

Minnesota 39 S Geology

[#minnesota geology](#) [#geology of minnesota](#) [#minnesota rock formations](#) [#glacial geology minnesota](#) [#iron range geology](#)

Explore the rich and diverse geological landscape of Minnesota, a state profoundly shaped by ancient bedrock and extensive glacial activity. From the ancient iron-rich formations of the Mesabi Range to the stunning Dalles of St. Croix and the countless lakes sculpted by ice, Minnesota's geology tells a captivating story of Earth's powerful forces and deep time, offering insights into its unique natural heritage and resource wealth.
