National Geographic Kids Cats and Dogs Super Sticker Activity Book

This activity book features 75 puffy stickers and over 300 regular stickers for many hours of fun with Mochi Mochi Panda! Each kit includes stickering activities and favorite age-appropriate activities like mazes, spot-the-differences, and dot-to-dot. Introducing a new kawaii property "Mochi Mochi Panda," a hugely popular brand with Japanese kids and teens! It was created by Kamio Japan, one of the top stationery companies in the country, and gained exposure through Gakken's tween fashion magazines as well as 16 books. Now the brand has been licensed to over 50 licensees, who have featured it on towels, toys, accessories and more. Mochi Mochi Panda is a panda-like creature that is squishy like mochi (rice cake). This is not a panda, not a rice cake, nor a marshmallow. Much like the kawaii character Gudetama, the world of Mochi Mochi Panda is about being laid-back and relaxed. Jumbo Mochi Mochi Panda can pull off pieces of himself to create lots and lots of Tiny Mochi Mochi Pandas. You'll meet Idol Panda, Aloha Panda, Princess Panda, Chic Panda, Rainbow Panda, Zombie Panda, and lots of other Tiny Pandas! What is kawaii? The concept of kawaii, Japan's culture of cuteness, started in the '70s and made its way to the US in 1976 with Sanrio's Hello Kitty. Since then, the US has seen continued success with such kawaii properties as Pokemon and more recently, Gudetama. The culture of kawaii is not just about being cute: it is pushing away serious things like business and politics, and embracing a more laid-back lifestyle. Couldn't we all use more of that?

El Sistema Solar. Un Libro Que Brilla En La Oscuridad

Si alguna vez te has preguntado cuál es el planeta más grande o cuál está más lejano del Sol o por qué Marte es rojo, éste es el libro que necesitas leer. Con ilustraciones del sistema solar, estas páginas revelarán todos los secretos que se esconden en el corazón de nuestra casa estelar. Descubre el origen de los anillos de Saturno, conoce cuál es la temperatura ardiente de Venus y lee la explicación del cinturón de asteroides. If you've ever wondered which planet is the biggest or the furthest away from the sun, or why Mars is red, this is the book you need to read. With its illustrations of the solar system, this book reveals all the secrets at the heart of our solar system. Discover the origin of Saturn's rings, the temperature of Venus, and why we have an asteroid belt.

I Am the Solar System

The Solar System is an incredible neighborhood centered around one very important star called the Sun. Discover the many amazing objects that call the Solar System home! In this simple Solar System book for kindergarten and first grade, kids are introduced to basic space concepts that are made easy to follow and remember. Starting at the Sun and working outward through the planets and belts, children will discover space objects and follow the flow of the solar wind, taking a fun and informative tour of the Solar System. Both boys and girls ages 5-8 will love the bright, colorful images of the planets and objects brought to life as characters, making learning more enjoyable and engaging. Kids will enjoy learning facts with the imaginatively illustrated Sun and planets that help build a love of learning while simultaneously presenting educational and scientific facts. Large print and easy to follow information tell all about the solar system for kids at preschool level learning. Travel the Solar System in an imaginary spaceship that tours the planets, and both belts, all the way to where the Solar System ends, and interstellar space begins. How many planets are in the Solar System? What type of planets are they? What happens to the solar wind? Have any spacecraft made it out of the Solar System? Where does the Solar System end? Find the answer to these questions and many more. I Am the Solar System is an excellent book for preschoolers, kindergarteners, and first graders just beginning to understand the basic concepts of the Solar System they are part of. I Am the Solar System, along with the numerous other books in the I Am series are a great addition to the Montessori method of teaching. The I Am series is geared toward scientific learning and independent thought. An excellent companion for Montessori classroom activities and as a stand alone read aloud.

Maker Lab

Build, create, invent, and discover 28 awesome experiments and activities with Maker Lab. Created in association with the Smithsonian Institution and supporting STEAM education initiatives, Maker Lab has 28 kid-safe projects and crafts that will get young inventors' wheels turning and make science pure fun. Explaining science through photographs and facts that carefully detail the "why" and "how" of each experiment using real-world examples to provide context, each activity is appropriate for kids ages 8-12 years old and ranked easy, medium, or hard, with an estimated time frame for completion. Requiring only household materials, young makers can build an exploding volcano, make bath fizzies, construct a solar system, make an eggshell geode, and more. With a foreword by Jack Andraka, a teen award-winning inventor, Maker Lab will help kids find their inner inventor to impress friends, family, and teachers and create winning projects for science fairs and school projects.

The Left Hand of Darkness

A human emissary sent to the world of Winter to bring it into a galactic civilization must find a way to bridge the gulf between his outlook and that of the natives, who can change gender at will.

The Divine Comedy

'We are going,' said Annie, 'on a great cosmic journey. So listen up, Savers of Planet Earth, and prepare to meet the Universe.' George's best friend Annie needs help. Her scientist father, Eric, is working on a space project - and it's all going wrong. A robot has landed on Mars, but is behaving very oddly. And now Annie has discovered something wierd on her dad's super-computer. Is it a message from an

alien? Could there be life out there? How do you find a planet in outer space? And if you could talk to aliens, what would you say?

George's Cosmic Treasure Hunt

The international bestseller about life, the universe and everything. 'A simply wonderful, irresistible book' DAILY TELEGRAPH 'A terrifically entertaining and imaginative story wrapped round its tough, thought-provoking philosophical heart' DAILY MAIL 'Remarkable ... an extraordinary achievement' SUNDAY TIMES When 14-year-old Sophie encounters a mysterious mentor who introduces her to philosophy, mysteries deepen in her own life. Why does she keep getting postcards addressed to another girl? Who is the other girl? And who, for that matter, is Sophie herself? To solve the riddle, she uses her new knowledge of philosophy, but the truth is far stranger than she could have imagined. A phenomenal worldwide bestseller, SOPHIE'S WORLD sets out to draw teenagers into the world of Socrates, Descartes, Spinoza, Hegel and all the great philosophers. A brilliantly original and fascinating story with many twists and turns, it raises profound questions about the meaning of life and the origin of the universe.

Sophie's World

The infectious tales and astounding details in 'The Disappearing Spoon' follow carbon, neon, silicon and gold as they play out their parts in human history, finance, mythology, war, the arts, poison and the lives of the (frequently) mad scientists who discovered them.

The Disappearing Spoon

People are nature. From the water we drink to the trees we climb, we are connected to the natural world in big and surprising ways. With simple, poetic text, and exquisite artwork, You Are Stardust introduces kids to these connections - sparking their imaginations and starting conversations. Combining the ideas of environmental author and educator Elin Kelsey with inventive, three-dimensional dioramas by artist Soyeon Kim, this remarkable picture book reveals ties that are often sensed, yet seldom explained. Children will learn that the salt in their body is the same as the salt in the ocean, that they learned to speak in the same way that baby birds do - by copying their parents, and that elephants, bats and whales make friends, just like they do. In a world dominated by technology, never have these connections between people and nature been more worth exploring.

You Are Stardust

Widely praised, "A Neotropical Companion" is an extraordinarily readable introduction to the American tropics, the lands of Central and South America, their rainforests and other ecosystems, and the creatures that live there. 177 color illustrations.

NEW YORK TIMES BESTSELLER • More than 2.7 million copies sold! • "A deeply spiritual book [that] honors what is tough, smart and untamed in women."—The Washington Post Book World Book club pick for Emma Watson's Our Shared Shelf Within every woman there lives a powerful force, filled with good instincts, passionate creativity, and ageless knowing. She is the Wild Woman, who represents the instinctual nature of women. But she is an endangered species. For though the gifts of wildish nature belong to us at birth, society's attempt to "civilize" us into rigid roles has muffled the deep, life-giving messages of our own souls. In Women Who Run with the Wolves, Dr. Clarissa Pinkola Estés unfolds rich intercultural myths, fairy tales, folk tales, and stories, many from her own traditions, in order to help women reconnect with the fierce, healthy, visionary attributes of this instinctual nature. Through the stories and commentaries in this remarkable book, we retrieve, examine, love, and understand the

Wild Woman, and hold her against our deep psyches as one who is both magic and medicine. Dr. Estés has created a new lexicon for describing the female psyche. Fertile and life-giving, it is a psychology of women in the truest sense, a knowing of the soul.

I Hate School

From the author of *Eichmann in Jerusalem* and *The Origins of Totalitarianism*, “a book to think with through the political impasses and cultural confusions of our day” (*Harper’s Magazine*) Hannah Arendt’s insightful observations of the modern world, based on a profound knowledge of the past, constitute an impassioned contribution to political philosophy. In *Between Past and Future* Arendt describes the perplexing crises modern society faces as a result of the loss of meaning of the traditional key words of politics: justice, reason, responsibility, virtue, and glory. Through a series of eight exercises, she shows how we can redistill the vital essence of these concepts and use them to regain a frame of reference for the future. To participate in these exercises is to associate, in action, with one of the most original and fruitful minds of the twentieth century.

Women Who Run with the Wolves

“Intention is a force in the universe, and everything and everyone is connected to this invisible force.” Dr. Wayne W. Dyer has researched intention as a force in the universe that allows the act of creation to take place. This beautiful edition of Wayne’s international bestseller explores intention—not as something we do—but as an energy we’re a part of. We’re all intended here through the invisible power of intention—a magnificent field of energy we can access to begin co-creating our lives! Part I deals with the principles of intention, offering true stories and examples showing how to make the connection. Wayne identifies the attributes of the all-creating universal mind of intention as kind, loving, beautiful, expanding, endlessly abundant, and receptive, emphasizing the importance of emulating this source of creativity. In Part II, he offers an intention guide with specific ways to apply the co-creating principles in daily life. Part III is an exhilarating description of Wayne’s vision of an individual connected at all times to the universal mind of intention.

Between Past and Future

In this eclectic and entertaining study of the interrelationship between the arts and the sciences, Barrow explains how the landscape of the Universe has influenced the development of philosophy and mythology, and how millions of years of evolutionary history have fashioned our attraction to certain patterns of sound and color.

The Power of Intention

Martín Rivas (1862) is a novel by Alberto Blest Gana. Regarded as the first Chilean novel, *Martín Rivas* is a powerful story of romance, class, and national unity from an author who served for decades as a diplomat and ambassador for Chile. Inspired by the social realism of Honoré de Balzac, Blest Gana retains his European roots while remaining true to the emerging culture of his country. *Martín Rivas* has always feared the walls closing in. Born and raised in a poor mining community, he sees the limits placed on the lives of his friends and family. Generational poverty, instability, and bad health plague the workers of northern Chile, and he dreams of something more for his life. With his father’s approval, Rivas travels to Santiago to take a job as a servant. Working in the home of a wealthy aristocrat, he does his best to acclimate himself to the manners and desires of the rich, but ultimately loses focus to his employer’s beautiful daughter. Madly in love, he feels the walls inch closer once again. How will he reconcile his emotions with society’s disapproval of relationships between members of opposing classes? How will he convince a man who controls his livelihood to allow him to court his own daughter? As he agonizes over his newly complicated reality, Rivas recalls how much he has overcome and wonders if it was worth the endless struggle. With a beautifully designed cover and professionally typeset manuscript, this edition of Alberto Blest Gana’s *Martín Rivas* is a classic of Chilean literature reimaged for modern readers.

The Artful Universe

‘Fifteen years on, the remembrance of that day has returned to me. I have seen that boy wandering through the mist of the railway station, and the name of Marina has flared up again like a fresh wound. We all have a secret buried under lock and key in the attic of our soul. This is mine...’ In May 1980,

15-year-old Óscar Draí suddenly vanishes from his boarding school in the old quarter of Barcelona. For seven days and nights no one knows his whereabouts... His story begins in the heart of old Barcelona, when he meets Marina and her father German Blau, a portrait painter. Marina takes Óscar to a cemetery to watch a macabre ritual that occurs on the fourth Sunday of each month. At 10 a.m. precisely a coach pulled by black horses appears. From it descends a woman dressed in black, her face shrouded, wearing gloves, holding a single rose. She walks over to a gravestone that bears no name, only the mysterious emblem of a black butterfly with open wings. When Óscar and Marina decide to follow her they begin a journey that will take them to the heights of a forgotten, post-war Barcelona, a world of aristocrats and actresses, inventors and tycoons; and a dark secret that lies waiting in the mysterious labyrinth beneath the city streets. Carlos Ruiz Zafón was born in Barcelona and is the author of seven novels including *THE SHADOW OF THE WIND*. He is one of the world's most read and best-loved writers. His work has been translated into more than 40 languages and published around the world, garnering numerous international prizes and reaching millions of readers. He divides his time between Barcelona and Los Angeles.

Martin Rivas

A superb novel that delicately unearths the myriad manifestations of extraordinary love between ordinary people. 'The Feast of Love' is just that – a sumptuous work of fiction about the thing that most distracts and delights us. Shortlisted for the National Book Award.

Life in the Argentine Republic in the Days of the Tyrants

From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and charismatic" (The New Yorker), *Bullshit Jobs* gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and "a thought-provoking examination of our working lives" (Financial Times).

Bram Stoker's most famous work, *Dracula* tells the story of Jonathan Harker and his beloved Mina as Jonathan goes to finalize a land deal with the brooding Count Dracula. Dracula makes his way to London and turns Mina's friend Lucy into one of the Undead as well as Mina herself. Jonathan then races to Transylvania to save his beloved wife, but will he arrive in time?

The Feast of Love

One of a series of fiction for schools. The *Illustrated Man* is covered with tiny illustrations which quiver and come to life in the dark. Each one becomes one short story, and each story offers a picture of the future and a disturbing glimpse into the minds of those who live there.

The Natural Science of Stupidity

Twentieth-century Spanish poetry has received comparatively little attention from critics writing in English. Andrew Debicki now presents the first English-language history published in the United States to examine the sweep of modern Spanish verse. More important, he is the first to situate Spanish poetry in the context of European modernity, to trace its trajectory from the symbolists to the postmodernists. Avoiding the rigid generational schemes and catalogs of names found in traditional Hispanic literary histories, Debicki offers detailed discussions of salient books and texts to construct an original and compelling view of his subject. He demonstrates that contemporary Spanish verse is rooted in the modern tradition and poetics that see the text as a unique embodiment of complex experiences. He then traces the evolution of that tradition in the early decades of the century and its gradual disintegration from the 1950s to the present as Spanish poetry came to reflect features of the postmodern, especially the poetics of text as process rather than as product. By centering his study on major periods and examining within each the work of poets of different ages, Debicki develops novel perspectives. The late 1960s and early 1970s, for example, were not merely the setting for a new aestheticist generation but an era of exceptional creativity in which both established and new writers engendered a profound, intertextual, and often self-referential lyricism. This book will be essential reading for specialists in modern Spanish letters, for advanced students, and for readers inter-ested in comparative literature.

Dracula and Dracula's Guest

An English translation of a recently discovered Icelandic adaptation of Bram Stoker's classic novel "Dracula" includes new characters, a re-worked plot, and annotations that provide literary, cultural, and historical context.

Spanish Poetry of the Twentieth Century

The discovery of planets around stars other than the Sun within the past 15 years has opened up one of the largest and most exciting new fields in modern astronomy. The transit method of detecting exoplanets has revealed more information about individual planets than any other method of detection. This volume, the proceedings of IAU Symposium 253, contains a description of the latest development in the field of transiting extrasolar planets. Topical reviews and short contributions from more than one hundred authors present the latest results in the field, from the photometric transit searches for transiting planets, through observational studies of these planets, to the consequences for theories of planet formation, evolution and planetary atmospheres. Presenting the latest research, it is an important resource for graduate students and researchers working in astronomy and planetary sciences.

Powers of Darkness

"The aim of the present volume is to give a co-ordinated and coherent view of the "forest" rather than to describe in detail each particular "tree." The student may then, as his leisure permits, and his tastes impel, study for himself the histories of the separate trees, bushes, thickets, and so on, which, collectively, make up the gigantic forest of lives which populate the amazing world, or rather series of worlds, in which we have our being and evolve. "The work is planned in three main sections. First, the field, in which evolution takes place, is described. This involves a study of the various globes, their successive periods of activity and obscurity, the chains, and schemes of evolution. It is the form-side of our subject, a description of the places where life evolves. The second section deals with the various streams of life which are poured into the prepared field, and the method by which those streams steadily evolve and pass through the various stages or levels of attainment or growth. These processes are here dealt with in, broad outline only, giving the student a bird's-eye view of the whole stately march of events. "The third section describes in much more detail the progress of the component parts of certain of the kingdoms of life, more especially the human races and sub-races. In this section, however, as already stated, full elaboration of detail is avoided, the object being, not so much to give

the student an encyclopedic mass of information, as to enable him to perceive and understand the principles determining the mighty plan in obedience to which everything is ordered in this superbly ordered universe, in which “not a sparrow falls on the ground” save by the will of the Father of the System to which we have the honour to belong.” (Lieut.-Col. Arthur E. Powell)

RETURNING TO TELEVISION AS AN ALL-NEW MINISERIES ON FOX *Cosmos* is one of the best-selling science books of all time. In clear-eyed prose, Sagan reveals a jewel-like blue world inhabited by a life form that is just beginning to discover its own identity and to venture into the vast ocean of space. Featuring a new Introduction by Sagan's collaborator, Ann Druyan, full color illustrations, and a new Foreword by astrophysicist Neil deGrasse Tyson, *Cosmos* retraces the fourteen billion years of cosmic evolution that have transformed matter into consciousness, exploring such topics as the origin of life, the human brain, Egyptian hieroglyphics, spacecraft missions, the death of the Sun, the evolution of galaxies, and the forces and individuals who helped to shape modern science. Praise for *Cosmos* “Magnificent . . . With a lyrical literary style, and a range that touches almost all aspects of human knowledge, *Cosmos* often seems too good to be true.”—*The Plain Dealer* “Sagan is an astronomer with one eye on the stars, another on history, and a third—his mind's—on the human condition.”—*Newsday* “Brilliant in its scope and provocative in its suggestions . . . shimmers with a sense of wonder.”—*The Miami Herald* “Sagan dazzles the mind with the miracle of our survival, framed by the stately galaxies of space.”—*Cosmopolitan* “Enticing . . . iridescent . . . imaginatively illustrated.”—*The New York Times Book Review*

The Red Book: A Reader's Edition

All is not as it seems in this magic book of changing pictures! As Little Mouse travels through the woods alone on a quiet moonlit night, the mischievous shadows decide to play tricks on him. Will he make it to Granny's house safely? With ingenious changing pictures and playful rhyming text, *Who's There? Beware!* is sure to become a firm bedtime favourite.

Transiting Planets (IAU S253)

When a clumsy armadillo named Lola knocks over a glass pitcher, she sets off a silly chain of events, encountering chaos wherever she goes. But accidents happen—just ask the stoat snarled in spaghetti, the airborne sheep, and the bull who has broken a whole shop's worth of china. In the tradition of beloved books like *The Dot* and *Beautiful Oops*, this charming, hilarious debut from author-illustrator Andrea Tsurumi shows that mistakes don't have to be the end of the world.

The Solar System

Explore the colorful illustrations as you trace the grooved trails on each page with your fingers and follow the dinosaur through the five different prehistoric scenes. There's lots of other stomping, chomping, and roaring dinosaurs to spot along the way! There are die-cuts to find and feel, plus holes lead you through the pages as you find out where the dinosaur is going! The tactile trails and die-cut holes are perfect for sensory and interactive play. Bright colorful illustrations feature lots of detail to spot and say, aiding development of first words and early reading.

UFO's--a Scientific Debate

From beloved *New York Times* and *USA Today* bestselling author Marie Benedict comes the story of a not-so-famous scientist who not only loved Albert Einstein, but also shaped the theories that brought him lasting renown. In the tradition of Beatriz Williams and Paula McClain, Marie Benedict's *The Other Einstein* offers us a window into a brilliant, fascinating woman whose light was lost in Einstein's enormous shadow. This novel resurrects Einstein's wife, a brilliant physicist in her own right, whose contribution to the special theory of relativity is hotly debated. Was she simply Einstein's sounding board, an assistant performing complex mathematical equations? Or did she contribute something more? Mitza Maric has always been a little different from other girls. Most twenty-year-olds are wives by now, not studying physics at an elite Zurich university with only male students trying to outdo her clever calculations. But Mitza is smart enough to know that, for her, math is an easier path than marriage. Then fellow student Albert Einstein takes an interest in her, and the world turns sideways. Theirs becomes a partnership of the mind and of the heart, but there might not be room for more than one genius in a

marriage. Marie Benedict illuminates one pioneering woman in STEM, returning her to the forefront of history's most famous scientists. "The Other Einstein takes you into Mileva's heart, mind, and study as she tries to forge a place for herself in a scientific world dominated by men."—Bustle Recommended by PopSugar, Bustle, Booklist, Library Journal and more! The Wolf Princess

A captivating, atmospheric mystery set in the crystalline winterland of Russia. Abandoned in a blinding blizzard in the wintry wilds of Russia, Sophie Smith fears for her life. But just like in a fairy tale, a princess comes to her rescue: the beautiful, exotic Anna Volkonskaya. Over a river of ice in a horse-drawn sleigh, she brings Sophie and her friends to a magnificent, if weathered, winter palace. At first, Sophie is enchanted by Princess Anna's stories of long-ago royalty, of white wolves and gray diamonds. But when the princess takes a particular interest in her, Sophie grows concerned. What is her place in the sinister mystery that surrounds her? Even as the wind and wolves howl outside, is she more in danger now, a prisoner of the palace, than she ever was lost in the snow?

The Princess Knight

Violetta is a little princess who wants to be as strong and brave as her brothers. And what she lacks in size, she makes up for in determination. At night she slips out into the woods and secretly teaches herself to become the cleverest, most nimble knight in the land. Soon she will be ready for the greatest battle of all - the battle for herself.

The Ice Princess

"A top-notch thriller, one of the best of the genre" (Minneapolis Star Tribune) from international crime-writing sensation Camilla Läckberg tells the story of brutal murders in a small Swedish fishing village, and the shattering, decades-old secrets that precipitated them. In this electrifying tale of suspense from an international crime-writing sensation, a grisly death exposes the dark heart of a Scandinavian seaside village. Erica Falck returns to her tiny, remote hometown of Fjällbacka, Sweden, after her parents' deaths only to encounter another tragedy: the suicide of her childhood best friend, Alex. It's Erica herself who finds Alex's body—suspended in a bathtub of frozen water, her wrists slashed. Erica is bewildered: Why would a beautiful woman who had it all take her own life? Teaming up with police detective Patrik Hedström, Erica begins to uncover shocking events from Alex's childhood. As one horrifying fact after another comes to light, Erica and Patrik's curiosity gives way to obsession—and their flirtation grows into uncontrollable attraction. But it's not long before one thing becomes very clear: a deadly secret is at stake, and there's someone out there who will do anything—even commit murder—to protect it. Fans of Scandinavian greats Stieg Larsson and Henning Mankell will devour Camilla Läckberg's penetrating portrait of human nature at its darkest.

Princess Pistachio and Maurice the Magnificent

Pistachio is worried about her dog. All he does is sleep . . . and eat . . . and sleep. What a boring life! An audition call for a theater production seems like the perfect answer. When Dog is chosen for the role, his life is abruptly transformed with a new job and a new name: Maurice the Magnificent, star of Sleeping Beauty! Unfortunately, Maurice is not the only one being swept up in the excitement. Pistachio can talk about nothing else, until her best friend Madeline is completely fed up. Then disaster strikes: Maurice is dog-napped! Pistachio is distraught, and Madeline will not even lift a finger to help. Can Pistachio save both her dog and her friendship? An exuberant new installment for the popular Princess Pistachio from beloved author-illustrator Marie-Louise Gay.
