Stained glass and the Victorian Gothic revival

Stained glass reached the height of its popularity in the Victorian period. But how did it become so popular and who was involved in this remarkable revival? The enthusiasm for these often exquisite pieces of artwork spread from specialist groups of antiquarians and architects to a much wider section of the Victorian public. By looking at stained glass from the perspective of both glass-painter and patron, and by considering how stained glass was priced, bought and sold, this enlightening study traces the emergence of the market for stained glass in Victorian England. Thus it contains new insights into the Gothic Revival and the relationship between architecture and the decorative arts. Beautifully illustrated with colour plates and black and white illustrations, this book will be valuable to those interested in stained glass and the wider world of Victorian art.

Riders of the Borderlands

The Routledge International Handbook of Sociology and Christianity examines the intersection of the sociology of religion – a long-standing focus of sociology as a discipline – and Christianity – the world's largest religion. An internationally representative and thematically comprehensive collection, it analyzes both the sociology of Christianity and Christian approaches to sociology, with attention to the Roman Catholic, Orthodox, and Protestant branches of Christianity. An authoritative, state-of-the-art review of current research, it is organized into five inter-connected thematic sections, considering the overlapping emergence of both the Christian religion and the social science, the conceptualization of and engagement with Christianity by sociological theory, the ways in which Christianity shapes and is shaped by various social institutions, the manner in which Christianity resists and promotes various forms of social change, and the identification, diagnosis, and correction of social problems by sociology and Christianity. This volume is an invaluable collection for scholars and advanced students, with special appeal for those working in the fields of sociology and social theory, as well as religious studies and theology

Anglo-American cities face economic decline, social polarisation and racial conflict. Their fate is increasingly decided by the global actions of transnational corporations and market forces. Community groups find it difficult to gain access to the political system. Ethnic minorities strive for empowerment while indebted city governments battle to maintain basic services. Such is the urban crisis of the 1990s. Fractured Cities describes the political economy of urban change and explores the future of the city.
