration, hybrid procedures, problem solving workshops, and peacekeeping, uniquely bringing all major topics of third party intervention into one text. The last two chapters deal with timing of intervention and ripe moments, and ethics. Students of conflict resolution and peace studies will benefit from this book.

### Conflict Resolution - Volume II

This handbook explores the challenges and opportunities for leadership and conflict response in the context of Africa at several levels. Leadership plays a vital role in affecting conflict response but is frequently only examined at the macro level of state, government, and international organizations. This handbook addresses the need to explore challenges and opportunities for leadership at several levels: macro (global, regional, national), meso (NGOs, religious groups, academics), and micro (civil society organizations, youth groups, women's organizations). Analysis from multiple levels provides a broader explanation of conflict dynamics and helps to fit localized conflict transformation approaches into wider national or regional structures. The multidisciplinary essays presented in this volume encompass the psychological, political, and structural dimensions of conflict response and demonstrate how its success is fundamentally linked to the style of effectiveness of leadership, among other factors. The volume is divided into four thematic sections: Part I: The theory and dynamics of conflict response and leadership Part II: Macro-level leadership experiences in conflict response Part III: Meso-/micro-level leadership experiences in conflict response Part IV: Recommendations for improved leadership in conflict response This book will be of much interest to students of conflict resolution, peace studies, African politics, security studies, and international relations, in general.

### Conflict Resolution

This monograph highlights the necessity for taking preventive measures in the form of peace-building as a sustainable and long-term solution to conflicts in West Africa, with a special focus on the Mano River Union countries. Apart from the Mano River Union countries, efforts at resolving other conflicts in say, Guinea Bissau, Senegal, C'te d'Ivoire and Nigeria, have suffered from a lack of attention on the post-conflict imperatives of building peace in order to ensure that sustainable peace is achieved. Given the often intractable and inter-related nature of conflicts in this region, it argues for the need to revisit the existing mechanisms of conflict resolution in the sub-region with a view to canvassing a stronger case for stakeholders towards adopting the peace-building strategy as a more practical and sustainable way of avoiding wars in the sub-region. Peace-building in consonance with its infrastructure is a more sustainable approach to ensuring regional peace and stability and, therefore, ensuring development for the peoples of West Africa. Dr Osita Agbu is currently a Senior Research Fellow at the Nigerian Institute of International Affairs, Lagos. His areas of specialization include Peace and Conflict studies,

Governance and Democratization and Technology and Development. He was until recently, a Visiting Research Fellow at the Institute of Developing Economies, Chiba, Japan.

#### Routledge Handbook of Conflict Response and Leadership in Africa

Elections have emerged as one of the most important, and most contentious, features of political life on the African continent. In the first half of this decade, there were more than 20 national elections, serving largely as capstones of peace processes or transitions to democracies. The outcomes of these and more recent elections have been remarkably varied, and the relationship between elections and conflict management is widely debated throughout Africa and among international observers. Elections can either help reduce tensions by reconstituting legitimate government, or they can exacerbate them by further polarizing highly conflictual societies. This timely volume examines the relationship between elections, especially electoral systems, and conflict management in Africa, while also serving as an important reference for other regions. The book brings together for the first time the latest thinking on the many different roles elections can play in democratization and conflict management.

#### West Africa's Trouble Spots and the Imperative for Peace-Building

Managing post-conflict progress has been an elusive task for policymakers and other stakeholders. This book discusses domestic peace, security, and development in Sierra Leone, and argues for human security as the basis for building a sustainable post-conflict environment.

#### Elections and Conflict Management in Africa

This textbook takes a multi-perspective approach to the study of conflict management in divided societies. The philosophies underpinning constitutional design are clearly explained, including power sharing, centripetalism, power dividing and territorial self-governance. The actors and processes involved, and the practicalities of the settlement process are covered in conceptual and theoretical contributions that include the evolution of diplomacy in peacemaking. The book ends with empirical case studies that explore the realities on the ground by specialists drawing on their experience of working in conflict zones.

#### Human Security and Sierra Leone's Post-Conflict Development

Indigenous Conflict Management Strategies in West Africa: Beyond Right and Wrong expands the discourse on indigenous knowledge. With several examples and case histories, the work defines, characterizes, and explains indigenous conflict management strategies in West Africa, particularly in Ghana, Nigeria, and Cameroon. The book critically evaluates indigenous conflict management strategies with a view to determining their effectiveness in the context of the societies' history and culture, and the relevance and adaptability of these strategies in contemporary contexts. This book takes a scholarly approach, avoiding romanticizing or idealizing indigenous conflict management strategies in West Africa. It advocates a set of mechanisms by which the best elements of indigenous knowledge and skills in conflict management may be deployed to settle contemporary disputes, and made portable for adoption and adaptation by other complex societies in the region and beyond.

#### Conflict Management in Divided Societies

Since 1982, Nigeria has experienced more than ten large scale ethnic or religious riots in its major cities. These violent clashes have wreaked economic, political, and social havoc; caused an enormous number of deaths and injuries; and posed serious obstacles to Nigeria's sociopolitical development as well as retarded efforts at nation-building. The papers collected in this book serve as a critical part of an overall objective to develop and promote mechanisms for the understanding and resolution of ethnic and religious conflicts in Nigeria. Both academic and community leaders address various aspects of these conflicts, and Uwazie offers several thoughtful options for their successful resolution. Inter-Ethnic and Religious Conflict Resolution in Nigeria will interest students of African history and current affairs, scholars of anthropology and ethnicity studies, and those involved in international relations and peace studies.

#### Indigenous Conflict Management Strategies in West Africa

Offering an assessment of the theory and practice of conflict resolution in post-Cold War conflicts, this book addresses a number of questions. It explores the nature of contemporary conflict and the development of conflict resolution.

#### Inter-ethnic and Religious Conflict Resolution in Nigeria

The Handbook of Conflict Management cuts across theoretical perspectives, strategic models, and situational contexts as the first all-encompassing conflict management reference. A young field in both research and practice, this foundational text sets precedents for furthering academic study and real-world progress in managing diverse instances of conflict. It draws on more than 600 references to probe sources of conflict and to prescribe means of reducing tension in organizational, institutional, and community settings. Introducing core themes and issues into the dialogue, the handbook provides techniques to promote peaceful negotiation, cooperation, and consensus.

#### Contemporary Conflict Resolution

Master's Thesis from the year 2017 in the subject Politics - International Politics - Topic: Peace and Conflict Studies, Security, grade: 3.00, , course: Msc Defence and International Politics, language: English, abstract: This study examines the causes of electoral conflicts in Ghana and Africa, and the role and challenges of the National Peace Council in resolving election-related conflicts. In many African countries, both the economic and political authorities are confiscated and held in the hands of some corrupt leaders who through the use of force control the destiny of their countries. Since the adoption of multiparty systems in some African countries, most elections have been tarnished by violence and by political antagonists who continue to question not only the fairness and the transparency of elections but also the validity of the electoral systems of their countries. Ghana's elections for some time now have become violent resulting in disputes. A typical case of this situation was the 2012 elections which ended up in the Supreme Court as a dispute. In all of these conflicts, the role of the National Peace Council cannot be over-emphasized. The Council played an important role before, during and after elections. This contributed in the peace that the Ghana experienced during and after elections. In the light of the key role of the Council played in ensuring peace before, during and after elections, there are a number of challenges that confronted the Council. This study examines the specific role played by the National Peace Council (NPC) in ensuring peace in elections. The study discussed the challenges that affected the work of the Council such as limited funding to initiate activities and inadequate staff to help carry out its functions. The methodology adopted in this study is the qualitative case study approach which enabled the study to analyze the findings by relying mostly on secondary data to make its findings. Literatures from secondary data were reviewed to answer research questions. The findings of this study confirm that, the role played by the National Peace Council (NPC) yielded positive results in ensuring the peace of the country throughout the electoral period which other Africa countries can emulate to prevent election-related conflicts.

#### Training to Promote Conflict Management

Resolving International Conflict rethinks the dynamics of conflict escalation and continuation by engaging with research from the wide range of subfields in this area. The book suggests a new framework for understanding conflict as a particular form of situation, interaction and tension. It shows how conflicts are shaped by varied dynamics relating to emotion, securitization, incentives, digital technology and violence; even attempts at monitoring, resolving or remembering conflicts may end up contributing to their escalation or continuation. Split into two sections, the first part focuses on the question of why and how conflicts escalate, while the second part analyses the continuation of conflict. The book features several case studies of conflict escalation and continuation - in Bahrain, Israel-Palestine, South Sudan, Northern Ireland and, most prominently, the case of the Syrian uprising and subsequent civil war. Throughout the book, and, in particular, in the conclusion, the consequences for conflict transformation are discussed. This work will be of much interest to students of conflict resolution, peace studies, war and conflict studies, security studies and international relations, in general.

#### Conflict Resolution in Uganda

In examining the efforts of Cote d'Ivoire, Ghana, and Nigeria to manage their conflicts, this book provides a greater understanding of governance and conflict management that is applicable well beyond the African continent.

## Understanding Peace, Security and Conflict Resolution

Ethno-national conflict is one of the central issues of modern politics. Despite the emergence of approaches to managing it, from nation-building to territorial autonomy, in recent years, the application of these approaches has been uneven. Old conflicts persist and new ones continually emerge. The authors of this book contend that what is needed to drive forward the theory and practice of ethno-national conflict management is a more nuanced understanding of ethnicity and nationalism. The book addresses this issue by linking theories of ethnicity and nationalism to theories of conflict management. Its contributors share a common goal of demonstrating that a nuanced understanding of ethnicity and nationalism can beneficially inform conflict management in theory and practice. To do so, they analyse both hot and cold conflict zones, as well as cases that have been important in the development of the most widely-used conflict management models. The book is aimed at those interested in the theory and practice of ethno-national conflict management as well as the study of ethnicity and nationalism. It is well-suited for undergraduate and advanced research students, experts and policy-makers. This book was originally published as a special issue of Commonwealth and Comparative Politics.
