Intro

Scientific Method Set of experimental and mathematical procedures used by scientists to develop, test, and modify ideas about how the world works

Falsifiable Capable of being proven wrong based on observations or experimentation

Theory Explanation about the natural world backed by substantial evidence

Critical Thinking Objective evaluation and analysis of a topic that considers the full range of evidence

Illusory Correlation Perception of a stronger relationship between events than actually exists

Anecdotal Evidence Personal stories about specific experiences and incidents

Anecdotal evidence is less reliable than large data sets.

Confirmation Bias Tendency to seek out or interpret information in ways that support an existing belief

Pseudoscience Collection of beliefs or practices that appear to be scientific but are not supported by evidence
