Literary ombudsman John Crace never met an important book he didn't like to deconstruct. From Salman Rushdie to John Grisham, Crace retells the big books in just 500 bitingly satirical words, pointing his pen at the clunky plots, stylistic tics and pretensions of Big Ideas, as he turns publishers' golden dream books into dross.

An extraordinary new verse translation of Dante's masterpiece, by poet, scholar, and lauded translator Anthony Esolen. Of the great poets, Dante is one of the most elusive and therefore one of the most difficult to adequately render into English verse. In the *Inferno*, Dante not only judges sin but strives to understand it so that the reader can as well. With this major new translation, Anthony Esolen has succeeded brilliantly in marrying sense with sound, poetry with meaning, capturing both the poem's line-by-line vigor and its allegorically and philosophically exacting structure, yielding an *Inferno* that will be as popular with general readers as with teachers and students. For, as Dante insists, without a trace of sentimentality or intellectual compromise, even Hell is a work of divine art. Esolen also provides a critical Introduction and endnotes, plus appendices containing Dante's most important sources—from Virgil to Saint Thomas Aquinas and other Catholic theologians—that deftly illuminate the religious universe the poet inhabited.

The Da Vinci Code (The Young Adult Adaptation)

For centuries, the art of translation has been misconstrued as a solitary affair. Yet, from Antiquity to the Middle Ages, groups of translators comprised of specialists of different languages formed in order to transport texts from one language and culture to another. Collaborative Translation uncovers the collaborative practices occluded in Renaissance theorizing of translation to which our individualist notions of translation are indebted. Leading translation scholars as well as professional translators have been invited here to detail their experiences of collaborative translation, as well as the fruits of their research into this neglected form of translation. This volume offers in-depth analysis of rich, sometimes explosive, relationships between authors and their translators. Their negotiations of cooperation and control, assistance and interference, are shown here to shape the translation

of prominent modern authors such as Günter Grass, Vladimir Nabokov and Haruki Murakami. The advent of printing, the cultural institutions and the legal and political environment that regulate the production of translated texts have each formalized many of the inherently social and communicative practices of translation. Yet this publishing regime has been profoundly disrupted by the technologies that are currently revolutionizing collaborative translation techniques. This volume details the impact that this technological and environmental evolution is having upon the translator, proliferating sites and communities of collaboration, transforming traditional relationships with authors and editors, revisers, stage directors, actors and readers.

The Rings of Saturn

Programming Legend Charles Petzold unlocks the secrets of the extraordinary and prescient 1936 paper by Alan M. Turing. Mathematician Alan Turing invented an imaginary computer known as the Turing Machine; in an age before computers, he explored the concept of what it meant to be computable, creating the field of computability theory in the process, a foundation of present-day computer programming. The book expands Turing's original 36-page paper with additional background chapters and extensive annotations; the author elaborates on and clarifies many of Turing's statements, making the original difficult-to-read document accessible to present day programmers, computer science majors, math geeks, and others. Interwoven into the narrative are the highlights of Turing's own life: his years at Cambridge and Princeton, his secret work in cryptanalysis during World War II, his involvement in seminal computer projects, his speculations about artificial intelligence, his arrest and prosecution for the crime of "gross indecency," and his early death by apparent suicide at the age of 41.

The startling, frighteningly convincing sequel to *The Holy Blood and the Holy Grail* that reveals the very nature of the Messianic Legacy. After the shocking revelations of *The Holy Blood and the Holy Grail* the authors, in their quest to determine the discrepancies between early and modern 'Christian' thought, found that they were forced to ask such questions as: *Was there more than one Christ? *Was Christ the founder of Christianity? *Were the disciples as peace-loving as it is traditionally assumed? *What links the Vatican, the CIA, the KGB, the Mafia, Freemasonry, P2, Opus Dei and the Knights Templar? *What mysterious modern crusade implicates British industry, Churchill and de Gaulle, the EEC and Solidarity? The Messianic Legacy offers enthralling new investigations into the shadowy society of the 'Priore de Sion' - 'The Guardians of the Holy Grail' - as the authors discover the murky world of politics, finance, freemasonry, and religion that exists beneath the most solid and conservative seeming of European institutions: the Church. The ominous global conspiracy of disinformations they uncovered ensures that *The Messianic Legacy* is an up-to-the-minute thriller and a work of biblical detection that is even more significant than *The Holy Blood and the Holy Grail*.

Discovering the Dutch

Bestselling author and acclaimed historian Alison Weir tells the tragic story of Henry VIII's fifth wife, a nineteen-year-old beauty with a hidden past, in this fifth novel in the sweeping Six Tudor Queens series. "A vivid re-creation of a Tudor tragedy."—Kirkus Reviews In the spring of 1540, Henry VIII is desperate to be rid of his unappealing German queen, Anna of Kleve. A prematurely aged and ailing forty-nine, with an ever-growing waistline, he casts an amorous eye on a pretty nineteen-year-old brunette, Katheryn Howard. Like her cousin Anne Boleyn, Katheryn is a niece of the Duke of Norfolk, England's premier Catholic peer, who is scheming to replace Anna of Kleve with a good Catholic queen. A flirtatious, eager participant in the life of the royal court, Katheryn readily succumbs to the king's attentions when she is intentionally pushed into his path by her ambitious family. Henry quickly becomes besotted and is soon laying siege to Katheryn's virtue. But as instructed by her relations, she holds out for marriage and the wedding takes place a mere fortnight after the king's union to Anna is annulled. Henry tells the world his new bride is a rose without a thorn, and extols her beauty and her virtue, while Katheryn delights in the pleasures of being queen and the rich gifts her adoring husband showers upon her: the gorgeous gowns, the exquisite jewels, and the darling lap-dogs. She comes to love the ailing, obese king, enduring his nightly embraces with fortitude and kindness. If she can bear him a son, her triumph will be complete. But Katheryn has a past of which Henry knows nothing, and which comes back increasingly to haunt her—even as she courts danger yet again. What happens next to this naïve and much-wronged girl is one of the saddest chapters in English history.

The Annotated Turing

New technologies are changing our reading habits. Laptops, e-readers, tablets and other handheld devices supply new platforms for reading, and we must learn to manage them by scrolling, clicking or tapping. Reading Today places reading in current literary and cultural contexts in order to analyse how these contexts challenge our conceptions of who reads, what reading is, how we read, where we read, and for what purposes – and then responds to the questions this analysis raises. Is our reading experience becoming a 'flat' one? And does reading in a media environment favour quick reading? Alongside these questions, the contributors unpack emerging strategies of reading. They consider, for example, how paying attention to readers' emotional reactions as an indispensable component of reading affects our conception of the reading process. Other chapters consider how reading can be explored through such topics as experimental literature, the contemporary encyclopedic novel and the healing power of books.
