Active investing strategies to profit from world-changing trends In The Next Great Bull Market, Matthew McCall advocates an approach he calls, "Conversification," meaning concentrating your investments in specific areas that are poised to benefit from global change. The areas of change addressed throughout this book include the green movement, infrastructure expansion, commodities, peak oil, the next great commodity-water-aging baby boomers, a growing global middle class, geopolitical upheavals, and the explosion of exchange-traded funds. With today's world characterized by rapid change on many different levels, McCall's approach holds even greater promise in the years ahead. Page by page, he provides strategies for both conservative investors interested in long-term growth and aggressive investors interested in generating fast profits. Describes the dynamics driving each major change and provide specific strategies to take advantage of them Shows how to profit from short-term swings in fast-moving sectors of the world economy Highlights how to use various investment vehicles, including ETFs, stocks, and options Investors who understand and anticipate the changes ahead stand to profit handsomely. With The Next Great Bull Market as your guide, you'll quickly discover how the trends that are changing the world can be used to enhance the performance of your portfolio.

As you're well aware, your individual energy ebbs and flows--leading to high and low productivity cycles. Fail to manage your energy correctly, and you risk falling into traps including inertia, complacency, and frenzied, unfocused activity that only erodes the quality of your life. The same holds true for your entire organization. In *Fully Charged*, Heike Bruch and Bernd Vogel provide tools and strategies to help you manage your company's collective energy. First, diagnose your company's "energy state" using the Organizational Energy Matrix. By assessing the intensity (high or low) and the quality (positive or negative) of the energy in your enterprise, you discover which of four energy states your company is experiencing. Second, move your company out of dangerous states characterized by complacency, cynicism, aggression, withdrawal, and other perils. By applying practices mastered by companies as diverse as Airbus, Novartis, SAP, and Tata Steel, you can shift your firm into a state of high, positive energy--in which everyone is emotionally engaged, mentally alert, and working swiftly and productively toward critical goals. Practical and backed by extensive research, *Fully Charged* reveals how to continually refresh your company's energy--so it's always ready to tackle the next period of high demand.
