Lippincott's Manual of Psychiatric Nursing Care Plans

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

Lippincott's Manual of Psychiatric Nursing Care Plans

A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 Psychiatric Mental-Health Nursing: Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Manual of Psychiatric Nursing Care Plans

This supplemental resource contains 54 nursing care plans that address the most commonly encountered behaviours and behaviour complexes in psychiatric and mental health nursing. DSM-IV terminology and NANDA diagnoses are used throughout.

Manual of Psychiatric Nursing Care Planning

A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning*, 5th Edition supplies you with the latest diagnostic information available, including the DSM-5, for accurate assessment and diagnosis of patients. It offers quick and easy access to plans of care for a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth Varcarolis, provides a clinically-based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. The latest diagnoses, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. A focus on clinical information furnishes you with information on providing patient care in a range of settings. Assessment Guides, including tables, charts, and questionnaires facilitate patient diagnosis and care. A chapter on Major Psychotropic Interventions and Patient and Family Teaching, in addition to the content found in each disorder chapter, helps you better understand the uses and workings of the psychotropic agents. Coverage of major disorders exposes you to a wide range of disorders within psychiatric nursing. The latest diagnostic information includes the DSM-5 taxonomy (due to publish May 2013) with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 *Psychiatric Mental-Health Nursing: Scope and Standards of Practice*. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Lippincott's Manual of Psychiatric Nursing Care Plans

This fully updated Fifth Edition explores the full psychiatric nursing curriculum, from theoretical foundations to application of interventions for commonly encountered disorders. The focus is on treatment modalities, nursing care, therapeutic communication, and self-awareness. The built-in study guide helps reinforce student learning and knowledge retention. Abundant features highlight the most pertinent learning concepts.

Manual of Psychiatric Nursing Care Planning - E-Book

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR)* and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, *The Nursing Process*, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including *Etiology*, *Epidemiology*, *Assessment and Diagnostic Criteria*, *Interventions*, and *Prognosis and Discharge Criteria*. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with *Assessment Data*, *Outcome Criteria*, *Planning and Implementation*, and *Evaluation* sections. *Assessment Data* sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. *Outcome Criteria* sections give the reader clear indications of the desired end state. *Planning and Implementation* sections list specific,

relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Psychiatric-mental Health Nursing

Accompanying CD-ROM has blank concept diagrams and care plans.

Psychiatric Nursing Care Plans - E-Book

Now in its Seventh Edition, this psychiatric and mental health nursing text covers both care of patients with psychiatric disorders and the psychosocial aspects of physiological disorders. Geared toward LPN/LVN students, the book's format reflects the nursing model and the shift of psychiatric nursing care from hospitals to community-based settings. New content includes care planning and psychotropic drug monitoring and the DSM-IV-TR. Other features include an increased emphasis on communication, and a family and resource support list that includes selected Web resources. End-of-chapter review questions allow the reader to balance knowledge-based, analysis and application questions. The Ancillary package consists of a printed Instructor's Manual and Test Bank on disk.

National Library of Medicine Current Catalog

A thoughtful, portable clinical companion, Varcarolis' Manual of Psychiatric Nursing Care Planning: An Interprofessional Approach, 6th Edition, provides you with the latest diagnostic information available, including the DSM-5 and patient problems, for accurate assessment and diagnosis of patients. This clinically-based guide offers quick and easy access to the latest psychiatric nursing care planning guidelines for a range of settings including the inpatient unit, home care, or community mental health setting. Designed to accompany Foundations of Psychiatric-Mental Health Nursing, the refreshed and updated edition is a perfect reference for learning to create psychiatric nursing care plans. A thoroughly revised patient centered assessment, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. The latest patient problems, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing patient problems, etiology, assessment findings/diagnostic cues, outcome criteria, and interventions and rationales provide guidance for supporting patients with a wide range of psychiatric alterations. Talk-based therapies covered and referred to in a dedicated chapter on psychotherapeutic models. Promising brain stimulation therapies are addressed in a separate chapter NEW! A separate sleep disorder chapter addresses alterations present in all psychiatric disorders. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients. NEW! Updated, refreshed, and refined Manual improves overall design and reduces extraneous content to focus on essential clinical information.

Psychiatric Mental Health Case Studies and Care Plans

First multi-year cumulation covers six years: 1965-70.

Mental Health & Mental Illness

Written by the author of the best-selling texts on nursing diagnosis and care plans, Understanding the Nursing Process is the first book to tutor students on the nursing process, concept mapping, and care planning all in one text. It guides students systematically through each step, focusing sharply on fundamental need-to-know concepts and using easy-to-understand case studies and learning activities. To teach care planning, the text presents selected nursing diagnoses and collaborative problems that are appropriate for beginning students and grouped from simple to complex. An Instructor's Resource CD-ROM shows how to use the book in a clinical nursing course. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing

and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Manual of Psychiatric Nursing Care Planning - E-Book

This pocket-sized clinical companion is designed to assist in the assessment of psychiatric nursing clients, formulation of nursing diagnoses, and design of psychiatric nursing care plans. It provides quick and easy access to the detailed and concrete information students need to know as they visit the inpatient unit, community mental health setting, or home care setting. The content is clinically based, rather than theory based. This avoids repetition of material that students already have in their mental health nursing textbooks and makes it a perfect reference for clinical use.

Current Catalog

Covering the full range of nursing interventions, Nursing Interventions Classification (NIC), 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided - including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities Definition, list of activities, publication facts line, and background readings provided for each intervention. NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses promotes clinical decision-making. New! Understanding the Nursing Process

A concise coverage of essential theory and assessment and related interventions in psychiatric- mental health nursing.

Manual of Psychiatric Nursing Care Plans

The Fifth Edition of Nursing Care Plans and Documentation provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Nursing Interventions Classification (NIC)

It's really 2 books in 1! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe administration of psychotropic medications. And, the concepts can be applied to a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home health and private practice.

Basic Concepts of Psychiatric-mental Health Nursing

This handy pocket guide is designed to assist in the assessment of psychiatric nursing clients, the formulation of nursing diagnoses, and the design of psychiatric nursing care plans. The book contains practical, clinically-oriented information.

Nursing Care Planning Made Incredibly Easy

The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.

Nursing Care Plans & Documentation

This text covers a wide range of issues surrounding nursing, midwifery and health visiting. The topics it covers are the structure and functions of the human body, nursing care and nursing needs, care of the individual with a body system disorder, and special aspects of nursing care. This edition written for Australia and NZ students.

Nursing Diagnoses in Psychiatric Nursing

This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter.

Manual of Psychiatric Nursing Care Plans

A separate sleep disorder chapter addresses alterations present in all psychiatric disorders. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients. NEW! Updated, refreshed, and refined Manual improves overall design and reduces extraneous content to focus on essential clinical information.

Psychiatric and Mental Health Nursing

Revised to incorporate the latest NANDA-approved nursing diagnoses, the Eleventh Edition of this classic text offers definitive guidance on key elements of nursing diagnosis and its application to clinical practice. Section 1 thoroughly explains the role of nursing diagnosis in the nursing process and in care planning. Section 2 is a comprehensive A-to-Z guide to current nursing diagnoses. Section 3 focuses on collaborative problems. This edition lists associated NIC (Nursing Interventions Classifications) and NOC (Nursing Outcomes Classifications) for every NANDA diagnosis. New diagnoses added and modified in accordance with the latest NANDA meeting are in an appendix for easy access.

Tabbner's Nursing Care

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across

the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosing, Implementation, and Evaluation (APIE) nursing process Addresses critical thinking, clinical decision making, therapeutic interventions, case management roles, and mental health care settings across the lifespan Features NCLEX preparation questions, vivid clinical scenarios, and evidence-based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM-V updates is available Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM-V update This book is also available as part of a discounted set. To view the Psychiatric-Mental Health Nursing Special A Student Pack, click the link above.

Basic Concepts of Psychiatric-mental Health Nursing

Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Lippincott's Manual of Psychiatric Nursing Care Plans and Psychiatric Mental Health Nursing, 2

Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This exciting revision includes special risk consideration icons called "Clinical Alert" (derived from the most recent IOM report) that integrate patient-specific considerations into each care plan. Other enhancements include a streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.

Psychiatric Nursing Care Plans

Nurses of the future need to accurately assess people of all ages, with varying mental and physical problems, across different settings and with changing health needs. This book introduces student nurses and novice practitioners to the assessment process enabling them to identify patient problems in order for solutions to be planned and implemented. Linked to the NMC Standards and Essential Skills Clusters for degree-level education, and with detailed case studies and scenarios demonstrating practical application of key theory, the book encourages critical thinking and urges students to consider the social, cultural, psychological and environmental factors as well as the physical symptoms that may be present when making assessments.

Vancouver's Manual of Psychiatric Nursing Care Planning

Enter the world of nursing care planning with confidence! This informative guide is the perfect way to build your care planning and documentation skills. Practical and easy-to-read material covers each phase of care plan development and record-keeping for both surgical and non-surgical interventions.

Nursing Diagnosis

Designed for the Diploma of Nursing, Foundations of Nursing, Enrolled Nurses, Australia and New Zealand edition is mapped to the HLT54115 training package competencies, and aligns to the revised Standards for Practice for the Enrolled Nurse. Written to equip the enrolled nurse with current knowledge, and basic problem-solving and critical-thinking skills to successfully meet the demanding challenges of today's health care, the text clearly explains concepts and definitions, and scaffolds knowledge. The student-friendly text provides a clear and fresh approach to the study of nursing; it is straightforward and heavily illustrated with colour photos of procedures.

Psychiatric Nursing Care Plans

This book explores, for the first time in an edited collection, the intersection of three key research areas - women, madness and the law - and advances the debates on how law and the 'psy' sciences play a critical role in regulating and controlling women's lives.

Mental Health-psychiatric Nursing

Psychiatric Nursing provides a focused, thorough introduction to psychiatric-mental health nursing, including nursing assessment and intervention of the most common mental disorders as classified in the DSM-IV. This text guides nurses in managing special populations, clarifying neurobiologic theories, and conducting psychiatric nursing evaluations. Additionally, Psychiatric Nursing presents the latest on psychotropic drugs, addresses legal and ethical concerns within psychiatric nursing, and discusses complementary and alternative therapies. Perfect for undergraduate courses, the text features: Learning Objectives Key Terms Critical Thinking Questions Case Studies Clinical Examples Care Plans Diagnostic Criteria Patient and Family Education Internet Resources Implications for Evidence-Based Practice Client Teaching Guides

Psychiatric-Mental Health Nursing

Select nursing interventions with the book that standardizes nursing language! Nursing Interventions Classification (NIC), 8th Edition provides a research-based clinical tool to help you choose appropriate

interventions. It standardizes and defines the knowledge base for nursing practice as it communicates the nature of nursing. More than 610 nursing interventions are described — from general practice to all specialty areas. From an expert author team led by Cheryl Wagner, this book is an ideal tool for practicing nurses and nursing students, educators seeking to enhance nursing curricula, and nursing administrators seeking to improve patient care. It's the only comprehensive taxonomy of nursing-sensitive interventions available! 614 research-based nursing intervention labels — with 60 new to this edition — are included, along with specific activities used to carry out interventions. Specialty core interventions are provided for 57 specialties. Descriptions of each intervention include a definition, a list of activities, a publication facts line, and references. NEW! 60 interventions are added to this edition, including several related to the care of patients with COVID considerations. UPDATED! Approximately 220 existing interventions have been revised.
