The Great Eastern

"My favorite read of the year..."—Keegan-Michael Key, Top Ten Picks, New York Times A dazzling, inventive literary adventure story in which Captain Ahab confronts Captain Nemo and the dark cultural stories represented by both characters are revealed in cliffhanger fashion. A sprawling adventure pitting two of literature's most iconic anti-heroes against each other: Captain Nemo and Captain Ahab. Caught between them: real-life British engineer Isambard Kingdom Brunel, builder of the century's greatest ship, The Great Eastern. But when he's kidnapped by Nemo to help design a submarine with which to fight the laying of the Transatlantic cable - linking the two colonialist forces Nemo hates, England and the US - Brunel finds himself going up against his own ship, and the strange man hired to protect it, Captain Ahab, in a battle for the soul of the 19th century.

The Greatest Iron Ship

"In Shambhala: The Sacred Path of the Warrior Chögyam Trungpa offers an inspiring and practical guide to enlightened living based on the Shambhala journey of warriorship, a secular path taught internationally through the Shambhala Training program. Great Eastern Sun: The Wisdom of Shambhala is a continuation of that path. Shambhala was an exploration of human goodness and its potential to create an enlightened society—a state that the author calls "nowness." And in that spirit of nowness, Great Eastern Sun—which is accessible to meditators and nonmeditators alike—centers on the question, "Since we're here, how are we going to live from now on?"

The Official Guide to the Great Eastern Railway

A photographic journey along this famous stretch of Britain's railways, including all the stations as well as all the different variations of locomotives and multiple units that operate over it.

Great Eastern Sun

This military history of Ancient Rome analyses the empire's revitalized push against rising enemies to the East. In the century since Rome's defeat of the Seleucid Empire in the 180s BC, the East was dominated by the rise of new empires: Parthia, Armenia, and Pontus, each vying to recreate the glories of the Persian Empire. By the 80s BC, the Pontic Empire of Mithridates had grown so bold that it invaded and annexed the whole of Rome's eastern empire and occupied Greece itself. But as Rome emerged from the devastating effects of the First Civil War, a new breed of general emerged with it, eager to

re-assert Roman military dominance and carve out a fresh empire in the east. In Rome's Great Eastern War, Gareth C. Sampson analyses the military campaigns and battles between a revitalized Rome and the various powers of the eastern Mediterranean hinterland. He demonstrates how this series of conflicts ultimately heralded a new phase in Roman imperial expansion and reshaped the ancient East.

The Great Eastern Main Line: London Liverpool Street-Norwich

At the time of her launch in 1858, the iron steam ship Great Eastern was the largest ship ever built. It would take more than forty years until her length of nearly 700 feet and tonnage of 22,550 tons were beaten by another ship. She had been designed by the famous engineer Isambard Kingdom Brunel and became known all over the world for her modern look. Commercially, the Great Eastern was a disappointment. A series of accidents, starting with an explosion during her maiden voyage, ended her short career as passenger liner between Britain and the United States. In the second half of the 1860s she was transformed into a cable-laying ship and placed transatlantic telegraph cables for several years. Afterwards, the Great Eastern became a floating music hall and advertising space in Liverpool before she was broken up in 1889. This little book, descriptive of the wonder of the world of the deep.

The Great Eastern Railway

The Great Eastern Railway In South Essex: A Definitive History is the history of the Great Eastern's lines from Shenfield to Southend, Wickford to Southminster and Woodham Ferrers to Maldon including their ancestor. It is the only comprehensive history of all three lines and was researched using both previously published and unpublished material. The history covers not only the history of the lines in question but also a sample of services from the opening of them to the present day, the motive power that was and is used on them and a topographical description of them. The book is intended to appeal to wide audience: in particular those with an interest in the local history of the area served by the lines, those interested in the history of Essex and railway enthusiasts interested in the railways of the eastern counties in general and the Great Eastern Railway in particular.

The Great Eastern Steam Ship; a description of Scott Russell's Great Ship, now building at Milwall, for the Eastern Steam Navigation Company

Khmer Concrete investigates what remains of Cambodia's post-independence architectural heritage and how it still retains its poetic power in contemporary Cambodia. The development of an independent intellectual and cultural elite was seen as crucial to maintaining Cambodia's international status and independence in the years after 1953. In addition to architecture, a vibrant art and culture scene developed which sought to express itself on the international stage. All this came to an end, however, when the Khmer Rouge seized power and laid waste to the countryside and cities of Cambodia between 1975 and 1980. *Khmer Concrete* explores the forgotten legacy of these buildings and their place in modern Cambodia.

Rome's Great Eastern War

"This is no chronology of Middle East history but a passionate outcry against the lies and deceit that have sent soldiers to their deaths and killed tens of thousands of men and women - Muslim, Christian and Jew - over the past century. It is also a chronicle of journalists at war, of the rage, humour and frustration of the correspondents who spend their lives reporting the first draft of history, of their occasional courage - and sometimes their deaths. Rarely have first-hand reporting and history been so powerfully combined than in Robert Fisk's epic story of tragedy and betrayal in the Middle East. As his narrative of bloodshed and cruelty unfolds in Iraq, Afghanistan, Algeria, Iran, Israel, Palestine and other battlefields, the carnage of September 11th, 2001, and the overthrow of Saddam Hussein's brutal regime take on a new and frightening meaning." -Inside front cover.

Description and History of the Great Eastern

While not all natural disasters can be avoided, their impact on a population can be mitigated through effective planning and preparedness. These are the lessons to be learned from Japan's own megadisaster: the Great East Japan Earthquake of 2011, the first disaster ever recorded that included an earthquake, a tsunami, a nuclear power plant accident, a power supply failure, and a large-scale disruption of supply chains. It is a sad fact that poor communities are often hardest hit and take the

longest to recover from disaster. Disaster risk management (DRM) should therefore be taken into account as a major development challenge, and countries must shift from a tradition of response to a culture of prevention and resilience. Learning from Megadisasters: Lessons from the Great East Japan Earthquake consolidates a set of 36 Knowledge Notes, research results of a joint study undertaken by the Government of Japan and the World Bank. These notes highlight key lessons learned in seven DRM thematic clusters—structural measures; nonstructural measures; emergency response; reconstruction planning; hazard and risk information and decision making; the economics of disaster risk, risk management, and risk financing; and recovery and relocation. Aimed at sharing Japanese cutting-edge knowledge with practitioners and decision makers, this book provides valuable guidance to other disaster-prone countries for mainstreaming DRM in their development policies and weathering their own natural disasters.

The Great Eastern Railway in South Essex

"Zahra handles this immensely complicated and multidimensional history with remarkable clarity and feeling." —Robert Levgold, *Foreign Affairs* Between 1846 and 1940, more than 50 million Europeans moved to the Americas in one of the largest migrations of human history, emptying out villages and irrevocably changing both their new homes and the ones they left behind. With a keen historical perspective on the most consequential social phenomenon of the twentieth century, Tara Zahra shows how the policies that gave shape to this migration provided the precedent for future events such as the Holocaust, the closing of the Iron Curtain, and the tragedies of ethnic cleansing. In the epilogue, she places the current refugee crisis within the longer history of migration.

The Big Ship: Brunel's Great Eastern

This work features stunning aerial photography from Britain's leading aerial photographer, Jason Hawkes, accompanied by text from award-winning travel writer, Mike Gerrard. Jason Hawkes, Britain's leading aerial photographer, has been taking to the skies with his camera for more than fifteen years. In this, his latest collection of aerial

Khmer Concrete

Since the 1950s, China and India have been locked in a monumental battle for geopolitical supremacy. Chinese interest in the ethnic insurgencies in northeastern India, the still unresolved issue of the McMahon Line, the border established by the British imperial government, and competition for strategic access to the Indian Ocean have given rise to tense gamesmanship, political intrigue, and rivalry between the two Asian giants. Former *Far Eastern Economic Review* correspondent Bertil Lintner has drawn from his extensive personal interviews with insurgency leaders and civilians in remote tribal areas in northeastern India, newly declassified intelligence reports, and his many years of firsthand experience in Asia to chronicle this ongoing struggle. His history of the "Great Game East" is the first significant account of a regional conflict which has led to open warfare on several occasions, most notably the Sino-India border war of 1962, and will have a major impact on global affairs in the decades ahead.

The Great War for Civilisation

IF EVER there was a subject fit for the hand of the biographer, the story of the Great Eastern is surely it. James Dugan has made the entertaining most of a monstrous but true episode of the high Victorian days, the age of iron and the mechanical engineer. He has written a failure-story far more amusing than most success-stories could be: and out of 692 feet and 12,000 tons of iron he has made a character almost human in its foibles and its superb talent for getting into trouble. Before the Great Eastern had made her first trip to New York, she had eaten up \$5,000,000, the first of the fortunes she regularly swallowed on every voyage. She had hardly steamed a few dozen miles when the forward funnel blew out. She passed through the hands of three groups of shareholders before she ever carried a paying passenger. Everything that could possibly happen to a ship happened to the Great Eastern. Tanks of fish oil deluged her engine deck. Two horses died of a bad cold because she passed too close to an iceberg. On her fourth voyage she got stuck in Flushing Bay, at the western end of Long Island Sound, with a gash in her bottom that would have comfortably accommodated an ordinary-sized ship. Storm, mechanical failure, inefficient captains and crew—the Great Eastern had everything. She almost cut New York in two when she first docked. Into her story enter such figures as Cyrus Field—who made use of the Great Eastern to lay the Atlantic cable; Louis Napoleon—he wrested the leviathan just in

time from the hands of the Sultan of Turkey, who wanted to use her to house his harem; Jules Verne, Du Chaillu. Indian nabobs, the war correspondent Scott Russell, and dozens of other figures of a bygone age. The whole story is told by Mr. Dugan with an unfailing appreciation of the high, low and medium comedy involved in the Great Eastern's crazy career, and with a sharp eye for the Victorian background and personalities.

Learning from Megadisasters

Throughout the history of civilization, food has been more than simple necessity. In countless cultures, it has been livelihood, status symbol, entertainment - and passion. In the GREAT FOOD series, Penguin brings you the finest food writing from the last 400 years, and opens the door to the wonders of every kitchen.

The Great Departure: Mass Migration from Eastern Europe and the Making of the Free World

The Great Eastern steamship was one of the most amazing feats of engineering of its time, and in this detailed account, William Henry Webb provides an inside look at its design and construction. Complete with illustrations and sectional plans, this book is a must-read for anyone interested in the history of transportation and technology. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

British Isles

This volume reproduces the Apocalypse Cycle of the Great East Window of York Minster in its entirety and in full colour for the very first time. Stunning photography presents each panel in detail, accompanied by expert commentary. The book is both a testament to the remarkable combination of skill, scholarship and cutting-edge technology that has gone into the conservation of the window, and an important study of the significance of the Apocalypse narrative both in the early 15th century and today.

Great Game East

Benjamin Disraeli is primarily remembered as a two-time Prime Minister, founder of modern British Conservatism, and popular novelist. However, in the course of a few fateful years, he had a decisive influence on the history of the countries of the Balkan peninsula. Like all British Prime Ministers in this period, Disraeli was forced to confront the Eastern Question: what to do about the political future of the Balkans and the Levant, as the Ottoman Empire began to implode. During the 'Eastern Crisis' of 1875 to 1878, Disraeli played a key role, in the end imposing his will on the rest of Europe at the Congress of Berlin. It is a commonplace in biographies of Disraeli that his attitude to the East and the Eastern Question is essential for understanding his complex persona and the most crucial period of his career, yet until now this topic has not been researched in detail. Disraeli and the Eastern Question now fills this gap, providing the first complete reconstruction of Disraeli's attitudes towards the East and the Eastern Question as a whole, from his early youth onwards, and using a wide range of primary sources, from Disraeli's private papers, correspondence, and novels, the manuscript collections of Queen Victoria and the Prime Minister's closest associates, to the minutes of Parliamentary debates and the official correspondence of the Foreign Office, as well as Russian, Serbian, Bulgarian, and Albanian documents. Blending a biographical approach with the history of ideas, Milos Kovic analyses Disraeli's role in the Eastern Crisis, at the Congress of Berlin, and after, to provide a full intellectual biography of his attitudes to the Eastern Question and how these affected the history of international relations in the late nineteenth century.

The Great Iron Ship

This book focuses on the ecological impacts of the Great East Japan Earthquake and resulting tsunamis, a rare and extremely large disturbance event, on various coastal ecosystems in Japan's Tohoku area, including sub-tidal and tidal animal communities, sand dune plant communities and

coastal forests. The studies presented here describe not only how species and populations in these ecosystems were disturbed by the earthquake and tsunamis, but also how the communities have responded to the event and what types of anthropogenic activities will hamper their recovery processes. In the ecological sciences, it is often argued that large disturbances are critical to shaping community structures and biodiversity in local and regional habitats. However, our understanding of these roles remains limited, simply because there have been few opportunities to examine and address the ecological impacts of large disturbance events. The scale of the 2011 Great East Japan Earthquake makes it one of the largest hazards in the past 1000 years. Thus, this book provides a unique opportunity to advance our understanding of the ecological impacts of large and rare disturbances and the implications of these events in the conservation and management of coastal ecosystems. Following an outline of the Great East Japan Earthquake, the book's content is divided into two major parts. Part I reports on studies examining the ecological impacts of the tsunamis on sub-tidal and tidal animal communities, while Part II focuses on terrestrial plant communities in Japan's coastal Tohoku area. This book will benefit all scientists interested in the ecological impacts of large disturbances on aquatic and terrestrial ecosystems in general, and especially those who are interested in the ecological management of coastal ecosystems and Ecosystem based Disaster Risk Reduction (EcoDRR).

Great Eastern Railway Magazine

After an immense process of careful restoration and conservation, the outstanding artistry of the Great East Window is revealed afresh through state-of-the art photography that captures the complete sequence of major panels, in corrected placements, for the very first time. At the size of a tennis court, it is the largest single expanse of medieval stained glass in Britain and one of the largest medieval windows ever made. This visual feast is brought to life by expert author Sarah Brown, who explores the history, artistry, meaning and restoration of the window, revealing new insights on a fragile masterpiece that has been described as England's Sistine Chapel. Ground breaking new research has shed exciting new light on the window's complex narratives, relating its story to the Minster's history and liturgy. The Great East Window of York Minster explores the window's biblical presentation of the beginning and end of time, the window's relationships with other media and the technical processes behind its creation. This stunning, illustrated hardback presents an engaging contextual analysis of the window's unequivocal position as an English masterpiece.

A Middle Eastern Feast

"This English translation of the original Russian work is thought provoking, challenging the 'official' version of what happened" during World War II (Firetrench). The memory of the Second World War on the Eastern Front—still referred to in modern Russia as the Great Patriotic War—is an essential element of Russian identity and history, as alive today as it was in Stalin's time. It is represented as a defining episode, a positive historical myth that sustains the Russian national idea and unites the majority of Russian citizens. As a result, as Boris Sokolov shows in this powerful and thought-provoking study, the heroic and tragic side of the war is highlighted while the dark side—the incompetent, negligent and even criminal way the war was run—is overlooked. Although almost eighty years have passed since the defeat of Nazi Germany, he demonstrates that many of the fabrications put forward during the war and immediately afterwards persist into the present day. In a sequence of incisive chapters he uncovers the truth about famous wartime episodes that have been consistently misrepresented. His bold reinterpretation should go some way towards dispelling the enduring myths about the Great Patriotic War. It is necessary reading for anyone who is keen to understand how it continues to be distorted in Russia today.

Descriptive Particulars of the Great Eastern Steam Ship With Illustrations and Sectional Plans

Beginning in 1948, the Soviet Union launched a series of wildly ambitious projects to implement Joseph Stalin's vision of a total "transformation of nature." Intended to increase agricultural yields dramatically, this utopian impulse quickly spread to the newly communist states of Eastern Europe, captivating political elites and war-fatigued publics alike. By the time of Stalin's death, however, these attempts at "transformation"—which relied upon ideologically corrupted and pseudoscientific theories—had proven a spectacular failure. This richly detailed volume follows the history of such projects in three communist states—Poland, Hungary, and Czechoslovakia—and explores their varied, but largely disastrous, consequences.

Apocalypse

The defeat of the Ottoman Empire in the Balkans in 1475 at the Battle of Vaslui heralded the beginnings of a historic legacy. The victor became known as Stephen the Great or Athleta Christi, Champion of Christ. Perceived as the founder of a Balkan identity, Stephen the Great maintained Moldova's independence during periods of fierce Ottoman attack between 1457 and 1504. His Christian religious stance meant that, in the eyes of Europe, he had not only defeated a significant territorial threat but had elevated Christianity to a superior level as victors over its Muslim opponents. Here, Jonathan Eagles seeks to unveil the mechanisms behind this legacy, reviewing the state formations that allowed this national hero to emerge, and explaining the methods that preserve his memory in the region today. By combining the latest historical studies of the anti-Ottoman resistance with new archaeological findings, Stephen the Great and Balkan Nationalism engages with a fresh approach to the history of the Balkans, and reinvigorates the study of the Ottoman Empire's impact in Europe. This is an important book for those with an interest in medieval history, Balkan history and the Ottomans.

Disraeli and the Eastern Question

A highly illustrated survey of the glory days of steam in Essex, Sussex, Norfolk and parts of Cambridgeshire.

Ecological Impacts of Tsunamis on Coastal Ecosystems

A celebration of the life and engineering achievements of Isambard Kingdom Brunel by two of the world's foremost authorities. In his lifetime, Isambard Kingdom Brunel towered over his profession. Today, he remains the most famous engineer in history, the epitome of the volcanic creative forces which brought about the Industrial Revolution - and brought modern society into being. Brunel's extraordinary talents were drawn out by some remarkable opportunities - above all his appointment as engineer to the new Great Western Railway at the age of 26 - but it was his nature to take nothing for granted, and to look at every project, whether it was the longest railway yet planned, or the largest ship ever imagined, from first principles. A hard taskmaster to those who served him, he ultimately sacrificed his own life to his work in his tragically early death at the age of 53. His legacy, though, is all around us, in the railways and bridges that he personally designed, and in his wider influence. This fascinating new book draws on Brunel's own diaries, letters and sketchbooks to understand his life, times, and work.

The Great East Window of York Minster

This stylishly designed book tells the fascinating story of the greatness and glamour of the ocean liner. For the first time in paperback, the history of these vessels is recounted with full exploration into their design, construction and development, along with a social history of those who worked and travelled on them. The well-known perennial favourites such as Mauretania, Olympic, Titanic, Bremen, Europa and the Cunard Queens are looked at in a fresh light in the context of emerging and changing lifestyles. The book also offers detailed information on some of the lesser known but significant ships such as l'Atlantique, Empress of Britain and Cap Arcona. The story is brought full circle with a discussion of the liner's increasing influence on cruise ship design and the Queen Mary 2, which initiated a new liner era for the twenty-first century.

Myths and Legends of the Eastern Front

The first ever history of Isambard Kingdom Brunel's forgotten first ship, the SS Great Western, the fastest and largest Atlantic Steamship of its day.

In the Name of the Great Work

R.C. Sherriff, author of *Journeys End*, the most famous play of the Great War, saw all his front line service with the 9th Battalion East Surrey Regiment. This intense experience profoundly affected his writing and, through his play, it continues to have a powerful influence on our understanding of the conflict. Yet the story of his battalion has never been told in full until now. In *The Journeys End Battalion*, Michael Lucas gives a vivid account of its history. Using official and unofficial sources, diaries, letters, and British and German wartime records, he describes the individuals who served in it and the operations they took part in. He identifies the inspiration for *Journeys End* and considers how Sherriff delved into his experiences and those of his fellow soldiers in order to create his drama. So not only

does the book shed new light on the wartime career of R.C. Sherriff, but it is a valuable record of the operation of a British battalion on the Western Front during the Great War.

Stephen the Great and Balkan Nationalism

SUNDAY TIMES TOP TEN BESTSELLER WINNER OF THE BRITISH ARMY MILITARY BOOK OF THE YEAR 2016 'Truly essential' Simon Sebag Montefiore The final destruction of the Ottoman Empire - one of the great epics of the First World War, from bestselling historian Eugene Rogan For some four centuries the Ottoman Empire had been one of the most powerful states in Europe as well as ruler of the Middle East. By 1914 it had been drastically weakened and circled by numerous predators waiting to finish it off. Following the Ottoman decision to join the First World War on the side of the Central Powers the British, French and Russians hatched a plan to finish the Ottomans off: an ambitious and unprecedented invasion of Gallipoli... Eugene Rogan's remarkable book recreates one of the most important but poorly understood fronts of the First World War. Despite fighting back with great skill and ferocity against the Allied onslaught and humiliating the British both at Gallipoli and in Mesopotamia (Iraq), the Ottomans were ultimately defeated, clearing the way for the making, for better or worse, of a new Middle East which has endured to the present.

Glory Days: Steam in East Anglia

The author reviews the history of East Friesland and discusses emigration to the United States of America. He reviews settlement in the States, and gets very specific listing settlements and extracting a brief amount of information from their church books for congregations in the following places: Adams, Brown, Champaign, Hancock, Iroquois, Lee, Livingston, Logan, Macoupin, Menard, Montgomery, Ogle, Peoria, Stephenson, Woodford Counties in Illinois and the towns of Pekin and Peoria; Calhoun, Grundy, Jones, Lyon, Osceola, Pocahontas Counties in Iowa; Barton and Rush Counties in Kansas; Chippewa County in Minnesota; Cheyenne and Dawson Counties in Nebraska as well as the southeastern part of the state; Garfield County in Oklahoma; and Texas.

Brunel

Information on religious and philosophical thinkers from China, India, Japan, Korea and the Islamic world

The Liner

A photographic journey along this famous stretch of Britain's railways, including all the stations as well as all the different variations of locomotives and multiple units that operate over it.

The First Atlantic Liner

The Imjin War (1592–1598) was a grueling conflict that wreaked havoc on the towns and villages of the Korean Peninsula. The involvement of Chinese, Japanese, and Korean forces, not to mention the regional scope of the war, was the largest the world had seen, and the memory dominated East Asian memory until World War II. Despite massive regional realignments, Korea's Chosŏn Dynasty endured, but within its polity a new, national discourse began to emerge. Meant to inspire civilians to rise up against the Japanese army, this potent rhetoric conjured a unified Korea and intensified after the Manchu invasions of 1627 and 1636. By documenting this phenomenon, JaHyun Kim Haboush offers a compelling counternarrative to Western historiography, which ties Korea's idea of nation to the imported ideologies of modern colonialism. She instead elevates the formative role of the conflicts that defined the second half of the Chosŏn Dynasty, which had transfigured the geopolitics of East Asia and introduced a national narrative key to Korea's survival. Re-creating the cultural and political passions that bound Chosŏn society together during this period, Haboush reclaims the root story of solidarity that helped Korea thrive well into the modern era.

The Journeys End Battalion

From the acclaimed historian of global empire, the dramatic story of how steam power reshaped our cities and our seas, and forged a new world order Steam power transformed our world, initiating the complex, resource-devouring industrial system the consequences of which we live with today. It revolutionized work and production, but also the ease and cost of movement over land and water. The result was to throw open vast areas of the world to the rampaging expansion of Europeans and

Americans on a scale previously unimaginable. Unlocking the World is the captivating history of the great port cities which emerged as the bridgeheads of this new steam-driven economy, reshaping not just the trade and industry of the regions around them but their culture and politics as well. They were the agents of what we now call 'globalization', but their impact and influence, and the reactions they provoked, were far from predictable. Nor were they immune to the great upheavals in world politics across the 'steam century'. This book is global history at its very best. Packed with fascinating case histories (from New Orleans to Montreal, Bombay to Singapore, Calcutta to Shanghai), individual stories and original ideas, Darwin's book allows us, for better or worse, to see the modern age taking shape.
