France's Long Reconstruction

Postwar recovery required a transformation of France, but what form it should take remained a question. Herrick Chapman charts the course of France's reconstruction from 1944 to 1962, offering insights

into the ways the expansion of state power produced fierce controversies at home and unintended consequences abroad in France's crumbling empire.

France's Long Reconstruction

At the end of World War II, France's greatest challenge was to repair a civil society torn asunder by Nazi occupation and total war. Recovery required the nation's complete economic and social transformation. But just what form this "new France" should take remained the burning question at the heart of French political combat until the Algerian War ended, over a decade later. Herrick Chapman charts the course of France's long reconstruction from 1944 to 1962, offering fresh insights into the ways the expansion of state power, intended to spearhead recovery, produced fierce controversies at home and unintended consequences abroad in France's crumbling empire. Abetted after Liberation by a new elite of technocratic experts, the burgeoning French state infiltrated areas of economic and social life traditionally free from government intervention. Politicians and intellectuals wrestled with how to reconcile state-directed modernization with the need to renew democratic participation and bolster civil society after years spent under the Nazi and Vichy yokes. But rather than resolving the tension, the conflict between top-down technocrats and grassroots democrats became institutionalized as a way of framing the problems facing Charles de Gaulle's Fifth Republic. Uniquely among European countries, France pursued domestic recovery while simultaneously fighting full-scale colonial wars. France's Long Reconstruction shows how the Algerian War led to the further consolidation of state authority and cemented repressive immigration policies that now appear shortsighted and counterproductive.--

French Reconstruction in a European Context

This is a comprehensive history of a critically formative period in French economic history. Frances Lynch covers topics such as the post-war negotiations for American aid, the reconstruction of a capital market, the modernization of French agriculture, the liberalization of trade in the 1950s and subsequent economic growth.

France and the International Economy

The main purpose of the book is to introduce the work of Alan S. Milward and to acknowledge the full magnitude of his scientific contribution to contemporary British and European history. The book is a collection of essays which provide a better understanding of Alan Milward's extensive intellectual work for future scholars and facilitate the knowledge and transmission of his published work to present and future generations of students, scholars in the various disciplines concerned, and the general public. The series of original contributions which this book contains are related to or reflect critically upon Milward's own contributions to the fields of political, diplomatic, and socio-economic history, political science, economics, international relations, and European Studies in general. This book honors Alan Milward through a better understanding of his many pioneering contributions in the fields of contemporary European history in general, and the history of European integration in particular. Although the volume does not aim to be a substitute for Milward's work itself, it illuminates and assesses his creative process along fifty years of continued and intense work, as well as the impact of his main work, and the continuing relevance of his main theses today.

Alan S. Milward and a Century of European Change

In Argentina and elsewhere in Latin America, decades after the fall of authoritarian regimes in the 1970s, transitional justice has proven to be anything but transitional—it has become a cornerstone of state policy and a powerful tool of state formation. Contextualizing cultural and political shifts in Argentina after the 1976 military coup with comparisons to other countries in the Southern Cone, Michelle Frances Carmody argues that incorporating human rights practices into official policy became a way for state actors to both build the authority of the state and manage social conflict, a key aim of post-Cold War democracies. By examining the relationship between transitional justice and the Latin American political order, this book illuminates overlooked dimensions of state formation in the age of human rights.

Human Rights, Transitional Justice, and the Reconstruction of Political Order in Latin America

In *Vanishing Vienna* historian Frances Tanzer traces the reconstruction of Viennese culture from the 1938 German annexation through the early 1960s. The book reveals continuity in Vienna's cultural

history across this period and a framework for interpreting Viennese culture that relies on antisemitism, philosemitism, and a related discourse of Jewish presence and absence. This observation demands a new chronology of cultural reconstruction that links the Nazi and postwar years, and a new geography that includes the history of refugees from Nazi Vienna. Rather than presenting the Nazi, exile, and postwar periods as discrete chapters of Vienna's history, Tanzer argues that they are part of a continuous spectrum of cultural evolution—the result of which was the creation of a coherent Austrian identity and culture that emerged by the 1950s. As she shows, antisemitism and philosemitism were not contradictory forces in post-Nazi Austrian culture. They were deeply interconnected aspirations in a city where nostalgia for the past dominated cultural reconstruction efforts and supported seemingly contradictory impulses. Viennese nostalgia at times concealed the perpetuation of antisemitic fantasies of the city without Jews. At the same time, the postwar desire to return to a pre-Nazi past relied upon notions of Austrian culture that Austrian Jews perfected in exile, as well as on the symbolic remigration of a mostly imagined “Jewish” culture now taxed with redeeming Austria in the aftermath of the Holocaust. From this perspective, philosemitism is much more than a simple inversion of antisemitism—instead, Tanzer argues, philosemitism, problematic as it may be, defines Vienna in the era of postwar reconstruction. In this way, *Vanishing Vienna* uncovers a rarely discussed phenomenon of the aftermath of the Holocaust—a society that consumes, redefines, and bestows symbolic meaning on the victims in their absence.

Poems on Miscellaneous Subjects

At 11:00 a.m. on Wednesday, April 7, 1926, a woman stepped out of the crowd on Rome's Campidoglio Square and shot Mussolini at point-blank range. He escaped virtually unscathed. Violet Gibson, who expected to be thanked for her action, was arrested, labeled a "crazy Irish spinster" and a "half-mad mystic"—and promptly forgotten. Now, in an elegant work of reconstruction, Frances Stonor Saunders retrieves this remarkable figure from the lost historical record. In a grand tragic narrative, full of suspense and mystery, conspiracy and back-room diplomacy, she vividly resurrects the life and times of a woman who sought to forestall catastrophe, whatever the cost.

The Woman Who Shot Mussolini

According to William Gillette, recent reinterpretation of Reconstruction by revisionist historians has often tended to overemphasize idealistic motivations at the expense of assessing concrete achievements of the era. Thus, he maintains, the failure of both the purpose and the promise of Reconstruction has not been deeply enough analyzed. *Retreat from Reconstruction* is the first and most comprehensive analysis yet published on the course of the development, decline, and disintegration of Reconstruction during the decade of the 1870s. Gillette sets forth the idea that these years provided the true test of the effectiveness of Reconstruction. By using the primary sources to back up and amplify his premise, he offers a detailed, thoroughly convincing study of Reconstruction and a significant interpretation of why the political programs of the Republicans ended in failure. Focusing on Reconstruction as national policy and how it was made and administered, Gillette's study interweaves local developments in the South with political developments in the North that resulted in the withdrawal of support of that policy. His broadly based work includes an examination of federal election enforcement in the South, the southern policies of the Grant and Hayes administrations, the presidential elections of 1872 and 1876, the congressional election of 1874, and the Civil Rights Act of 1875. In addition to political developments, Gillette touches on the social, economic, intellectual, educational, and racial facets of Reconstruction; and by demonstrating how they bore on the political processes of the era, he deepens

our understanding of a crucial but controversial period in American history and the workings of the American political system.

Policies Towards Horizontal Inequalities in Post-conflict Reconstruction

Grandmother Fran's proper name is Frances Plum. She was born and raised in what was once a farm community, in Niagara County, New York. The house was a century-old Victorian. Frances, her grandson Mitchell, and Jerry (the bully) are the most significant stars of this story. There are many characters, however, that you will hear about but will not see, each one adding their own twist. Sometimes problems get so big that they must be addressed. Solutions that might seem easy are not. From pride of diversity, to bullying, to domestic violence, there will always be a better way. This story addresses the real world, on so many levels. Intrigue is constant. It will get the reader thinking and keep him/her wondering.

Terror in the Heart of Freedom: Citizenship, Sexual Violence, and the Meaning of Race in the Postemancipation South

The Black Codes, 1865-1867

Invariably misunderstood by Anglophones, and often derided in the English-language financial press, the French economy remains one of the world's major economies. For many years characterized by a distinctive economic model in which the French state intervened to correct or prevent market failures, as France has embraced the global market, its economy has converged with the western norm, but it remains different from its western neighbours, particularly Germany and the UK, in a number of important respects. Frances Lynch provides an authoritative analysis of the modern French economy from its postwar reforms, through the period of Gaullist national planning, to the impact of the recent global financial crisis. She explores the monetary and fiscal policies of successive governments and the country's economic performance through a variety of indicators. In particular she explores the attempts by the state to correct the regional imbalances associated with the contraction of agriculture and the decline of the textile, coal and steel industries as well as the dominance of Paris. The part played by demographic change, income inequality, the European project and migration patterns in French economic development are also investigated. The strength and competitiveness of the public and private sectors is detailed, including the key industries of finance, energy and transport. The book is to be welcomed as the first general economic history of France since 2004 and is the first to include the impact of the global financial crisis. It is also an important corrective to recent work that has emphasized the convergence of the French economy and society and instead reasserts the importance of the state in the economic picture analysing the interaction of the state and the market across the postwar years.

Retreat from Reconstruction, 1869–1879

This "layered, nuanced, and focused study" of Civil War era writings reveals a popular sense of patriotism and hope in the midst of loss (*Journal of American History*). The American Civil War is often seen as the first modern war, not least because of the immense suffering it inflicted. Yet unlike later conflicts, it did not produce an outpouring of disillusionment or cynicism in public or private discourse. In fact, most people portrayed the war in highly sentimental and patriotic terms. While scholars typically dismiss this everyday writing as simplistic or naïve, Frances M. Clarke argues that we need to reconsider the letters, diaries, songs, and journalism penned by Union soldiers and their caregivers to fully understand the war's impact and meaning. In *War Stories*, Clarke revisits the most common stories that average Northerners told in hopes of redeeming their suffering and hardship—stories that enabled people to express their beliefs about religion, community, and personal character. From tales of Union soldiers who died heroically to stories of tireless volunteers who exemplified the Republic's virtues, *War Stories* sheds new light on this transitional moment in the history of war, emotional culture, and American civic life.

Books have been written, films made, we have raised the Titanic and watched her go down again on numerous occasions, but out of the wreckage Frances Wilson spins a new epic: when the ship hit the iceberg on 14 April 1912 and a thousand men prepared to die, J Bruce Ismay, the ship's owner and inheritor of the White Star fortune, jumped into a lifeboat with the women and children and rowed away to safety. Accused of cowardice, Ismay became, according to one headline, 'The Most Talked-of Man in the World'. The first victim of a press hate campaign, his reputation never recovered and while other survivors were piecing together their accounts, Ismay never spoke of his beloved ship again. With the help of that great narrator of the sea, Joseph Conrad, whose Lord Jim so uncannily predicted Ismay's fate - and whose manuscript of the story of a man who impulsively betrays a code of honour and lives on under the strain of intolerable guilt went down with the Titanic - Frances Wilson explores the reasons behind Ismay's jump, his desperate need to make sense of the horror of it all, and to find a way of living with lost honour. For those who survived the Titanic the world was never the same again. But as Wilson superbly demonstrates, we all have our own Titanics, and we all need to find ways of surviving them.

Lynching occurred more in Mississippi than in any other state. During the 100 years after the Civil War, almost one in every ten lynchings in the United States took place in Mississippi. As in other Southern states, these brutal murders were carried out primarily by white mobs against black victims. The complicity of communities and courts ensured that few of the more than 500 lynchings in Mississippi resulted in criminal convictions. This book studies lynching in Mississippi from the Civil War through the civil rights movement. It examines how the crime unfolded in the state and assesses the large number of deaths, the reasons, the distribution by counties, cities and rural locations, and public responses to these crimes. The final chapter covers lynching's legacy in the decades since 1965; an appendix offers a chronology.

The Wartime Journal of a Georgia Girl

Through an archive-based study of the political and financial history of the 1920s, this book examines how and why international capital teamed up with the League of Nations to bail out the Austrian state after the First World War, and what consequences the intervention carried for Austrian politics and finance. While the existing literature on the League of Nations sees the organization's intervention during the 1920s as mostly positive and successful, Austrian historians decried it as a financial dictatorship that ended in disaster. In contrast, the book claims that while the League of Nations' involvement was essentially responsible for terminating Austrian hyperinflation in 1922, its representatives remained largely immobilized in Vienna, with the Austrian government in control. The League ceased its involvement Austria in 1926, though aware of the latter's financial and political instability. The subsequent collapse of the Austrian Credit-Anstalt bank in 1931, however, was successfully contained with international help within just a few weeks. Thus, it could not have triggered and was not responsible for the larger European banking panics in Germany and Britain that summer.--

How to Survive the Titanic or The Sinking of J. Bruce Ismay

"In *Before Modernism: Inventing American Lyric*, Virginia Jackson argues that in the late eighteenth and early nineteenth centuries, Black poetics, in antagonism with White poetics, produced the conditions for the invention of modern American poetry. This is not a history of American poetry that begins with the

Puritans and stretches to the present, or that jumps from the British Romantics to Walt Whitman, or that restricts the influence of African American poetry to a separate tradition; instead, this book emphasizes the many ways in which early Black poets invented what Phillis Wheatley Peters called "the deep design" of American lyric. Through readings of the poetics of Wheatley Peters, George Moses Horton, James Monroe Whitfield, and Frances Ellen Watkins Harper-as well as the poetics of now-neglected but once-popular White poets William Cullen Bryant and Henry Wadsworth Longfellow-Jackson suggests that Black poetics inspired the direction that American poetics has taken for the last two centuries. Thus this book represents not only a new history but a new theory of American poetry. Over the late eighteenth and early nineteenth centuries, as an idea of poetry based on genres of poems (ballads, elegies, odes, hymns, drinking songs, epistles, etc.) gave way to an idea of poetry based on genres of people (Black, White, male, female, Indigenous, etc.), almost all poetry became lyric poetry. Like everything else in America, what we now think lyric is can be traced back to the twisted paths that have determined what we now think people are and can be. This book tells that story, the story of American lyric"--

Grief and Women Writers in the English Renaissance

Volume One: This volume, which spans the long period from the sixteenth century through the Civil War era, is remarkable for the religious, racial, ethnic, and class diversity of the women it features. Essays on plantation mistresses, overseers' wives, nonslaveholding women from the upcountry, slave women, and free black women in antebellum Charleston are certain to challenge notions about the slave South and about the significance of women to the state's economy. South Carolina's unusual history of religious tolerance is explored through the experiences of women of various faiths, and accounts of women from Europe, the West Indies, and other colonies reflect the diverse origins of the state's immigrants.

Art Of Memory

In some ways, no American city symbolizes the black struggle for civil rights more than Birmingham, Alabama. During the 1950s and 1960s, Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement. Racially motivated bombings of the houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname "Bombingham." In this critical analysis of why Birmingham became such a national flashpoint, Bobby M. Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest. True to its antebellum roots, no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham. A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state, America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in which racial issues influenced the rise of industrial capitalism.

With the defeat of Napoleon Bonaparte at the Battle of Waterloo in June 1815, the next two centuries for France would be tumultuous. Bestselling historian and political commentator Jonathan Fenby provides an expert and riveting journey through this period as he recounts and analyses the extraordinary sequence of events of this period from the end of the First Revolution through two others, a return of Empire, three catastrophic wars with Germany, periods of stability and hope interspersed with years of uncertainty and high tensions. As her cross-Channel neighbour Great Britain would equally suffer, France was to undergo the wrenching loss of colonies in the post-Second World War as the new modern world we know today took shape. Her attempts to become the leader of the European union is a constant struggle, as was her lack of support for America in the two Gulf Wars of the past twenty years. Alongside this came huge social changes and cultural landmarks but also fundamental questioning of what this nation, which considers itself exceptional, really stood - and stands - for. That saga and those questions permeate the France of today, now with an implacable enemy to face in the form of Islamic extremism which so bloodily announced itself this year in Paris. Fenby will detail every event, every struggle and every outcome across this expanse of 200 years. It will prove to be the definitive guide to understanding France.

A History of Nineteenth-Century American Women's Poetry is the first book to construct a coherent history of the field and focus entirely on women's poetry of the period. With contributions from some of the most prominent scholars of nineteenth-century American literature, it explores a wide variety of authors, texts, and methodological approaches. Organized into three chronological sections, the essays examine multiple genres of poetry, consider poems circulated in various manuscript and print venues, and propose alternative ways of narrating literary history. From these essays, a rich story emerges about a diverse poetics that was once immensely popular but has since been forgotten. This History confirms that the field has advanced far beyond the recovery of select individual poets. It will be an invaluable resource for students, teachers, and critics of both the literature and the history of this era.

The Best Books for Academic Libraries: History of the Americas

The companion volume to the Smithsonian's National Museum of African American History and Culture exhibit, opening in September 2021 With a Foreword by Pulitzer Prize-winning author and historian Eric Foner and a preface by veteran museum director and historian Spencer Crew An incisive and illuminating analysis of the enduring legacy of the post-Civil War period known as Reconstruction—a comprehensive story of Black Americans' struggle for human rights and dignity and the failure of the nation to fulfill its promises of freedom, citizenship, and justice. In the aftermath of the Civil War, millions of free and newly freed African Americans were determined to define themselves as equal citizens in a country without slavery—to own land, build secure families, and educate themselves and their children. Seeking to secure safety and justice, they successfully campaigned for civil and political rights, including the right to vote. Across an expanding America, Black politicians were elected to all levels of government, from city halls to state capitals to Washington, DC. But those gains were short-lived. By the mid-1870s, the federal government stopped enforcing civil rights laws, allowing white supremacists to use suppression and violence to regain power in the Southern states. Black men, women, and children suffered racial terror, segregation, and discrimination that confined them to second-class citizenship, a system known as Jim Crow that endured for decades. More than a century has passed since the revolutionary political, social, and economic movement known as Reconstruction, yet its profound consequences reverberate in our lives today. Make Good the Promises explores five distinct yet intertwined legacies of Reconstruction—Liberation, Violence, Repair, Place, and Belief—to reveal their lasting impact on modern society. It is the story of Frederick Douglass, Frances Ellen Watkins Harper, Hiram Revels, Ida B. Wells, and scores of other Black men and women who reshaped a nation—and of the persistence of white supremacy and the perpetuation of the injustices of slavery continued by other means and codified in state and federal laws. With contributions by leading scholars, and illustrated with 80 images from the exhibition, Make Good the Promises shows how Black Lives Matter, #SayHerName, antiracism, and other current movements for repair find inspiration from the lessons of Reconstruction. It touches on questions critical then and now: What is the meaning of freedom and equality? What does it mean to be an American? Powerful and eye-opening, it is a reminder that history is far from past; it lives within each of us and shapes our world and who we are.

Making Peace Work

The recognition that Africans in the Americas have also been subjects of their destiny rather than merely passive objects of European oppression represents one of the major shifts in twentieth-century mainstream historiography. Yet even in the eighteenth and nineteenth centuries, slave narratives and abolitionist tracts offered testimony to various ways in which Africans struggled against slavery, from outright revolt to day-to-day resistance. In the first decades of the twentieth century, African American historians like Carter G. Woodson and W.E.B. Du Bois started to articulate a vision of African American history that emphasized survival and resistance rather than victimization and oppression. This volume seeks to address these and other issues in black liberation from interdisciplinary and comparative perspectives, focusing on such issues as slave revolts, day-to-day resistance, abolitionist movements, maroon societies, the historiography of resistance, the literature of resistance, black liberation movements in the twentieth century, and black liberation and post colonial theory. The chapters span the disciplines of history, literature, anthropology, folklore, film, music, architecture, and art, drawing on the black experience of liberation in the United States, the Caribbean, and Latin America.
