Topics in this book: Plotting points on a graph Graphing a line using an equation and a T-chart Graphing a line using its intercepts Constant rates The slope of a line Writing a line's equation in Slope-Intercept Form Parallel and perpendicular lines Scenarios that involve linear equations Linear inequalities Cumulative Review Answer Key Book description: This books builds on the introduction to rates at the end of Algebra 1: Book 1. Students learn that a constant rate of change produces a linear relationship. They learn about x- and y-intercepts and they graph equations in Standard Form. After they learn about slopes of lines, the book introduces them to equations in Slope-Intercept Form and guides them through scenarios that include graphing lines in that form and writing equations to model linear relationships. Students also learn about parallel and perpendicular lines. Near the end of the book, they learn how to graph linear inequalities. Student testimonials: "This is the best way to learn math."
