Bloody Point 1976

Fourth of July, 1976. Tooley Walter, a young Chesapeake Bay waterman on Maryland's rural Eastern Shore, is hired to retrieve big shot Harris Bradnox's rebellious daughter Dee from The Block, Baltimore city's grimy and notoriously dangerous red-light district. Thrown into a menacing world of vice and violence, with hometown goon Clacker Herbertson on his tail, Tooley collides into a lineup of mind-blowing strangers, including: Salt Wade, Dee's murderous "manager" and his mysterious case; Dr. Merriman, the fallen from grace, drug-addled "Block-doc," and Amy Ruari, the red-headed waitress with a carbonated personality who might know more than she lets on. A coming-of-age crime adventure mixed with an epic quest and garnished with a funky slice of Bicentennial Americana; told with fishhook-sharp dialogue and a boatload of twists, Bloody Point 1976 is a rowdy and racy tale of unforgettable characters born of voice, humor and truth, trying to navigate their survival in a changing time and place.

Bloody Point

After her agent-husband is murdered, you FBI agent Cassie McKenna takes a leave from the Bureau to try to find serenity on her sailboat that's moored on the beautiful Chesapeake Bay. But serenity is the last thing she finds. Breakneck twists follow the chilling realization that a series of strange events are anything but a coincidence, and if Cass's hunch is correct, there's more at stake than she ever dreamed. Will Cass find out who killed her husband? Who assaulted her former partner leaving him with an injury only God can heal? Will Cass end her self-imposed estrangement from God - before it's too late?

'To thine own self be true!' These words light up the imagination of previously quiet student Stella Tranter in conformist mid-1970s London. Throwing herself into a study of the arts and philosophy, she embarks on a quest to find out exactly what they mean. She reads Nietzsche. She gets into punk. She falls in

love. None of these works out quite as expected, however... Maybe what she really wants is just to be grown-up... She settles down in pleasant, tree-lined Dulwich with unimaginative but well-meaning Bobby. Is this really her? Her discontent begins to grow. The opportunity for escape presents itself. It proves irresistible – but costly. Freedom, she discovers, can be lonely and terrifying. It can destroy as well as liberate. This is a snappily written, witty but also serious 40,000 word novella about culture, ideas, love, music (punk and Mozart), making choices, and the fact that authenticity is not an easy option. "Clever, intriguing," said prizewinning novelist Dame Beryl Bainbridge about this book, adding, "Stella is an excellent voice."

European Prehistory: A Survey traces humans from their earliest appearance on the continent to the Rise of the Roman Empire, drawing on archaeological research from all over Europe. It includes the Paleolithic, Mesolithic, Neolithic, Bronze and Iron Ages. Throughout these periods, the major developments are explored using a wide range of archaeological data that emphasizes aspects of agricultural practices, gender, mortuary practices, population genetics, ritual, settlement patterns, technology, trade, and warfare. Using new methods and theories, recent discoveries and arguments are presented and previous discoveries reevaluated. This work includes chapters on European geography and the chronology of European prehistory. A new chapter has been added on the historical development of European archaeology. The remaining chapters have been contributed by archaeologists specializing in different periods. The second edition of European Prehistory: A Survey is enhanced by a glossary, three indices and a comprehensive bibliography, as well as an extensive collection of maps, chronological tables and photographs.

Daufuskie, a Muscogee word meaning "sharp feather" or "land with a point," is an island located between Hilton Head and Savannah, bounded by the Calibogue Sound and the Cooper River. With no bridge to the mainland, the island maintains a distinct allure. Home to Native American tribes, a paradise for pirates, and a strategic military outpost, Daufuskie held enslaved Africans brought by plantation owners as chattel to build their wealth. After the Civil War and occupation by Union soldiers, freed slaves from the Sea Islands and surrounding states settled on Daufuskie as landowners and sharecroppers. Daufuskie's population fluctuated in keeping with local industries, and those who stayed often relied on farming, hunting, and fishing to survive. Electricity was brought to the island in the early 1950s, and the first telephone rang in 1972. Today, historic sites, restaurants, outdoor recreation, and scenic beauty draw visitors and residents to this unique community. Daufuskie Island is part of the National Park Service's Gullah Geechee Cultural Heritage Corridor and is listed in the National Register of Historic Places.

By the creators of *Criminology*: a complete chronicle of the Golden State serial killer investigation, including photographs and documents. In 1976, a serial rapist terrorized California's Sacramento County, breaking into homes and leaving a trail of destruction behind him. As the masked predator

expanded his turf, his evil urges drove him to murder. In Northern California, he was known as the East Area Rapist. In Southern California, he was called the Original Night Stalker. When his crimes were finally connected, he would become known as the Golden State Killer. By 1986, he had committed a staggering tally of crimes, including at least 12 murders. In season two of their popular podcast, *Criminology*, veteran podcaster Mike Morford and true crime researcher Mike Ferguson unmasked this killer in a story that spans more than forty years. Joined by the investigators who hunted him, the witnesses who saw him, and the survivors who lived to tell their stories, *Criminology Season Two: The Case of the Golden State Killer* examines the story of the most prolific serial rapist and murderer in American history. Now, *The Case of the Golden State Killer* presents an even more complete chronicle of this true crime story. Based on the podcast, this digital volume features additional commentary, photographs and primary source documents.

Maryland: A Guide to the Old Line State

This book stresses the interrelatedness of knowledge by extricating models that cut across traditional disciplinary boundaries. For example, science can find models from the technology and semantic field of music, music can find its models from the technology and semantic field of science, and each domain may be guided by a philosophical or metaphysical principle - thus, the title of the book. But the book itself is structured as a mirror image of its title. Chapters 1-6 provide instances of the role of music in such domains as epistemology and logic, as well as in the early modern sciences of developmental biology, continuum mechanics, anatomy and physiological psychology, whereas Chapters 7-10 provide instances of what some other domains of knowledge have given back to the philosophy and theory of music.

Tidal Current Tables

The preamble to the post-apartheid South African constitution states that 'South Africa belongs to all who live in it, united in our diversity' and promises to 'lay the foundations for a democratic and open society in which government is based on the will of the people and every citizen is equally protected by law' and to 'improve the quality of life of all citizens'. This would seem to commit the South African government to, amongst other things, the implementation of policies aimed at fostering a common sense of South African national identity, at societal development and at reducing of levels of social inequality. However, in the period of more than a decade that has now elapsed since the end of apartheid, there has been widespread discontent with regard to the degree of progress made in connection with the realisation of these constitutional aspirations. The 'limits to liberation' in the post-apartheid era has been a theme of much recent research in the fields of sociology and political theory (e. g. Luckham, 1998; Robins, 2005a). Linguists have also paid considerable attention to the South African situation with the realisation that many of the factors that have prevented, and are continuing to prevent, effective progress towards the achievement of these constitutional goals are linguistic in their origin.

Decent middle class citizens with their backs against the wall. Awful decisions made out of fear, whether real or imagined, are the chief ingredients that drive the stories. To stop the free-fall, the characters must make unthinkable choices. But irony waits around every turn. Below is a glimpse inside the collection: In *aWelcome to the Family*, a Virginia Jasmen, six months after her husband's apparent suicide, finds herself facing a tribunal of her late husband's closest friends. In *aGlenas Remains*, a Leslie Gorman is suspected of having her husband murdered just days after the police closed the case as accidental death. *aSign Here, Here, and Here* is a fast-paced mystery about Billy Maxwell, a career scam artist who gets conned himself. Billy attempts to vindicate himself for a murder he did not commit as he desperately tries to elude a police dragnet.

JAMAICA, 1976 Seven gunmen storm Bob Marley's house, machine guns blazing. The reggae superstar survives, but the gunmen are never caught. From the acclaimed author of *The Book of Night Women* comes a dazzling display of masterful storytelling exploring this near-mythic event. Spanning three decades and crossing continents, *A Brief History of Seven Killings* chronicles the lives of a host of unforgettable characters – slum kids, one-night stands, drug lords, girlfriends, gunmen, journalists, and even the CIA. Gripping and inventive, ambitious and mesmerising, *A Brief History of Seven Killings* is one of the most remarkable and extraordinary novels of the twenty-first century.

The diagnosis and treatment of respiratory problems in the newborn have advanced significantly over recent years, although respiratory failure remains an important cause of neonatal mortality and morbidity. This book provides a comprehensive overview of respiratory physiology in the newborn, and of the mechanism underlying respiratory failure in this age group. It goes on to present in detail the techniques, both novel and well established, for effective ventilatory support. In presenting and evaluating the available treatment modalities, the authors consider not only clinical indications, modes of delivery and monitoring, but also complications and outcomes. Comprehensive and up to date, this is an essential handbook and reference for clinicians in neonatal medicine, that will help to optimise their management of respiratory failure in the newborn.
