The Wiley Handbook of Educational Supervision

Supervision: New Perspectives for Theory and Practice co-edited by two prominent scholars in the field (Jeffrey Glanz and Sally Zepeda), draws attention to supervision as a function that is often misunderstood, under-appreciated, and frequently controversial. Much has changed in the last two decades in the education world. These changes have inevitably influenced the theory and practice of supervision. This text includes some of the top scholars in the field in the USA to offer their insights to important topics and issues in supervision. To strike a balance, the editors also included award-winning practitioners who share their insights about supervision. We hope that this volume raises awareness to several critical issues that affect teachers, administrators, and policy makers. With the range of topics associated with supervision, we believe that the authors offer an informed and lively discussion of supervision in the present and future contexts of schools. Through our efforts, we believe that the multiple contexts in which supervision unfolds are examined alongside trends including high-stakes testing, the uses of data, the work superintendents do to supervise principals, and the type of supervision that builds a just and caring school culture that is culturally relevant and respectful for teachers and leaders.

Educational Administration & Supervision; Volume 2

The best known book in the field, Supervision: A Redefinition is a research-based guide to the practice and philosophy of supervision. Practical applications are supported by a conception of supervision as moral agency, and the book continues to promote a redefinition of supervision from a traditional top-down hierarchy to a shared activity involving all stake-holders in the school--including teachers, administrators, and parents. The eighth edition continues a thirty-plus year tradition of breaking new ground by reconsidering the field of supervision in response to changing school contexts, policies, and realities. The new edition shows even more clearly how the book's ideas can be used to help supervisors improve their effectiveness: practical suggestions abound.

Supervision

This supervisory, administrative, and leadership text for courses at the graduate level reflects new thinking about teaching and school structures - redefining the idea of supervision to focus on seeing schools as communities rather than as organizations. In addition, Supervision emphasizes the student-teacher relationship rather than bureaucratic functions. Using new opinions based on current trends in education, the fifth edition takes the position of viewing the school as a community, with teaching and learning as the most important aspects of this community. In addition, the school is looked upon as a moral rather than a technical enterprise, whereby the moral authority of the supervisor, and its close link with the moral authority of the teacher, is emphasized. The simplified chapters and the revised arrangement of material provide a more logical sequence and presentation of the subject.

Educational Administration, Supervision, and School Management

This comprehensive and practical text introduces your students to concepts and theories of educational administration. It is unlike other texts which are structured in isolated units. Instead, the topics in this book are connected, presented in the context of the ISLLC standards which reveal the real world of practicing school administrators.

Supervision, a Guide to Practice

Here is a wealth of practical techniques and materials for dealing successfully with the many kinds of "people problems" school administrators encounter in the day to day management and supervision of schools. Included are ready-to-use suggestions for handling a wide range of specific problem situations, from untruthful employees to excessive discipline, sexual harassment, and more.

Supervision: A Redefinition

Choosing honor over love, Preston Flynn leaves Forth Worth in an attempt to distance himself from Anna Archer, the wife of the doctor who saved his life. But San Antonio offers its own brand of trouble in the form of Kathleen Hannigan, a tough, out-spoken cattle woman who ramrods her invalid father's ranch. Kathleen considered all men weak and inept. But after she meets Marshal Preston Flynn she realizes that he is an entirely different breed of man and resents every extraordinary quality he possesses, from his flawless reputation to his handsome features and breathtaking blue eyes, deciding that no man had the right to look the way he did. They immediately locked horns.

Educational Administration & Supervision; Volume 1

Supervision That Improves Teaching, Second Edition is a practical guide to improving classroom instruction. This book is user-friendly and based on research and tested strategies and techniques. It intends to assist readers in developing his or her platforms with the use of summary sheets and observation charts provided throughout the book. The book offers future education leaders supervisory strategies and techniques necessary to promote teaching and learning. It brings forth the goal of supervision in attaining and facilitating the process of instructional excellence in schools through curriculum and staff development, action research, and assessments.

Introduction to Educational Administration

A highly respected overview of the field of instructional supervision that covers the three domains of supervision: instructional development, curriculum development, and staff development. The authors adhere to the beliefs that supervisors should look at teaching before looking at the teacher, and that the supervisor should look at the classroom and school environment within the context of instruction.

School Administration and Supervision

This highly usable, hands-on guide offers that much-needed and fully integrated support system for the building-level supervisor to truly become a teacher of teachers.

School Administrator's Factomatic

This book addresses career-related questions commonly asked by students beginning the study of school administration. As an introductory text, it presents a broad overview of school administration as a specialized field of study and as an applied field of professional practice. Special attention is given to describing the social, political, and economic contexts of contemporary practice. Chapter titles reflect the book's content: (1) "Perspective of Educational Administration"; (2) "Administration Roles in Professional Education"; (3) "The Study of School Administration"; (4) "School Administration: Requirements and Opportunities"; (5) "Control and Authority in Public Education"; (6) "Social, Political, and Historical Context of Private Education"; (7) "Organizational Dimensions of Schools"; (8) "The Roles of School in Society"; (9) "Administrative Strategies and Styles"; (10) "Behavior, Decision Making, and Reflective Practice"; (11) "Important Aspects of Practice"; (12) "Demands for School Reform"; (13) "Responses to Student Needs and Public Dissatisfaction"; (14) "Transforming the School"; (15) "Women and Minorities in School Administration"; and (16) "Planning Your Career." Each chapter contains implications for practice, points for further discussion, suggested activities, and list of references. (Contains a subject index.) (WFA).

A Practitioner's View of Educational Administration

Why Study Supervision? This book presents two compelling reasons to study supervision and supervisory leadership: **Influential Position:** Supervisors exert considerable influence on organizational settings. Supervisors have been schooled, developed, and trained for their responsibilities. They can function more effectively than if they learn through informal, sometimes haphazard means. It thus pays to learn about supervision because supervisors can influence how efficiently and effectively their organization functions. **Career Path:** Many career paths lead to supervision. Supervisors are everywhere. Supervisors are teachers, doctors, accountants, lawyers, plumbers, and electricians. If you aspire to advance within your occupation, you may find that one career path leads to supervision. **Preparing for supervisory responsibilities** can prepare you for advancement. You may thus have a personal stake – your own future – in learning about what supervisors do and how they do it. In addition, this book: Provides strategies for building solid relationships with team members. Uses positivity as a foundational practice to lead and encourage other employees. Provides guidelines on how to hold employees accountable and set high expectations. Presents strategies to engage, coach, and develop employees by creating a positive environment to influence attitudes and behaviors. Offers various approaches for managing time and increasing productivity.

Educational Administration, Supervision And School Management

Now with SAGE Publishing! The bestselling Educational Administration: Concepts and Practices has been considered the standard for all educational administration textbooks for three decades. A thorough and comprehensive revision, the Seventh Edition continues to balance theory and research with practical application for prospective and practicing school administrators. While maintaining the book's hallmark features—a friendly and approachable writing style, cutting-edge content, and compelling pedagogy—authors Frederick C. Lunenburg and Allan Ornstein present research-based practices while discussing topical issues facing school administrators today. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Supervision That Improves Teaching

EDUCATION ADMINISTRATION: CONCEPTS AND PRACTICES, the most comprehensive and respected text on the market, discusses all topics covered by other educational administration texts, and **MORE:** culture, change, curriculum, personnel administration, diversity, effective teaching strategies, and supervision of instruction. Topics are covered in a direct and easy-to-understand manner, with an excellent blend of theory and practice.

Supervision for Today's Schools

Both those who are beginners and those who have spent many years in studying the purposes and processes of administration may well be intrigued with this book. It deals with the heart of all efforts to provide a sound educational program. The title itself cuts through the core of the administrative enterprise. Administration always has had the responsibility of encouraging maximum accomplishment

in both learning and teaching. This book is particularly focused on the administrative responsibilities of the instructional program. Many books in administration deal mainly with the non-instructional tasks, and many books in supervision deal with the non-managerial tasks. But both apparently deal with esoteric tasks which constitute ends rather than means. The refreshing and refreshingly different aspects of this book are the amalgamations of instructional and managerial concerns as integral parts of administration. Those who wish to question their own professional efforts will find in this book not only an incentive for increased purposeful activities, but also an opportunity to structure and appraise their own behaviors as instruments for instructional improvement. - Introduction / John Guy Fowlkes.

Supportive Supervision

Demands, constraints, and choices have always shaped the decision-making character of educational administration. Only the content of demands, constraints, and choices change with the times. Enduring public values such as equity, efficiency, choice, and excellence are examined historically and currently as prime influences on school policy. This book introduces readers to both school governance and administration in education. It provides a balanced overview of the development of thought in educational administration, providing readers with a realistic view of the promises and pitfalls of professionalism in administration. It also includes a realistic treatment of the nature of administrative work and takes a problem solving approach. There is an exhaustive discussion of financial and legal problems that serves as a background for a discussion of issues. An important theme that runs throughout the book is how conflicting values influence educational governance and administration. School administrators, principals, and school committee members.

The Administration and Supervision of Special Programs in Education

Case Studies for Educational Leadership gives educational leadership students an opportunity to project themselves into real-life administrative situations and prepare for their future positions in the field. Each case study contained in this practical first edition book asks students to analyze complex problems, consider the moral ramifications of their approach, think on their feet, and ultimately solve the issue at hand. Appropriate as a supplemental text or a main text to a range of educational leadership courses, this text thoroughly presents the key areas of educational leadership, including instructional leadership; ethics and management; organization and development of curriculum and its alignment with instruction with assessment; supervision of personnel; school community relations and strategic planning; and diversity issues in educational leadership. Features "Here's What Happened" features following each case study share the true-life story of a real school administrator and prepare readers for realistic situations. "Ethical consideration" components within each case study encourage students to reflect upon different approaches to solving the case studies, as well as the possible moral ramifications of each decision. Covers multiple administrative positions, such as department chair, assistant principal, principal and central office administrator, preparing readers for a range of educational leadership positions. ISLLC standards alignment and cross-reference charts allow readers to draw parallels between standards and case studies.

Handbook of Educational Supervision

This book immerses prospective administrators in the realities of practice. Problem solving and decision-making skills are addressed through the use of open-ended case studies. Effective practice in school administration requires both leadership and management. In today's reform-minded, information-based society, practitioners must be able to frame problems correctly and then make effective decisions to ameliorate them. As leaders, district and school-level administrators are expected to focus on what should be done to improve schools; as managers; they are expected to focus on how to do things successfully. The cases in this book are designed to make students think about common problems of practice by encouraging them to bridge theory and practice. More precisely, the cases are intended to hone four essential practitioner skills: 1. The ability to frame a problem correctly 2. The ability to develop and evaluate alternative solutions to a defined problem 3. The ability to use data and other facts to counter the influence of politics and emotion in decision making 4. The ability to grow professionally by engaging in reflective practice

International Perspectives on Social Entrepreneurship

Social entrepreneurship has become a global phenomenon. Drawing from the 2nd International Social Entrepreneurship Research Conference held in New York, this book provides an in-depth discussion of this vibrant area of research, explores its regional variation across continents, and looks at new theoretical perspectives.

International Perspectives on Value Creation and Sustainability Through Social Entrepreneurship

Social entrepreneurship is construed an innovative activity that addresses or mitigates social issues based on self-sufficiency and financial stability. It offers the potential to shift civil society through innovative social ventures that pursue profit and purpose. It is gaining international attention due to the intent of social entrepreneurs to change and to see the world as it can be, not as it is. These changemakers blend lessons from business with the diversity and complexity of social values and in the process pursue opportunities for change. International Perspectives on Value Creation and Sustainability Through Social Entrepreneurship explores various issues and ideas about social entrepreneurship through the lens of theoretical, practical, and empirical research. It provides an international outlook of social entrepreneurship, focusing primarily on value creation and sustainability. Covering topics such as entrepreneurship education, post-COVID perspectives, and private wealth, this premier reference source is an essential resource for entrepreneurs, business leaders, managers, government officials, policymakers, libraries, students and faculty of higher education, researchers, and academicians.

International Educational Innovation and Public Sector Entrepreneurship

This volume in the *International Perspectives on Education and Society Series* focuses on the ways that social entrepreneurs innovatively contribute to the development and implementation of education worldwide.

Social Entrepreneurship in Non-Profit and Profit Sectors

This volume examines the theoretical and empirical landscape of social entrepreneurship in both non-profit and profit sectors. It extends the traditional view of social entrepreneurship to include the environmental and institutional factors that affect the emergence of social entrepreneurship activities, such as formal laws, regulations, procedures and informal institutions. The editors aim to provide evidence and increased understanding of this growing phenomenon. Social Entrepreneurship is gaining recognition as a key element of economic and social development. It embraces a wide set of situations with a broad scope of activities in for-profit and non-profit organizations interested in social performance and/or in economically profitable performance, with an emphasis on achieving social aim. In the strict sense, social entrepreneurship corresponds to entrepreneurs whose main concern is to achieve social objectives rather than to obtain personal financial profits. However, there is still much to be learned about the dynamics and processes of social entrepreneurship. The current literature in the field has tended to focus on psychological experiences and personal characteristics, or on organizational perspectives such as resources, capabilities and leadership. This book intends to provide theoretical frameworks and empirical studies to this very new and broad field. Specifically, this book provides a collection of contemporary research in the following topics: How to create opportunity through social innovation How to detect entrepreneurial opportunity to meet social needs How to develop social entrepreneurship, while still seeking profits How to discover opportunities for different forms of social entrepreneurship Featuring contributions from around the world, this book is a valuable source for students, academics, researchers, policy makers, and professionals in the area of social entrepreneurship.

People-Centered Social Innovation

Social Innovation is emerging as an alternate interdisciplinary development pathway of knowledge and practice that aims to understand and address contemporary complexities and multi – dimensional social realities. BEPA (2011) defines social innovation as, ‘innovations that are social in both their ends and means’. However, though Social Innovation is a widely-used term; its conceptual understanding and the specific relation to social change remains under explored. *People Centered Social Innovation: Global perspectives on an Emerging Paradigm* attempts to revisit and extend the existing understanding of Social Innovation in practice by focusing upon the lived realities of marginalized groups and communities. The emerging field of people-centered development is placed in dialogue with theory and concepts from the more established field of social innovation to create a new approach; one that adopts a global perspective, engaging with very different experiences of marginality across the global north and south. Theoretically, ‘People Centered Social Innovation: Global Perspectives on an Emerging Paradigm’ draws upon ‘northern’ understandings of change and improvement as well as ‘southern’ theory concerns for epistemological diversity and meaning making. The result is an experiment aimed at reimagining research and practice that seriously needs to center the actor in processes of social transformation.

Research Handbook on Small Business Social Responsibility

The vast majority of businesses globally are small. If business is to be socially responsible, we need to go beyond the westernised concept of ‘Corporate Social Responsibility’, to develop ‘Small Business Social Responsibility’. This agenda-setting *Research Handbook on Small Business Social Responsi-*

bility includes leading research from around the world, including developed and developing country contexts. It provides a foundation for the further development of small business social responsibility as a scholarly subject and crucially important practice and policy field.

Universities, Inclusive Development and Social Innovation

This book examines the ways in which universities can play a crucial role in inclusive development, social innovation and social entrepreneurship. It aims to prove the importance of inclusive development and inclusive innovation on economic growth and demonstrate the ways in which universities can be pioneers in this area through initiatives in social responsibility and social innovation. For example, providing access to a university education without discrimination of race, gender, income status, or other factors would help to diminish the increasing income differentials currently being experienced in many countries, especially in the developing world. The research and studies included in this book provide insight into possible actions that can be taken by universities and public and private shareholders in inclusive development, social innovation, social entrepreneurship and overall regional economic and social development. Innovation is currently considered to be the most important and dynamic factor explaining growth and development. At the same time, the traditional view considering innovation as having to be commercialized at any price is being challenged. Lately, there has been growing interest in innovation in the public sector, particularly with respect to social innovations designed to reduce income inequality. To address these concepts, constant exchange of ideas and information between research groups became necessary. UniDev (Universities in Development – the Evolving Role of Academic Institutions in Innovation Systems and Development) is an international research group with researchers in twelve countries interested in the role of universities in development. This book features the results of research performed by eleven research groups from UniDev country communities, presenting in-depth and comparative case studies from universities around the world, including Latin America, Northern and Eastern Europe, and sub-Saharan Africa. This title will be of interest to students, academics, researchers, and policy makers interested in the role of universities in development, social innovation and social entrepreneurship.

Social Entrepreneurs

This core adoptable textbook equips students with the tools needed to create and manage a successful social enterprise and provides an excellent balance between theory and practice. Taking a highly engaging and focused approach, *Social Entrepreneurs* explores what it takes for entrepreneurs to translate their ambition and vision into an organisation that is targeted and socially meaningful. This new second edition shows how theories, models and concepts within entrepreneurship, business strategy and international marketing can be adapted to create high-impact social ventures that will deliver both positive impact and commercial success. Written by a team of experienced instructors and researchers, *Social Entrepreneurs* is ideal for students taking social entrepreneurship and social enterprise modules at undergraduate, postgraduate and MBA level. This textbook is also an essential companion for existing ventures to scale up and increase social impact locally, nationally or internationally. New to this Edition:

- Revised and updated throughout to take into account new developments in social enterprise
- Newly expanded coverage of interdisciplinary critical perspectives
- Revised focus on how to achieve significant social impact in addition to organisational success

The Emergence of Social Entrepreneurship

The rise of hybrid ventures is proof that another way of doing business is possible. Many developments in the last 15 years highlight the significance of social entrepreneurship: the 2006 Nobel Peace Prize to Grameen Bank, the efforts of scholars in studying social ventures, and the new academic programs at Ivy League universities, as well as the creation of indices such as the United Nations Human Development Index to measure non-economic issues. This book portrays these as strong indicators to support the development and sustenance of a market-based economy that also imbibes social progress and human values. This book emphasizes that awareness of the conditions under which social start-ups emerge is crucial. The authors provide a thorough and empirical analysis of the emergence of social entrepreneurship using the Global Entrepreneurship Monitor (GEM) data as well as case studies from practice. From the perspective of individuals, they examine the most important characteristics of social entrepreneurs, and from a macro perspective, social ventures are studied as agents of change. A handpicked collection of successful cases of social ventures also provides the reader with an awareness of the best practices.

International Entrepreneurship

'Oviatt and McDougall have produced a significant and supremely useful volume bringing together the best of the latest thinking and research on the topics and processes of international entrepreneurship, as well as some of the classics of the field. for serious students of this growing area of research, this volume makes getting up to speed on the topic a simple matter.' - Jerome Katz, Saint Louis University, US

International entrepreneurship is becoming the focus for major research initiatives in universities throughout the world. This timely volume presents a careful selection of the most important articles on international entrepreneurship. the editors have chosen key contributions from a comprehensive range of sources and have successfully made a selection that represents a variety of different perspectives.

Social Enterprise and the Third Sector

The concepts of social enterprise and social entrepreneurship are rapidly attracting increased attention in academic spheres and from policy-makers, as well as field workers who are setting up new initiatives or reshaping their organizations. These concepts are perceived as defining innovative and dynamic responses to major global challenges in today's societies. The debate about social enterprise is now world-wide, with lively exchanges between American and European scholars. However, the research and landscapes still differ significantly in different regions, and diversity also exists within specific regions such as Europe. This book presents the most comprehensive set of contributions reflecting the European-wide debate, but with frequent connections to developments in other parts of the world. This book is a result of work carried out by members of the EMES International Research Network, which is a pioneer in this field. Social Enterprise and the Third Sector will appeal to all researchers who focus on the third sector, social economy and social enterprise, to MBA and postgraduate students, as well as to intellectual social enterprise leaders and practitioners. It will soon become a key reference for all those who want to explore the full richness of these concepts and follow this important academic debate.

Social Enterprise - Context-dependent Dynamics in a Global Perspective

Social entrepreneurs are change makers that aim to solve society's unsolved problems. Not surprisingly, social entrepreneurship has thus created high expectations. To better understand the potential as well as the limitations of social entrepreneurship, however, a more nuanced approach is needed in two ways. First, social entrepreneurship is a multi-level phenomenon. It spans macro-level questions as well as meso-level questions and, finally, micro-level questions. If we really want to understand social entrepreneurship, we need to bring together all three levels of analysis and see how they are connected. Second, while social entrepreneurship can certainly produce socially desirable outcomes, we also need a critical perspective to capture potential undesirable effects that social entrepreneurship can cause, often unintendedly, in society, in markets, in organizations, and for individuals. To this end, an ethical perspective can help complement the positive analysis of social entrepreneurship with a discussion of the normative implications of its potential "dark side". Looking at social entrepreneurship from both a multi-level analysis and an ethical perspective, Social Entrepreneurship and Business Ethics takes the reader on a journey through the "bright side" as well as the potential "dark side" of social entrepreneurship for societies, organizations, and individuals. Highlighting both, this book not only seeks to provoke researchers and students to advance their understanding of social entrepreneurship. It also hopes to help practitioners to better realize the positive contributions of social entrepreneurship for society.

Social Enterprise and the Third Sector

In the past decades, social enterprise has been an emerging field of research. Its main frameworks have been provided by Occidental approaches. Mainly based on an organizational vision, they give little or no room to questions such as gender, race, colonialism, class, power relations and intertwined forms of inequality. However, a wide range of worldwide hidden, popular initiatives can be considered as another form of social enterprises based on solidarity, re-embedding the economy as well as broadening the political scope. This has been shown in a previous book: *Civil Society, the Third Sector, and Social Enterprise: Governance and Democracy*. Thus, to be more than a fashion or a fictitious panacea, the concept of social enterprise needs to be debated. Southern realities cannot be only understood through imported categories and outside modeled guidelines. This book engages a multicontinental and pluridisciplinary discussion in order to provide a pluralist theory of social enterprise. The book will be of interest to researchers, academics and students in the fields of social entrepreneurship, social innovation, development studies, management studies and social work.

Theory of Social Enterprise and Pluralism

This edited volume discusses the development of the new social and impact economy in ten countries around the globe. The new social and impact economy is an attempt to conceptualize developments after the 2008 economic crisis, which emphasized the pitfalls of the Neo-Liberal economic system. In the aftermath of the crisis, new organizational entities evolved, which combined social and business objectives as part of their mission. Using data gathered by two recent international research projects—the ICSEM project and the FAB-MOVE project—the book provides an initial portrait of the forces at play in the evolution of the new social and impact economy, linking those to the past crisis as well as to Covid19 and comparing the emergence of the phenomenon in a varied group of countries. The book begins with an overview of the classical definitions of social economy and proposes a comprehensive concept of new social and impact economy, its characteristics, and sources. Ten country chapters as well as a comparative chapter on international social economy organizations follow. The volume concludes with an overall analysis of the data from the country chapters, forming a typology of social economy traditions and linking it to recent Post Capitalism trends. Creating a conceptual framework to analyze the new phenomena in social economy, this volume is ideal for academics and practitioners in the fields of social economy; social, economic and welfare policies; social and business entrepreneurship in a comparative fashion; social and technological innovation as well as CSR specialists and practitioners.

The New Social and Impact Economy

This volume examines the practice of embedding corporate social responsibility into academic curricula.

Education and Corporate Social Responsibility

In the last two decades social entrepreneurship has grown in energy and impact as entrepreneurial spirit has increasingly turned to finding solutions for social, cultural and environmental issues. As social entrepreneurship has grown in popularity, so too has its academic study. *A Research Agenda for Social Entrepreneurship* brings together contributions from developing paths in the field to signpost the directions ahead for the study of social entrepreneurship.

A Research Agenda for Social Entrepreneurship

Addressing the need for further theorisation and operationalisation of social entrepreneurship in India, this edited collection provides a critical and deeper understanding of the social entrepreneurial ecosystem. Covering topics such as entrepreneurial intentions, empathy, impact investment and standardised social measures, the contributors explore the potential of social entrepreneurship and sustainable business models in an Indian context. Offering empirical cases and presenting a realistic perspective of the social entrepreneurship landscape in India, this collection will undoubtedly be of value to those interested in creating a social and sustainable impact in business and society.

Social Entrepreneurship and Sustainable Business Models

The first comparative look at how social enterprise is shaped by local conditions worldwide

Social Enterprise

An exploration of the interplay between social responsibility, entrepreneurship and the common good which is organized into four sections: business and the common good; educating responsible entrepreneurs; corporate social responsibility (CSR) challenges and the common good; and CSR and entrepreneurship in emerging economies

Mapping Social Enterprise Models

Talent has become the most important resource for organizations across a wide range of sectors throughout the world including business, non-profit, and government. These organizations are now engaged in an increasingly fierce competition to acquire the best talent as they seek to gain the upper hand in today's fast changing environment. By combining the body of knowledge on entrepreneurship and talent management from a global perspective, this book provides a synthesized understanding of entrepreneurial mobility and talent management in the entrepreneurship and innovation ecosystem. The expert contributors combine empirical evidence and case studies to provide a nuanced understanding of global talent management from an international comparative perspective. The topics discussed include China's return migration and its impact on Chinese development, local engagement and transformation of Chinese communities in England, and reverse migration from the US to China. Furthermore, from a comparative perspective, contributors examine global talent and entrepreneurial mobility in the contexts of Silicon Valley, European university spin-off practices and entrepreneurial ecosystems in France, Italy, and South Korea, respectively. Scholars and students in entrepreneurship and talent management will find the scope for future research useful in their work. Entrepreneurs, managers, and policymakers will benefit from the examination of global perspectives and different national contexts.

Social Responsibility, Entrepreneurship and the Common Good

Workers from various diverse disciplines such as geography, public policy, administration, social work, education, public health and so on are joining together to address complex social issues such as poverty, health, peace building, the environment and others. Interdisciplinary Community Development: International Perspectives is a unique look at the innovations in interdisciplinary community development around the world. Leading experts from various disciplines explore the latest research, programs, and innovative approaches to promote strategies that enable social justice.

Entrepreneurship and Talent Management from a Global Perspective

Entrepreneurs exist in every country but the nature and level of entrepreneurial activity differs remarkably. Why is this? What shapes the level of entrepreneurial activity in each country? What defines entrepreneurial activity? As more and more teaching and research into entrepreneurship reflects its often international nature, the need for literature reflecting this grows. This concise new textbook provides an introduction to topics in entrepreneurship in a global context; focusing on how enterprise works across the world. Important topics such as financing, innovation and (anti) social enterprise are discussed in detail throughout the text and examples and case studies are used to illustrate the application of different theoretical and conceptual approaches to entrepreneurship and the role it plays in developed, emerging and transitional economies. Entrepreneurship: A Global Perspective is suitable for both final year undergraduate and postgraduate courses in enterprise and is likely to appeal particularly to student groups with a strong international element.

Interdisciplinary Community Development

This text looks at the reasons for cultural discrepancies in entrepreneurial behaviour, giving a comprehensive understanding of these issues. Case studies illustrate key factors relative to the experience of the practising entrepreneur.

Entrepreneurship

This book takes as its central theme the role of entrepreneurship in the context of regional, local and national tourism development.

Entrepreneurship

With today's current problems, including forced migrations, inadequate education and healthcare systems, environmental threats, economic crises, poverty, etc., it has become evident that systemic social change is needed. Unfortunately, creating, maintaining, and fostering sustainable social value is not easy. In this respect, social entrepreneurs can act as change agents with their social missions. Yet, the role of social entrepreneurship in creating sustainable social value is still in an embryonic state. *Creating Social Value Through Social Entrepreneurship* contains expert research that links social entrepreneurship and social value in order to further understand the role of social entrepreneurship in creating social value and to highlight the importance of social entrepreneurs in emerging economies. While covering topics that include crowdfunding, social enterprise, social entrepreneurship ecosystems, and the triggers and challenges of social entrepreneurship, this book seeks to extend the social entrepreneurship contribution to social impact. The book is of value to entrepreneurs, managers, academicians, researchers, and students in various fields that include economics, management, and entrepreneurship.

Tourism and Entrepreneurship

The field of social entrepreneurship is attracting attention from multiple industries. Social entrepreneurs are responsible for finding ways to creatively contribute to society by providing affordable products and services. *Creating Business Value and Competitive Advantage With Social Entrepreneurship* is a useful scholarly resource that examines the broad topic of social entrepreneurship by looking at relevant theoretical frameworks and fundamental terms. Focused on topics such as creating business value, promoting social entrepreneurship, and enacting programs of social change, this book provides the latest research and practical solutions concerning social entrepreneurship. The source proves valuable to academicians, researchers, entrepreneurship practitioners, and individuals interested in learning more about social entrepreneurship.

The Social Entrepreneur Pyramid: with a Nordic Perspective on Social Entrepreneurship

The objective of this book is to begin the process of building a global network of young scholars familiar with, and appreciative of, other countries' approaches to research in the area of entrepreneurship. The book falls naturally into four parts, starting at a very high level of generality and becoming increasingly focused. The first set of papers presents novel and insightful ways of looking at entrepreneurship from a perspective that is substantively different from the more traditional U.S. view. Second are a subset of papers, also distinctively conceptual and theoretical, which give insights into the profound differences in culture of the participants and the way that the various representatives' social, political and religious platforms influence the way they see the evolution of entrepreneurship in their particular countries. The third subset of papers are generally empirical studies which address the entrepreneurial environment and the way in which this environment shapes entrepreneurial endeavour. The final set looks at different countries' perspectives on how entrepreneurs go about forging and managing their enterprise. The papers and their critiques originate from the first annual Global Conference on Entrepreneurship Research held at Imperial College, London, February 1990.

Creating Social Value Through Social Entrepreneurship

As the current economic crisis spreads around the globe questions are being asked about what kind of capitalist or post-capitalist economy will follow. There is increasing talk of the need for stringent economic regulation, the need to temper greed and individualism, to make the economy work for human and social development. The search is on for a kinder, greener, less unequal and more redistributive economy. This transitional moment, with its pointed questions about the economy to come, provides an opportunity to assess the role and potential of the 'social economy', that is, economic activity in between market and state oriented towards meeting social needs. Until a decade ago, the term was used mainly by the fringe to describe the 'alternative economy'. Typically, organisations providing affordable child-care to low-wage families in a poor neighbourhood, or those making goods from recycled materials for low-income households, were considered to be residual or marginal to a mainstream dominated by markets and states. In the last decade, expectation in both the developed and developing world has changed in quite radical ways. Mainstream opinion is starting to see the social economy as a source of building social capabilities as well as developing new markets in welfare provision. Policymakers around the world have begun to support the social economy, and increasingly on business grounds, jostling with traditional interest on the fringe in the sector as a moral and social

alternative to the capitalist economy. It is precisely this emerging but disputed centrality of the social economy that makes this book so timely. The book positions the social economy conceptually and normatively with the help of case evidence from a number of developed and developing countries. Uniquely, it brings together in English the work of leading scholars of the social economy who are also actively engaged in national and international policy formulation. Although it argues a case for seeing the social economy as distinctive from the state and market in terms of aims, values, and actors, it also notes many overlaps and complementarities once the economy is conceptualised as a plural entity responding to needs in diverse organisational combinations. The book also shows that expectations - social and economic - cannot be divorced from local institutional and historical circumstances and legacies. Accordingly, while certain generic policy principles can be shared internationally, interventions on the ground cannot ignore the demands of situated practice and legacy.

Creating Business Value and Competitive Advantage With Social Entrepreneurship

This concise new textbook provides an introduction to topics in entrepreneurship in a global context; focusing on how enterprise works across the world. Important topics such as financing, innovation and social enterprise are discussed in detail and brought to life by a raft of pedagogical features. Entrepreneurship: A Global Perspective is suitable for both final year undergraduate and postgraduate courses in enterprise.

International Perspectives on Entrepreneurship Research

Scholars and policy makers have long recognized entrepreneurship as a powerful engine of economic growth. There is clear evidence, however, that when it comes to social entrepreneurship, policy attention has not been matched by growth in scholarly rese

The Social Economy

Pascal Dey and Chris Steyaert provide a timely critique on the idea of social entrepreneurship and its reputation as a means for positive social change. The book uses different traditions and modes of critique to interrogate, disrupt and reimagine the concept of social entrepreneurship.

Entrepreneurship

This compilation offers students a comprehensive overview of the field of social entrepreneurship. Leading European researchers and lecturers such as Ann-Kristin Achleitner, Markus Beckmann, Heather Cameron, Pascal Dey, Andreas Heinecke, Benjamin Huybrechts, Alex Nicholls, Johanna Mair, Susan Müller and Chris Steyaert have contributed to this textbook.

Theory and Empirical Research in Social Entrepreneurship

Conceptualized and put into practice by Nobel Peace Prize Laureate and Presidential Medal of Freedom recipient Dr. Muhammad Yunus, social businesses work to address social ills such as poverty, lack of health care, gaps in education and environmental challenges. This book explores the ideation, practice and evaluation of the concept of social business. Not just theoretical foundations but several case studies of social businesses around the world and state-of-the-art assessment of the issues that arise in the planning, marketing and evaluation of social businesses, are featured in this book. This cutting-edge collection of articles, presented by the California Institute for Social Business (CISB) in collaboration with Professor Yunus, is one of the first comprehensive collections of theory and research on the emerging field of social business. The diverse group of authors come from around the world and from various disciplinary backgrounds, representing the leading academic experts on social business phenomena.

Social Entrepreneurship

Democratizing educational access and building capacity in developing countries and amongst indigenous peoples in developed countries may be elusive but are hopeful goals. Many developing countries are striving to reengineer their incoherent education systems at a time when they are most vulnerable, particularly with susceptibility to natural disasters, political unrests, and economic instabilities (UNESCO, 2007). Similarly, indigenous peoples in developed countries are seeking more control over education as they consider the long-term effects of educational policies that have been forced on them. Research on education and social change in developing countries has a long history

(Glewwe, 2002; Hanushek, 1995; Sider, 2011). However, there is limited research on educational capacity?building in developing countries such as Kenya, Honduras, Haiti, Ghana, Hong Kong, India, Peru, China, and Thailand. Further, the educational frameworks by which Indigenous peoples (M?ori, Canada's First Nations, and American Indian/Alaska Natives) have been educated have some significant similarities to those encountered in developing countries. The compilation of chapters illuminates research and collaborative initiatives between the authors and local leaders in developing countries' and Indigenous peoples in developed countries' efforts to solve the complexity of social inequities through educational access and quality learning. The authors draw on theoretical lens, knowledge bases, and strategies, and identify trends and developments to provide the scope of educational improvement in a globalization context (Brooks & Normore, 2010; Jean?Marie, Normore & Brooks, 2009).

Social Entrepreneurship and Social Business

Women's social entrepreneurship has been proved to alleviate poverty and in parallel to promote gender equality. This book introduces a useful analysis of the field, investigating the emerging phenomenon of women's social entrepreneurship from both a conceptual and empirical perspective. The book is based on the premise that how gender is articulated within the entrepreneurial debate has to acknowledge context. Seven case studies are presented and, through them, the importance of women's social entrepreneurship for job creation is revealed. A complemented layout of activities is also provided to reinforce the business spirit of women's social entrepreneurship. Finally, the book provides suggestions and educational programmatical alterations for policy makers, which are needed to be invoked for the endorsement of women's social entrepreneurship. This book will be of interest to undergraduate and postgraduate students who study social entrepreneurship, to social entrepreneurship scholars and to the international academic library market in particular.
