Welcome to this interview training tutorial.

I am a highly organized, professional and analytical person who has the right qualities, attributes and temperament to become a competent pilot with your airline.

I have chosen your airline for three specific reasons. The first reason is, you have a great reputation with your passengers and travellers, which means, providing I carry out my duties as a pilot to the high standards expected, I will have employment as a pilot with you for many years to come.

You need to have strong communication skills for several reasons, but primarily you need them for safety reasons. Firstly, whilst communicating with Air Traffic Control staff, you need to give clear accurate and concise information and conversely you also have to listen to, and follow instructions they give you.

The biggest risk I have ever taken was during a project was working on for a client in a previous role. The client had requested that an expensive, additional software resource be included within the project specification
