### Hope and Fear in Margaret Chase Smith's America

Hope and Fear in Margaret Chase Smith's America: A Continuous Tangle provides a fresh interpretation of the life, career, and legacy of former United States Senator Margaret Chase Smith, the first woman elected to both houses of the U.S. Congress.

### Courage in The People's House

The remarkable stories of nine US Representatives who helped shape America. Courage in the People's House tells the gripping stories of nine individuals who served in the US House of Representatives—the "People's House"—during a span of over one hundred years, from the 1870s to the 1990s. From the first African American to serve in the House, to immigrants elected at the dawn of the 20th century, all were trailblazers who made significant contributions to the country. The book provides an inspiring story of America through profiles of each of them, representatives of all political stripes who overcame the odds and demonstrated the courage to challenge powerful interests, and at times, their own political allies. The nine members of Congress are: -Joseph Rainey, South Carolina -Josiah Walls, Florida -William B. Wilson, Pennsylvania -Adolph Sabath, Illinois -Oscar Stanton De Priest, Illinois -Margaret Chase Smith, Maine -Henry B. Gonzalez, Texas -Shirley Chisholm, New York -Barbara Jordan, Texas Representative Joe Neguse, the first African American elected to the Congress from Colorado, shares how these nine ordinary Americans served nobly despite the barriers before them and did extraordinary things in service to their constituents, the Constitution, and the country.

### The Highest Glass Ceiling

Best-selling historian Ellen Fitzpatrick tells the story of three remarkable women who set their sights on the Presidency. The arduous, dramatic quests of Victoria Woodhull (1872), Margaret Chase Smith (1964), and Shirley Chisholm (1972) illuminate today's political landscape, shedding light on Hillary Clinton's 2016 campaign for the Oval Office.

### Claiming Her Place in Congress

̃The fall of 2018 saw an unprecedented number of women elected to Congress, changing estimates of how long it might take to achieve equal representation. For the first time, women candidates used

techniques honed by America's political families, which have helped women enter politics since 1916. Drawing on extensive research and conversations with successful women politicians, this book offers a history of the political opportunities provided through familial connections. Family networks have a long history of enabling women to run for political office. There is much for the latest group of candidates to emulate.

### Winds of Hope, Storms of Discord

In brisk and engaging prose, this comprehensive introductory textbook traverses the broad sweep of US history since 1945. *Winds of Hope, Storms of Discord* explores how Americans from all walks of life – political leaders, businesspeople, public intellectuals, workers, students, activists, migrants, and others – struggled to define the nation's political, economic, geopolitical, demographic, and social character. It chronicles the nation's ceaseless ferment, from the rocky conversion to peacetime in the early aftermath of World War II; to the frightening emergence of the Cold War and repeated US military adventures abroad; to the struggles of African Americans and other minorities to claim a share of the American Dream; to the striking transformations in social attitudes catalyzed by the women's movement and struggles for gay and lesbian liberation; to the dynamic force of political, economic, and social conservatism. Carrying the story to the spring of 2022, *Winds of Hope* also shows how dizzying technological changes at times threatened to upend the nation's civic and political life.

### Demagogue

The definitive biography of the most dangerous demagogue in American history, based on first-ever review of his personal and professional papers, medical and military records, and recently unsealed transcripts of his closed-door Congressional hearings. In the long history of American demagogues, from Huey Long to Donald Trump, never has one man caused so much damage in such a short time as Senator Joseph McCarthy. We still use "McCarthyism" to stand for outrageous charges of guilt by association, a weapon of polarizing slander. From 1950 to 1954, McCarthy destroyed many careers and even entire lives, whipping the nation into a frenzy of paranoia, accusation, loyalty oaths, and terror. When the public finally turned on him, he came crashing down, dying of alcoholism in 1957. Only now, through bestselling author Larry Tye's exclusive look at the senator's records, can the full story be told. *Demagogue* is a masterful portrait of a human being capable of immense evil, yet beguiling charm. McCarthy was a tireless worker and a genuine war hero. His ambitions knew few limits. Neither did his socializing, his drinking, nor his gambling. When he finally made it to the Senate, he flailed around in search of an agenda and angered many with his sharp elbows and lack of integrity. Finally, after three years, he hit upon anti-communism. By recklessly charging treason against everyone from George Marshall to much of the State Department, he became the most influential and controversial man in America. His chaotic, meteoric rise is a gripping and terrifying object lesson for us all. Yet his equally sudden fall from fame offers reason for hope that, given the rope, most American demagogues eventually hang themselves.

### A Story of Maine in 112 Objects: From Prehistory to Modern Times

Founded in 1836, the Maine State Museum is America's oldest state museum and is known to many as "Maine's Smithsonian" because of the breadth and diversity of its holdings—nearly a million objects covering every aspect of the state's cultural, biological, and geological history—and the thousands of stories its collections tell. For this book the museum selected and photographed 112 artifacts and specimens that, together, tell an epic story of the land and its people from prehistoric times to the present. It is a story covering 395 million years, a story told with a walrus skull and fossils, tourmaline and spear points, mammoth tusks and bone fishhooks, Norse coins and caulking irons, militia flags and survey stakes, treaty documents and wooden tankards, a temperance banner and a locomotive, Joshua Chamberlain's pistol and a cod tub trawl, a Lombard log hauler and a woman's WWII welding outfit, L. L. Bean boots and German POW snowshoes, and many more objects from the museum's collections. Short narratives written by museum curators are woven around each item—including photos of related objects—and the ensemble has been honed, polished, and introduced by museum director Bernard Fishman. This is a book that historians and Maine residents and visitors will delve into again and again, unearthing new treasures with each reading.

### Freedom is the Right to Choose

Seeks to penetrate the logic, social structure, and daily practice of life in American military communities in Germany Army life has always been known as a life of sacrifice, challenge, and frustration, yet one filled also with deep satisfactions. This is so for the soldiers' families as much as for the soldiers themselves. Over the years, military and civilian leaders of the US Army have tried to reduce the hardships of military life by creating an array of community services designed to provide social support for soldiers and families and help them live satisfying lives in military communities. Unfortunately, this effort has not been particularly successful, and frustration, dissatisfaction, and alienation persist among soldiers and family member in the US Army communities in Germany. Discontent continues because the underlying sources of alienation in the Army and among its families are highly complex, poorly understood, and therefore hardly addressed by the Army's quality-of-life programs that are intended to make soldier and family life more bearable. In *Army of Hope, Army of Alienation: Culture and Contradiction in the American Army Communities of Cold War Germany*, the author seeks to penetrate the logic, social structure, and daily practice of life in the American military communities that

lay scattered along the frontier between East and West Germany during the final years of the Cold War. In coming to understand the life and thought of these American soldiers and families, ordinary American citizens can learn much about their military forces and about their own society and culture. In addition, a greater understanding about how people work and live around an institution that is at once so important and yet tasked with a mission so different from that of ordinary pursuits can stimulate social scientists and concerned citizens to think differently about culture, society, and behavior in general.
