Mookey the Monkey Gets Over Being Teased

Mookey the Monkey

There once lived a monkey named 'Mookey' who was born without a single hair on his body. No fur, no fleece, not even a hint of fuzz. Mookey's family thought his silky skin was beautiful and made him colorful clothes to keep him warm. But when Mookey started school, he quickly learned how it feels to be teased. His classmates had never seen a monkey without hair. They pointed, stared, and called him 'Baldy.' Mookey began to feel bad about himself and set out to change his hairless skin. After trying all sorts of things, Mookey decides to listen to the wise animals throughout the jungle. They teach him all sorts of terrific tools to use when teased. As Mookey applies his new skills, the teasers lose interest and Mookey gains a sense of empowerment. Ultimately, Mookey learns to love himself just the way he is.

Race and gender are explored in essays about picture-books featuring children as consumable objects, about books focused on African American female athletes, and about young adult dystopian fiction. Gender itself is further explored in articles about Monster High, Joyce Carol Oates's Beasts, and The Hunger Games and Divergent. Essays about fantasy literature include an exploration of environmentalism in Rick Riordan's The Heroes of Olympus, a discussion of Severus Snape as a Judas figure, an explication of Chapter 5 of The Hobbit, and an analysis of ghosts and nationalism in Eva Ibbotson's The Haunting of Granite Falls. An essay about Horrible Histories explores television, genre, and the way history is coded. Other contributions explore how teaching literature to reluctant readers can be effective through multimodal texts and how Harry Potter has played a role in the popularity of young adult literature for adult readers.

Monkey and Me

'The Fig Tree' is a story about a little girl, Lydia, and her grandfather-who elegantly imparts a message of gratitude using the example of the backyard fig tree: 'Ms. Figgy.' As she returns home from a hard day at school, Lydia seeks the solace of her grandpa who is resting beneath the tree. Once she recounts the events of her day, Lydia's grandfather describes how he cares for the tree-likening its need for TLC to that provided to Lydia by her parents. As she listens, Lydia begins to forget about her own worries and instead takes notice of how Ms. Figgy has nurtured all sorts of critters with food and shelter throughout each season. And, with Grandpa's help, Lydia also reflects upon the many ways in which the tree has enhanced her own life since she was a baby. By illuminating the strength and majesty of the tree, Lydia begins to see it as so much more than just a tree. With its stunning illustrations, 'The Fig Tree' gives a young girl a new perspective on an old tree she had taken for granted; instead, seeing it through a lens of gratitude and wonder. Children will enjoy the artist's attention to detail while gaining an appreciation for nature, as well as the touching relationship between Lydia and her grandpa.

A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

This book examines labour regulation and labour mobility in two professional baseball leagues: Major League Baseball in the United States and Nippon Professional Baseball in Japan. Through vivid comparative study, Matt Nichol explores how each league internally regulates labour mobility and how this internal regulation engages with external regulation from the legislature, statutory authorities and the courts. This comparison of two highly restrictive labour markets utilizes regulatory theory and labour regulation and suggests a framework for a global player transfer system in baseball.

Grunge, also known as the 'Seattle sound', is the sludgy fusion of punk rock and heavy metal that emerged from the Pacific Northwest in the early part of the 1980s. But it was the unexpected, seemingly overnight success of Nirvana's single 'Smells Like Teen Spirit,' in the fall of 1991, that made grunge a household word and launched an American music movement on par with punk and hip-hop. Twenty years later, Mark Yarm captures that era in the words of those at the forefront of the movement (and the music's lesser-known champions). *Everybody Loves Our Town* will tell the whole story: the founding of originators like Soundgarden and the Melvins, the early successes of Seattle's Sub Pop record label, the rise of powerhouses Nirvana and Pearl Jam, the insane media hype surrounding the grunge explosion, the suicide of Kurt Cobain, and finally, the genre's mid-to-late-'90s decline.

Jane Birkin - actor, singer, songwriter and model - attained international fame with her decade-long musical and personal relationship with Serge Gainsbourg, which featured their internationally controversial hit song 'Je t'aime...moi no plus'. She has also enjoyed a notable career as an actress in British and French cinema, including Blow-Up, Death on the Nile and Evil Under the Sun. And then there is the Birkin bag... Throughout these years Jane has been keeping a diary: "I've been keeping a journal since I was eleven, writing it to my confidante, the stuffed monkey won in a tombola: Munkey. He has slept by my side, shared my life with John, Serge, Jacques, and been witness to every joy and sadness. Before my children arrived wreaking havoc on my life, I left Munkey in Serge's arms, in the casket where he lay, like a pharaoh. My monkey, protecting him in the after-life. As I re-read my journals, it seems obvious to me that we don't change. What I was twelve years old, I am today. Newspapers are obviously unfair, giving different versions of everything, but here, there is only my version. On principle, I haven't changed anything, and believe me, looking back, I would have preferred to have wiser reactions than I did . . ." We thought we knew nearly everything about Jane Birkin. Her book not only re-creates the flamboyant era of Swinging London and Saint-Germain-des-Pres in the 1970s, it also lets us into the everyday life of an exceptional woman.

Enemy Coast Ahead

A definitive new edition of a classic, World War II memoir, complete with more than 100 photographs, and notes from leading historians. Guy Gibson was the leader of the famous Dambusters raid, and *Enemy Coast Ahead* is a vivid, honest account, widely regarded as one of the best books on the Second World War. It also provides an insider's perspective, setting down in clear detail the challenges that the RAF faced in the war against Germany's Luftwaffe. Tragically, Gibson died in September 1944, when his Mosquito crashed near Steenbergen in the Netherlands. He was aged just 26. This new book has been published to mark the 75th anniversary of his death and includes an introduction by James Holland, a historian and broadcaster. It includes notes by Dr Robert Owen, the Official Historian of the No. 617 Squadron Association, and many images that have never before been published. Published in association with the RAF Museum Inspired the 1955 film *The Dam Busters*, starring Richard Todd and Michael Redgrave

Enemy Coast Ahead [Illustrated Edition]

Includes the Aerial Warfare In Europe During World War II illustrations pack with over 200 maps, plans, and photos. THE classic account of the Royal Air Force Bomber Command during World War Two. This is probably the best-known memoir by a Bomber Command Officer. The author first saw active service with 83 Squadron in 1939 flying against German naval targets. After completing 39 missions he transferred to Fighter Command where he flew as a night-fighter pilot with 29 Squadron. In 1942, he was given command of 106 Squadron. Such was his success flying Lancasters that when 617 Squadron was formed for the specific task of attacking the Ruhr valley dams, the author was given command. Awarded the VC for the famous 'Dam Busters' raid, the author was commissioned to write this book, a task which he completed shortly before his death in 1944.-Print Ed. "A remarkable piece of descriptive writing. It records the night-to-night life of a bomber pilot with modesty, humour, and a rich understanding.it is extraordinarily adult work for such a young man."..."This is a magnificent story well and simply told by as great a warrior as these islands ever bred. It is also History." Marshal of the Royal Air Force, Sir Arthur Harris

Enemy coast ahead

Wing Commander Guy Gibson writes affectionately about his beloved aircrews.

Enemy Coast Ahead

On 16 May 1943, nineteen Lancaster aircraft from the RAF's 617 Squadron set off to attack the great dams in the industrial heart of Germany. Flying at a height of 60ft, they dropped a series of bombs which bounced across the water and destroyed two of their targets, thereby creating a legend. The one-off operation combined an audacious method of attack, technically brilliant flying and visually spectacular results. But while the story of Operation Chastise is well known, most of the 133 'Dambusters' who took part in the Dams Raid have until now been just names on a list. They came from all parts of the UK and the Commonwealth and beyond, and each of them was someone's son or brother, someone's husband

or father. This is the first book to present their individual stories and celebrate their skill, heroism and, for many, sacrifice.

The Complete Dambusters

FEW MEN HAVE A BETTER CLAIM TO BE CALLED A LEGEND IN THEIR OWN LIFETIME THAN GUY GIBSON. Leader of the famous Dambuster Raid of May 1943, which became part of the popular folklore of the Second World War after the film in which Richard Todd took the part of the hero, Gibson himself was tragically in an air crash in 1944. Born in India in 1918 and brought up in England, Guy Gibson joined the RAF in November 1936. Thereafter his career can be seen as a battle between, on the one hand, his uncertain temperament and less than ideal private life, and, on the other, his undoubted skills as an airman and as a leader of men. The war was to bring him adventure and, later, fame. He took part in the first aerial attack of the war, on the Kiel Canal; he served in Fighter Command and then, in 1943, came the famous raid on the Mohne and Eder dams for which he was awarded the Victoria Cross. By now a hero of international fame, he was sent on a Public Relations tour of North America, but he was above all a flyer and, refusing to remain grounded, he died an airman's death. This new edition, which draws on conversations with members of Gibson's family and on notes made by his widow, expands upon his early life in a severely dysfunctional family, his unhappy marriage and the possible reason for his untimely death in September 1944.

Guy Gibson, VC

The most audacious bombing raid in history is explained in amazing detail within this text. It includes the complex design and testing of Barnes Wallis theories, including dummy runs across English and Scottish lakes and lochs.

The tranquility of Mars is disrupted by humans who want to conquer space, colonize the planet, and escape a doomed Earth.

The Dambusters Raid

Filled with fresh interpretations and information, puncturing old myths and challenging new ones, *Battle Cry of Freedom* will unquestionably become the standard one-volume history of the Civil War. James McPherson's fast-paced narrative fully integrates the political, social, and military events that crowded the two decades from the outbreak of one war in Mexico to the ending of another at Appomattox. Packed with drama and analytical insight, the book vividly recounts the momentous episodes that preceded the Civil War--the Dred Scott decision, the Lincoln-Douglas debates, John Brown's raid on Harper's Ferry--and then moves into a masterful chronicle of the war itself--the battles, the strategic maneuvering on both sides, the politics, and the personalities. Particularly notable are McPherson's new views on such matters as the slavery expansion issue in the 1850s, the origins of the Republican Party, the causes of secession, internal dissent and anti-war opposition in the North and the South, and the reasons for the Union's victory. The book's title refers to the sentiments that informed both the Northern and Southern views of the conflict: the South seceded in the name of that freedom of self-determination and self-government for which their fathers had fought in 1776, while the North stood fast in defense of the Union founded by those fathers as the bulwark of American liberty. Eventually, the North had to grapple with the underlying cause of the war--slavery--and adopt a policy of emancipation as a second war aim. This "new birth of freedom," as Lincoln called it, constitutes the proudest legacy of America's bloodiest conflict. This authoritative volume makes sense of that vast and confusing "second American Revolution" we call the Civil War, a war that transformed a nation and expanded our heritage of liberty.

The Martian Chronicles

Collected in book form for the first time – and also available as an ebook – are some of Gary Eason's acclaimed *Flight Artworks*: carefully researched and crafted photorealistic pictures of historical air combat. This first volume presents images of WWII scenes, selected from artworks created since 2011. "From my point of view as a pilot for the last 43 years and an RAF fighter pilot for 30 years, the realism he captures is uncanny ...". - Squadron Leader Clive Rowley MBE RAF (Retd) Third edition, September 2015

Battle Cry of Freedom

In this eagerly anticipated book, renowned space historian and author David Baker turns his attention to the Saturn I and IB rockets. Although considered as merely a 'stepping stone' from the Mercury and Gemini programs to the mighty Saturn V and the Apollo missions that put the first humans on the Moon, the Saturn I and IB rockets actually played a far more significant role in NASA's manned space effort. As the first American 'heavy lift' rocket, Wernher von Braun's Saturn I traced its lineage right back to his WWII V2 rocket, through Redstone to the Jupiter and Juno projects that lead to the Saturn vehicles. In describing this often-overlooked historical background, the story of the transition of the space program from the US Army to the (then) newly-formed NASA, and the evolution from launching men and satellites on modified missiles, to flying purpose-built space rockets, is also uncovered. The first Saturn I flew in 1961 and it remained in service until 1975, flying the first manned Apollo mission, testing stages for the Moon flights and launching 'Skylab' astronauts among other accomplishments. Illustrated throughout with NASA technical drawings and photographs, many previously unpublished, this absorbing book also includes a description of each mission flown by the Saturn I and IB.

The New York Times bestselling graphic memoir from actor/author/activist George Takei returns in a deluxe edition with 16 pages of bonus material! Experience the forces that shaped an American icon -- and America itself -- in this gripping tale of courage, country, loyalty, and love. George Takei has captured hearts and minds worldwide with his magnetic performances, sharp wit, and outspoken commitment to equal rights. But long before he braved new frontiers in STAR TREK, he woke up as a four-year-old boy to find his own birth country at war with his father's -- and their entire family forced from their home into an uncertain future. In 1942, at the order of President Franklin D. Roosevelt, every person of Japanese descent on the west coast was rounded up and shipped to one of ten "relocation centers," hundreds or thousands of miles from home, where they would be held for years under armed guard. **THEY CALLED US ENEMY** is Takei's firsthand account of those years behind barbed wire, the terrors and small joys of childhood in the shadow of legalized racism, his mother's hard choices, his father's tested faith in democracy, and the way those experiences planted the seeds for his astonishing future. What does it mean to be American? Who gets to decide? George Takei joins cowriters Justin Eisinger & Steven Scott and artist Harmony Becker for the journey of a lifetime.

Great World War 2 Air Stories

John 'Hoppy' Hopgood, pilot and 2nd in command in the May 1943 Dambusters raid, died a hero at just 21 years old. Wounded by flak and with his Lancaster M-Mother ablaze, Hoppy had no hope of escape yet managed to gain height for two of his crew to parachute to safety. The plane crashed moments later. Using Hoppy's school diary and letters to his mother and sister, this book tells the story of how a boy from a small Surrey village matured into a gutsy war hero. A veteran of forty-eight bombing sorties and an expert pilot in three Bomber Command Squadrons, this is the man who taught Guy Gibson how to fly a Lancaster.

They Called Us Enemy - Expanded Edition

The daring raid on the great dams of western Germany by Lancaster bombers of 617 Squadron in May 1943 is probably one of the best known and most widely told stories of the Second World War. In 1955 the raid was immortalized on film by director Michael Anderson in *The Dam Busters*, starring Michael Redgrave and Richard Todd. It became Britain's top grossing film of 1955 and in the half-century that has followed, thanks to its almost annual airing on the small screen, it has become a film classic. It is also a firm favorite with aviation enthusiasts due in no small measure to the breathtaking flying sequences featuring the Avro Lancaster. Tucked away in the Pinewood Studios archives are hundreds

of rarely seen 'still' photographs from the making of the film. Including everything from storyboarding to location shots, and from the stars and personalities to the aircraft themselves, it is estimated that only about 10 per cent of these high quality pictures have ever been published before. In this book they are supplemented by stunning and previously unpublished air-to-air photographs, taken by the aircrews who flew the Lancasters on camera. Drawing on eyewitness accounts and interviews with film unit and flying personnel, *Filming the Dam Busters* evokes the optimistic outlook of the new postwar Elizabethan Age, when British cinema had a force and reach not equalled before or since.

Tarka the Otter

This book tries to answer that question through a global journey in search of places where conservation efforts mean things are getting better, not worse an attempt to understand conservation success, celebrate it, and learn from it.

M-Mother

When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

Filming The Dam Busters

Utopia is a work of fiction and socio-political satire by Thomas More published in 1516 in Latin. The book is a frame narrative primarily depicting a fictional island society and its religious, social and political customs. Many aspects of More's description of *Utopia* are reminiscent of life in monasteries.

Wild Hope

Aeneas appears in *The Illiad* in vague snippets and starts as a traveling warrior of great piety who was loosely connected to the foundation of Rome. Virgil weaves these fragments into a powerful myth about the founding of Rome in *The Aeneid*. Aeneas travels from his native Troy to Italy then wages victorious war upon the Latins.

The War of the Worlds

WINNER OF THE INTERNATIONAL BUSINESS BOOK AWARD 2019 From the million-copy best-selling author of *The 48 Laws of Power* Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defence.

The Dam Busters

West With the Night is the 1942 memoir by Beryl Markham, chronicling her experiences growing up in Kenya in the early 1900s, leading to a career as a bush pilot there. The author describes growing up in an Africa that no longer exists, training and breeding race horses, flying mail to Sudan, and being the first woman to fly the Atlantic from east to west. When Markham decided to take on the Atlantic crossing, no pilot had yet flown it non-stop. Markham became the first woman to cross the Atlantic east-to-west solo, and the first person to make it from England to North America non-stop. She was celebrated as an aviation pioneer. Markham chronicled her many adventures in this memoir. After living

for many years in the United States, Markham moved back to Kenya in 1952, becoming for a time the most successful horse trainer in the country.

Utopia

A new assessment of the life of one of the most famous and controversial airmen of the Second World War, this book covers Guy Gibson's sometimes troubled upbringing and the impact on him of his time at St Edward's School, Oxford. In particular, the story of his career in the RAF is relayed, including his stunning leadership achievement in creating No 617 Squadron and leading its attack on the dams of western Germany. The much-discussed circumstances of his unnecessary death and the theories, which have grown up around it are examined, as well as his legacy—he remains a great British hero almost 70 years after his death in a world utterly different to the one he knew.

The Aeneid

A boy grows to manhood while attempting to subdue the evil he unleashed on the world as an apprentice to the Master Wizard.

Twenty Thousand Leagues Under the Sea

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Laws of Human Nature

A celebration of the visual contributions of the bestiary--one of the most popular types of illuminated books during the Middle Ages--and an exploration of its lasting legacy. Brimming with lively animals both real and fantastic, the bestiary was one of the great illuminated manuscript traditions of the Middle Ages. Encompassing imaginary creatures such as the unicorn, siren, and griffin; exotic beasts including the tiger, elephant, and ape; as well as animals native to Europe like the beaver, dog, and hedgehog, the bestiary is a vibrant testimony to the medieval understanding of animals and their role in the world. So iconic were the stories and images of the bestiary that its beasts essentially escaped from the pages, appearing in a wide variety of manuscripts and other objects, including tapestries, ivories, metalwork, and sculpture. With over 270 color illustrations and contributions by twenty-five leading scholars, this gorgeous volume explores the bestiary and its widespread influence on medieval art and culture as well as on modern and contemporary artists like Pablo Picasso and Damien Hirst. Published to accompany an exhibition on view at the J. Paul Getty Museum at the Getty Center May 14 to August 18, 2019.

West with the Night

Foppish, impulsive, and philandering: William Jackson was every Georgian parent's worst nightmare. Gentlemen were expected to be honorable and virtuous, but William was the opposite, much to the dismay of his father, a well-to-do representative of the East India Company in Madras. In *The Profligate Son*, historian Nicola Phillips meticulously reconstructs William's life from a recently discovered family

archive, describing how his youthful misbehavior reduced his family to ruin. At first, William seemed destined for a life of great fortune, but before long, he was indulging regularly in pornography and brothels and using his father's abundant credit to swindle tradesmen. Eventually, William found himself in debtor's prison and then on a long, typhus-ridden voyage to an Australian penal colony. He spent the rest of his days there, dying a pauper at the age of thirty-seven. A masterpiece of literary nonfiction as dramatic as any Dickens novel, *The Profligate Son* transports readers from the steamy streets of India, to London's elegant squares and seedy brothels, to the sunbaked shores of Australia, tracing the arc of a life long buried in history.

Strengthening Forensic Science in the United States

On the night of 16-17 May 1943, nineteen Lancaster bombers from 617 Squadron headed for Germany. Their mission, for which they had been trained under a cloak of absolute secrecy, was to destroy the dams of the Ruhr Valley and in doing so cripple the Nazi industrial war effort. It was to become one of the most famous raids of WW2. For the first time, acclaimed oral historian Max Arthur has gathered together the voices of the 'Dambusters', including Guy Gibson, commander of the mission and Barnes Wallis, who developed the iconic Bouncing Bomb. These voices tell of the hard training and sheer bravery that went into this legendary mission. We also hear from the German civilians who suffered the attack, who speak of the devastation that was wrought in their lives. This was a raid like no other, and in this extraordinary collection Max Arthur has created an enduring record of a unique event in British military history.

A Wrinkle in Time

Millions of Christians have struggled with how to reconcile God's love and God's judgment: Has God created billions of people over thousands of years only to select a few to go to heaven and everyone else to suffer forever in hell? Is this acceptable to God? How is this "good news"? Troubling questions—so troubling that many have lost their faith because of them. Others only whisper the questions to themselves, fearing or being taught that they might lose their faith and their church if they ask them out loud. But what if these questions trouble us for good reason? What if the story of heaven and hell we have been taught is not, in fact, what the Bible teaches? What if what Jesus meant by heaven, hell, and salvation are very different from how we have come to understand them? What if it is God who wants us to face these questions? Author, pastor, and innovative teacher Rob Bell presents a deeply biblical vision for rediscovering a richer, grander, truer, and more spiritually satisfying way of understanding heaven, hell, God, Jesus, salvation, and repentance. The result is the discovery that the "good news" is much, much better than we ever imagined. Love wins.

The Profligate Son

"[An] irreverent and remarkably candid memoir about growing up in wealthy eighties San Francisco . . . rollicking, ruthless . . . ultimately generous-hearted." —Vogue "A vivid mix of brio, self-awareness and sophistication . . . writing well is indeed the best revenge." —The New York Times Book Review "A monumental piece of work." —Kirkus Reviews "In the beginning we were happy. And we were always excessive. So in the beginning we were happy to excess." With these opening lines Sean Wilsey takes

us on an exhilarating tour of life in the strangest, wealthiest, and most grandiose of families. Sean's blond-bombshell mother (one of the thinly veiled characters in Armistead Maupin's bestselling *Tales of the City*) is a 1980s society-page staple, regularly entertaining Black Panthers and movie stars in her marble and glass penthouse, "eight hundred feet in the air above San Francisco; an apartment at the top of a building at the top of a hill: full of light, full of voices, full of windows full of water and bridges and hills." His enigmatic father uses a jet helicopter to drop Sean off at the video arcade and lectures his son on proper hygiene in public restrooms, "You should wash your hands first, before you use the urinal. Not after. Your penis isn't dirty. But your hands are." When Sean, "the kind of child who sings songs to sick flowers," turns nine years old, his father divorces his mother and marries her best friend. Sean's life blows apart. His mother first invites him to commit suicide with her, then has a "vision" of salvation that requires packing her Louis Vuitton luggage and traveling the globe, a retinue of multiracial children in tow. Her goal: peace on earth (and a Nobel Prize). Sean meets Indira Gandhi, Helmut Kohl, Menachem Begin, and the pope, hoping each one might come back to San Francisco and persuade his father to rejoin the family. Instead, Sean is pushed out of San Francisco and sent spiraling through five high schools, till he finally lands at an unorthodox reform school cum "therapeutic community," in Italy. With its multiplicity of settings and kaleidoscopic mix of preoccupations—sex, Russia, jet helicopters, seismic upheaval, boarding schools, Middle Earth, skinheads, home improvement, suicide, skateboarding, Sovietology, public transportation, massage, Christian fundamentalism, dogs, Texas, global thermonuclear war, truth, evil, masturbation, hope, Bethlehem, CT, eventual salvation (abridged list)—*Oh the Glory of It All* is memoir as bildungsroman as explosion.

White Space Is Not Your Enemy

In *Going Solo*, the world's favourite storyteller, Roald Dahl, tells of life as a fighter pilot in Africa. 'They did not think for one moment that they would find anything but a burnt-out fuselage and a charred skeleton, and they were astounded when they came upon my still-breathing body lying in the sand nearby.' In 1938 Roald Dahl was fresh out of school and bound for his first job in Africa, hoping to find adventure far from home. However, he got far more excitement than he bargained for when the outbreak of the Second World War led him to join the RAF. His account of his experiences in Africa, crashing a plane in the Western Desert, rescue and recovery from his horrific injuries in Alexandria, flying a Hurricane as Greece fell to the Germans, and many other daring deeds, recreates a world as bizarre and unnerving as any he wrote about in his fiction. 'Very nearly as grotesque as his fiction. The same compulsive blend of wide-eyed innocence and fascination with danger and horror' *Evening Standard* 'A non-stop demonstration of expert raconteurship' *The New York Times Book Review* Roald Dahl, the brilliant and worldwide acclaimed author of *Charlie and the Chocolate Factory*, *James and the Giant Peach*, *Matilda*, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, *Roald Dahl's Twisted Tales* by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.
