Resources in Education

A multidimensional approach to entrepreneurship, especially in the post-COVID-19 era, will have an important influence on the state of business and government, especially when considering the effects of technological development, innovation, glocalization, and nationalization policies that need to be adopted for inclusive sustainable growth, as well as the enhanced and efficient utilization of global resources. That means there is likely to be a shift in how entrepreneurship development and entrepreneurial opportunities will be perceived, developed, and resourced. The question is how to sustain SMEs and entrepreneurial innovation in the post-COVID-19 era. Thus, comprehensive research and knowledge on designing policies and approaches to ensure the sustainability of SMEs and entrepreneurial innovation in post-pandemic times are essential to sustain, stimulate, and foster SMEs, entrepreneurship, and entrepreneurial innovations. The Handbook of Research on Sustaining SMEs and Entrepreneurial Innovation in the Post-COVID-19 Era provides research dedicated to entrepreneurship with a special emphasis on the sustainability of SMEs and entrepreneurial innovations in the post-COVID-19 era. It provides discussion and the exchange of information on principles, strategies, models, techniques, methodologies, and applications of entrepreneurship in the post-COVID-19 era in the field of public and

private organizations. The chapters communicate the latest developments and thinking on the entrepreneurship subject worldwide by drawing on the latest developments, ideas, research, and best practice to examine the implications of the changes taking place due to COVID-19. This book is ideally intended for entrepreneurs, global organizations, small and medium-sized enterprises, managers, executives, government officials, policymakers, researchers, academicians, and students who are interested in learning about, designing, or implementing policies that are more effective in the post-pandemic era.

Handbook of Research on Sustaining SMEs and Entrepreneurial Innovation in the Post-COVID-19 Era

Bangladesh and the Indian state of West Bengal share many characteristics, including a common language, fertile land, abundant rainfall, year-round warmth, and a dense population. This book examines the progress made in crucial economic sectors that have paved the way for the development of Bangladesh and West Bengal. The book begins by describing how Bangladesh is moving toward achieving the status of a middle-income nation, and how West Bengal seems to have fallen into the trap of developmental experiments with different political ideologies over time. The book then compares the trajectory of development in various economic sectors of the two economies. In doing so, it covers social development, education, health care, food habits, cinema and theatre, and the entrepreneurship of both entities. The chapters take an empirical and descriptive approach to address various issues, analyse results, draw conclusions, and make policy suggestions.

Two Bengals

The Art of Getting Computer Science PhD is an autobiographical book where Emdad Ahmed highlighted the experiences that he has gone through during the past 25 years (1988-2012) in various capacities both as Computer Science student as well as Computer Science faculty at different higher educational institutions in USA, Australia and Bangladesh. This book will be a valuable source of reference for computing professional at large. In the 150 pages book Emdad Ahmed tells the story in a lively manner balancing computer science hard job and life.

The Art of Getting Computer Science PhD

Includes subject section, name section, and 1968-1970, technical reports.

The COVID-19 pandemic has affected every aspect of the modern world, and its impact is felt by all. The pandemic particularly has had a large impact on businesses as they were forced to close, supply chains were disrupted, and new health and safety precautions were adopted. As such, many businesses, especially small businesses, were faced with losses they could not afford. Governments and stakeholders across the world have thus needed to formulate various strategies and interventions to mitigate the negative consequences of the COVID-19 pandemic, particularly as they relate to small- and medium-sized enterprises (SMEs). The Handbook of Research on Strategies and Interventions to Mitigate COVID-19 Impact on SMEs is a comprehensive reference source that encapsulates the overall effect of COVID-19 on SMEs and a variety of strategies to overcome the negative effects and create more sustainable policies and organizations moving forward. The book offers a thorough overview of interventions and tactics to help organizations, entrepreneurs, and institutions of higher learning overcome the negative impact of COVID-19 while preparing policies for a more effective post-pandemic world. Covering topics that include sustainable practices for development, interventions to lessen the impact of COVID-19, and psychological resilience for SME employees, this book is ideal for entrepreneurs, managers, executives, small businesses, family firms, academicians, scholar-practitioners, policymakers, researchers, and students.

Handbook of Research on Strategies and Interventions to Mitigate COVID-19 Impact on SMEs

First multi-year cumulation covers six years: 1965-70.

The world is undergoing a transformation as technology enters every ecosystem. Subsequently, there is a need to develop higher-order digital skills to ensure one's employability as professionals need to build digital competencies to remain competitive in the current work environment. Additionally, businesses

must also continue to update their digital practices in order to remain relevant. Multidisciplinary Perspectives Towards Building a Digitally Competent Society explores multidisciplinary perspectives towards building a more digitally competent society, considers new business models and the need for organizations and individuals to develop the right mindset to embrace digitalization, and discusses how social capital can become a key driver in crafting a whole new digitally competent social fabric. Covering topics such as technological transformation, social media, and corporate social responsibility, this reference work is ideal for corporate practitioners, business owners, policymakers, scholars, researchers, practitioners, instructors, and students.

Multidisciplinary Perspectives Towards Building a Digitally Competent Society

The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world. Groups commonly referred to as minorities-including Asian Americans, Pacific Islanders, African Americans, Hispanics, American Indians, and Alaska Natives-are the fastest growing segments of the population and emerging as the nation's majority. Despite the rapid growth of racial and ethnic minority groups, their representation among the nation's health professionals has grown only modestly in the past 25 years. This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions. In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity, and identifies institutional and policy-level mechanisms to garner broad support among health professions leaders, community members, and other key stakeholders to implement these strategies. Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans.
