Rumi

Focusing on Rumi, the best-selling Persian mystical poet of the 13th century, this book investigates the reception of his work and thought in North America and Europe – and the phenomenon of ‘Rumimania’ – to elucidate the complexities of intercultural communication between the West and the Iranian and Islamic worlds. Presenting tens of examples from the original and translated texts, the book is a critical analysis of various dimensions of this reception, outlining the difficulties of translating the text but also exploring how translators of various times and languages have performed, and explaining why the quality of reception varies. Topics analysed include the linguistic and pragmatic issues of translation, comparative stylistics and poetics, and non-textual factors like the translator's beliefs and the political and ideological aspects of translation. Using a broad theoretical framework, the author highlights the difficulties of intercultural communication from linguistic, semiotic, stylistic, poetic, ethical, and sociocultural perspectives. Ultimately, the author shares his reflections on the semiotic specificities of Rumi's mystical discourse and the ethics of translation generally. The book will be valuable to scholars and students of Islamic philosophy, Iranian studies, and translation studies, but will appeal to anyone interested in the cultural dichotomies of the West and Islam.

Soul Excavation: An Exploration and Discovery of Self Through Fear, Failure, and Quantum Physics is about one woman's transformational journey of living from fear, anger, and pain to discovering and choosing to live as the Infinite Power, Creativity, and Love she is at her core. Lesia Kohut begins with her story of fear—a brave, candid exploration into how the turbulent relationship with her dad and

confusing relationship with God early on in life lay the groundwork for three main limiting beliefs. These beliefs were the foundation for several decades of living in fear, anger, pain, and self-doubt, leading to attempted suicide, alcoholism, and believing there was something inherently wrong or broken with her. In the second story, she focuses on the failure, grief, and loss of identity felt during the painful, emotional, and financially crushing experience of closing down her “dream turned nightmare” organic, sustainably-minded, gluten-free bakery. By the leap of faith story, Lesia illustrates how her steadfast commitment to her Spiritual/Consciousness Studies inspired and empowered her to anchor herself in knowing that, no matter what personal, financial, and emotional challenges she and her family faced while moving across the country a few years ago, she was always at choice as to how to move forward in life—that she was the one creating her reality. In the next part of the book, Lesia explores the concept and impact of limiting beliefs, focusing on the three main beliefs from her life, “You’re not good enough,” “You’re not smart enough,” and “You don’t have what it takes.” She tells us how her Spiritual Studies, including the more recent plunge into Quantum Physics, helped her to become aware of her relationship with those long-standing beliefs, and to better understand and accept how and why they’d kept her feeling stuck for so long. This awareness and understanding led to the profound realization that she was actually not her beliefs, but that she was infinitely bigger and more powerful than the fear, anger, and pain she’d felt and the failures she’d experienced for most of her life. Lesia explains how this renewed sense of faith, and exciting understanding of reality from a quantum perspective has become the new foundation for how she now perceives and values her relationship with her dad and with God, how she looks back on circumstances around the closing of her beloved bakery, and how she moves forward in life today. By sharing her journey from fear and failure to infinite possibilities, Lesia shows us that just because life has been a certain way up until now, doesn’t mean it has to be that way going forward. The stories, nuggets, and aha’s in this book open the door for others to realize that we can all choose to live from love rather than fear, at any time; that we are all creators of our reality; and, that we are all infinitely more

Soul Excavation: An Exploration and Discovery of Self Through Fear, Failure, and Quantum Physics

An extraordinary vision of unity among the world's historic faiths and a classic of New Age spirituality. Here is a hugely influential interpretation of the "lost years" of Jesus Christ—from roughly the ages of twelve to thirty that are not covered in Scripture— in which the Son of Man is seen to travel through the religious cultures of the East, learning and preaching the unifying spiritual ethic behind all religions. The Aquarian Gospel of Jesus the Christ is a stirring and deeply involving vision that profoundly impacted the development of alternative spirituality in the early twentieth century, and continues to touch readers today. Now, the unabridged narrative of this powerful work— drawn from one of its earliest volumes—is redesigned for ease of reading in a handsome signature edition.

The Aquarian Gospel of Jesus the Christ

Philosopher Jacob Needleman's groundbreaking study of America's alternative spiritual movements is back in print with a new introduction by the author. Originally published in 1970, *The New Religions* was the first full-scale study of alternative spirituality in America. It remains unparalleled for the intellectual depth and seriousness with which it regards Eastern, New Age, and alternative faiths on the American landscape. Needleman's writing and reportage are unfailingly thoughtful and incisive as he illuminates topics that other scholars failed to consider or could not fully grasp.

The New Religions

"My heart wandered through the world constantly seeking after my cure, but the sweet and delicious water of life had to break through the granite of my heart." When the words of Rumi enter your heart, something softens, breaks, and is subtly reborn. That he wrote the words seven hundred years ago in a medieval Persian world that bears little resemblance to ours makes their uncanny resonance to us today just that much more remarkable. Here is a treasury of daily wisdom from this most beloved of all the Sufi masters—both his prose and his ecstatic poetry—that you can use to start every day for a year, or that you can dip into for inspiration any time you need to break through the granite of your heart.

Since 1976, the channeled writings of *A Course in Miracles* have touched millions of readers, seekers, and students of self-development. The widely regarded spiritual and psychological scholars Frances Vaughan, Ph.D., and Roger Walsh, M.D., Ph.D., distilled the most poignant passages from the Course in their beloved volume *Accept This Gift*—now returned to print in this Tarcher Cornerstone Edition. This slender, immensely powerful book provides the perfect gleanings for anyone at any level of interest in *A Course in Miracles*.

Two Suns Rising

Rumi, who wrote and preached in Persia during the thirteenth century, is one of history's most celebrated mystics. His vast body of poetry includes a lengthy epic of religious mysticism, the *Mathnawi*, and more than three thousand lyrics and odes. A. J. Arberry, who selected four hundred of the lyrics for translation, calls Rumi "one of the world's greatest poets. In profundity of thought, inventiveness of image, and triumphant mastery of language, he stands out as the supreme genius of Islamic mysticism." Arberry's authoritative translation is one of the few done directly from the original Persian. A. J. Arberry (1905-69) was professor of Arabic at Cambridge University.

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three-dimensional vault.

Islamic Thought is a fresh and contemporary introduction to the philosophies and doctrines of Islam. Abdullah Saeed, a distinguished Muslim scholar, traces the development of religious knowledge in Islam, from the pre-modern to the modern period. The book focuses on Muslim thought, as well as the development, production and transmission of religious knowledge, and the trends, schools and

movements that have contributed to the production of this knowledge. Key topics in Islamic culture are explored, including the development of the Islamic intellectual tradition, the two foundation texts, the Qur'an and Hadith, legal thought, theological thought, mystical thought, Islamic Art, philosophical thought, political thought, and renewal, reform and rethinking today. Through this rich and varied discussion, Saeed presents a fascinating depiction of how Islam was lived in the past and how its adherents practise it in the present. Islamic Thought is essential reading for students beginning the study of Islam but will also interest anyone seeking to learn more about one of the world's great religions.

"Song of Myself" is a poem by Walt Whitman that is included in his work *Leaves of Grass*. It has been credited as "representing the core of Whitman's poetic vision". The poem was first published without sections as the first of twelve untitled poems in the first (1855) edition of *Leaves of Grass*. The first edition was published by Whitman at his own expense. In 1856 it was called "A Poem of Walt Whitman, an American" and in 1860 it was simply termed "Walt Whitman." Walter "Walt" Whitman (1819 – 1892) was an American poet, essayist and journalist. His work was very controversial in its time, particularly his poetry collection *Leaves of Grass*, which was described as obscene for its overt sexuality.

From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The *Cambridge Guide to Homer* examines the influence and meaning of Homeric poetry from its earliest form as ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter complementary 'micropedia' articles. The *Cambridge Guide to Homer* thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Songs in the Key of Z

Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

The Cambridge Guide to Homer

Self-esteem is essential for psychological survival. It is an emotional sine qua non - without some measure of self-worth, life can be enormously painful, with many basic needs going unmet. One of the main factors differentiating humans from other animals is the awareness of self: the ability to form an identity and then attach a value to it. In other words, you have the capacity to define who you are and then decide if you like that identity or not. The problem of self-esteem is this human capacity for judgment. It's one thing to dislike certain colors, noises, shapes, or sensations. But when you reject parts of yourself, you greatly damage the psychological structures that literally keep you alive. Judging and rejecting yourself causes enormous pain. And in the same way that you would favor and protect a physical wound, you find yourself avoiding anything that might aggravate the pain of self-rejection in

any way. You take fewer social, academic, or career risks. You make it more difficult for yourself to meet people, interview for a job, or push hard for something where you might not succeed. You limit your ability to open yourself with others, express your sexuality, be the center of attention, hear criticism, ask for help, or solve problems....This book is about stopping the judgments. It's about healing the old wounds of hurt and self-rejection. How you perceive and feel about yourself can change. And when those perceptions and feelings change, the ripple effect will touch every part of your life with a gradually expanding sense of freedom. ---- Self-Esteem.

Saviours of Islamic Spirit

Marked by lyrical beauty and spiritual insight, a deep understanding of human suffering that coexists with rapturous abandon, the poems of Jalaluddin Rumi continue to be relevant almost eight centuries after they were composed, with contemporary audiences finding new meanings in them. Rumi's poems bring together the divine and the human, the mystical and the corporeal to create a vivid kaleidoscope of poetic images. While many recent 'translations' have sought to give Rumi's poetry a certain hippy sensibility, robbing it of its true essence, Farrukh Dhondy attempts to bring out the beauty and sensibility of the verses whilst imitating the metre of the original. Dhondy's translations provide a modern idiom to the poems, carefully keeping intact their religious context.

Mirza Asadullah Khan (1797–1869), popularly, Ghalib, is the most influential poet of the Urdu language. He is noted for the ghazals he wrote during his lifetime, which have since been interpreted and sung by different people in myriad ways. Ghalib's popularity has today extended beyond the Indian subcontinent to the Hindustani diaspora around the world. In this book, Gopi Chand Narang studies Ghalib's poetics by tracing the archetypal roots of his creative consciousness and enigmatic thought in Buddhist dialectical philosophy, particularly in the concept of shunyata. He underscores the importance of the Mughal era's Sabke Hindi poetry, especially through Bedil, whom Ghalib considered his mentor. The author also engages with Ghalib criticism that has flourished since his death and analyses the important works of the poet, including pieces from early Nuskhas and Divan-e Ghalib, strengthening this central argument. Much has been written about Ghalib's life and his poetry. A marked departure from this dominant trend, Narang's book looks at Ghalib from different angles and places him in the galaxy of the great Eastern poets, stretching far beyond the boundaries of India and the Urdu language.

Self-Esteem

For nearly seven decades, Jane Blaffer Owen was the driving force behind the restoration and revitalization of the town of New Harmony, Indiana. In this delightful memoir, Blaffer Owen describes the transformational effect the town had on her life. An oil heiress from Houston, she met and married Kenneth Dale Owen, great-great-grandson of Robert Owen, founder of a communal society in New Harmony. When she visited the then dilapidated town with her husband in 1941, it was love at first sight, and the story of her life and the life of the town became intertwined. Her engaging account of her journey to renew the town provides glimpses into New Harmony's past and all of its citizens—scientists, educators, and naturalists—whose influence spread far beyond the town limits.

And there are fascinating stories of the artists, architects, and theologians who became part of Blaffer Owen's life at New Harmony, where, she says, "My roots could sink deeply and spread."

A collection of the long-unavailable tafasir, or commentaries on the Qur'an, which help to properly explain and contextualize the revelation, this series aims to make leading exegetical works-in translation, unabridged, and faithful to the letter and meaning of the Arabic-widely available for study and research. The earliest surviving Sufi commentary on the Qur'an, this record is not only one of the few authenticated works in Tustari's name but is also a key source for understanding the mystical thought and teachings of this important and influential Sufi. In addition to insights into the spiritual significance of almost 1,000 verses of the Qur'an, this commentary, presented in complete English translation for the first time, includes numerous references to traditions of the Prophet, explanations of the ethical and mystical dimensions of the religious life, stories of the prophets, and anecdotes about earlier mystics. Generously augmented with explanatory footnotes throughout, the book will provide readers with an invaluable introduction to the Sufi tradition of Qur'anic interpretation and acquaint them with spiritual doctrines fundamental to the later development of Sufism.

The Power of Awareness

"The most important work from one of the foremost exponents of New Thought, this guide takes readers on an internal journey that leads to remarkable changes in their external circumstances. Neville Goddard provides exercises that promote increased mindfulness and cultivate a positive philosophy through which all things are possible "the effortless way."--

The Power of Awareness

Becoming aware of . . . one great emotion permeates your being. You live with a perpetual feeling of reverence. The knowledge that your creator is the very self of yourself and never would have made you had he not loved you must fill your heart with devotion, yes, with adoration. One knowing glimpse of the world about you at any single instant of time is sufficient to fill you with profound awe and a feeling of worship. It is when your feeling of reverence is most intense that you are closest to God, and when you are closest to God your life is richest. -Neville Goddard

The Power of Awareness

2022 Hardcover Reprint of the 1952 first edition. Neville Lancelot Goddard was born in Barbados in 1905. He came to the United States to study drama at the age of seventeen and whilst touring with his dance company in England he developed an interest in metaphysics, after striking up a conversation with a Scotsman who lent him a series of books on the powers of the mind. On his return he gave up the entertainment industry to devote his full attention to the study of spiritual and mystical matters. After traveling extensively throughout the United States, Neville eventually made his home in Los Angeles where, in the 1950s, he gave a series of talks on television and radio, and for many years lectured regularly to capacity audiences. In the 1960s and early 1970s, he confined most of his lectures to Los Angeles, New York, and San Francisco. In his early lectures and books, Neville dealt solely with what he called The Law, the technique of creating one's physical reality through imagining. It is this portion of his expression that most closely accords with the teachings of the New Thought movement. In 1959 he began to experience what he called The Promise. In the latter part of the 1960s and early 1970s Neville gave more emphasis to The Promise than to The Law. One could use imaginal power to change one's circumstances, he said, but it would be temporary, "...and will vanish like smoke." He went on to explain that The Promise superseded The Law, claiming "Oh, you can use it [The Law] to make a fortune, to become known in the world, all these things are done, but, your true purpose here is to fulfill Scripture." After subordinating The Law to The Promise, he became as eager to hear accounts by those who had experienced The Promise, and sharing such accounts, as he had earlier of those with The Law. The Power of Awareness attempts to demonstrate how to use our mind to realize our wishes. As such, it is an important part of the larger New Thought Movement, in which Neville holds a prominent place.

Working with the Law

Science has defined a variety of natural laws that explain the physical world and how it changes. One such law states that for every action there is a reaction, and that for every motion there is corresponding counter-motion. Whether it's visible to the human eye or not, one thing is certain – movement and change will occur as a result. Having studied these principles, author Raymond Holliwell not only understood the universal physical applications, he also understood the spiritual and mental applications as well. By using this law on a spiritual and mental level, Holliwell found that a specific thought could create a desired reaction in his personal and professional life through continual and dedicated practice. As he came to realize the expanded potential of this powerful law, he eventually recognized the ultimate source of the dramatic results – God.

The Essential Marcus Aurelius

This inaugural-and all new-Tarcher Cornerstone Edition presents a stunningly relevant and reliable translation of the thoughts and aphorisms of the Stoic philosopher and Roman emperor Marcus Aurelius, properly placing the philosopher-king's writings within the vein of the world's great religious and ethical traditions. The late antique world possessed no voice like that of Roman emperor Marcus Aurelius (121-180 CE). His private meditations on what constitutes a good life have withstood the centuries and reach us today with the same penetrating clarity and shining light as the words of Shakespeare, Emerson, or Thoreau. In this remarkable new translation, bestselling religious philosopher Jacob Needleman and classics scholar John P. Piazza have retained the depth of Marcus's perspective on life. They have carefully selected and faithfully rendered those passages that clarify Marcus's role as someone who stood within the great religious and ethical traditions that extend throughout every culture in human history. The voice that emerges from their translation is a universal one, equally recognizable to students of Christ, Buddha, the Vedas, the Talmud, and to anyone who sincerely searches for a way of meaning in contemporary life.

Return to the Brain of Eden

An exploration of our fall from the pinnacle of human evolution 200,000 years ago and how we can begin our return • Explores recent neurological and psychological research on the brain and the role of plant biochemistry in human brain expansion • Explains how humanity's prehistoric diet change led to a neurodegenerative condition characterized by aggression and a fearful perception of the world • Outlines a strategy of raw foods, tantric sexuality, shamanic practices, and entheogens to reverse our mental degeneration and restore our advanced abilities Over a period of a million years the human brain expanded at an increasingly rapid rate, and then, 200,000 years ago, the expansion abruptly stopped. Modern science has overlooked this in order to maintain that we are at the pinnacle of our evolution. However, the halt in brain expansion explains not only recently uncovered anomalies within the human brain but also the global traditions of an earthly paradise lost and of humanity's degeneration from our original state of perpetual wonder and joy. Drawing on more than 20 years of research, authors Tony Wright and Graham Gynn explore how our modern brains are performing far below their potential and how we can unlock our higher abilities and return to the euphoria of Eden. They explain how for millions of years early forest-dwelling humans were primarily consuming the hormone-rich sex organs of plants--fruit--each containing a highly complex biochemical cocktail evolved to influence DNA transcription, rapid brain development, and elevated neural and pineal gland activity. Citing recent neurological and psychological studies, the authors explain how the loss of our symbiotic fruit-based diet led to a progressive neurodegenerative condition characterized by aggressive behaviors, a fearful perception of the world, and the suppression of higher artistic, mathematical, and spiritual abilities. The authors show how many shamanic and spiritual traditions were developed to counteract our decline. They outline a strategy of raw foods, tantric sexuality, shamanic practices, and entheogen use to reverse our degeneration, restore our connection with the plant world, and regain the bliss and peace of the brain of Eden.

Power of Awareness

Reprint of 1952 first edition. Neville Lancelot Goddard was born in Barbados in 1905. He came to the United States to study drama at the age of seventeen and whilst touring with his dance company in England he developed an interest in metaphysics, after striking up a conversation with a Scotsman who lent him a series of books on the powers of the mind. On his return he gave up the entertainment industry to devote his full attention to the study of spiritual and mystical matters. After traveling extensively throughout the United States, Neville eventually made his home in Los Angeles where, in the 1950s, he gave a series of talks on television and radio, and for many years lectured regularly to capacity audiences. In the 1960s and early 1970s, he confined most of his lectures to Los Angeles, New York, and San Francisco. In his early lectures and books, Neville dealt solely with what he called The Law, the technique of creating one's physical reality through imagining. It is this portion of his expression that most closely accords with the teachings of the New Thought movement. In 1959 he began to experience what he called The Promise. In the latter part of the 1960s and early 1970s Neville gave more emphasis to The Promise than to The Law. One could use imaginal power to change one's circumstances, he said, but it would be temporary, .."and will vanish like smoke." He went on to explain that The Promise superseded The Law, claiming "Oh, you can use it [The Law] to make a fortune, to become known in the world, all these things are done, but, your true purpose here is to fulfill Scripture." After subordinating The Law to The Promise, he became as eager to hear accounts by those who had experienced The Promise, and sharing such accounts, as he had earlier of those with The Law. The Power of Awareness attempts to demonstrate how to use our mind to realize our wishes. As such, it is an important part of the larger New Thought Movement, in which Neville holds a prominent place.

Occupational Therapy Practice Framework: Domain and Process

As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. The Framework can provide the structure and guidance that practitioners can use to meet this important goal.

Robert A. Russell Through many difficulties and many priests, our church became a parish in 1927 under Dr. Robert Russell. He eventually built this church at this location in 1941, and it was added on to in 1960. Dr. Russell was a theatrical man who was a one man show. All of the lights in the church would be turned down (there were no windows then) save one, this one over the pulpit. He would give a rousing sermon on healing and the human potential (ironically he was a more Zoroastrian-like the wise man-than Anglican). He had a huge following in his heyday and this parish averaged 500-700 on a Sunday during the 1950s. A Great metaphysician and every one of his books is worth its weight in GOLD. Check out

The 48 Laws of Power

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
